EO No. 097-30063-00365

Dear Mr. Stevens:

On December 28, 2010, SVC Manufacturing, Inc. submitted a letter informing the Office of Air Quality (OAQ) that a labeler in the Bottle and Case Coding Process will be temporarily operated to utilize an open wick system and an adhesive solvent to label bottles as part of an experimental trial at the existing beverages manufacturing source, located at 5858 Decatur Boulevard, Indianapolis, IN 46241. SVC Manufacturing, Inc. estimates actual usage of the trial adhesive solvent, containing 9.92 pounds of VOC per gallon, to be between five (5) and twenty (20) gallons during the temporary operation. This equates to a VOC potential to emit between 49.6 lbs and 198.4 lbs during the operation.
