TO: Interested Parties / Applicant
DATE: October 17, 2005
RE: Chiyoda USA Corporation / 133-21714-00019
FROM: Paul Dubenetzky
Chief, Permits Branch
Office of Air Quality

Notice of Decision – Approval

Please be advised that on behalf of the Commissioner of the Department of Environmental Management, I have issued a decision regarding the enclosed matter. Pursuant to 326 IAC 2, this approval was effective immediately upon submittal of the application.

If you wish to challenge this decision, IC 4-21.5-3-7 requires that you file a petition for administrative review. This petition may include a request for stay of effectiveness and must be submitted to the Office of Environmental Adjudication, 100 North Senate Avenue, Government Center North, Room 1049, Indianapolis, IN 46204, **within eighteen (18) calendar days from the mailing of this notice**. The filing of a petition for administrative review is complete on the earliest of the following dates that apply to the filing:

- (1) the date the document is delivered to the Office of Environmental Adjudication (OEA);
- (2) the date of the postmark on the envelope containing the document, if the document is mailed to OEA by U.S. mail; or
- (3) The date on which the document is deposited with a private carrier, as shown by receipt issued by the carrier, if the document is sent to the OEA by private carrier.

The petition must include facts demonstrating that you are either the applicant, a person aggrieved or adversely affected by the decision or otherwise entitled to review by law. Please identify the permit, decision, or other order for which you seek review by permit number, name of the applicant, location, date of this notice and all of the following:

- (1) the name and address of the person making the request;
- (2) the interest of the person making the request;
- (3) identification of any persons represented by the person making the request;
- (4) the reasons, with particularity, for the request;
- (5) the issues, with particularity, proposed for considerations at any hearing; and
- (6) identification of the terms and conditions which, in the judgment of the person making the request, would be appropriate in the case in question to satisfy the requirements of the law governing documents of the type issued by the Commissioner.

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178. Callers from within Indiana may call toll-free at 1-800-451-6027, ext. 3-0178.

Mr. Keith Rogers
Chiyoda USA Corporation
2200 S.R. 240 East
Greencastle, Indiana 46135

October 17, 2005

Re: **133-21714-00019**
Third Administrative Amendment to
Part 70 No.: T 133-12660-00019

Dear Mr. Rogers:

Chiyoda USA Corporation was issued a permit on March 19, 2002 for a stationary plastic automotive trim molding and surface coating operation. Two letters requesting changes to this permit were received on August 18, 2005. Pursuant to the provisions of 326 IAC 2-7-11, the permit is hereby administratively amended as follows: (Deleted wording is shown with ~~strike through~~ and added language is **bolded**.)

Change No. 1:

Ownership of H.A. Parts Products of Indiana Company was transferred to Chiyoda USA Corporation. All references to H.A. Parts Products of Indiana Company have been revised to reflect the Chiyoda USA Corporation. Condition A.1 has been revised to reflect Mr. Oe, President as the Responsible Official.

Change No. 2:

The co-extrusion and flocking operations have been removed from the plant. Three (3) of the five (5) degreasing operations and Paint Booth PT 515 have been removed from the plant. The Mask Washer B has been relocated to the North Paint Mixing Room. Sections A.2, A.3, D.1, D.2, D.3 and D.4 have been modified to reflect the change in emission units.

The 326 IAC 6-3 revisions that became effective on June 12, 2002 were approved into the State Implementation Plan on September 23, 2005. These rules replace the previous version of 326 IAC 6-3 (Process Operations) that had been part of the SIP; therefore, the requirements of the previous version of 326 IAC 6-3-2 are no longer applicable to this source. Condition C.1 has been revised, and Conditions D.1.2 and D.2.4 which contained these requirements have been removed and since the requirements of the 326 IAC 6-3-2(d) that were effective June 12, 2002 are now federally enforceable, the last statements from D.1.3 and D.2.5 have been removed.

The Table Of Contents has been modified and conditions have been renumbered to reflect these changes.

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)]
[326 IAC 2-7-5(15)]

This stationary source consists of the following emission units and pollution control devices:

Hand Paint Spray Booths

- (a) one (1) paint spray booth, identified as PT537, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 20 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through three (3) stacks, identified as 537-P-1, 537-P-2, 537-O-1;
- ~~(b) one (1) paint spray booth, identified as PT515, constructed in 1989, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 20 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through one (1) stack, identified as OPB-1;~~
- (e b) one (1) paint spray booth, identified as PT538, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through four (4) stacks, identified as 538-P-1, 538-P-2, 538-P-3, 538-O-1;
- ~~(d c)~~ one (1) paint spray booth, identified as PT539, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 24 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through four (4) stacks, identified as 539-P-1, 539-P-2, 539-P-3, 539-O-1;

North Paint Mix Room

- ~~(e) one (1) Mask washer, identified as Mask Washer A, constructed in 2003, using a maximum of 22.5 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-A-1;~~

Robot Paint Spray Lines

- (f d) one (1) robot paint spray system, identified as PT531, consisting of the following:
 - (1) one (1) Primer coat spray booth (NPP), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPP-1 and NPP-2;
 - (2) one (1) Primer coat flash/setting zone, exhausting through one (1) stack, identified as NPP-3;
 - (3) one (1) Base coat spray booth (NPB), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through three (3) stacks, identified as NPB-1, NPB-2, and NPB-3;
 - (4) one (1) Base coat flash/setting zone, exhausting through one (1) stack, identified as NPB-4;
 - (5) one (1) Clear coat spray booth (NPC), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPC-1 and NPC-2;

- (6) one (1) Clear coat flash/setting zone, exhausting through one (1) stack, identified as NPC-3;
 - (7) two (2) natural gas-fired bake ovens, each with a maximum heat input of 0.8 million (MM) British thermal units (Btu) per hour;
- Note: The robot paint spray system was previously referred to as the Large Parts Line in CP-133-8608-00019, issued October 6, 1997.
- (g e) one (1) hand paint spray booth, identified as PT532, consisting of the following:
 - (1) one (1) hand paint spray booth, identified as PT532 (NPS), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 25 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPS-1 and NPS-2;
 - (2) one (1) natural gas-fired bake oven (NPSO), constructed in 1999, with a maximum heat input of 0.4 MMBtu per hour, exhausting through one (1) stack, identified as NPSO-1; and
 - (3) one (1) hand paint spray booth cool down (NPSD), exhausting through one (1) stack, identified as NPSD-1;
 - (h f) one (1) robot paint spray line, identified as PT536, constructed in 2001, consisting of the following:
 - (1) one (1) Loading Clean Room;
 - (2) one (1) Primer coat pump room, exhausting through one (1) stack (ID Stack #1);
 - (3) one (1) Primer coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through one (1) stack (ID Stack #2);
 - (4) one (1) Primer coat flash off tunnel, exhausting through one (1) stack (ID Stack #3);
 - (5) one (1) Base coat pump room, exhausting through one (1) stack (ID Stack #4);
 - (6) one (1) Base coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks (ID Stacks #5 and #6);
 - (7) one (1) Base coat flash off tunnel, exhausting through one (1) stack (ID Stack #7);
 - (8) one (1) Clear coat pump room, exhausting through one (1) stack (ID Stack #8);
 - (9) one (1) Clear coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through one (1) stack (ID Stack #9);
 - (10) one (1) Clear coat flash off tunnel, exhausting through one (1) stack (ID Stack #10);
 - (11) one (1) convection curing oven, exhausting through three (3) stacks (ID Stacks #11, #12, and #13), equipped with two (2) indirect natural gas-fired heater boxes, each rated at 1.5 million British thermal units (MMBtu) per hour, exhausting through two (2) stacks (ID Stacks #14 and #15); and
 - (12) one (1) clean room for unloading of painted parts.
 - (i g) One (1) robot paint line, identified as PT540, utilizing a High Volume Low Pressure (HVLP) spray application system coating a maximum of 17.1 garnish assembly trunks per hour and 14.6 spoiler assembly roofs per hour, equipped with a closed loop internal mix manifold system and a water-wash system for particulate matter overspray control, exhausting through three (3) stacks, identified as 540-S, 540-SW and 540-NW. The paint line also includes one (1) convection oven (to cure the painted parts), utilizing two (2) 10 inch exhaust ducts, with a rain cap.

~~East North~~ Paint Mix Room

- (h) **one (1) Mask washer, identified as Mask Washer A, constructed in 2003, using a maximum of 22.5 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-A-1;**
- (i) one (1) Mask washer, identified as Mask Washer B, constructed in 1999, using a maximum of 6.0 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-B-1;

~~Co-Extrusion~~

- ~~(k) eight (8) co-extrusion lines, identified as CX101, CX103, CX106, CX109, CX110, CX111, and CX113, all constructed in 1989, and CX115, constructed in 2004, each utilizing a roller coating system for adhesive application, each exhausting through one (1) stack, with CX101 exhausting through stack F4, CX106 and CX113 exhausting through stack E2, CX103, CX109, CX110, and CX111 exhausting through stack E3, and CX115 exhausting through stack E4;~~

Flocking

- ~~(l) Four (4) Flockers for adhesive application, identified as FL101, FL112, FL114, and FL116. Both FL101 and FL112 were constructed in 1989, FL114 was constructed in 2000; FL116 was constructed in 2004. FL101, FL112, and FL114 each utilize an air atomization spray application system, each equipped with an infrared (IR) oven. FL116 utilizes a roll coating application system. The FL101, FL112 and FL114 Flockers exhaust through one (1) stack, identified as F1, F4 and F6, respectively, and each IR Oven exhausts through one (1) stack, identified F2, F3, and F5, respectively. FL116 exhausts through one (1) stack, identified as F6. The total combined potential usage of flocking material for the four flockers is 4.25 pounds per hour.~~

A.3 Specifically Regulated Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities which are specifically regulated, as defined in 326 IAC 2-7-1(21):

- (a) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour including:
 - (1) one (1) natural gas-fired flexible water tube package boiler, located in the New Paint Room, constructed in 1999, with a maximum heat input of 9.0 MMBtu per hour, exhausting through one (1) stack, identified as NPBM-1 [326 IAC 6-2-4].
- (b) Degreasing operations that do not exceed 145 gallons per 12 months, except if subject to 326 IAC 20-6, including **five two (2) washers, identified as Tool & Die parts washer, two (2) Dept. 200 parts washers, Dept. 300 parts washer, and Dept. 400 parts washer and Maintenance parts washer**, each with a maximum capacity of 100 gallons of solvent [326 IAC 8-3-2, 326 IAC 8-3-5].
- (c) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment [326 IAC 6-3-2].

