Re: Interim Significant Source Modification Permit  
Denial  
I-059-12392-00018

Dear Monica Hammer:

On June 16, 2000, the Office of Air Management received an interim significant source modification petition from Avery Dennison, 870 West Anderson Boulevard in Greenfield, Indiana, for the addition of a pressure sensitive paper coating operation. Based on the data and information submitted in the petition and the provisions in 326 IAC 2-13-1, it has been determined that the interim significant source modification permit is denied because of the following reasons:

- (a) Rule 2-13-1(a)(3) states "This section applies to any person who operates an existing source under valid operating permits issued by the commissioner and who proposes to modify a source or construct a new emission unit at the existing source and such modification or construction requires an operating permit revision or other approval by the commissioner in accordance with this article, excluding the following: Any modification that is subject to 326 IAC 2-4.1."

This modification states that it is applicable to rule 2-4.1. Therefore, an interim cannot be issued.

If you choose to re-apply for the interim construction, please satisfy the above mentioned items. If you have any questions regarding this interim permit denial, please contact Donald R. Poole of my staff at 317/232-8327 or at 1-800-451-6027 (ask for extension 2-8327).

Sincerely,

Paul Dubenetzky, Chief  
Permit Branch  
Office of Air Management
