RE: E & B Paving / 003-23047-03125  
FROM: Nisha Sizemore  
Chief, Permits Branch  
Office of Air Quality

### Notice of Decision – Approval

Please be advised that on behalf of the Commissioner of the Department of Environmental Management, I have issued a decision regarding the enclosed matter. Pursuant to 326 IAC 2, this approval was effective immediately upon submittal of the application.

If you wish to challenge this decision, IC 4-21.5-3-7 requires that you file a petition for administrative review. This petition may include a request for stay of effectiveness and must be submitted to the Office of Environmental Adjudication, 100 North Senate Avenue, Government Center North, Room 1049, Indianapolis, IN 46204, **within eighteen (18) calendar days from the mailing of this notice**. The filing of a petition for administrative review is complete on the earliest of the following dates that apply to the filing:

- (1) the date the document is delivered to the Office of Environmental Adjudication (OEA);
- (2) the date of the postmark on the envelope containing the document, if the document is mailed to OEA by U.S. mail; or
- (3) The date on which the document is deposited with a private carrier, as shown by receipt issued by the carrier, if the document is sent to the OEA by private carrier.

The petition must include facts demonstrating that you are either the applicant, a person aggrieved or adversely affected by the decision or otherwise entitled to review by law. Please identify the permit, decision, or other order for which you seek review by permit number, name of the applicant, location, date of this notice and all of the following:

- (1) the name and address of the person making the request;
- (2) the interest of the person making the request;
- (3) identification of any persons represented by the person making the request;
- (4) the reasons, with particularity, for the request;
- (5) the issues, with particularity, proposed for considerations at any hearing; and
- (6) identification of the terms and conditions which, in the judgment of the person making the request, would be appropriate in the case in question to satisfy the requirements of the law governing documents of the type issued by the Commissioner.

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178. Callers from within Indiana may call toll-free at 1-800-451-6027, ext. 3-0178.

## FEDERALLY ENFORCEABLE STATE OPERATING PERMIT RENEWAL OFFICE OF AIR QUALITY

**E & B Paving, Inc.  
320 S. Thomas Road  
Ft. Wayne, Indiana 46804**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

**The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit is grounds for enforcement action; permit termination, revocation and reissuance, or modification; or denial of a permit renewal application. It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in Section B, Emergency Provisions.**

Indiana statutes from IC 13 and rules from 326 IAC, quoted in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a FESOP under 326 IAC 2-8.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-8 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: F003-23047-03125	
Issued by: Original signed by Nisha Sizemore, Chief Permits Branch Office of Air Quality	Issuance Date: February 20, 2007: Expiration Date: February 20, 2012

## SECTION A SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

### A.1 General Information [326 IAC 2-8-3(b)]

---

The Permittee owns and operates a stationary batch hot mix asphalt plant.

Authorized Individual:	Regulatory Affairs Director
Source Address:	320 S. Thomas Road, Ft. Wayne, IN 46804
Mailing Address:	286 W. 300 N, Anderson, IN 46012
General Source Phone Number:	(765) 643-5358
SIC Code:	2951
County Location:	Allen
Source Location Status:	Nonattainment for 8-Hour Ozone Attainment for all other criteria pollutants
Source Status:	Federally Enforceable State Operating Permit Program Minor Source, under PSD and Emission Offset Rules Minor Source, Section 112 of the Clean Air Act

### A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]

---

This stationary source consists of the following emission units and pollution control devices:

- (a) one (1) aggregate batch mix dryer, identified as EU-05, constructed in 1986, with a maximum capacity of 125 tons per hour, equipped with one (1) natural gas fired dryer burner with a maximum heat input of 90 million (MM) Btu per hour, using No. 2 distillate fuel oil as back-up fuel; using one (1) baghouse (ID No. B-1) for particulate matter control, exhausting to one (1) stack (ID No. SV-1);
- (b) feeding, conveying and loading operations, processing a maximum of 125 tons per hour;
- (c) cold-mix (stockpile mix) asphalt manufacturing operations, constructed in 1986;
- (d) one (1) 12,000 gallon asphalt cement storage tank (ID No. T-02), constructed in 1986;
- (e) one (1) 15,000 gallon asphalt cement storage tank (ID No. T-06), constructed in 1986; and
- (f) one (1) 500,000 gallon asphalt cement storage tank (ID No. T-09), constructed in 1986.