C.1 Particulate Matter Emission Limitations For Processes with Process Weight Rates Less Than One Hundred (100) pounds per hour [326 IAC 6-3-2(e)]

Pursuant to 326 IAC 6-3-2(e)(2), ~~the allowable particulate matter emissions rate from any process not already regulated by 326 IAC 6-1 or any New Source Performance Standard, and exempt under 326 IAC 6-3-1(b) or (c) which has a maximum process weight rate less than 100 pounds per hour and the methods in 326 IAC 6-3-2(b) through (d) do not apply shall not exceed 0.551 pounds per hour.~~

SECTION D.1 FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Hand Paint Spray Booths

- ~~(b) one (1) paint spray booth, identified as PT515, constructed in 1989, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 20 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through one (1) stack, identified as OPB-1;~~
- (e b) one (1) paint spray booth, identified as PT538, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through four (4) stacks, identified as 538-P-1, 538-P-2, 538-P-3, 538-O-1;
- (d c) one (1) paint spray booth, identified as PT539, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 24 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through four (4) stacks, identified as 539-P-1, 539-P-2, 539-P-3, 539-O-1;

North Paint Mix Room

- ~~(e) one (1) Mask washer, identified as Mask Washer A, constructed in 2003, using a maximum of 22.5 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-A-1;~~

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

D.1.1 Volatile Organic Compounds (VOC) [326 IAC 8-1-6]

Pursuant to CP-133-5802-00019, issued October 7, 1996, the best available control technology (BACT) for the spray coating of plastic automobile trim in PT537, ~~PT515~~, PT538, and PT539 shall be the use of a high volume low pressure (HVLP) spray gun with a closed-loop internal mix manifold system at all times during which this process is operated. The total amount of volatile organic compounds (VOC) delivered to the applicators in PT537, ~~PT515~~, PT538, and PT539 shall not exceed 34.2 tons per twelve (12) consecutive month period. This usage limit is equivalent to 34.2 tons of VOC per twelve (12) consecutive month period.

D.1.2 ~~Particulate Matter (PM) [40 CFR 52 Subpart P]~~

~~Pursuant to 40 CFR 52 Subpart P, the particulate matter (PM) from each of the hand paint spray booths, identified as PT537, PT515, PT538, and PT539 shall not exceed the pound per hour emission rate established as E in the following formula:~~

~~Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:~~

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

D.1.32 Particulate [326 IAC 6-3-2(d)]

Pursuant to 326 IAC 6-3-2(d), particulate from each surface coating facility shall be controlled by a closed loop internal mix / waterwash, and the Permittee shall operate the control device in accordance with manufacturer's specifications. ~~This requirement to operate the control is not federally enforceable.~~

D.1.4 ~~Volatile Organic Compounds (VOC) [326 IAC 8-3-2]~~

Pursuant to ~~326 IAC 8-3-2 (Cold Cleaner Operations)~~ for Mask Washer A, a cold cleaning operation constructed after January 1, 1980, the owner or operator shall:

- ~~(a) Equip the cleaner with a cover;~~
- ~~(b) Equip the cleaner with a facility for draining cleaned parts;~~
- ~~(c) Close the degreaser cover whenever parts are not being handled in the cleaner;~~
- ~~(d) Drain cleaned parts for at least fifteen (15) seconds or until dripping ceases;~~
- ~~(e) Provide a permanent, conspicuous label summarizing the operation requirements;~~
- ~~(f) Store waste solvent only in covered containers and not dispose of waste solvent or transfer it to another party, in such a manner that greater than twenty percent (20%) of the waste solvent (by weight) can evaporate into the atmosphere.~~

D.1.408 Monitoring

- (a) Daily inspections shall be performed to verify that the water level of the water pans meet the manufacturer's recommended level. To monitor the performance of the water pans, the water level of the pans shall be maintained weekly at a level where surface agitation indicates impact of the air flow. Water shall be kept free of solids and floating material that reduces the capture efficiency of the water pan. To monitor the performance of the baffles, weekly inspections of the baffle panels shall be conducted to verify placement and configuration meet recommendations of the manufacturer. In addition, weekly observations shall be made of the overspray from the surface coating booth stacks (Stack IDs 537-P-1, 537-P-2, 537-O-1, ~~OPB-1~~, 538-P-1, 538-P-2, 538-P-3, 538-O-1, 539-P-1, 539-P-2, 539-P-3, and 539-O-1) while one or more of the booths are in operation. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a deviation from this permit.

D.1.419 Record Keeping Requirements

- (b) To document compliance with Condition D.1.408, the Permittee shall maintain a log of weekly overspray observations, daily and monthly inspections, and those additional inspections prescribed by the Preventative Maintenance Plan.

SECTION D.2 FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Robot Paint Spray Lines

- (f d) one (1) robot paint spray system, identified as PT531, consisting of the following:
 - (1) one (1) Primer coat spray booth (NPP), constructed in 1999, utilizing a High Volume Low Pressure (HVL) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPP-1 and NPP-2;
 - (2) one (1) Primer coat flash/setting zone, exhausting through one (1) stack, identified as NPP-3;
 - (3) one (1) Base coat spray booth (NPB), constructed in 1999, utilizing a High Volume Low Pressure (HVL) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through three (3) stacks, identified as NPB-1,

- NPB-2, and NPB-3;
- (4) one (1) Base coat flash/setting zone, exhausting through one (1) stack, identified as NPB-4;
 - (5) one (1) Clear coat spray booth (NPC), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPC-1 and NPC-2;
 - (6) one (1) Clear coat flash/setting zone, exhausting through one (1) stack, identified as NPC-3;
 - (7) two (2) natural gas-fired bake ovens, each with a maximum heat input of 0.8 million (MM) British thermal units (Btu) per hour;
- Note: The robot paint spray system was previously referred to as the Large Parts Line in CP-133-8608-00019, issued October 6, 1997.
- (g e) one (1) hand paint spray booth, identified as PT532, consisting of the following:
- (1) one (1) hand paint spray booth, identified as PT532 (NPS), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 25 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPS-1 and NPS-2;
 - (2) one (1) natural gas-fired bake oven (NPSO), constructed in 1999, with a maximum heat input of 0.4 MMBtu per hour, exhausting through one (1) stack, identified as NPSO-1; and
 - (3) one (1) hand paint spray booth cool down (NPSD), exhausting through one (1) stack, identified as NPSD-1;
- (h f) one (1) robot paint spray line, identified as PT536, constructed in 2001, consisting of the following:
- (1) one (1) Loading Clean Room;
 - (2) one (1) Primer coat pump room, exhausting through one (1) stack (ID Stack #1);
 - (3) one (1) Primer coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through one (1) stack (ID Stack #2);
 - (4) one (1) Primer coat flash off tunnel, exhausting through one (1) stack (ID Stack #3);
 - (5) one (1) Base coat pump room, exhausting through one (1) stack (ID Stack #4);
 - (6) one (1) Base coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks (ID Stacks #5 and #6);
 - (7) one (1) Base coat flash off tunnel, exhausting through one (1) stack (ID Stack #7);
 - (8) one (1) Clear coat pump room, exhausting through one (1) stack (ID Stack #8);
 - (9) one (1) Clear coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through one (1) stack (ID Stack #9);
 - (10) one (1) Clear coat flash off tunnel, exhausting through one (1) stack (ID Stack #10);
 - (11) one (1) convection curing oven, exhausting through three (3) stacks (ID Stacks #11, #12, and #13), equipped with two (2) indirect natural gas-fired heater boxes, each rated at 1.5 million British thermal units (MMBtu) per hour, exhausting through two (2) stacks (ID Stacks #14 and #15); and
 - (12) one (1) clean room for unloading of painted parts.
- (i g) One (1) robot paint line, identified as PT540, utilizing a High Volume Low Pressure (HVLP) spray application system coating a maximum of 17.1 garnish assembly trunks per hour and 14.6 spoiler assembly roofs per hour, equipped with a closed loop internal mix manifold system and a water-wash system for particulate matter overspray control, exhausting through three (3) stacks, identified as 540-S, 540-SW and 540-NW. The paint line also includes one (1) convection oven (to cure the painted parts), utilizing two (2) 10 inch exhaust ducts, with a rain cap.
- East North Paint Mix Room**
- (h) **one (1) Mask washer, identified as Mask Washer A, constructed in 2003, using a maximum of 22.5 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-A-1;**

- (j i) one (1) Mask washer, identified as Mask Washer B, constructed in 1999, using a maximum of 6.0 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-B-1;

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

D.2.3 Volatile Organic Compounds and Hazardous Air Pollutants (HAPs) [326 IAC 2-4.1-1]

- (a) Pursuant to Agreed Order Case No. 2000-9022-A, the VOC and HAP input usage from **Mask Washer A and Mask Washer B and Mask Washer A of Section D.1** shall be limited to 4.74 tons per 12 consecutive month period with compliance determined at the end of each month.

D.2.4 Particulate Matter (PM) [40 CFR 52 Subpart P]

- (a) Pursuant to 40 CFR 52 Subpart P and CP 133-8608-00019, issued on October 6, 1997, the particulate matter (PM) from each of the robot paint spray system, identified as PT531, and the hand paint spray booth, identified as PT532, shall not exceed the pound per hour emission rate established as E in the following formula:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \text{ where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

- (b) Pursuant to 40 CFR 52 Subpart P, the particulate matter (PM) from the primer coat, base coat, the clear coat spray booths of the robot paint spray line, identified as PT536, and the robot paint line, identified as PT540 shall not exceed the pound per hour emission rate established as E in the following formula:

Interpolation of the data for the process weight rate up to 60,000 pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \text{ where } E = \text{rate of emission in pounds per hour; and} \\ P = \text{process weight rate in tons per hour}$$

D.2.54 Particulate [326 IAC 6-3-2(d)]

Pursuant to 326 IAC 6-3-2(d), particulate from each surface coating facility shall be controlled by a closed loop internal mix / waterwash, and the Permittee shall operate the control device in accordance with manufacturer's specifications. ~~This requirement to operate the control is not federally enforceable.~~

D.2.76 Volatile Organic Compounds (VOC) [326 IAC 8-3-5]

- (a) Pursuant to 326 IAC 8-3-5(a) (Cold Cleaner Degreaser Operation and Control) for Mask Washers **A and B**, the owner or operator of a cold cleaner degreaser without remote solvent reservoirs constructed after July 1, 1990, shall ensure that the following requirements are met :

D.2.143 Record Keeping Requirements

- (b) To document compliance with Condition D.2.1312, the Permittee shall maintain a log of weekly overspray observations, daily and monthly inspections, and those additional inspections prescribed by the Preventive Maintenance Plan.

SECTION D.3(formerly D.4) FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Insignificant Activities

- (b) Degreasing operations that do not exceed 145 gallons per 12 months, except if subject to 326 IAC 20-6, including ~~five~~ two (2) washers, identified as Tool & Die parts washer, ~~two (2) Dept. 200 parts washers, Dept. 300 parts washer, and Dept. 400 parts washer~~ and **Maintenance parts washer**, each with a maximum capacity of 100 gallons of solvent [326 IAC 8-3-2, 326 IAC 8-3-5]

Change No. 3:

The Part 70 Quarterly Report Form relating to the co-extrusion operation has been removed.

