Re: 019-14371-00008  
Revocation of CP-019-3340-00008

Dear Mr. Ybanez:

ESSROC was issued CP019-3340-00008 on September 5, 1997, providing for physical changes to a kiln and preheater unit at ESSROC's Speed, Indiana Plant to facilitate utilization of waste tires as an additional source of heat input to the kiln. ESSROC appealed the construction permit and, pursuant to Joint Agreement by IDEM and ESSROC, the permit was stayed effective January 27, 1998. In April 2001, ESSROC dismissed its appeal, thus dissolving the stay. On May 8, 2001, ESSROC Cement Corporation notified the Office of Air Quality (OAQ) that they do not wish to perform the changes to its kiln and preheater system authorized by the above-referenced construction permit.

The Construction Permit (CP) 019-3340-00008, issued September 5, 1997, is hereby revoked. Pursuant to 4-21.5-3-5(a) and (b), this revocation letter is effective eighteen (18) days from the date of this letter.

Any construction or modification that would result in potential to emit greater than the exemption levels, as specified in 326 IAC 2-1.1-3 (Exemptions) shall be subject to New Source Review (NSR) and must be approved by the OAQ before such construction or modification may occur.

If you have any questions regarding this revocation, please contact Ms. Nisha Sizemore of my staff at 317/232-8356 or [nsizemor@dem.state.in.us](mailto:nsizemor@dem.state.in.us)

Sincerely,

Original signed by Paul Dubenetzky,

Paul Dubenetzky, Chief  
Permits Branch  
Office of Air Quality
