Re: 175-11838-00009  
Notice-only change to  
R 175-2733-00009

Dear Mr. DeKeyser:

Tecumseh Products Company was issued a permit on October 19, 1992 for a heat treat and shot blast operation for lawn and garden equipment. A letter notifying the Office of Air Management of the replacement of three (3) baghouses with a single cartridge type dust collector was received on February 2, 2000. Pursuant to the provisions of 326 IAC 2-6.1-6 the permit is hereby revised as follows:

The permit, R 175-2733-00009, shall be changed to state that the three shotblasters will be vented to a dust collector. The dust collector for the shotblasters shall be operated at all times that the shotblasters are in operation. Particulate matter (PM) emissions shall be limited to 0.008 grains per actual cubic foot (gr/acf) with a pressure drop across the dust collector not to exceed 5 inches of water.

Since the previous condition limited PM emissions to 0.015 gr/acf with a pressure drop across the baghouse of 8 inches of water, this new condition is more stringent. Therefore, the new dust collector is in compliance.

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this letter to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Daniel Harper, at (800) 451-6027, press 0 and ask for Daniel Harper or extension 2-8253, or dial (317) 232-8253.

Sincerely,

Paul Dubenetzky, Chief  
Permits Branch  
Office of Air Management