Change No. 4:

The mailing address of IDEM, Office of Air Quality (OAQ) has changed. All references in the permit to "100 North Senate Ave, Post Office Box 6015, Indianapolis, Indiana 46206-6015" have been changed to "100 North Senate Ave, Indianapolis, Indiana 46204".

All other conditions of the permit shall remain unchanged and in effect. For your convenience the entire Part 70 Operating Permit as modified will be provided at issuance.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Jenny Acker, at (800) 451-6027, and ask for Jenny Acker or extension 2-8253, or dial (317) 232-8253.

Sincerely,

PART 70 OPERATING PERMIT OFFICE OF AIR QUALITY

**Chiyoda USA Corporation
 2200 SR 240 East
 Greencastle, Indiana 46135**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-7 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: T133-12660-00019	
Issued by: Original Signed By Janet G. McCabe, Assistant Commissioner Office of Air Quality	Issuance Date: March 19, 2002 Expiration Date: March 19, 2007

First Administrative Amendment No.: 133-15969-00019, issued on June 18, 2002
 First Significant Permit Modification No.: 133-16849-00019, issued on April 10, 2003
 Second Administrative Amendment No.: 133-17435-00019, issued on May 19, 2003
 Second Significant Permit Modification No.: 133-18041-00019, issued on December 15, 2003
 First Minor Permit Modification No.: 133-20411-00019, issued on May 27, 2005

Third Administrative Amendment No.: 133-21714-00019	Sections Affected: A, D.1, D.2, D.3
Issued by: Original Signed By: Nisha Sizemore, Section Chief Permit Branch Office of Air Quality	Issuance Date: October 17, 2005

SECTION A

SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)] [326 IAC 2-7-1(22)]

The Permittee owns and operates a stationary plastic automotive trim molding and surface coating operation.

Responsible Official:	Mr. Oe, President
Source Address:	2200 State Road 240 East, Greencastle, IN 46135
General Source Phone Number:	765-653-2000
SIC Code:	3499, 3714
County Location:	Putnam
Source Location Status:	Attainment for all criteria pollutants
Source Status:	Part 70 Permit Program Minor Source, under PSD Rules; Major Source, Section 112 of the Clean Air Act

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)] [326 IAC 2-7-5(15)]

This stationary source consists of the following emission units and pollution control devices:

Hand Paint Spray Booths

- (a) one (1) paint spray booth, identified as PT537, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 20 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through three (3) stacks, identified as 537-P-1, 537-P-2, 537-O-1;
- (b) one (1) paint spray booth, identified as PT538, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through four (4) stacks, identified as 538-P-1, 538-P-2, 538-P-3, 538-O-1;
- (c) one (1) paint spray booth, identified as PT539, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 24 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through four (4) stacks, identified as 539-P-1, 539-P-2, 539-P-3, 539-O-1;

Robot Paint Spray Lines

- (d) one (1) robot paint spray system, identified as PT531, consisting of the following:
 - (1) one (1) Primer coat spray booth (NPP), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPP-1 and NPP-2;
 - (2) one (1) Primer coat flash/setting zone, exhausting through one (1) stack, identified as NPP-3;

- (3) one (1) Base coat spray booth (NPB), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through three (3) stacks, identified as NPB-1, NPB-2, and NPB-3;
 - (4) one (1) Base coat flash/setting zone, exhausting through one (1) stack, identified as NPB-4;
 - (5) one (1) Clear coat spray booth (NPC), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPC-1 and NPC-2;
 - (6) one (1) Clear coat flash/setting zone, exhausting through one (1) stack, identified as NPC-3;
 - (7) two (2) natural gas-fired bake ovens, each with a maximum heat input of 0.8 million (MM) British thermal units (Btu) per hour;
- Note: The robot paint spray system was previously referred to as the Large Parts Line in CP-133-8608-00019, issued October 6, 1997.
- (e) one (1) hand paint spray booth, identified as PT532, consisting of the following:
 - (1) one (1) hand paint spray booth, identified as PT532 (NPS), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 25 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPS-1 and NPS-2;
 - (2) one (1) natural gas-fired bake oven (NPSO), constructed in 1999, with a maximum heat input of 0.4 MMBtu per hour, exhausting through one (1) stack, identified as NPSO-1; and
 - (3) one (1) hand paint spray booth cool down (NPSD), exhausting through one (1) stack, identified as NPSD-1;
 - (f) one (1) robot paint spray line, identified as PT536, constructed in 2001, consisting of the following:
 - (1) one (1) Loading Clean Room;
 - (2) one (1) Primer coat pump room, exhausting through one (1) stack (ID Stack #1);
 - (3) one (1) Primer coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through one (1) stack (ID Stack #2);
 - (4) one (1) Primer coat flash off tunnel, exhausting through one (1) stack (ID Stack #3);
 - (5) one (1) Base coat pump room, exhausting through one (1) stack (ID Stack #4);
 - (6) one (1) Base coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks (ID Stacks #5 and #6);
 - (7) one (1) Base coat flash off tunnel, exhausting through one (1) stack (ID Stack #7);
 - (8) one (1) Clear coat pump room, exhausting through one (1) stack (ID Stack #8);
 - (9) one (1) Clear coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through one (1) stack (ID Stack #9);
 - (10) one (1) Clear coat flash off tunnel, exhausting through one (1) stack (ID Stack #10);
 - (11) one (1) convection curing oven, exhausting through three (3) stacks (ID Stacks #11, #12, and #13), equipped with two (2) indirect natural gas-fired heater boxes, each rated at 1.5 million British thermal units (MMBtu) per hour, exhausting through two (2) stacks (ID Stacks #14 and #15); and
 - (12) one (1) clean room for unloading of painted parts.
 - (g) One (1) robot paint line, identified as PT540, utilizing a High Volume Low Pressure (HVLP) spray application system coating a maximum of 17.1 garnish assembly trunks per hour and 14.6 spoiler assembly roofs per hour, equipped with a closed loop internal mix manifold system and a water-wash system for particulate matter overspray control, exhausting through

three (3) stacks, identified as 540-S, 540-SW and 540-NW. The paint line also includes one (1) convection oven (to cure the painted parts), utilizing two (2) 10 inch exhaust ducts, with a rain cap.

North Paint Mix Room

- (h) one (1) Mask washer, identified as Mask Washer A, constructed in 2003, using a maximum of 22.5 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-A-1;
- (i) one (1) Mask washer, identified as Mask Washer B, constructed in 1999, using a maximum of 6.0 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-B-1;

A.3 Specifically Regulated Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities which are specifically regulated, as defined in 326 IAC 2-7-1(21):

- (a) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour including:
 - (1) one (1) natural gas-fired flexible water tube package boiler, located in the New Paint Room, constructed in 1999, with a maximum heat input of 9.0 MMBtu per hour, exhausting through one (1) stack, identified as NPBM-1 [326 IAC 6-2-4].
- (b) Degreasing operations that do not exceed 145 gallons per 12 months, except if subject to 326 IAC 20-6, including two (2) washers, identified as Tool & Die parts washer, and Maintenance parts washer, each with a maximum capacity of 100 gallons of solvent [326 IAC 8-3-2, 326 IAC 8-3-5].
- (c) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment [326 IAC 6-3-2].

A.4 Part 70 Permit Applicability [326 IAC 2-7-2]

This stationary source is required to have a Part 70 permit by 326 IAC 2-7-2 (Applicability) because:

- (a) It is a major source, as defined in 326 IAC 2-7-1(22);
- (b) It is a source in a source category designated by the United States Environmental Protection Agency (U.S. EPA) under 40 CFR 70.3 (Part 70 - Applicability).

SECTION B GENERAL CONDITIONS

B.1 Definitions [326 IAC 2-7-1]

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2 and 326 IAC 2-7) shall prevail.

B.2 Permit Term [326 IAC 2-7-5(2)] [326 IAC 2-1.1-9.5]

This permit is issued for a fixed term of five (5) years from the original date, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date.

B.3 Enforceability [326 IAC 2-7-7]

Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.

B.4 Termination of Right to Operate [326 IAC 2-7-10] [326 IAC 2-7-4(a)]

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-7-3 and 326 IAC 2-7-4(a).

B.5 Severability [326 IAC 2-7-5(5)]

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

B.6 Property Rights or Exclusive Privilege [326 IAC 2-7-5(6)(D)]

This permit does not convey any property rights of any sort or any exclusive privilege.

B.7 Duty to Supplement and Provide Information [326 IAC 2-7-4(b)] [326 IAC 2-7-5(6)(E)] [326 IAC 2-7-6(6)]

- (a) The Permittee, upon becoming aware that any relevant facts were omitted or incorrect information was submitted in the permit application, shall promptly submit such supplementary facts or corrected information to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

The submittal by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall furnish to IDEM, OAQ, within a reasonable time, any information that IDEM, OAQ, may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The submittal by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34). Upon request, the Permittee shall also furnish to IDEM, OAQ, copies of records required to be kept by this permit or, for information claimed to be confidential, the Permittee may furnish such records directly to the U. S. EPA along with a claim of confidentiality. [326 IAC 2-7-5(6)(E)]
- (c) The Permittee may include a claim of confidentiality in accordance with 326 IAC 17.1. When furnishing copies of requested records directly to U. S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.8 Compliance with Permit Conditions [326 IAC 2-7-5(6)(A)] [326 IAC 2-7-5(6)(B)]

- (a) The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit is grounds for:
 - (1) Enforcement action;
 - (2) Permit termination, revocation and reissuance, or modification; or
 - (3) Denial of a permit renewal application.
 - (2) Noncompliance with any provision of this permit, except any provision specifically designated as not federally enforceable, constitutes a violation of the Clean Air Act.
- (c) It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
- (d) An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in Section B, Emergency Provisions.

B.9 Certification [326 IAC 2-7-4(f)] [326 IAC 2-7-6(1)] [326 IAC 2-7-5(3)(C)]

- (a) Where specifically designated by this permit or required by an applicable requirement, any application form, report, or compliance certification submitted shall contain certification by a responsible official of truth, accuracy, and completeness. This certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) One (1) certification shall be included, using the attached Certification Form, with each submittal requiring certification.
- (c) A responsible official is defined at 326 IAC 2-7-1(34).

B.10 Annual Compliance Certification [326 IAC 2-7-6(5)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. The initial certification shall cover the time period from the date of final permit issuance through December 31 of the same year. All subsequent certifications shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted in letter form no later than July 1 of each year to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Air Enforcement Branch - Indiana (AE-17J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
 - (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
 - (2) The compliance status;
 - (3) Whether compliance was continuous or intermittent;
 - (4) The methods used for determining the compliance status of the source, currently and over the reporting period consistent with 326 IAC 2-7-5(3); and
 - (5) Such other facts, as specified in Sections D of this permit, as IDEM, OAQ, may require to determine the compliance status of the source.

