Re: Interim Significant Source Modification Petition

**I-005-11795-00006**

Dear Mr. Casey :

On March 8, 2000, the Office of Air Management (OAM) received an interim significant source modification petition from Golden Casting Corporation located at 1616 Tenth Street, Columbus, Indiana for construction of a 30 ton per hour shot blast unit, identified as emission unit 450, with particulate emissions controlled by a 30,000 cfm fabric filter baghouse exhausting through stack SC-22.

Public notice of the interim significant source modification petition was published on March 16, 2000. The public comment period ended on March 30, 2000. Since there were no comments received during the public comment period, pursuant to 326 IAC 2-13-1(i), the interim significant source modification petition is in effect on April 1, 2000 and expires on the effective date of the final significant source modification permit. The interim significant source modification petition may be revoked after this effective date upon a written finding by the Indiana Department of Environmental Management (IDEM) that any of the reasons for denial in 326 IAC 2-13-1(h) exist or if the final significant source modification permit is denied. The IDEM has reviewed this interim significant source modification petition and has not found any such reason. The facilities specified in the interim significant source modification petition may not operate until the final significant source modification permit is issued by OAM.

The interim significant source modification petition is federally enforceable. Detailed construction and operation conditions will be specified in the final significant source modification permit 005-11795-00006.

If you have any questions regarding this interim significant source modification petition, please contact Mack E. Sims of my staff at 317-233-0867, or at 1-800-451-6027 (ask for extension 3-0867).

Sincerely,

Paul Dubenetzky, Chief
