Re: Response to Review Request 033-21125-00039
Permit Status Evaluation
Plant ID 033-00039

Dear Mr. Day,

Marathon Ashland Petroleum LLC, which operates a petroleum products storage terminal located at 2670 US Highway 6, Waterloo, IN 46793-9414, submitted a review request on April 12, 2005. The request was submitted to determine if the emission source requires an air pollution permit for:

- (a) one (1) natural gas / #2 fuel fired boiler, constructed in 1977, rated at 12.553 million Btu per hour; and
- (b) one (1) natural gas / #2 fuel fired boiler, constructed in 1977, rated at 8.4 million Btu per hour.

An application for registration, 033-15870-00039, was received on July 16, 2002. However, these two boilers qualified for a Source Specific Operation Agreement (SSOA) under 326 IAC 2-9-13(b)(2)(A). This particular SSOA (referred to as an "Option 1" external combustion SSOA) does not require written approval by OAQ and does not require the payment of a fee. Thus, the application was deemed to be unnecessary and no further action was required by either OAQ or Marathon Ashland Petroleum LLC.

In September, 2002, OAQ informed the application's listed contact person, Katie Patterson, of these facts by telephone. She was also informed that if Marathon Ashland Petroleum LLC would submit a two-page SSOA application, OAQ would issue the SSOA in writing. Marathon Ashland Petroleum LLC never pursued that option.

Questions should be directed to Allen R. Davidson, OAQ, 100 North Senate Avenue, Room N1001, Indianapolis, IN 46204-2222, or call (800) 451-6027, press 0 and ask for extension 3-5693, or dial (317) 233-5693.

Sincerely,

Original Signed by
