Re: A129-11329-00002  
Amendment to CP129-10588  
Plt ID129-00002

Dear Mr. Richard:

General Electric Company was issued a permit on August 23, 1999 for the expansion of the ULTEM<sup>®</sup> operation by about twice the existing permitted throughput.

The Office of Air Management (OAM) has determined after the permit has been issued that Condition D.1.12 (a) is incorrect. Particulate matter emissions from small units with process weight rate below 100 pounds per hour are regulated by 326 IAC 6-3.

Pursuant to IC 13-15-7-1, OAM is hereby amending this condition as follows (changes are bolded and deletion is struck through for emphasis):

D.1.12 Particulate Emissions (Process Operations)

The pounds per hour PM emissions limit from 326 IAC 6-3, as referenced in Condition D.1.3, shall be determined using the following equations:

(a) For process weight rate less than one hundred (100) lbs/hr:

~~PM emissions are not regulated~~ **PM emissions limit will be 0.551 lb/hr.**

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment with the original permit.

Sincerely,

Paul Dubenetzky, Chief  
Permits Branch  
Office of Air Management

APD
