Re: Source Specific Operation Status
S 079-12748-00006

Dear Mr. Dilts:

Your application for Source Specific Operation Status, received on September 26, 2000 has been reviewed. Based on the data submitted and the provisions in 326 IAC 2, it has been determined that your emission source located at 1405 Industrial Drive, North Vernon, Indiana 47265, has met the criteria required to obtain a Source Specific Operating Agreement (SSOA) for external combustion operations and woodworking operations. All terms and conditions in such registrations and permits are no longer in effect.

Pursuant to IC 4-21.5-3-5(a) and (b), approval of this SSOA shall not be effective until fifteen (15) days from the date of this letter.

The facilities and processes of this source are hereby granted the SSOA provided that the following requirements of 326 IAC 2-9 are satisfied:

Section A: External Combustion Operation: [326 IAC 2-9-13(b)(2)(B)]

1. The visible emissions from the external combustion unit shall not exceed twenty percent (20%) opacity in twenty-four (24) consecutive readings in a six (6) minute period. The opacity shall be determined using 40 CFR 60, Appendix A, Method 9.
2. The fuel usage for the 2.85 MMBtu natural gas-fired boiler included in this SSOA shall be limited to less than one thousand one hundred forty-two million cubic feet (1142 MMcf) of natural gas per year, based on a straight twelve (12) month total.
3. The fuel usage for the 3.8 MMBtu wood-fired boiler included in this SSOA shall be limited to less than eleven thousand seven hundred sixty-four (11,764) tons of wood per year, based on a straight twelve (12) month total.
4. The source shall keep the following records from the external combustion unit:
 - (a) the hours operated for each external combustion unit approved under this SSOA,
 - (b) records of the annual fuel usage for each external combustion unit approved under this SSOA, and
 - (c) records of all routine maintenance conducted on the external combustion units approved under this SSOA.

These records shall be kept for a minimum period of five (5) years, and made available upon request of the Office of Air Quality (OAQ).

Section B: Woodworking Operation: [326 IAC 2-9-4(d)]

The woodworking operations shall meet the following conditions:

1. The woodworking operations shall be controlled by a baghouse.
2. The baghouse does not exhaust to the atmosphere greater than forty thousand (40,000) cubic feet per minute.
3. The baghouse does not emit particulate matter with a diameter less than ten (10) microns in excess of one-hundredth (0.01) grain per dry standard cubic feet of outlet air.
4. Opacity from the baghouse does not exceed ten percent (10%).
5. The baghouse is in operation at all times that the woodworking equipment is in use.
6. Visible emissions from the baghouse are observed daily using procedures in accordance with 40 CFR 60, Appendix A, Method 22* and normal or abnormal emissions are recorded. In the event abnormal emissions are observed for greater than six (6) minutes in duration, the following shall occur:
 - (a) The baghouse shall be inspected, and
 - (b) Corrective actions, such as replacing or reseating bags, are initiated when necessary.
7. The baghouse is inspected quarterly when vented to the atmosphere.
8. The owner or operator keeps the following records:
 - (a) Records documenting the date when the baghouse redirected indoors or to the atmosphere,
 - (b) Quarterly inspection reports when vented to the atmosphere,
 - (c) Visible operation reports, and
 - (d) Records of corrective actions.

Section C: General Requirements: [326 IAC 2-9-1]

1. The source shall provide an annual notice to the commissioner, stating that the source is in operation, and certifying that its operations are in compliance with the requirements of this SSOA. The above annual notice shall be submitted to:

**Compliance Data Section
Office of Air Quality
100 North Senate Avenue
P.O. Box 6015
Indianapolis, IN 46206-6015**

no later than January 30 of each year, with the annual notice being submitted in the format attached.

2. Any exceedance of any requirement contained in this operating agreement shall be reported, in writing, within one (1) week of its occurrence. Said report shall include information on the actions taken to correct the exceedance, including measures to reduce emissions, in order to comply with the established limits. If an exceedance is the result of a malfunction, then the provisions of 326 IAC 1-6 apply.
3. Pursuant to 326 IAC 2-9-1(i), the owner or operator is hereby notified that this operating agreement does not relieve the permittee of the responsibility to comply with the provisions of any applicable federal, state, or local rules, or any New Source Performance Standards (NSPS), 40 CFR Part 60, or National Emission Standards for Hazardous Air Pollutants (NESHAP), 40 CFR Parts 61 and 63.

Any change or modification which will alter operations in such a way that it will no longer comply with the applicable restrictions and conditions of this operating agreement, must obtain the appropriate approval from the Office of Air Quality (OAQ) under 326 IAC 2-5.1, 326 IAC 2-5.5, 326 IAC 2-6.1, 326 IAC 2-2, 326 IAC 2-3, 326 IAC 2-7, and 326 IAC 2-8, before such change may occur.

Sincerely,