The submittal by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

B.11 Preventive Maintenance Plan [326 IAC 2-7-5(1),(3) and (13)] [326 IAC 2-7-6(1) and (6)]
[326 IAC 1-6-3]

- (a) If required by specific condition(s) in Section D of this permit, the Permittee shall prepare and maintain Preventive Maintenance Plans (PMPs) within ninety (90) days after issuance of this permit, including the following information on each facility:
 - (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
 - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
 - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.

If, due to circumstances beyond the Permittee's control, the PMPs cannot be prepared and maintained within the above time frame, the Permittee may extend the date an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

The PMP and the PMP extension notification do not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall implement the PMPs as necessary to ensure that failure to implement a PMP does not cause or contribute to a violation of any limitation on emissions or potential to emit.

- (c) A copy of the PMPs shall be submitted to IDEM, OAQ, upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ. IDEM, OAQ, may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or contributes to any violation. The PMP does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (d) Records of preventive maintenance shall be retained for a period of at least five (5) years. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.

B.12 Emergency Provisions [326 IAC 2-7-16]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describe the following:
 - (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
 - (2) The permitted facility was at the time being properly operated;
 - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
 - (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ, within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Telephone Number: 1-800-451-6027 (ask for Office of Air Quality, Compliance Section), or
Telephone Number: 317-233-5674 (ask for Compliance Section)
Facsimile Number: 317-233-5967
 - (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-7-5(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;

- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) IDEM, OAQ, may require that the Preventive Maintenance Plans required under 326 IAC 2-7-4-(c)(10) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ, by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-7 and any other applicable rules.
- (g) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.

B.13 Permit Shield [326 IAC 2-7-15] [326 IAC 2-7-20] [326 IAC 2-7-12]

- (a) Pursuant to 326 IAC 2-7-15, the Permittee has been granted a permit shield. The permit shield provides that compliance with the conditions of this permit shall be deemed in compliance with any applicable requirements as of the date of permit issuance, provided that either the applicable requirements are included and specifically identified in this permit or the permit contains an explicit determination or concise summary of a determination that other specifically identified requirements are not applicable. The Indiana statutes from IC 13 and rules from 326 IAC, referenced in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a Part 70 permit under 326 IAC 2-7 or for applicable requirements for which a permit shield has been granted.

This permit shield does not extend to applicable requirements which are promulgated after the date of issuance of this permit unless this permit has been modified to reflect such new requirements.
- (b) If, after issuance of this permit, it is determined that the permit is in nonconformance with an applicable requirement that applied to the source on the date of permit issuance, IDEM, OAQ, shall immediately take steps to reopen and revise this permit and issue a compliance order to the Permittee to ensure expeditious compliance with the applicable requirement until the permit is reissued. The permit shield shall continue in effect so long as the Permittee is in compliance with the compliance order.
- (c) No permit shield shall apply to any permit term or condition that is determined after issuance of this permit to have been based on erroneous information supplied in the permit application. Erroneous information means information that the Permittee knew to be false, or in the exercise of reasonable care should have been known to be false, at the time the information was submitted.

- (d) Nothing in 326 IAC 2-7-15 or in this permit shall alter or affect the following:
- (1) The provisions of Section 303 of the Clean Air Act (emergency orders), including the authority of the U.S. EPA under Section 303 of the Clean Air Act;
 - (2) The liability of the Permittee for any violation of applicable requirements prior to or at the time of this permit's issuance;
 - (3) The applicable requirements of the acid rain program, consistent with Section 408(a) of the Clean Air Act; and
 - (4) The ability of U.S. EPA to obtain information from the Permittee under Section 114 of the Clean Air Act.
- (e) This permit shield is not applicable to any change made under 326 IAC 2-7-20(b)(2) (Sections 502(b)(10) of the Clean Air Act changes) and 326 IAC 2-7-20(c)(2) (trading based on State Implementation Plan (SIP) provisions).
- (f) This permit shield is not applicable to modifications eligible for group processing until after IDEM, OAQ, has issued the modifications. [326 IAC 2-7-12(c)(7)]
- (g) This permit shield is not applicable to minor Part 70 permit modifications until after IDEM, OAQ, has issued the modification. [326 IAC 2-7-12(b)(7)]

B.14 Prior Permits Superseded [326 IAC 2-1.1-9.5]

- (a) All terms and conditions of previous permits issued pursuant to permitting programs approved into the state implementation plan have been either
- (1) incorporated as originally stated,
 - (2) revised, or
 - (3) deleted
- by this permit.
- (b) All previous registrations and permits are superseded by this permit.

B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-7-5(3)(C)(ii)]

- (a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provisions), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent. A deviation required to be reported pursuant to an applicable requirement that exists independent of this permit, shall be reported according to the schedule stated in the applicable requirement and does not need to be included in this report.

The Quarterly Deviation and Compliance Monitoring Report does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit.
- (c) Emergencies shall be included in the Quarterly Deviation and Compliance Monitoring Report.

B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination [326 IAC 2-7-5(6)(C)]
[326 IAC 2-7-8(a)] [326 IAC 2-7-9]

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a Part 70 permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-7-5(6)(C)] The notification by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM, OAQ, determines any of the following:
 - (1) That this permit contains a material mistake.
 - (2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.
 - (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-7-9(a)(3)]
- (c) Proceedings by IDEM, OAQ, to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-7-9(b)]
- (d) The reopening and revision of this permit, under 326 IAC 2-7-9(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM, OAQ, at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM, OAQ, may provide a shorter time period in the case of an emergency. [326 IAC 2-7-9(c)]

B.17 Permit Renewal [326 IAC 2-7-4]

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ, and shall include the information specified in 326 IAC 2-7-4. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(21) and 326 IAC 2-7-1(40). The renewal application does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

- (b) Timely Submittal of Permit Renewal [326 IAC 2-7-4(a)(1)(D)]
 - (1) A timely renewal application is one that is:

- (A) Submitted at least nine (9) months prior to the date of the expiration of this permit; and
 - (B) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (2) If IDEM, OAQ, upon receiving a timely and complete permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect, including any permit shield provided in 326 IAC 2-7-15, until the renewal permit has been issued or denied.
- (c) **Right to Operate After Application for Renewal [326 IAC 2-7-3]**
If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-7 until IDEM, OAQ, takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ, any additional information identified as being needed to process the application.
- (d) **United States Environmental Protection Agency Authority [326 IAC 2-7-8(e)]**
If IDEM, OAQ, fails to act in a timely way on a Part 70 permit renewal, the U.S. EPA may invoke its authority under Section 505(e) of the Clean Air Act to terminate or revoke and reissue a Part 70 permit.

B.18 Permit Amendment or Modification [326 IAC 2-7-11] [326 IAC 2-7-12]

- (a) Permit amendments and modifications are governed by the requirements of 326 IAC 2-7-11 or 326 IAC 2-7-12 whenever the Permittee seeks to amend or modify this permit.
- (b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

Any such application shall be certified by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request.
[326 IAC 2-7-11(c)(3)]

**B.19 Permit Revision Under Economic Incentives and Other Programs [326 IAC 2-7-5(8)]
[326 IAC 2-7-12 (b)(2)]**

- (a) No Part 70 permit revision shall be required under any approved economic incentives, marketable Part 70 permits, emissions trading, and other similar programs or processes for changes that are provided for in a Part 70 permit.
- (b) Notwithstanding 326 IAC 2-7-12(b)(1)(D)(i) and 326 IAC 2-7-12(c)(1), minor Part 70 permit modification procedures may be used for Part 70 modifications involving the use of economic incentives, marketable Part 70 permits, emissions trading, and other similar approaches to the extent that such minor Part 70 permit modification procedures are explicitly provided for

in the applicable State Implementation Plan (SIP) or in applicable requirements promulgated or approved by the U.S. EPA.

B.20 Operational Flexibility [326 IAC 2-7-20] [326 IAC 2-7-10.5]

(a) The Permittee may make any change or changes at the source that are described in 326 IAC 2-7-20(b), (c), or (e), without a prior permit revision, if each of the following conditions is met:

- (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
- (2) Any preconstruction approval required by 326 IAC 2-7-10.5 has been obtained;
- (3) The changes do not result in emissions which exceed the emissions allowable under this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
- (4) The Permittee notifies the:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and

- (5) The Permittee maintains records on-site which document, on a rolling five (5) year basis, all such changes and emissions trading that are subject to 326 IAC 2-7-20(b), (c), or (e) and makes such records available, upon reasonable request, for public review.

Such records shall consist of all information required to be submitted to IDEM, OAQ, in the notices specified in 326 IAC 2-7-20(b), (c)(1), and (e)(2).

(b) The Permittee may make Section 502(b)(10) of the Clean Air Act changes (this term is defined at 326 IAC 2-7-1(36)) without a permit revision, subject to the constraint of 326 IAC 2-7-20(a). For each such Section 502(b)(10) of the Clean Air Act change, the required written notification shall include the following:

- (1) A brief description of the change within the source;
- (2) The date on which the change will occur;
- (3) Any change in emissions; and
- (4) Any permit term or condition that is no longer applicable as a result of the change.

The notification which shall be submitted is not considered an application form, report or compliance certification. Therefore, the notification by the Permittee does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (c) Emission Trades [326 IAC 2-7-20(c)]
The Permittee may trade increases and decreases in emissions in the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-7-20(c).
- (d) Alternative Operating Scenarios [326 IAC 2-7-20(d)]
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-7-5(9). No prior notification of IDEM, OAQ, or U.S. EPA is required.

B.21 Source Modification Requirement [326 IAC 2-7-10.5]

A modification, construction, or reconstruction is governed by 326 IAC 2 and 326 IAC 2-7-10.5.

B.22 Inspection and Entry [326 IAC 2-7-6] [IC 13-14-2-2]

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a Part 70 source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) Have access to and copy any records that must be kept under the conditions of this permit;
- (c) Inspect any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
- (d) Sample or monitor substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
- (e) Utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

B.23 Transfer of Ownership or Operational Control [326 IAC 2-7-11]

- (a) The Permittee must comply with the requirements of 326 IAC 2-7-11 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

The application which shall be submitted by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

B.24 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-7-5(7)] [326 IAC 2-1.1-7]

- (a) The Permittee shall pay annual fees to IDEM, OAQ, within thirty (30) calendar days of receipt of a billing. Pursuant to 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM, OAQ, the applicable fee is due April 1 of each year.
- (b) Except as provided in 326 IAC 2-7-19(e), failure to pay may result in administrative enforcement action or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-0430 (ask for OAQ Billing, Licensing, and Training Section), to determine the appropriate permit fee.

B.25 Credible Evidence [326 IAC 2-7-5(3)] [326 IAC 2-7-6] [62 FR 8314]

Notwithstanding the conditions of this permit that state specific methods that may be used to demonstrate compliance with, or a violation of, applicable requirements, any person (including the Permittee) may also use other credible evidence to demonstrate compliance with, or a violation of, any term or condition of this permit.

