Re: 039-13886
Second Administrative Amendment to
Part 70 039-7650-00324

Dear Todd Cleveland:

Adorn LLC was issued a permit on October 06, 1998 for a stationary wood counter top and cabinet manufacturing operation. A letter requesting the addition of an additional baghouse to their Plant 1 wood working area was received on February 5, 2001. Pursuant to the provisions of 326 IAC 2-7-11 the permit is hereby administratively amended as follows:

The Permittee has requested to add an additional baghouse identified as P-6 to control particulate matter emissions from the existing Woodworking equipment, with a maximum throughput of 25,000 pounds of wood per hour located at Plant 1. The particulate matter emissions from this equipment are already controlled using a cyclone/baghouse system, exhausting to one (1) stack, identified as C5. The addition of baghouse P-6 to the existing cyclone/baghouse system, exhausting to the existing Cyclone C-5 will not change any descriptions, emission limitations and the compliance monitoring of the units, specified in the Section D.2 of the Part 70 Operating Permit.

All conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Gurinder Saini, at (800) 451-6027, press 0 and ask for Gurinder Saini or extension 3-0203, or dial (317) 233-0203.

Sincerely,

Paul Dubenetzky, Chief