Under 40 CFR 60, Subpart I, this hot mix asphalt plant is considered an affected facility.

### A.3 Insignificant Activities [326 IAC 2-7-1(21)][326 IAC 2-8-3(c)(3)(I)]

---

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (a) one (1) direct-fired hot oil heater, with a maximum heat input of 1.3 MMBtu per hour, firing No. 2 distillate fuel oil with natural gas as back-up fuel, exhausting to one (1) stack (ID No. SV-11);

- (b) sand, crushed stone and reclaimed asphalt pavement storage piles with a maximum total storage capacity of 60,000 tons;
- (c) paved and unpaved roadways [326 IAC 6-4];
- (d) one (1) 10,000 gallon asphalt cement storage tank (ID No. T-01);
- (e) one (1) 6,000 gallon asphalt cement storage tank (ID No. T-03);
- (f) two (2) 8,000 gallon asphalt cement storage tanks (ID Nos. T-04 & T-05);
- (g) one (1) 300 gallon gasoline storage tank (ID No. T-07);
- (h) one (1) 4,000 gallon fuel oil storage tank (ID No. T-08); and
- (i) one (1) test trailer.

A.4 FESOP Applicability [326 IAC 2-8-2]

---

This stationary source, otherwise required to have a Part 70 permit as described in 326 IAC 2-7-2(a), has applied to the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) to renew a Federally Enforceable State Operating Permit (FESOP).

## **SECTION B GENERAL CONDITIONS**

### **B.1 Definitions [326 IAC 2-8-1]**

---

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2 and 326 IAC 2-7) shall prevail.

### **B.2 Permit Term [326 IAC 2-8-4(2)][326 IAC 2-1.1-9.5][IC 13-15-3-6(a)]**

---

- (a) This permit, F003-23047-03125, is issued for a fixed term of five (5) years from the issuance date of this permit, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date of this permit.
- (b) If IDEM, OAQ, upon receiving a timely and complete renewal permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect until the renewal permit has been issued or denied.

### **B.3 Term of Conditions [326 IAC 2-1.1-9.5]**

---

Notwithstanding the permit term of a permit to construct, a permit to operate, or a permit modification, any condition established in a permit issued pursuant to a permitting program approved in the state implementation plan shall remain in effect until:

- (a) the condition is modified in a subsequent permit action pursuant to Title I of the Clean Air Act; or
- (b) the emission unit to which the condition pertains permanently ceases operation.

### **B.4 Enforceability [326 IAC 2-8-6]**

---

Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.

### **B.5 Severability [326 IAC 2-8-4(4)]**

---

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

### **B.6 Property Rights or Exclusive Privilege [326 IAC 2-8-4(5)(D)]**

---

This permit does not convey any property rights of any sort or any exclusive privilege.

### **B.7 Duty to Provide Information [326 IAC 2-8-4(5)(E)]**

---

- (a) The Permittee shall furnish to IDEM, OAQ, within a reasonable time, any information that IDEM, OAQ may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The submittal by the Permittee does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1). Upon request, the Permittee shall also furnish to IDEM, OAQ copies of records required to be kept by this permit.
- (b) For information furnished by the Permittee to IDEM, OAQ, the Permittee may include a claim of confidentiality in accordance with 326 IAC 17.1. When furnishing copies of requested records directly to U. S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.8 Compliance Order Issuance [326 IAC 2-8-5(b)]

IDEM, OAQ may issue a compliance order to this Permittee upon discovery that this permit is in nonconformance with an applicable requirement. The order may require immediate compliance or contain a schedule for expeditious compliance with the applicable requirement.