SECTION C

SOURCE OPERATION CONDITIONS

Entire Source

Emission Limitations and Standards [326 IAC 2-7-5(1)]

C.1 Particulate Emission Limitations For Processes with Process Weight Rates Less Than One Hundred (100) pounds per hour [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2(e)(2), particulate emissions from any process not exempt under 326 IAC 6-3-1(b) or (c) which has a maximum process weight rate less than 100 pounds per hour and the methods in 326 IAC 6-3-2(b) through (d) do not apply shall not exceed 0.551 pounds per hour.

C.2 Opacity [326 IAC 5-1]

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

C.3 Open Burning [326 IAC 4-1] [IC 13-17-9]

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1. 326 IAC 4-1-3 (a)(2)(A) and (B) are not federally enforceable.

C.4 Incineration [326 IAC 4-2] [326 IAC 9-1-2]

The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and 326 IAC 9-1-2. 326 IAC 9-1-2 is not federally enforceable.

C.5 Fugitive Dust Emissions [326 IAC 6-4]

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions). 326 IAC 6-4-2(4) is not federally enforceable.

C.6 Operation of Equipment [326 IAC 2-7-6(6)]

Except as otherwise provided by statute or rule, or in this permit, all air pollution control equipment listed in this permit and used to comply with an applicable requirement shall be operated at all times that the emission units vented to the control equipment are in operation.

C.7 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

- (a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.
- (b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or

before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:

- (1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or
- (2) If there is a change in the following:
 - (A) Asbestos removal or demolition start date;
 - (B) Removal or demolition contractor; or
 - (C) Waste disposal site.
- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).
- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management
Asbestos Section, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification by the "responsible official" as defined by 326 IAC 2-7-1(34). The notifications do not require a certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (e) **Procedures for Asbestos Emission Control**
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-4, emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) **Indiana Accredited Asbestos Inspector**
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement that the inspector be accredited, pursuant to the provisions of 40 CFR 61, Subpart M, is federally enforceable.

Testing Requirements [326 IAC 2-7-6(1)]

C.8 Performance Testing [326 IAC 3-6]

- (a) All testing shall be performed according to the provisions of 326 IAC 3-6 (Source Sampling Procedures), except as provided elsewhere in this permit, utilizing any applicable procedures and analysis methods specified in 40 CFR 51, 40 CFR 60, 40 CFR 61, 40 CFR 63, 40 CFR 75, or other procedures approved by IDEM, OAQ.

A test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ, if the source submits to IDEM, OAQ, a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

Compliance Requirements [326 IAC 2-1.1-11]

C.9 Compliance Requirements [326 IAC 2-1.1-11]

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

Compliance Monitoring Requirements [326 IAC 2-7-5(1)] [326 IAC 2-7-6(1)]

C.10 Compliance Monitoring [326 IAC 2-7-5(3)] [326 IAC 2-7-6(1)]

Unless otherwise specified in this permit, all monitoring and record keeping requirements not already legally required shall be implemented within thirty (30) days of permit issuance. If required by Section D, the Permittee shall be responsible for installing any necessary equipment and initiating any required monitoring related to that equipment. If due to circumstances beyond its control, that equipment cannot be installed and operated within thirty (30) days, the Permittee may extend the compliance schedule related to the equipment for an additional thirty (30) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

in writing, prior to the end of the initial thirty (30) day compliance schedule, with full justification of the reasons for the inability to meet this date.

The notification which shall be submitted by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

Unless otherwise specified in the approval for the new emission unit(s), compliance monitoring for new emission units or emission units added through a source modification shall be implemented when operation begins.

C.11 Monitoring Methods [326 IAC 3] [40 CFR 60] [40 CFR 63]

Any monitoring or testing required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, 40 CFR 60 Appendix B, 40 CFR 63, or other approved methods as specified in this permit.

Corrective Actions and Response Steps [326 IAC 2-7-5] [326 IAC 2-7-6]

C.12 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

(a) The Permittee shall prepare written emergency reduction plans (ERPs) consistent with safe operating procedures.

(b) These ERPs shall be submitted for approval to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

within ninety (90) days after the date of issuance of this permit.

The ERP does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

(c) If the ERP is disapproved by IDEM, OAQ, the Permittee shall have an additional thirty (30) days to resolve the differences and submit an approvable ERP.

(d) These ERPs shall state those actions that will be taken, when each episode level is declared, to reduce or eliminate emissions of the appropriate air pollutants.

(e) Said ERPs shall also identify the sources of air pollutants, the approximate amount of reduction of the pollutants, and a brief description of the manner in which the reduction will be achieved.

(f) Upon direct notification by IDEM, OAQ, that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level. [326 IAC 1-5-3]

C.13 Risk Management Plan [326 IAC 2-7-5(12)] [40 CFR 68.215]

If a regulated substance, subject to 40 CFR 68, is present at a source in more than a threshold quantity, 40 CFR 68 is an applicable requirement and the Permittee shall submit:

(a) A compliance schedule for meeting the requirements of 40 CFR 68; or

(b) As a part of the annual compliance certification submitted under 326 IAC 2-7-6(5), a certification statement that the source is in compliance with all the requirements of 40 CFR 68, including the registration and submission of a Risk Management Plan (RMP).

All documents submitted pursuant to this condition shall include the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

C.14 Compliance Response Plan - Preparation, Implementation, Records, and Reports [326 IAC 2-7-5]
[326 IAC 2-7-6]

- (a) The Permittee is required to prepare a Compliance Response Plan (CRP) for each compliance monitoring condition of this permit. A CRP shall be submitted to IDEM, OAQ upon request. The CRP shall be prepared within ninety (90) days after issuance of this permit by the Permittee, supplemented from time to time by the Permittee, maintained on site, and comprised of:
- (1) Reasonable response steps that may be implemented in the event that a response step is needed pursuant to the requirements of Section D of this permit; and an expected timeframe for taking reasonable response steps.
 - (2) If, at any time, the Permittee takes reasonable response steps that are not set forth in the Permittee's current Compliance Response Plan and the Permittee documents such response in accordance with subsection (e) below, the Permittee shall amend its Compliance Response Plan to include such response steps taken.
- (b) For each compliance monitoring condition of this permit, reasonable response steps shall be taken when indicated by the provisions of that compliance monitoring condition as follows:
- (1) Reasonable response steps shall be taken as set forth in the Permittee's current Compliance Response Plan; or
 - (2) If none of the reasonable response steps listed in the Compliance Response Plan is applicable or responsive to the excursion, the Permittee shall devise and implement additional response steps as expeditiously as practical. Taking such additional response steps shall not be considered a deviation from this permit so long as the Permittee documents such response steps in accordance with this condition.
 - (3) If the Permittee determines that additional response steps would necessitate that the emissions unit or control device be shut down, the IDEM, OAQ shall be promptly notified of the expected date of the shut down, the status of the applicable compliance monitoring parameter with respect to normal, and the results of the actions taken up to the time of notification.
 - (4) Failure to take reasonable response steps shall constitute a deviation from the permit.
- (c) The Permittee is not required to take any further response steps for any of the following reasons:
- (1) A false reading occurs due to the malfunction of the monitoring equipment and prompt action was taken to correct the monitoring equipment.
 - (2) The Permittee has determined that the compliance monitoring parameters established in the permit conditions are technically inappropriate, has previously submitted a request for a minor permit modification to the permit, and such request has not been denied.
 - (3) An automatic measurement was taken when the process was not operating.
 - (4) The process has already returned or is returning to operating within "normal" parameters and no response steps are required.
- (d) When implementing reasonable steps in response to a compliance monitoring condition, if the Permittee determines that an exceedance of an emission limitation has occurred, the

Permittee shall report such deviations pursuant to Section B-Deviations from Permit Requirements and Conditions.

- (e) The Permittee shall record all instances when response steps are taken. In the event of an emergency, the provisions of 326 IAC 2-7-16 (Emergency Provisions) requiring prompt corrective action to mitigate emissions shall prevail.
- (f) Except as otherwise provided by a rule or provided specifically in Section D, all monitoring as required in Section D shall be performed when the emission unit is operating, except for time necessary to perform quality assurance and maintenance activities.

C.15 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-7-5] [326 IAC 2-7-6]

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM, OAQ, within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.
- (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM, OAQ that retesting in one-hundred and twenty (120) days is not practicable, IDEM, OAQ may extend the retesting deadline.
- (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The documents submitted pursuant to this condition do require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

C.16 Emission Statement [326 IAC 2-7-5(3)(C)(iii)] [326 IAC 2-7-5(7)] [326 IAC 2-7-19(c)] [326 IAC 2-6]

- (a) In accordance with the compliance schedule specified in 326 IAC 2-6-3(b)(2), starting in 2005 and every three (3) years thereafter, the Permittee shall submit by July 1 an emission statement covering the previous calendar year. The emission statement shall contain, at a minimum, the information specified in 326 IAC 2-6-4(c) and shall meet the following requirements:
 - (1) Indicate estimated actual emissions of all pollutants listed in 326 IAC 2-6-4(a);
 - (2) Indicate estimated actual emissions of regulated pollutants as defined by 326 IAC 2-7-1 (32) ("Regulated pollutant, which is used only for purposes of Section 19 of this rule") from the source, for purposes of fee assessment.

The statement must be submitted to:

Indiana Department of Environmental Management
Technical Support and Modeling Section, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

The emission statement does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) The emission statement required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.

C.17 General Record Keeping Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-6]

- (a) Records of all required data, reports and support information shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.
- (b) Unless otherwise specified in this permit, all record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

C.18 General Reporting Requirements [326 IAC 2-7-5(3)(C)] [326 IAC 2-1.1-11]

- (a) The source shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported. This report shall be submitted within thirty (30) days of the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (b) The report required in (a) of this condition and reports required by conditions in Section D of this permit shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204
- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (d) Unless otherwise specified in this permit, all reports required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. All reports do require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (e) The first report shall cover the period commencing on the date of issuance of this permit and ending on the last day of the reporting period. Reporting periods are based on calendar years.

Stratospheric Ozone Protection

C.19 Compliance with 40 CFR 82 and 326 IAC 22-1

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with the standards for recycling and emissions reduction:

- (a) Persons opening appliances for maintenance, service, repair, or disposal must comply with the required practices pursuant to 40 CFR 82.156.
- (b) Equipment used during the maintenance, service, repair, or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to 40 CFR 82.158.
- (c) Persons performing maintenance, service, repair, or disposal of appliances must be certified by an approved technician certification program pursuant to 40 CFR 82.161.

