Re: 097-19593-00028 Notice-only change to 097-7963-00028

Dear Mr. Carroll:

ADM Grain Company was issued a Minor Source Operating Permit (MSOP) on December 29, 2003 for the operation of a stationary grain operator, located at 1901 South Sherman Drive, Indianapolis, Indiana 46204. A letter notifying the Office of Air Quality (OAQ) and the Office of Environmental Services (OES) of the replacement of the conveyor serving the South rail receiving operation was received on September 13, 2004. The existing 25,000 bushel per hour open conveyor is worn out and will be replaced with a 20,000 bushel per hour enclosed conveyor. This does not affect the applicability of the New Source Performance Standard (NSPS), 326 IAC 12, (40 CFR § 60.300, Subpart DD) because it is not a modification, or reconstruction. This replacement is not a modification under 40 CFR §60.14 because it will not affect the maximum capacity of the South rail receiving operation or the potential to emit of the source. This replacement is not a reconstruction under 40 CFR §60.15 because the fixed capital cost of the new component does not exceed 50 percent of the fixed capital cost that would be required to construct a comparable entirely new facility. No changes have been made to the MSOP as a result of this replacement. All conditions of the permit shall remain unchanged and in effect.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Angelique Oligier, (317) 327-2846.

Sincerely,

John B. Chavez
Administrator