B.9 Certification [326 IAC 2-8-3(d)][326 IAC 2-8-4(3)(C)(i)][326 IAC 2-8-5(1)]

- (a) Where specifically designated by this permit or required by an applicable requirement, any application form, report, or compliance certification submitted shall contain certification by an "authorized individual" of truth, accuracy, and completeness. This certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) One (1) certification shall be included, using the attached Certification Form, with each submittal requiring certification. One (1) certification may cover multiple forms in one (1) submittal.
- (c) An "authorized individual" is defined at 326 IAC 2-1.1-1(1).

B.10 Annual Compliance Certification [326 IAC 2-8-5(a)(1)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. All certifications shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted no later than July 1 of each year to:

Indiana Department of Environmental Management  
Compliance Branch, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
  - (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
  - (2) The compliance status;
  - (3) Whether compliance was continuous or intermittent;
  - (4) The methods used for determining the compliance status of the source, currently and over the reporting period consistent with 326 IAC 2-8-4(3); and
  - (5) Such other facts, as specified in Sections D of this permit, as IDEM, OAQ may require to determine the compliance status of the source.

The submittal by the Permittee does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

B.11 Preventive Maintenance Plan [326 IAC 1-6-3][326 IAC 2-8-4(9)][326 IAC 2-8-5(a)(1)]

- (a) If required by specific condition(s) in Section D of this permit, the Permittee shall maintain and implement Preventive Maintenance Plans (PMPs) including the following information on each facility:
- (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
  - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
  - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.
- (b) A copy of the PMPs shall be submitted to IDEM, OAQ upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ. IDEM, OAQ may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or is the primary contributor to an exceedance of any limitation on emissions or potential to emit. The PMPs do not require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (c) To the extent the Permittee is required by 40 CFR Part 60/63 to have an Operation Maintenance, and Monitoring (OMM) Plan for a unit, such Plan is deemed to satisfy the PMP requirements of 326 IAC 1-6-3 for that unit.

B.12 Emergency Provisions [326 IAC 2-8-12]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation except as provided in 326 IAC 2-8-12.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a health-based or technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describe the following:
- (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
  - (2) The permitted facility was at the time being properly operated;
  - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
  - (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ, within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Telephone Number: 1-800-451-6027 (ask for Office of Air Quality,  
Compliance Section), or  
Telephone Number: 317-233-0178 (ask for Compliance Section)  
Facsimile Number: 317-233-6865

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

Indiana Department of Environmental Management  
Compliance Branch, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-8-4(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) The Permittee seeking to establish the occurrence of an emergency shall make records available upon request to ensure that failure to implement a PMP did not cause or contribute to an exceedance of any limitations on emissions. However, IDEM, OAQ may require that the Preventive Maintenance Plans required under 326 IAC 2-8-3(c)(6) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-8 and any other applicable rules.
- (g) Operations may continue during an emergency only if the following conditions are met:
- (1) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
  - (2) If an emergency situation causes a deviation from a health-based limit, the Permittee may not continue to operate the affected emissions facilities unless:
    - (A) The Permittee immediately takes all reasonable steps to correct the emergency situation and to minimize emissions; and

- (B) Continued operation of the facilities is necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw material of substantial economic value.

Any operations shall continue no longer than the minimum time required to prevent the situations identified in (g)(2)(B) of this condition.

- (h) The Permittee shall include all emergencies in the Quarterly Deviation and Compliance Monitoring Report.

**B.13 Prior Permits Superseded [326 IAC 2-1.1-9.5]**

---

- (a) All terms and conditions of permits established prior to F003-23047-03125 and issued pursuant to permitting programs approved into the state implementation plan have been either:

- (1) incorporated as originally stated,
- (2) revised, or
- (3) deleted.

- (b) All previous registrations and permits are superseded by this permit.

