Re: 137-12938-00016
Revocation of Minor Source Modification
137-12307-00016

Dear Cynthia Bosela:

The letter from Barnes and Thornburg representing Batesville Manufacturing, Inc., received on November 06, 2000, has been reviewed. This letter requested that Part 70 Minor Source Modification 137-12307-00016 be revoked. This permit was issued for permitting construction and operation of:

(a) An inner panel paint booth identified as IPB and an associated drying oven.

The reason for the revocation request is that the Potential to Emit of any criteria pollutant from this modification is below the thresholds described in 326 IAC 2-7-10.5 (d) (4), for requiring Minor Source Modification under this rule.

Pursuant to 326 IAC 2-1.1-9, any permit to construct or operate or any permit revision approval granted by the commissioner may be revoked for any other cause that establishes in the judgement of the commissioner the fact that continuance of the permit or permit revision approval is not consistent with the purpose of this article. As the Potential to Emit of any criteria pollutant from this modification is in the exempt range, this Minor Source Modification 137-12307-00016 is hereby revoked.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Gurinder Saini, at (800) 451-6027, press 0 and ask for Gurinder Saini or extension 3-0203, or dial (317) 233-0203.

Sincerely,

Paul Dubenetzky, Chief
Permits Branch
Office of Air Management
