Re: Response to Review Request No. 019-17392  
Permit status evaluation  
Plant ID: 019-00011

Dear Mr. Walker :

Sellersburg Stone Company, Inc., located at 1019 East Utica Street, Sellersburg, Indiana 47172, submitted a review request on June 6, 2003. The letter was submitted to determine if Sellersburg Stone Company, Inc. requires an air pollution permit for operations consisting of adding one (1) screen and two (2) conveyors to your portable process unit (PEP Screen) operation. You requested guidance as to whether the change would constitute a Significant Modification or an Administrative Amendment to your existing FESOP.

Based on the information in your letter, your planned process change would be at the minor permit revision level.

However, before a definitive decision can be made IDEM will need a standard permit application with more detailed information on the emissions levels, emission factors used, origin of these factors, etc. from your process. An application can be obtained from the IDEM web site - [www.state.in.us/idem/guides/permit/](http://www.state.in.us/idem/guides/permit/).

Questions should be directed to Walter Habeeb at OAQ, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana, 46206-6015, or call (317) 232-8422.

Sincerely,