**B.14 Termination of Right to Operate [326 IAC 2-8-9][326 IAC 2-8-3(h)]**

---

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-8-3(h) and 326 IAC 2-8-9.

**B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)]**

---

- (a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provisions), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:

Indiana Department of Environmental Management  
Compliance Data Section, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251

using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent. A deviation required to be reported pursuant to an applicable requirement that exists independent of this permit, shall be reported according to the schedule stated in the applicable requirement and does not need to be included in this report.

The Quarterly Deviation and Compliance Monitoring Report does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit.

B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination  
[326 IAC 2-8-4(5)(C)][326 IAC 2-8-7(a)][326 IAC 2-8-8]

---

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a Federally Enforceable State Operating Permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-8-4(5)(C)] The notification by the Permittee does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM, OAQ, determines any of the following:
- (1) That this permit contains a material mistake.
  - (2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.
  - (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-8-8(a)]
- (c) Proceedings by IDEM, OAQ, to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-8-8(b)]
- (d) The reopening and revision of this permit, under 326 IAC 2-8-8(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM, OAQ, at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM, OAQ, may provide a shorter time period in the case of an emergency. [326 IAC 2-8-8(c)]

B.17 Permit Renewal [326 IAC 2-8-3(h)]

---

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ, and shall include the information specified in 326 IAC 2-8-3. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(21) and 326 IAC 2-7-1(40). The renewal application does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management  
Permits Branch, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251

- (b) A timely renewal application is one that is:
- (1) Submitted at least nine (9) months prior to the date of the expiration of this permit; and
  - (2) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.

- (c) If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-8 until IDEM, OAQ takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ any additional information identified as being needed to process the application.

B.18 Permit Amendment or Revision [326 IAC 2-8-10][326 IAC 2-8-11.1]

- (a) Permit amendments and revisions are governed by the requirements of 326 IAC 2-8-10 or 326 IAC 2-8-11.1 whenever the Permittee seeks to amend or modify this permit.
- (b) Any application requesting an amendment or modification of this permit shall be submitted to:
- Indiana Department of Environmental Management  
Permits Branch, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251
- Any such application shall be certified by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-10(b)(3)]

B.19 Operational Flexibility [326 IAC 2-8-15][326 IAC 2-8-11.1]

- (a) The Permittee may make any change or changes at the source that are described in 326 IAC 2-8-15(b) through (d) without a prior permit revision, if each of the following conditions is met:
- (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
  - (2) Any approval required by 326 IAC 2-8-11.1 has been obtained;
  - (3) The changes do not result in emissions which exceed the limitations provided in this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
  - (4) The Permittee notifies the:  
  
Indiana Department of Environmental Management  
Permits Branch, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251  
  
and  
  
United States Environmental Protection Agency, Region V  
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)  
77 West Jackson Boulevard  
Chicago, Illinois 60604-3590  
  
in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and

- (5) The Permittee maintains records on-site, on a rolling five (5) year basis, which document all such changes and emission trades that are subject to 326 IAC 2-8-15(b) through (d). The Permittee shall make such records available, upon reasonable request, for public review.

Such records shall consist of all information required to be submitted to IDEM, OAQ in the notices specified in 326 IAC 2-8-15(b)(2), (c)(1), and (d).

- (b) **Emission Trades [326 IAC 2-8-15(c)]**  
The Permittee may trade emissions increases and decreases at the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-8-15(c).
- (c) **Alternative Operating Scenarios [326 IAC 2-8-15(d)]**  
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-8-4(7). No prior notification of IDEM, OAQ, or U.S. EPA is required.
- (d) Backup fuel switches specifically addressed in, and limited under, Section D of this permit shall not be considered alternative operating scenarios. Therefore, the notification requirements of part (a) of this condition do not apply.

**B.20 Source Modification Requirement [326 IAC 2-8-11.1]**

---

A modification, construction, or reconstruction is governed by the requirements of 326 IAC 2 and 326 IAC 2-8-11.1.

