- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a health-based or technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describes the following:
  - (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
  - (2) The permitted facility was at the time being properly operated;
  - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
  - (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ / Northern Regional Office, within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Failure to notify IDEM, OAQ / Northern Regional Office, by telephone or facsimile within four (4) daytime business hours after the beginning of the emergency, or after the emergency is discovered or reasonably should have been discovered, shall constitute a violation of 326 IAC 2-8 and any other applicable rules. [326 IAC 2-8-12(f)]

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

- (g) Operations may continue during an emergency only if the following conditions are met:
  - (1) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
  - (2) If an emergency situation causes a deviation from a health-based limit, the Permittee may not continue to operate the affected emissions facilities unless:
    - (A) The Permittee immediately takes all reasonable steps to correct the emergency situation and to minimize emissions; and
    - (B) Continued operation of the facilities is necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw material of substantial economic value.

**Emission Limitations and Standards [326 IAC 2-8-4(1)]**

**D.1.1 General Provisions Relating to HAPs [40 CFR 61, Subpart A]**

The provisions of 40 CFR 61, Subpart A - General Provisions, apply to the facility described in this section except when otherwise specified in 40 CFR 61, Subpart FF.

**D.1.2 Benzene [40 CFR Part 61.342]**

Any change or modification in the total annual benzene quantity from facility waste to ten (10) megagrams per twelve (12) consecutive month period shall make this source subject to the requirements of NESHAP Part 61, Subpart FF, 40 CFR 61.342(b) and (c).

**D.1.3 Hazardous Air Pollutants (HAPs) and Volatile Organic Compounds (VOC) Limitations [326 IAC 2-8-4] [326 IAC 8-1-6]**

- (a) The total throughput of chemicals at this source shall not exceed 2,000,000 gallons per twelve (12) consecutive month period, excluding methylene chloride and 1,1,1-trichloroethylene. The total throughput of methylene chloride shall not exceed 75,000 gallons per twelve (12) consecutive month period and the total throughput of 1,1,1-trichloroethylene

shall not exceed 25,000 gallons per twelve (12) consecutive month period. This will limit the potential to emit total HAPs to 16.0 tons per year, which is less than 25 tons per year, from the entire source. Therefore, the requirements of 326 IAC 2-7, Part 70, are not applicable. This will also limit the potential to emit VOC from the storage and handling operations to less than 25 tons per year. Therefore, the requirements of 326 IAC 8-1-6, New facilities; General reduction requirements, are also not applicable.

- (b) The total throughput of each individual HAP at this source shall not exceed 950,000 gallons per twelve (12) consecutive month period, excluding methylene chloride and 1,1,1-trichloroethylene. The total throughput of methylene chloride shall not exceed 75,000 gallons per twelve (12) consecutive month period and the total throughput of 1,1,1-trichloroethylene shall not exceed 25,000 gallons per twelve (12) consecutive month period. This will limit the potential to emit each individual HAP to less than 10 tons per year from the entire source. Therefore, the requirements of 326 IAC 2-7, Part 70, are not applicable.

**D.1.4 Petroleum Sources [326 IAC 8-4] [40 CFR Part 60.500, Subpart XX] [40 CFR 63, Subpart R] [326 IAC 12] [326 IAC 20-10]**

- (a) Any change in operation at this source that causes this source to store and handle gasoline may make the source subject to the requirements of 326 IAC 12 (40 CFR Part 60.500, Subpart XX), 326 IAC 20-10 (40 CFR 63, Subpart R), and/or 326 IAC 8-4 (Petroleum Sources), and shall require prior IDEM, OAQ, approval.
- (b) Any change in operation at this source that causes this source to store petroleum products in storage tanks with capacities greater than 39,000 gallons shall make the source subject to the requirements of 326 IAC 8-4-3, Petroleum Liquid Storage Facilities, and shall require prior IDEM, OAQ, approval.

**D.1.5 Preventive Maintenance Plan [326 IAC 2-8-4(9)]**

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for this facility and any control devices.

**Compliance Determination Requirements**

**D.1.6 VOC and HAP Emission Limitations**

Compliance with Condition D.1.3 shall be demonstrated within 30 days of the end of each month based on the chemical and individual HAP throughputs for the most recent twelve (12) month period.

**Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]**

There are no specific Compliance Monitoring Requirements applicable to these emission units.

**D.1.7 Nonapplicability of Visible Emission Notations**

The requirement from FESOP 141-5525-00125, issued on December 9, 1996, Condition D.1.2 to perform daily visible emission notations has not been included in this renewal. This requirement is not applicable because daily visible emission notations are used to detect abnormal particulate emissions.

The particulate emissions from this source only result from insignificant activities, with potential PM and PM<sub>10</sub> emissions less than 25 tons per year and 10 pounds per hour. Therefore, visible emissions notations are not required by this permit. The source must maintain compliance with 326 IAC 5-1 (Opacity Limitations), as described in Section C. Thus, Condition D.1.2 of FESOP 141-5525-00125 is hereby rescinded.

**Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]**

**D.1.8 Record Keeping Requirements**

- (a) To document compliance with Condition D.1.3, the Permittee shall keep records of the following:
- (a) Total chemical throughput;
  - (b) Identification of each chemical and the throughput of each chemical;
  - (c) Individual and total HAP content of each chemical;
  - (d) Individual HAP throughputs for each individual HAP;
  - (e) Methylene chloride throughput; and
  - (f) 1,1,1-trichloroethylene throughput.

Records shall be taken monthly and shall be complete and sufficient to establish compliance with the throughput limits and the total HAPs, individual HAP and VOC emission limits established in Condition D.1.3.

- (b) The source shall maintain records required by 40 CFR Part 61.356. Each record shall be maintained in a readily accessible location at the source for a period not less than two (2) years. The owner or operator shall maintain records that identify each waste stream at the facility subject to 40 CFR 61, Subpart FF, and indicate whether or not the waste stream is controlled for benzene emissions in accordance with this subpart. For each waste stream not controlled for benzene emissions in accordance with this subpart, the records shall include all test results, measurements, calculations, and other documentation used to determine the water content, whether or not the waste stream is a process wastewater stream, annual waste quantity, range of benzene concentrations, annual average flow-weighted benzene concentration, and annual benzene quantity.
- (c) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

**D.1.9 Reporting Requirements**

A quarterly summary of the information to document compliance with Condition D.1.3 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The reports submitted by the Permittee do require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).
