Re: Source Specific Operation Status
S 039-13778-00507

Dear Mr. Butus:

Your application for Source Specific Operation Status was received on January 9, 2001 and has been reviewed. Based on the data submitted and the provisions in 326 IAC 2, it has been determined that your emission source, a stationary wood parts manufacturing source, located at 727 Mason Street, Elkhart, Indiana 46515, has met the criteria required to obtain a Source Specific Operating Agreement. All terms and conditions in such registrations and permits are no longer in effect.

Pursuant to IC 4-21.5-3-5(a) and (b), approval of this Source Specific Operating Agreement shall not be effective until fifteen (15) days from the date of this letter.

The facilities and processes of this source are hereby granted the Source Specific Operating Agreement provided that the following requirements of 326 IAC 2-9 are satisfied:

Section A: Woodworking Operation: [326 IAC 2-9-4]

1. The particulate matter with a diameter less than ten (10) microns (PM10) from the woodworking operation shall not exceed one-thousandth (0.001) grain per actual cubic foot of outlet air.
2. No visible emissions shall be discharged to the outside air from the woodworking operation.
3. The source shall not at any time, exhaust to the atmosphere, greater than four hundred thousand (400,000) actual cubic feet of outlet air per minute.
4. The source shall maintain records of the types of air pollution control devices utilized at the source, and the operation and maintenance manuals for those devices.
5. Compliance with the limitations of this Source Specific Operating Agreement (SSOA) shall be determined utilizing the test methods specified in 40 CFR 60, Appendix A, Methods 1-4 and 201A.

Section B: 326 IAC 2-9-13 External Combustion Sources

Pursuant to 326 IAC 2-9-13, the one (1) wood-fired boiler, rated at 13.4 million British thermal units per hour, must comply with the following limits:

1. The visible emissions from the external combustion unit shall not exceed twenty percent (20%) opacity in twenty-four (24) consecutive readings in a six (6) minute period. The opacity shall be determined using 40 CFR 60, Appendix A, Method 9.
2. Limiting fuel usage for every twelve (12) month period for a single fuel or a combination of two (2) fuels to less than the following limits as outlined in subsection f, Table 1 of 326 IAC 2-9-13:
 - (1) For wood only 7,352 tons per year
 - (2) For wood and bark 7,352 tons per year

- (3) For bark only 5,882 tons per year
3. Sources electing to comply with these requirements must be able to demonstrate compliance no later than thirty (30) days after receipt of a written request by the department or U.S. EPA. No other demonstration of compliance shall be required. A Source specific Operating Agreement is not required for these sources.
 4. The 13.4 million British thermal units per hour rated boiler, B-1, installed on January 3, 1992, is subject to the New Source Performance Standard (NSPS), 326 IAC 12, (40 CFR 60.40, Subpart Dc - Standards of Performance for Small Industrial - Commercial - Institutional Steam Generating Units) since the boiler was constructed after June 9, 1989 and is rated between 10 and 100 million British thermal units per hour. Since this boiler operates only on wood and has a heat input capacity less than thirty (30) million British thermal units per hour, there are no applicable standards under 40 CFR 60.43c. The amount and type of fuel combusted each day must be recorded.

Any change or modification which will alter operations in such a way that it will no longer comply with the applicable restrictions and conditions of this operating agreement, must obtain the appropriate approval from the Office of Air Quality (OAQ) under 326 IAC 2-5.1, 326 IAC 2-5.5, 326 IAC 2-6.1, 326 IAC 2-2, 326 IAC 2-3, 326 IAC 2-7, and 326 IAC 2-8, before such change may occur.

Section C: General Requirements: [326 IAC 2-9-1]

1. The source shall provide an annual notice to the commissioner, stating that the source is in operation, and certifying that its operations are in compliance with the requirements of this Source Specific Operating Agreement. The above annual notice shall be submitted to:

**Compliance Branch
Office of Air Management
100 North Senate Avenue
P.O. Box 6015
Indianapolis, IN 46206-6015**

no later than January 30 of each year, with the annual notice being submitted in the format attached.

2. Any exceedance of any requirement contained in this operating agreement shall be reported, in writing, within one (1) week of its occurrence. Said report shall include information on the actions taken to correct the exceedance, including measures to reduce emissions, in order to comply with the established limits. If an exceedance is the result of a malfunction, then the provisions of 326 IAC 1-6 apply.
3. Pursuant to 326 IAC 2-9-1(i), the owner or operator is hereby notified that this operating agreement does not relieve the permittee of the responsibility to comply with the provisions of any applicable federal, state, or local rules, or any New Source Performance Standards (NSPS), 40 CFR Part 60, or National Emission Standards for Hazardous Air Pollutants (NESHAP), 40 CFR Part 61.

Sincerely,