**B.21 Inspection and Entry [326 IAC 2-8-5(a)(2)][IC 13-14-2-2][IC 13-17-3-2][IC 13-30-3-1]**

---

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a FESOP source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
- (c) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
- (d) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
- (e) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

**B.22 Transfer of Ownership or Operational Control [326 IAC 2-8-10]**

---

- (a) The Permittee must comply with the requirements of 326 IAC 2-8-10 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
  
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:  
  
Indiana Department of Environmental Management  
Permits Branch, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251  
  
The application which shall be submitted by the Permittee does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).
  
- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-10(b)(3)]

**B.23 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-8-4(6)] [326 IAC 2-8-16][326 IAC 2-1.1-7]**

---

- (a) The Permittee shall pay annual fees to IDEM, OAQ, within thirty (30) calendar days of receipt of a billing. Pursuant to 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM, OAQ, the applicable fee is due April 1 of each year.
  
- (b) Failure to pay may result in administrative enforcement action or revocation of this permit.
  
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-4230 (ask for OAQ, Billing, Licensing, and Training Section), to determine the appropriate permit fee.

**B.24 Credible Evidence [326 IAC 2-8-4(3)][326 IAC 2-8-5][62 FR 8314] [326 IAC 1-1-6]**

---

For the purpose of submitting compliance certifications or establishing whether or not the Permittee has violated or is in violation of any condition of this permit, nothing in this permit shall preclude the use, including the exclusive use, of any credible evidence or information relevant to whether the Permittee would have been in compliance with the condition of this permit if the appropriate performance or compliance test or procedure had been performed.

## SECTION C

## SOURCE OPERATION CONDITIONS

Entire Source

### Emission Limitations and Standards [326 IAC 2-8-4(1)]

#### C.1 Particulate Emission Limitations For Processes with Process Weight Rates Less Than One Hundred (100) Pounds per Hour [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2(e)(2), particulate emissions from any process not exempt under 326 IAC 6-3-1(b) or (c) which has a maximum process weight rate less than 100 pounds per hour and the methods in 326 IAC 6-3-2(b) through (d) do not apply shall not exceed 0.551 pounds per hour.

#### C.2 Overall Source Limit [326 IAC 2-8]

The purpose of this permit is to limit this source's potential to emit to less than major source levels for the purpose of Section 502(a) of the Clean Air Act.

(a) Pursuant to 326 IAC 2-8:

- (1) The potential to emit any regulated pollutant, except particulate matter (PM), from the entire source shall be limited to less than one-hundred (100) tons per twelve (12) consecutive month period. This limitation shall also render the requirements of 326 IAC 2-2 (PSD) not applicable;
- (2) The potential to emit any individual hazardous air pollutant (HAP) from the entire source shall be limited to less than ten (10) tons per twelve (12) consecutive month period; and
- (3) The potential to emit any combination of HAPs from the entire source shall be limited to less than twenty-five (25) tons per twelve (12) consecutive month period.

(b) The potential to emit particulate matter (PM) from the entire source shall be limited to less than two hundred fifty (250) tons per twelve (12) consecutive month period. This limitation shall make the requirements of 326 IAC 2-2 (Prevention of Significant Deterioration (PSD)) not applicable.

(c) This condition shall include all emission points at this source including those that are insignificant as defined in 326 IAC 2-7-1(21). The source shall be allowed to add insignificant activities not already listed in this permit, provided the source's potential to emit does not exceed the above specified limits.

(d) Section D of this permit contains independently enforceable provisions to satisfy this requirement.

#### C.3 Opacity [326 IAC 5-1]

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.

- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

C.4 Open Burning [326 IAC 4-1] [IC 13-17-9]

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1.

C.5 Incineration [326 IAC 4-2] [326 IAC 9-1-2]

The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and 326 IAC 9-1-2.

C.6 Fugitive Dust Emissions [326 IAC 6-4]

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions).