SECTION D.1 FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Hand Paint Spray Booths

- (a) one (1) paint spray booth, identified as PT537, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 20 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through three (3) stacks, identified as 537-P-1, 537-P-2, 537-O-1;
- (b) one (1) paint spray booth, identified as PT538, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through four (4) stacks, identified as 538-P-1, 538-P-2, 538-P-3, 538-O-1;
- (c) one (1) paint spray booth, identified as PT539, constructed in 2001, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 24 plastic automotive trim pieces per hour, using a closed loop internal mix system and a water wash system for overspray control, and exhausting through four (4) stacks, identified as 539-P-1, 539-P-2, 539-P-3, 539-O-1;

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.1.1 Volatile Organic Compounds (VOC) [326 IAC 8-1-6]

Pursuant to CP-133-5802-00019, issued October 7, 1996, the best available control technology (BACT) for the spray coating of plastic automobile trim in PT537, PT538, and PT539 shall be the use of a high volume low pressure (HVLP) spray gun with a closed-loop internal mix manifold system at all times during which this process is operated. The total amount of volatile organic compounds (VOC) delivered to the applicators in PT537, PT538, and PT539 shall not exceed 34.2 tons per twelve (12) consecutive month period. This usage limit is equivalent to 34.2 tons of VOC per twelve (12) consecutive month period.

D.1.2 Particulate [326 IAC 6-3-2(d)]

Pursuant to 326 IAC 6-3-2(d), particulate from each surface coating facility shall be controlled by a closed loop internal mix / waterwash, and the Permittee shall operate the control device in accordance with manufacturer's specifications.

D.1.3 General Provisions Relating to HAPs [326 IAC 20-1] [40 CFR Part 63, Subpart A] [Table 2 to 40 CFR Part 63, Subpart PPPP] [40 CFR 63.4501]

- (a) The provisions of 40 CFR Part 63, Subpart A - General Provisions, which are incorporated by reference as 326 IAC 20-1-1, apply to the affected source, except when otherwise specified by Table 2 to 40 CFR Part 63, Subpart PPPP. The Permittee must comply with these requirements no later than April 19, 2004, the effective date of the National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products.
- (b) Since the applicable requirements associated with the compliance options are not included and specifically identified in this permit, the permit shield authorized by the B section of this permit in the condition titled Permit Shield, and set out in 326 IAC 2-7-15 does not apply to paragraph (a) of this condition

D.1.4 National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products [40 CFR Part 63, Subpart PPPP] [40 CFR 63.4481] [40 CFR 63.4482]

- (a) The provisions of 40 CFR Part 63, Subpart PPPP (National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products) apply to the affected source. A copy of this rule is available on the US EPA Air Toxics Website at <http://www.epa.gov/ttn/atw/plastic/plasticpg.html>. Pursuant to 40 CFR 63.4483(b), the

Permittee must comply with these requirements no later than three (3) years after April 19, 2004, the effective date of 40 CFR Part 63, Subpart PPPP.

- (b) This subpart applies to the surface coating of any plastic parts or products, as described in 40 CFR 63.4481, paragraph (a)(1), and it includes the following subcategories:
 - (1) General use coating subcategory;
 - (2) Automotive lamp coating subcategory;
 - (3) TPO coating subcategory;
 - (4) Assembled on-road vehicle coating subcategory; and
 - (5) These subcategories are further defined in 40 CFR 63.4481, paragraphs (a)(2) through (5).
- (c) The following emissions units comprise the affected source that is subject to 40 CFR 63, Subpart PPPP:
 - (1) All coating operations as defined in 40 CFR 63.4581;
 - (2) All storage containers and mixing vessels in which coatings, thinners and/or other additives, and cleaning materials are stored or mixed;
 - (3) All manual and automated equipment and containers used for conveying coatings, thinners and/or other additives, and cleaning materials; and
 - (4) All storage containers and all manual and automated equipment and containers used for conveying waste materials generated by a coating operation.
- (d) Terminology used in this section are defined in the CAA, in 40 CFR Part 63, Section 63.2, and in 40 CFR 63.4581, which are incorporated by reference.

D.1.5 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for these facilities and any control devices.

Compliance Determination Requirements

D.1.6 Volatile Organic Compounds (VOC)

Compliance with the VOC content and usage limitations contained in Condition D.1.1 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) using formulation data supplied by the coating manufacturer.

D.1.7 Volatile Organic Compounds (VOC)

Compliance with Condition D.1.1 shall be demonstrated within 30 days of the end of each month based on the total volatile organic compound usage for the twelve (12) month period.

Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

D.1.8 Monitoring

- (a) Daily inspections shall be performed to verify that the water level of the water pans meet the manufacturer's recommended level. To monitor the performance of the water pans, the water level of the pans shall be maintained weekly at a level where surface agitation indicates impact of the air flow. Water shall be kept free of solids and floating material that reduces the

capture efficiency of the water pan. To monitor the performance of the baffles, weekly inspections of the baffle panels shall be conducted to verify placement and configuration meet recommendations of the manufacturer. In addition, weekly observations shall be made of the overspray from the surface coating booth stacks (Stack IDs 537-P-1, 537-P-2, 537-O-1, 538-P-1, 538-P-2, 538-P-3, 538-O-1, 539-P-1, 539-P-2, 539-P-3, and 539-O-1) while one or more of the booths are in operation. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a deviation from this permit.

- (b) Monthly inspections shall be performed of the coating emissions from the stacks and the presence of overspray on the rooftops and the nearby ground. The Compliance Response Plan for these units shall contain troubleshooting contingency and response steps for when a noticeable change in overspray emission, or evidence of overspray emission is observed. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance Monitoring Plan - Failure to Take Response Steps, shall be considered a deviation from this permit.

During periods of inclement weather, the Permittee may perform the required visible emissions notations from the ground, observing and noting whether or not there are visible emissions exhausted from the stack(s) and if there is any overspray accumulation on the ground.

Upon determination that the weather has improved sufficiently to allow safe inspection of the rooftops, the Permittee shall inspect and note whether or not there is overspray accumulation on the rooftops.

If the Permittee performs the visible emissions notations during periods of inclement weather, the Permittee shall include in the required records, a statement that visible emissions were observed from the ground where the stack itself was not clearly visible, a description of the type of inclement weather which prevented viewing the stack from the rooftops, and the date the rooftops were observed.

- (c) Additional inspections and preventive measures shall be performed as prescribed in the Preventive Maintenance Plan.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.1.9 Record Keeping Requirements

- (a) To document compliance with Condition D.1.1, the Permittee shall maintain records in accordance with (1) through (5) below. Records maintained for (1) through (5) shall be taken monthly and shall be complete and sufficient to establish compliance with the VOC usage limits and/or the VOC emission limits established in Condition D.1.1.
- (1) The amount and VOC content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
 - (2) A log of the dates of use;
 - (3) The cleanup solvent usage for each month;
 - (4) The total VOC usage for each month; and

- (5) The weight of VOCs emitted for each compliance period.
- (b) To document compliance with Condition D.1.8, the Permittee shall maintain a log of weekly overspray observations, daily and monthly inspections, and those additional inspections prescribed by the Preventative Maintenance Plan.
- (c) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.1.10 Notification Requirements [40 CFR 63.4510]

- (a) General. The Permittee must submit the notifications in 40 CFR 63.7(b) and (c), 63.8(f)(4), and 63.9(b) through (e) and (h) that apply to the source by the dates specified in those sections, except as provided in paragraphs (b) and (c) of this section.
- (b) Initial Notification. The Permittee must submit the existing affected source initial notification no later than 1 year after the effective date of 40 CFR Part 63, Subpart PPPP. If the Permittee is complying with another NESHAP that constitutes the predominant activity at the affected facility under 40 CFR 63.4481(e)(2) to constitute compliance with this subpart for the plastic coating operations, then the Permittee must include a statement to this effect in the initial notification and no other notifications are required under this subpart.
- (c) Notification of Compliance Status. The Permittee must submit the notification of compliance status required by 40 CFR 63.9(h) no later than 30 calendar days following the end of the initial compliance period described in 40 CFR 63.4540, 40 CFR 63.4550, or 40 CFR 63.4560 that applies to the affected source. The notification of compliance status must contain the information specified in 40 CFR 63.4510, paragraphs (c)(1) through (11) and in 40 CFR 63.9(h).

D.1.11 Record Keeping Requirements [40 CFR 63.4530] [40 CFR 63.4531] [40 CFR 63.10(b)(1)]

- (a) The Permittee must collect and keep records of the data and information specified in 40 CFR 63.4530, paragraphs (c) through (h). Failure to collect and keep these records is a deviation from the applicable standard.
- (b) The records must be in a form suitable and readily available for expeditious review. Where appropriate, the records may be maintained as electronic spreadsheets or as a database. The Permittee must keep each record for 5 years following the date of each occurrence, measurement, maintenance, corrective action, report, or record. The Permittee must keep each record on-site for at least 2 years after the date of each occurrence, measurement, maintenance, corrective action, report, or record. The Permittee may keep the records off-site for the remaining 3 years.

D.1.12 Reporting Requirements [40 CFR 63.4520]

The Permittee must submit semiannual compliance reports for each affected source according to the requirements of 40 CFR 63.4520, paragraphs (a)(1) through (7). The semiannual compliance reporting requirements may be satisfied by reports required under other parts of the Clean Air Act (CAA), as specified in 40 CFR 63.4520, paragraph (a)(2).

D.1.13 Requirement to Submit a Significant Permit Modification Application [326 IAC 2-7-12] [326 IAC 2-7-5]

The Permittee shall submit an application for a significant permit modification to IDEM, OAQ to include information regarding which compliance option or options will be chosen in the Title V permit.

- (a) The significant permit modification application shall be consistent with 326 IAC 2-7-12, including information sufficient for IDEM, OAQ to incorporate into the Title V permit the applicable requirements of 40 CFR 63, Subpart PPPP, a description of the affected source and activities subject to the standard, and a description of how the Permittee will meet the applicable requirements of the standard.

