Evansville, Indiana 47702-0269

Re: 163-15576
Second Administrative Amendment to
FESOP 163-7735-00024

Dear Mr. Craddock:

Craddock Finishing Corporation was issued a FESOP on July 30, 1997 for various plastic and metal parts surface coating operation. A letter requesting a change in the permit was received on May 2, 2002, for the deletion of item (9) in Section A.3 of the FESOP. Item (9) in Section A.3 is for the two gasoline storage tanks which received a "Final Report Underground Storage Tank Removal permit" from IDEM, Leaking Underground Storage Tank Section and were dismantled in March 6, 1998. This change qualifies as a "revision to descriptive information where the revision will not trigger a new applicable requirement or violate a permit term" under Administrative Amendment 326 IAC 2-8-10. Therefore, the amendment is as follows (additions are **bolded** and deletions are ~~struck-through~~ for emphasis):

Section A.3 is amended to delete Item (9) as follows.

A.3 Insignificant Activities

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(20):

- (1) One (1) new natural gas-fired paint drying oven with a heat input capacity of 500,000 British thermal units per hour (Btu/hr)
- (2) Seven (7) natural gas fired paint drying ovens, identified as EU 7, 12, 13, 19, 21, 23, and 25, with total heat input rate of 9.25 million British thermal units per hour
- (3) Two (2) wheelabrator mechanical blast booths identified as EU 1 and 2, with a baghouse for particulate matter control
- (4) A gasoline fuel transfer and dispensing operation handling less than or equal to 1,300 gallons per day, such as filling of tanks, locomotives, automobiles, having a storage capacity less than or equal to 10,500 gallons
- (5) Infrared curing equipment
- (6) Replacement or repair of electrostatic precipitators, bags in baghouses and filters in other air filtration equipment

- (7) Grinding and machining operations controlled with fabric filters, scrubbers, mist collectors, wet collectors and electrostatic precipitators with a design grain loading of less than or equal to 0.03 grains per actual cubic foot and a gas flow rate less than or equal to 4000 actual cubic feet per minute, including the following: deburring; buffing; polishing; abrasive blasting; pneumatic conveying; and woodworking operations
- (8) Filter or coalescer media changeout
- ~~(9) Two (2) 1000 gallon gasoline tanks handling less than 1300 gallons per day.~~

All conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Aida De Guzman, at (800) 451-6027, press 0 and ask for Aida De Guzman or extension (3-4972), or dial (317) 233-4972.

Sincerely,