C.7 Fugitive Particulate Matter Emission Limitations [326 IAC 6-5]

Pursuant to 326 IAC 6-5 (Fugitive Particulate Matter Emission Limitations), fugitive particulate matter emissions shall be controlled according to the plan submitted on April 30, 1996. The plan is included as Attachment A.

C.8 Stack Height [326 IAC 1-7]

The Permittee shall comply with the applicable provisions of 326 IAC 1-7 (Stack Height Provisions), for all exhaust stacks through which a potential (before controls) of twenty-five (25) tons per year or more of particulate matter or sulfur dioxide is emitted.

C.9 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

- (a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.
- (b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:
  - (1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or
  - (2) If there is a change in the following:
    - (A) Asbestos removal or demolition start date;
    - (B) Removal or demolition contractor; or
    - (C) Waste disposal site.
- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).

- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management  
Asbestos Section, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (e) **Procedures for Asbestos Emission Control**  
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-1, emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) **Demolition and Renovation**  
The Permittee shall thoroughly inspect the affected facility or part of the facility where the demolition or renovation will occur for the presence of asbestos pursuant to 40 CFR 61.145(a).
- (g) **Indiana Accredited Asbestos Inspector**  
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos.

### **Testing Requirements [326 IAC 2-8-4(3)]**

#### **C.10 Performance Testing [326 IAC 3-6]**

---

- (a) All testing shall be performed according to the provisions of 326 IAC 3-6 (Source Sampling Procedures), except as provided elsewhere in this permit, utilizing any applicable procedures and analysis methods specified in 40 CFR 51, 40 CFR 60, 40 CFR 61, 40 CFR 63, 40 CFR 75, or other procedures approved by IDEM, OAQ.

A test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management  
Compliance Data Section, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ, if the Permittee submits to IDEM, OAQ, a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

**Compliance Requirements [326 IAC 2-1.1-11]**

**C.11 Compliance Requirements [326 IAC 2-1.1-11]**

---

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements by issuing an order under 326 IAC 2-1.1-11. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

**Compliance Monitoring Requirements [326 IAC 2-8-4][326 IAC 2-8-5(a)(1)]**

**C.12 Compliance Monitoring [326 IAC 2-8-4(3)][326 IAC 2-8-5(a)(1)]**

---

Unless otherwise specified in this permit, all monitoring and record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance. If required by Section D, the Permittee shall be responsible for installing any necessary equipment and initiating any required monitoring related to that equipment. If due to circumstances beyond its control, that equipment cannot be installed and operated within ninety (90) days, the Permittee may extend the compliance schedule related to the equipment for an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management  
Compliance Branch, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251

in writing, prior to the end of the initial ninety (90) day compliance schedule, with full justification of the reasons for the inability to meet this date.

The notification which shall be submitted by the Permittee does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Unless otherwise specified in the approval for the new emission unit(s), compliance monitoring for new emission units or emission units added through a permit revision shall be implemented when operation begins.

**C.13 Monitoring Methods [326 IAC 3] [40 CFR 60] [40 CFR 63]**

---

Any monitoring or testing required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, 40 CFR 60 Appendix B, 40 CFR 63, or other approved methods as specified in this permit.

**C.14 Instrument Specifications [326 IAC 2-1.1-11] [326 IAC 2-8-4(3)][326 IAC 2-8-5(1)]**

---

(a) When required by any condition of this permit, an analog instrument used to measure a parameter related to the operation of an air pollution control device shall have a scale such that the expected maximum reading for the normal range shall be no less than twenty percent (20%) of full scale.

(b) The Permittee may request that the IDEM, OAQ approve the use of an instrument that does not meet the above specifications provided the Permittee can demonstrate that an alternative instrument specification will adequately ensure compliance with permit conditions requiring the measurement of the parameters.

### **Corrective Actions and Response Steps [326 IAC 2-8-4][326 IAC 2-8-5(a)(1)]**

#### **C.15 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]**

---

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

(a) The Permittee shall prepare written emergency reduction plans (ERPs) consistent with safe operating procedures.