- (b) The significant permit modification application shall be submitted no later than twenty-seven (27) months after the effective date of 40 CFR 63, Subpart PPPP.
- (c) The significant permit modification application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

D.1.14 Reporting Requirements

A quarterly summary of the information to document compliance with Condition D.1.1 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

SECTION D.2

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Robot Paint Spray Lines

- (d) one (1) robot paint spray system, identified as PT531, consisting of the following:
 - (1) one (1) Primer coat spray booth (NPP), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPP-1 and NPP-2;
 - (2) one (1) Primer coat flash/setting zone, exhausting through one (1) stack, identified as NPP-3;
 - (3) one (1) Base coat spray booth (NPB), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through three (3) stacks, identified as NPB-1, NPB-2, and NPB-3;
 - (4) one (1) Base coat flash/setting zone, exhausting through one (1) stack, identified as NPB-4;
 - (5) one (1) Clear coat spray booth (NPC), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 40 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPC-1 and NPC-2;
 - (6) one (1) Clear coat flash/setting zone, exhausting through one (1) stack, identified as NPC-3;
 - (7) two (2) natural gas-fired bake ovens, each with a maximum heat input of 0.8 million (MM) British thermal units (Btu) per hour;

Note: The robot paint spray system was previously referred to as the Large Parts Line in CP-133-8608-00019, issued October 6, 1997.
- (e) one (1) hand paint spray booth, identified as PT532, consisting of the following:
 - (1) one (1) hand paint spray booth, identified as PT532 (NPS), constructed in 1999, utilizing a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 25 plastic automotive trim pieces per hour, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks, identified as NPS-1 and NPS-2;
 - (2) one (1) natural gas-fired bake oven (NPSO), constructed in 1999, with a maximum heat input of 0.4 MMBtu per hour, exhausting through one (1) stack, identified as NPSO-1; and
 - (3) one (1) hand paint spray booth cool down (NPSD), exhausting through one (1) stack, identified as NPSD-1;
- (f) one (1) robot paint spray line, identified as PT536, constructed in 2001, consisting of the following:
 - (1) one (1) Loading Clean Room;
 - (2) one (1) Primer coat pump room, exhausting through one (1) stack (ID Stack #1);
 - (3) one (1) Primer coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through one (1) stack (ID Stack #2);
 - (4) one (1) Primer coat flash off tunnel, exhausting through one (1) stack (ID Stack #3);
 - (5) one (1) Base coat pump room, exhausting through one (1) stack (ID Stack #4);
 - (6) one (1) Base coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through two (2) stacks (ID Stacks #5 and #6);
 - (7) one (1) Base coat flash off tunnel, exhausting through one (1) stack (ID Stack #7);
 - (8) one (1) Clear coat pump room, exhausting through one (1) stack (ID Stack #8);
 - (9) one (1) Clear coat spray booth, equipped with a closed loop internal mix system and a water wash system for particulate matter overspray control, exhausting through one (1) stack (ID Stack #9);
 - (10) one (1) Clear coat flash off tunnel, exhausting through one (1) stack (ID Stack #10);
 - (11) one (1) convection curing oven, exhausting through three (3) stacks (ID Stacks #11, #12, and #13), equipped with two (2) indirect natural gas-fired heater boxes, each rated at 1.5 million

<p>British thermal units (MMBtu) per hour, exhausting through two (2) stacks (ID Stacks #14 and #15); and</p> <p>(12) one (1) clean room for unloading of painted parts.</p> <p>(g) One (1) robot paint line, identified as PT540, utilizing a High Volume Low Pressure (HVLP) spray application system coating a maximum of 17.1 garnish assembly trunks per hour and 14.6 spoiler assembly roofs per hour, equipped with a closed loop internal mix manifold system and a water-wash system for particulate matter overspray control, exhausting through three (3) stacks, identified as 540-S, 540-SW and 540-NW. The paint line also includes one (1) convection oven (to cure the painted parts), utilizing two (2) 10 inch exhaust ducts, with a rain cap.</p> <p>North Paint Mix Room</p> <p>(h) one (1) Mask washer, identified as Mask Washer A, constructed in 2003, using a maximum of 22.5 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-A-1;</p> <p>(i) one (1) Mask washer, identified as Mask Washer B, constructed in 1999, using a maximum of 6.0 gallons per day of solvent, exhausting through one (1) stack, identified as PMR-B-1;</p> <p>(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)</p>

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.2.1 Volatile Organic Compounds (VOC) [326 IAC 8-1-6]

- (a) Pursuant to CP-133-8608-00019, issued October 6, 1997, the best available control technology (BACT) for the two (2) paint lines (the robot paint spray system, identified as PT531, and the hand paint spray booth, identified as PT532) shall be:
- (1) the use of a high volume low pressure (HVLP) spray application system with a closed loop internal mix manifold system;
 - (2) the use of a water wash system for overspray control, consisting of a water fall and water pan, at all times during which the robot paint spray system, identified as PT531, and the hand paint spray booth, identified as PT532, are in operation; and
 - (3) The total amount of VOC delivered to the applicators of the robot paint spray system, identified as PT531, and the hand paint spray booth, identified as PT532, shall not exceed 63.6 tons per twelve (12) consecutive month period. This usage limit is equivalent to 63.6 tons of VOC per twelve (12) consecutive month period.
- (b) Pursuant to Significant Source Modification No. 133-14228-00019, pending with the OAQ, the operation of the robot paint spray line, identified as PT536, without the use of add-on controls and with the following work practice and emission limitation will satisfy the BACT requirements:
- (1) The coatings applied in each of the primer coat spray booth, the base coat spray booth, and the clear coat spray booth shall be applied using High Volume Low Pressure (HVLP) Spray Application guns.

HVLP spray is the technology used to apply coating to substrate by means of coating application equipment which operates between one-tenth (0.1) and ten (10) pounds per square inch gauge (psig) air pressure measured dynamically at the center of the air cap and at the air horns of the spray system.
 - (2) The total usage of VOC in the primer coat spray booth, the base coat spray booth, and the clear coat spray booth shall not exceed 97.85 tons per twelve (12) consecutive month period. This usage limit is equivalent to 97.85 tons of VOC per twelve (12) consecutive month period.

- (c) Any change or modification which may increase potential to emit VOC from the robot paint line, identified as PT540 to 25 tons per year or more shall require approval from IDEM, OAQ, prior to making the change.

D.2.2 PSD Minor Limit [326 IAC 2-2] [40 CFR 52.21]

The total input of VOC to the robot paint spray system, identified as PT531, the hand paint spray booth, identified as PT532, and the robot paint spray line, identified as PT536, shall not exceed 138.07 tons per 12 consecutive month period, including coatings, dilution solvents, and cleaning solvents. This usage limit is required to limit the source-wide potential to emit of VOC to less than 250 tons per 12 consecutive month period. Compliance with this limit makes 326 IAC 2-2 (Prevention of Significant Deterioration) and 40 CFR 52.21 not applicable.

D.2.3 Volatile Organic Compounds and Hazardous Air Pollutants (HAPs) [326 IAC 2-4.1-1]

- (a) Pursuant to Agreed Order Case No. 2000-9022-A, the VOC and HAP input usage from Mask Washer A and Mask Washer B shall be limited to 4.74 tons per 12 consecutive month period with compliance determined at the end of each month.
- (b) Any change or modification which increases emissions from the robot paint spray system, identified as PT531, the hand paint spray booth, identified as PT532, or the robot paint spray line, identified as PT536, including Mask Washer B of any single HAP or any combination of HAPs to greater than 10 and 25 tons per year, respectively, shall be subject to the requirements of 326 IAC 2-4.1-1 and must be approved by the Office of Air Quality before such change can occur.

D.2.4 Particulate [326 IAC 6-3-2(d)]

Pursuant to 326 IAC 6-3-2(d), particulate from each surface coating facility shall be controlled by a closed loop internal mix / waterwash, and the Permittee shall operate the control device in accordance with manufacturer's specifications.

D.2.5 Volatile Organic Compounds (VOC) [326 IAC 8-3-2]

Pursuant to 326 IAC 8-3-2 (Cold Cleaner Operations), the Mask Washer B, which is a cold cleaning operation constructed after January 1, 1980, the owner or operator shall:

- (a) Equip the cleaner with a cover;
- (b) Equip the cleaner with a facility for draining cleaned parts;
- (c) Close the degreaser cover whenever parts are not being handled in the cleaner;
- (d) Drain cleaned parts for at least fifteen (15) seconds or until dripping ceases;
- (e) Provide a permanent, conspicuous label summarizing the operation requirements;
- (f) Store waste solvent only in covered containers and not dispose of waste solvent or transfer it to another party, in such a manner that greater than twenty percent (20%) of the waste solvent (by weight) can evaporate into the atmosphere.

D.2.6 Volatile Organic Compounds (VOC) [326 IAC 8-3-5]

- (a) Pursuant to 326 IAC 8-3-5(a) (Cold Cleaner Degreaser Operation and Control) for Mask Washers A and B, the owner or operator of a cold cleaner degreaser without remote solvent reservoirs constructed after July 1, 1990, shall ensure that the following requirements are met:
 - (1) Equip the degreaser with a cover. The cover must be designed so that it can be easily operated with one (1) hand if:

- (A) The solvent volatility is greater than two (2) kiloPascals (fifteen (15) millimeters of mercury or three-tenths (0.3) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F));
 - (B) The solvent is agitated; or
 - (C) The solvent is heated.
- (2) Equip the degreaser with a facility for draining cleaned articles. If the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F)), then the drainage facility must be internal such that articles are enclosed under the cover while draining. The drainage facility may be external for applications where an internal type cannot fit into the cleaning system.
 - (3) Provide a permanent, conspicuous label which lists the operating requirements outlined in subsection (b).
 - (4) The solvent spray, if used, must be a solid, fluid stream and shall be applied at a pressure which does not cause excessive splashing.
 - (5) Equip the degreaser with one (1) of the following control devices if the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F)), or if the solvent is heated to a temperature greater than forty-eight and nine-tenths degrees Celsius (48.9°C) (one hundred twenty degrees Fahrenheit (120°F)):
 - (A) A freeboard that attains a freeboard ratio of seventy-five hundredths (0.75) or greater.
 - (B) A water cover when solvent is used is insoluble in, and heavier than, water.
 - (C) Other systems of demonstrated equivalent control such as a refrigerated chiller or carbon adsorption. Such systems shall be submitted to the U.S. EPA as a SIP revision.
- (b) Pursuant to 326 IAC 8-3-5(b) (Cold Cleaner Degreaser Operation and Control), the owner or operator of a cold cleaning facility construction of which commenced after July 1, 1990, shall ensure that the following operating requirements are met:
 - (1) Close the cover whenever articles are not being handled in the degreaser.
 - (2) Drain cleaned articles for at least fifteen (15) seconds or until dripping ceases.
 - (3) Store waste solvent only in covered containers and prohibit the disposal or transfer of waste solvent in any manner in which greater than twenty percent (20%) of the waste solvent by weight could evaporate.

D.2.7 General Provisions Relating to HAPs [326 IAC 20-1] [40 CFR Part 63, Subpart A] [Table 2 to 40 CFR Part 63, Subpart P] [40 CFR 63.2398]

The provisions of 40 CFR Part 63, Subpart A General Provisions, which are incorporated by reference as 326 IAC 20-1-1, apply to the affected source, except when otherwise specified by Table 2 to 40 CFR Part 63, Subpart P. The Permittee must comply with these requirements on and

after the effective date of the National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products.

D.2.8 National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products [40 CFR Part 63, Subpart PPPP] [40 CFR 63.4481] [40 CFR 63.4482]

- (a) The provisions of 40 CFR Part 63, Subpart PPPP (National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products) apply to the affected source. A copy of this rule is available on the US EPA Air Toxics Website at <http://www.epa.gov/ttn/atw/plastic/plasticpg.html>. Pursuant to 40 CFR 63.4483(b), the Permittee must comply with these requirements on and after the date that is three (3) years after the effective date of 40 CFR Part 63, Subpart PPPP.
- (b) This subpart applies to the surface coating of any plastic parts or products, as described in 40 CFR 63.4481, paragraph (a)(1), and it includes the following subcategories:
 - (1) General use coating subcategory;
 - (2) Automotive lamp coating subcategory;
 - (3) TPO coating subcategory;
 - (4) Assembled on-road vehicle coating subcategory; and
 - (5) These subcategories are further defined in 40 CFR 63.4481, paragraphs (a)(2) through (5).
- (c) The following emissions units comprise the affected source that is subject to 40 CFR 63, Subpart PPPP:
 - (1) All coating operations as defined in 40 CFR 63.4581;
 - (2) All storage containers and mixing vessels in which coatings, thinners and/or other additives, and cleaning materials are stored or mixed;
 - (3) All manual and automated equipment and containers used for conveying coatings, thinners and/or other additives, and cleaning materials; and
 - (4) All storage containers and all manual and automated equipment and containers used for conveying waste materials generated by a coating operation.
- (d) Terminology used in this section are defined in the CAA, in 40 CFR Part 63, Section 63.2, and in 40 CFR 63.4581, which are incorporated by reference.

