Re: 173-11858
Review Request Response

Dear Mr. Darling:

ALCOA Inc. - Warrick Operations applied for a Part 70 operating permit on September 19, 1996 for an aluminum manufacturing plant. An application to add four (4) mix stations, each consisting of two (2) 400 gallon tanks was received on November 24, 1999. Pursuant to 326 IAC 2-7-10.5 the following emission units were approved for construction and operation at the source on February 3, 2000:

Four (4) coating mix stations each consisting of two (2) 400 gallon tanks with flat lids. Each of the eight (8) total tanks are vertical fixed roof tanks located inside Building 847 with no control devices.

On January 18, 2000, ALCOA inc. – Warrick Operations submitted a comment to explain that the tanks do not have identification numbers and therefore, could not report the identification numbers required by the permit. The source requests that the reporting requirement in Condition D.1.1(a) be removed, based on no identification numbers to be reported.

The IDEM, OAM believes each tank should be labeled for, but not limited to, identification purposes for inspectors during inspection visits and for review of reports as required by 326 IAC 8-9-6 (Volatile organic liquid storage vessels: record keeping and reporting requirements). Identification of the tanks does not have to be by manufacturer's supply Ids, but can be any form of identification preferred by ALCOA Inc. – Warrick Operations. Therefore, no change shall be made to the Significant Source Modification No.: 173-11598-00007.

If you have any questions on this matter, please call Kimberly Titzer at (800) 451-6027, press 0 and ask for extension 3-8396, or dial (317) 233-8396.

Sincerely,

Paul Dubenetzky, Chief
Permits Branch
Office of Air Management
