Re: 039-18799-00434
Third Administrative Amendment to
Part 70 T039-6875-00434

Dear Mr. Williams:

Accra Pac Group, Inc. was issued a permit on February 9, 2001 for a liquid and aerosol can filling operation. A letter requesting a change in the Responsible Official was received March 17, 2004. Pursuant to the provisions of 326 IAC 2-7-11(a)(2) the permit is hereby administratively amended as follows:

A.1 General Information

The Permittee owns and operates a liquid and aerosol can filling operation, which has a capability to fill an approximately 420,000,000 cans per year, and handle approximately 674,915,000 pounds per year of VOC-containing liquids.

Responsible Official:	Jim Pickering Dan L. Williams
Source Address:	2730 Middlebury Street, Elkhart, Indiana 46515 and Contiguous Property
Mailing Address:	P. O. Box 2988, Elkhart, Indiana 46515-2988
SIC Code:	7389
County Location:	Elkhart
County Status:	Attainment for all criteria pollutants
Source Status:	Part 70 Permit Program Major Source, under PSD Rules

The Responsible Official was changed from Jim Pickering to Mr. Dan L. Williams, who hold the position of Vice President of Technical Services. Mr. Williams meets the requirements of 326 IAC 2-7-1(34)(A)(iv) as a Responsible Official.

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment to the front of the original permit.

Accra Pac Group, Inc.
Elkhart, Indiana 46515

Second Administrative Amendment 039-17371-00434, issued April 16, 2003

Third Administrative Amendment: 039-18799-00434	Page Affected: 5
Issued by: Original signed by Paul Dubenetzky, Branch Chief Office of Air Quality	Issuance Date: April 14, 2004

SECTION A SOURCE SUMMARY

This approval is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the emission units contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this approval pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information

The Permittee owns and operates a liquid and aerosol can filling operation, which has a capability to fill an approximately 420,000,000 cans per year, and handle approximately 674,915,000 pounds per year of VOC-containing liquids.

Major Source, under PSD Rules

A.2 Emission Units and Pollution Control Equipment Summary

This application consists of a consolidation of multiple permits into a single source-wide permit and involves a relaxation of the previously established line by line production limitations in the construction permits issued for the source's two (2) plants Accra Pac and Health Care Industries. This relaxation will enable the source to use the full capacity of its production lines. The stationary source consists of the following emission units and pollution control devices:

- (a) VOC-Containing Propellant Handling Operations including bulk and smaller container unloading, storage, transfer and filling into aerosol product containers. The source has seven (7) aerosol product production lines with a total capacity of 420 million aerosol cans per year.
- (b) VOC-Containing Liquid Handling Operations including bulk and smaller container unloading, storage, transfer, mixing, and filling into liquid and aerosol product containers. The source has nine (9) liquid product filling lines in addition to the seven (7) aerosol product filling lines and all sixteen (16) lines involve VOC-containing liquid handling. The source can handle a maximum of 674,915,000 pounds per year of VOC-containing liquids.
- (c) Scrap Can Processing Operations including automatic and manual devices used to recover contents and allow recycling of scrap metal from aerosol cans from the production operations that are unusable. The manual devices utilize add-on canisters of activated carbon for VOC emission control. The capacity of the scrap can processing operations is limited by permit to less than 4,545,000 scrap cans processed per year (equivalent to less than 25 tons per year of VOC emissions).
