Re: Response to Review Request
No. 097-17703-00501
Permit status evaluation

Dear Avery Williams:

Contract Manufacturing Services, located at 754 North Sherman, Indianapolis, Indiana 46201, submitted a review request on May 6, 2002. The letter was submitted to determine if Contract Manufacturing Services requires an air pollution permit for operations consisting of manufacturing of production screw machine parts.

Criteria pollutant threshold levels for exemptions are as follows:

PM10 = <5tpy; **SO2** = <10 tpy; **NOx** = <10 tpy; **VOC** <10 tpy for sources not required to use air pollution control devices to comply with 328 IAC 8; **VOC** <5 tpy for sources required to use air pollution control devices to comply with 326 IAC 8; **CO** = < 25 tpy.

If a source can comply with exempt levels, the burden of proof lies with the source. If the source requires a definite decision to be made by the Indiana Department of Environmental Management (IDEM) and the Office of Environmental Services (OES) and a permit decision be issued, filing fees and any other permit fees shall be applicable according to the level of permit required.

Questions should be directed to Angelique Oliger, OES, 2700 South Belmont Avenue, Indianapolis, Indiana 46221, or call (317) 327-2846.

Sincerely,
