Re: 141-13959-00068
 Revocation of FESOP 141-5057-00068

Dear Mr. Gaudette:

The letter from Van Waters & Rogers, Inc., received on February 22, 2001, has been reviewed. This letter requests that FESOP 141-5057-00068, issued on December 11, 1996 be revoked because the source qualifies for permit by rule pursuant to 326 IAC 2-10.

Pursuant to 326 IAC 2-10, any source that limits the actual annual emissions of any criteria or hazardous air pollutants (HAP) to less than 20% of their respective major source thresholds, without use of emission controls, may operate their source under permit by rule.

The actual annual emissions from the soil vapor extraction system are listed below.

Process/facility	Source Actual Emissions (tons/year)						Total HAPs
	PM	PM ₁₀	SO ₂	VOC	CO	NO _x	
Soil Vapor Extraction System	-	-	-	0.13	-	-	0.26
Insignificant Activities	-	-	-	1.00	-	-	1.00
	-	-	-	1.13	-	-	1.26

20% Part 70 Major Source Threshold	-	20	20	20	20	20	2 ind. 5 tot.
20% PSD Major Source Threshold	50	50	50	50	50	50	-

The source annual actual criteria and hazardous air pollutants without use of emission controls are less than 20% of their respective major source levels. Thus, Van Waters & Rogers, Inc. qualifies for permit by rule pursuant to 326 IAC 2-10.

Pursuant to 326 IAC 2-1.1-9, any permit to construct or operate or any permit revision approval granted by the Commissioner may be revoked for any other cause that establishes in the judgement of the Commissioner the fact that continuance of the permit or permit revision approval is not consistent with the purposes of this Article. Since the source qualifies for permit by rule, existing FESOP 141-5057-00068, issued on December 11, 1996, is hereby revoked.

If there are any questions about this revocation, please contact Scott Fulton at (317) 233-5691 or call (800) 451-6027 and ask for extension 3-5691.

Sincerely,

Paul Dubenetzky, Chief
Permits Branch
Office of Air Quality
