Mr. Don Kendall
K-T Corporation, A Triumph Group Company
850 Elston Drive
Shelbyville, IN 46176

Re: Permit By Rule Status **145-15617-00043**

Dear Mr. Kendall:

The letter from K-T Corporation, A Triumph Group Company, was received on August 5, 2002. Based on the data and information submitted and the provisions of 326 IAC 2-10 (Permit by Rule), K-T Corporation, A Triumph Group Company states that the aluminum metal aircraft and travel trailer parts manufacturing operation, located at 850 Elston Drive, in Shelbyville, Indiana 46176 satisfies the criteria to operate under the Permit by Rule provisions.

The source is currently permitted under Part 70 Permit 145-7557-00043, issued on December 28, 1998, because the hazardous air pollutant emissions from the source's halogenated solvent cleaning system exceed the Part 70 major source levels.

Pursuant to a Consent Agreement and Final Order (CAFO) with the U.S. Environmental Protection Agency (U.S. EPA), Docket No. 5-CAA-99-039, K-T Corporation ceased using the halogenated solvent cleaning system.

Therefore, since the halogenated solvent cleaning system has been removed, the source has determined that it no longer needs to be permitted under their existing Part 70 permit.

Thus, K-T Corporation, A Triumph Group Company, is requesting that their existing Part 70 Permit (145-7557-00043, issued on December 28, 1998) be revoked with the operation status being changed to Permit By Rule under 326 IAC 2-10.

Part 70 Permit 145-7557-00043, issued on December 28, 1998, shall be revoked under revocation letter number 145-16058-00043.

Pursuant to 326 IAC 2-10 (Permit by Rule), this source shall comply with the following conditions:

- (a) The source's total actual emissions for every 12-month period shall be limited to less than 20% of any threshold for the following:
 - (1) A major source of regulated air pollutants.
 - (2) A major source of hazardous air pollutants, as defined in Section 112 of the Clean Air Act. [326 IAC 2-10-3(1)]
- (b) The source shall not rely on air pollution control equipment to comply with the above-mentioned limitations. [326 IAC 2-10-3(2)]

- (c) Not later than thirty (30) days after receipt of written request by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ), or U.S. Environmental Protection Agency (EPA), the owner or operator shall demonstrate that the source is in compliance with the above-mentioned conditions. [326 IAC 2-10-4]
- (d) Compliance demonstration shall be based on actual emissions for the previous 12 months and may include, but is not limited to, fuel or material usage or production records. No other demonstration of compliance shall be required. [326 IAC 2-10-4]

This source is hereby notified that this Permit by Rule approval does not relieve the source of the responsibility to comply with the provisions of any applicable federal, state, or local requirements, such as New source Performance Standards (NSPS), 40 CFR Part 60, or National Standards for Hazardous Air Pollutants (NESHAP), 40 CFR Part 61. [326 IAC 2-10-5]

Before any change or modification which will alter operations in such a way that the source will no longer comply with 326 IAC 2-10 (Permit by Rule) occurs, the owner or operator shall obtain the appropriate approval from the OAQ under 326 IAC 2-1.1, 326 IAC 2-2, 326 IAC 2-3, 326 IAC 2-7, 326 IAC 2-8, or 326 IAC 2-9 before such change may occur. This source may at any time reapply for a state operating permit under 326 IAC 2-6.1, a Part 70 permit under 326 IAC 2-7, a FESOP under 326 IAC 2-8, or an operating agreement under 326 IAC 2-9, as applicable. [326 IAC 2-10-1(b)]

Any violation of 326 IAC 2-10 (Permit by Rule) may result in administrative or judicial enforcement proceedings under IC 13-30-3 and penalties under IC 13-30-4.

Sincerely,

Original Signed by Paul Dubenetzky
