Re: Response to Review Request No. 029-11965:  
Permit status evaluation  
Plant ID: 029-00022

Dear Mr. Hudgens:

Unimin Corporation submitted a letter on March 2, 2000 to notify the IDEM, OAM of a temporary screening circuit to be located at Unimin Corporation's Aurora, Indiana facility. Per our telephone conversation on March 7, 2000, a permit determination was not requested. However, the source requested a response, in writing, for their records.

Air permit approvals based on potential to emit from the source are specified in 326 IAC 2-1.1-2. Enclosed is a copy of the rule to reference. If a source is exempt level, the source is not required to submit an application for approval.

This letter does not constitute confirmation that the source shall operate at exempt level.

If you have any questions on this matter call (800) 451-6027, press 0 and ask for Kimberly Titzer or extension (3-8396), or dial (317) 233-8396.

Sincerely,

Paul Dubenetzky, Chief  
Permits Branch  
Office of Air Management