D.2.9 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for the robot paint line, PT540, robot paint spray system, identified as PT531, the hand paint spray booth, identified as PT532, and the robot paint spray line, identified as PT536 and their control devices.

Compliance Determination Requirements

D.2.10 Volatile Organic Compounds (VOC)

Compliance with the VOC content and usage limitations contained in Conditions D.2.1, D.2.2 and D.2.3 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) using formulation data supplied by the coating manufacturer.

D.2.11 VOC Emissions

Compliance with Conditions D.2.1, D.2.2 and D.2.3 shall be demonstrated within 30 days of the end of each month based on the total volatile organic compound usage for the twelve (12) month period. each month based on the total volatile organic compound usage for the twelve (12) month period.

Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

D.2.12 Monitoring

- (a) Daily inspections shall be performed to verify that the water level of the water pans meet the manufacturer's recommended level. To monitor the performance of the water pans, the water level of the pans shall be maintained weekly at a level where surface agitation indicates impact of the air flow. Water shall be kept free of solids and floating material that reduces the capture efficiency of the water pan. To monitor the performance of the baffles, weekly inspections of the baffle panels shall be conducted to verify placement and configuration meet recommendations of the manufacturer. In addition, weekly observations shall be made of the overspray from the surface coating booth stacks (NPP-1, NPP-2, NPB-1, NPB-2, NPB-3, NPC-1, NPC-2, NPS-1, NPS-2, #2, #5, #6, and #9, 540-S, 540-SW, and 540-NW) while one or more of the booths are in operation. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a deviation from this permit.
- (b) Monthly inspections shall be performed of the coating emissions from the stacks and the presence of overspray on the rooftops and the nearby ground. The Compliance Response Plan for these units shall contain troubleshooting contingency and response steps for when a noticeable change in overspray emission, or evidence of overspray emission is observed. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance Monitoring Plan - Failure to Take Response Steps, shall be considered a deviation from this permit.
- (c) Additional inspections and preventive measures shall be performed as prescribed in the Preventive Maintenance Plan.

Record Keeping and Reporting Requirement [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.2.13 Record Keeping Requirements

- (a) To document compliance with Conditions D.2.1, D.2.2, and D.2.3, the Permittee shall maintain records in accordance with (1) through (5) below. Records maintained for (1) through (5) shall be taken monthly and shall be complete and sufficient to establish compliance with the VOC usage limits and/or the VOC emission limits established in Conditions D.2.1 and D.2.2 and the maximum HAP emissions established in Condition D.2.3.
 - (1) The amount and VOC and HAP content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
 - (2) A log of the dates of use;
 - (3) The cleanup solvent usage for each month;
 - (4) The total VOC and HAP usage for each month; and

- (5) The weight of VOCs and HAPs emitted for each compliance period.
- (b) To document compliance with Condition D.2.12, the Permittee shall maintain a log of weekly overspray observations, daily and monthly inspections, and those additional inspections prescribed by the Preventive Maintenance Plan.
- (c) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.2.14 Notification Requirements [40 CFR 63.4510]

- (a) General. The Permittee must submit the notifications in 40 CFR 63.7(b) and (c), 63.8(f)(4), and 63.9(b) through (e) and (h) that apply to the source by the dates specified in those sections, except as provided in paragraphs (b) and (c) of this section.
- (b) Initial Notification. The Permittee must submit the existing affected source initial notification no later than 1 year after the effective date of 40 CFR Part 63, Subpart PPPP. If the Permittee is complying with another NESHAP that constitutes the predominant activity at the affected facility under 40 CFR 63.4481(e)(2) to constitute compliance with this subpart for the plastic coating operations, then the Permittee must include a statement to this effect in the initial notification and no other notifications are required under this subpart.
- (c) Notification of Compliance Status. The Permittee must submit the notification of compliance status required by 40 CFR 63.9(h) no later than 30 calendar days following the end of the initial compliance period described in 40 CFR 63.4540, 40 CFR 63.4550, or 40 CFR 63.4560 that applies to the affected source. The notification of compliance status must contain the information specified in 40 CFR 63.4510, paragraphs (c)(1) through (11) and in 40 CFR 63.9(h).

D.2.15 Record Keeping Requirements [40 CFR 63.4530] [40 CFR 63.4531] [40 CFR 63.10(b)(1)]

- (a) The Permittee must collect and keep records of the data and information specified in 40 CFR 63.4530, paragraphs (c) through (h). Failure to collect and keep these records is a deviation from the applicable standard.
- (b) The records must be in a form suitable and readily available for expeditious review. Where appropriate, the records may be maintained as electronic spreadsheets or as a database. The Permittee must keep each record for 5 years following the date of each occurrence, measurement, maintenance, corrective action, report, or record. The Permittee must keep each record on-site for at least 2 years after the date of each occurrence, measurement, maintenance, corrective action, report, or record. The Permittee may keep the records off-site for the remaining 3 years.

D.2.16 Reporting Requirements [40 CFR 63.4520]

The Permittee must submit semiannual compliance reports for each affected source according to the requirements of 40 CFR 63.4520, paragraphs (a)(1) through (7). The semiannual compliance reporting requirements may be satisfied by reports required under other parts of the Clean Air Act (CAA), as specified in 40 CFR 63.4520, paragraph (a)(2).

D.2.17 Requirement to Submit a Significant Permit Modification Application [326 IAC 2-7-12] [326 IAC 2-7-5]

The Permittee shall submit an application for a significant permit modification to IDEM, OAQ to include information regarding which compliance option or options will be chosen in the Title V permit.

- (a) The significant permit modification application shall be consistent with 326 IAC 2-7-12, including information sufficient for IDEM, OAQ to incorporate into the Title V permit the applicable requirements of 40 CFR 63, Subpart PPPP, a description of the affected source

and activities subject to the standard, and a description of how the Permittee will meet the applicable requirements of the standard.

- (b) The significant permit modification application shall be submitted no later than twenty-seven (27) months after the effective date of 40 CFR 63, Subpart PPPP.
- (c) The significant permit modification application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
Indianapolis, Indiana 46204

D.2.18 Reporting Requirements

A quarterly summary of the information to document compliance with Conditions D.2.1, D.2.2, and D.2.3 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

SECTION D.3 FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Insignificant Activities

- (a) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour including:
 - (1) one (1) natural gas-fired flexible water tube package boiler, located in the New Paint Room, constructed in 1999, with a maximum heat input of 9.0 MMBtu per hour, exhausting through one (1) stack, identified as NPBM-1 [326 IAC 6-2-4].
- (b) Degreasing operations that do not exceed 145 gallons per 12 months, except if subject to 326 IAC 20-6, including two (2) washers, identified as Tool & Die parts washer, and Maintenance parts washer, each with a maximum capacity of 100 gallons of solvent [326 IAC 8-3-2, 326 IAC 8-3-5]
- (c) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment [326 IAC 6-3-2].

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Boilers

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.3.1 Particulate Matter (PM) [326 IAC 6-2-4]

Pursuant to 326 IAC 6-2-4(a) (Particulate Matter Emission Limitations for Sources of Indirect Heating, the PM emissions from the 9.0 MMBtu per hour heat input boiler shall be limited to 0.6 pounds per MMBtu heat input.

Degreasing operations

Emission Limitations and Standards [326 IAC 2-7-5(1)] (Cold Cleaning Degreaser Operations)

D.3.2 Volatile Organic Compounds (VOC)

Pursuant to 326 IAC 8-3-2 (Cold Cleaner Operations) for cold cleaning operations constructed after January 1, 1980, the owner or operator shall:

- (a) Equip the cleaner with a cover;
- (b) Equip the cleaner with a facility for draining cleaned parts;
- (c) Close the degreaser cover whenever parts are not being handled in the cleaner;
- (d) Drain cleaned parts for at least fifteen (15) seconds or until dripping ceases;
- (e) Provide a permanent, conspicuous label summarizing the operation requirements;
- (f) Store waste solvent only in covered containers and not dispose of waste solvent or transfer it to another party, in such a manner that greater than twenty percent (20%) of the waste solvent (by weight) can evaporate into the atmosphere.

D.3.3 Volatile Organic Compounds (VOC)

- (a) Pursuant to 326 IAC 8-3-5(a) (Cold Cleaner Degreaser Operation and Control), the owner or operator of a cold cleaner degreaser without remote solvent reservoirs constructed after July 1, 1990, shall ensure that the following requirements are met:
- (1) Equip the degreaser with a cover. The cover must be designed so that it can be easily operated with one (1) hand if:
 - (A) The solvent volatility is greater than two (2) kiloPascals (fifteen (15) millimeters of mercury or three-tenths (0.3) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F));
 - (B) The solvent is agitated; or
 - (C) The solvent is heated.
 - (2) Equip the degreaser with a facility for draining cleaned articles. If the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F)), then the drainage facility must be internal such that articles are enclosed under the cover while draining. The drainage facility may be external for applications where an internal type cannot fit into the cleaning system.
 - (3) Provide a permanent, conspicuous label which lists the operating requirements outlined in subsection (b).
 - (4) The solvent spray, if used, must be a solid, fluid stream and shall be applied at a pressure which does not cause excessive splashing.
 - (5) Equip the degreaser with one (1) of the following control devices if the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F)), or if the solvent is heated to a temperature greater than forty-eight and nine-tenths degrees Celsius (48.9°C) (one hundred twenty degrees Fahrenheit (120°F)):
 - (A) A freeboard that attains a freeboard ratio of seventy-five hundredths (0.75) or greater.
 - (B) A water cover when solvent is used is insoluble in, and heavier than, water.
 - (C) Other systems of demonstrated equivalent control such as a refrigerated chiller or carbon adsorption. Such systems shall be submitted to the U.S. EPA as a SIP revision.
- (b) Pursuant to 326 IAC 8-3-5(b) (Cold Cleaner Degreaser Operation and Control), the owner or operator of a cold cleaning facility construction of which commenced after July 1, 1990, shall ensure that the following operating requirements are met:
- (1) Close the cover whenever articles are not being handled in the degreaser.
 - (2) Drain cleaned articles for at least fifteen (15) seconds or until dripping ceases.

- (3) Store waste solvent only in covered containers and prohibit the disposal or transfer of waste solvent in any manner in which greater than twenty percent (20%) of the waste solvent by weight could evaporate.
