Re: Emission Reduction Registration
 Review Request No.: 089-22449-00302

Dear Ms. Dorigan:

Bradburne, Briller & Johnson, LLC, on behalf of ASF-Keystone, Inc., located at 3761 Canal Street in East Chicago, Indiana, submitted a review request on December 15, 2005. The letter was submitted to re-evaluate the quantity of emission credits available for registration from shutdown of the ASF-Keystone facility on January 16, 2002.

Based on the information submitted on December 15, 2005, IDEM will update the amounts of registered emission reductions as outlined in the following table:

Summary of Registered Emission Credits (tons per year)

Pollutant:	Eligible Credits (tons/year)	Transferred Credits (tons/year)	Registered Credits (tons/year)
Carbon Monoxide (CO)	40.58	0	40.58
Nitrogen Oxides (NO _x)	71.30	0	71.30
Particulate Matter (PM)	55.46	0	55.46
Particulate Matter less than 10µm (PM ₁₀) *	33.78	0	33.78
Sulfur Dioxide (SO ₂)	4.94	0	4.94
Volatile Organic Compounds (VOC)	204.40	- 93.6	110.80

The Air Emission Credit Registry, located at www.emissionscredit.in.gov, will be updated to reflect registration of these reductions. Any rules or laws that become effective after the date of generation may reduce the amount of credits available for New Source Review emission offsets. Registration of these emission reductions and acknowledgement of this emission credit transfer is done to give information to others of the availability of possible emission credits. The registration of emission reductions and listing of emission credits in the registry reductions is advisory only, and not a determination that is binding on IDEM. IDEM makes determinations regarding the use of emission credits in New Source Review permit decisions.

Questions should be directed to me at 100 North Senate Avenue, Indianapolis, Indiana, 46204, or call (800) 451-6027, and ask for Kimberly Cottrell at extension 3-0870, or dial (317) 233-0870.

Sincerely,

A handwritten signature in cursive script, reading "Kimberly Cottrell".
