Re: Response to Review Request No. 003-12203
Permit status evaluation
Plant ID: 003-00018

Dear Mr. Scales:

Engineered Polymer Solutions dba Valspar Coatings, located at 202 Jacobs Avenue, Fort Wayne, IN 46851, submitted a review request on April 24, 2000. The letter was submitted to determine if Engineered Polymer Solutions dba Valspar Coatings requires an administrative amendment for the addition of six (6) 6,000 gallon storage tanks and the removal of six (6) 3,000 gallon storage tanks.

Since the potential to emit of VOC of the new tanks is less than ten (10) tons per year, a minor permit revision is not required under 326 2-8-11.1(d). In addition, the description of the storage tanks, listed in Section A.2 on page 4 of 28, will not require a revision since the new tanks will keep the existing tanks' identification which are being removed. Therefore, an administrative amendment is not required under 326 IAC 2-8-10. Based on the level of VOC emissions (0.397 tons per year), there are no 326 IAC 8 rules applicable to the new tanks. 40 CFR Part 60, Subpart Kb (Volatile Organic Storage Vessels) is not applicable to the new tanks because the capacity is less than 40 m³.

Based on the above information, the OAM has determined that the addition of the new tanks does not require any type of permit revision to the existing FESOP, since there will not be any change to the permit.

Questions should be directed to Nysa L. James, OAM, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana, 46206-6015, or call (800) 451-6027, press 0 and ask for Nysa L. James or extension (3-6875), or dial (317) 233-6875.

Sincerely,

Paul Dubenetzky, Chief