(b) These ERPs shall be submitted for approval to:

Indiana Department of Environmental Management  
Compliance Branch, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251

within ninety (90) days after the date of issuance of this permit.

The ERP does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

(c) If the ERP is disapproved by IDEM, OAQ, the Permittee shall have an additional thirty (30) days to resolve the differences and submit an approvable ERP.

(d) These ERPs shall state those actions that will be taken, when each episode level is declared, to reduce or eliminate emissions of the appropriate air pollutants.

(e) Said ERPs shall also identify the sources of air pollutants, the approximate amount of reduction of the pollutants, and a brief description of the manner in which the reduction will be achieved.

(f) Upon direct notification by IDEM, OAQ that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level.  
[326 IAC 1-5-3]

#### **C.16 Risk Management Plan [326 IAC 2-8-4] [40 CFR 68]**

---

If a regulated substance, as defined in 40 CFR 68, is present at a source in more than a threshold quantity, the Permittee must comply with the applicable requirements of 40 CFR 68.

#### **C.17 Response to Excursions or Exceedances [326 IAC 2-8-4] [326 IAC 2-8-5]**

---

(a) Upon detecting an excursion or exceedance, the Permittee shall restore operation of the emissions unit (including any control device and associated capture system) to its normal or usual manner of operation as expeditiously as practicable in accordance with good air pollution control practices for minimizing emissions.

(b) The response shall include minimizing the period of any startup, shutdown or malfunction and taking any necessary corrective actions to restore normal operation and prevent the likely recurrence of the cause of an excursion or exceedance (other than those caused by excused startup or shutdown conditions). Corrective actions may include, but are not limited to, the following:

(1) initial inspection and evaluation;

(2) recording that operations returned to normal without operator action (such as through response by a computerized distribution control system); or

- (3) any necessary follow-up actions to return operation to within the indicator range, designated condition, or below the applicable emission limitation or standard, as applicable.
- (c) A determination of whether the Permittee has used acceptable procedures in response to an excursion or exceedance will be based on information available, which may include, but is not limited to, the following:
  - (1) monitoring results;
  - (2) review of operation and maintenance procedures and records;
  - (3) inspection of the control device, associated capture system, and the process.
- (d) Failure to take reasonable response steps shall be considered a deviation from the permit.
- (e) The Permittee shall maintain the following records:
  - (1) monitoring data;
  - (2) monitor performance data, if applicable; and
  - (3) corrective actions taken.

**C.18 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-8-4] [326 IAC 2-8-5]**

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM, OAQ, within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.
- (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM, OAQ that retesting in one-hundred and twenty (120) days is not practicable, IDEM, OAQ may extend the retesting deadline.
- (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The response action documents submitted pursuant to this condition do require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

**Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]**

**C.19 General Record Keeping Requirements[326 IAC 2-8-4(3)] [326 IAC 2-8-5]**

- (a) Records of all required monitoring data, reports and support information required by this permit shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be physically present or electronically accessible at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.

- (b) Unless otherwise specified in this permit, all record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

**C.20 General Reporting Requirements [326 IAC 2-8-4(3)(C)] [326 IAC 2-1.1-11]**

---

- (a) The Permittee shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported. This report shall be submitted within thirty (30) days of the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (b) The report required in (a) of this condition and reports required by conditions in Section D of this permit shall be submitted to:  
  
Indiana Department of Environmental Management  
Compliance Data Section, Office of Air Quality  
100 North Senate Avenue  
Indianapolis, Indiana 46204-2251
- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (d) Unless otherwise specified in this permit, all reports required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. All reports do require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (e) Reporting periods are based on calendar years, unless otherwise specified in this permit. For the purpose of this permit "calendar year" means the twelve (12) month period from January 1 to December 31 inclusive.

**Stratospheric Ozone Protection**

**C.21 Compliance with 40 CFR 82 and 326 IAC 22-1**

---

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with the standards for recycling and emissions reduction:

- (a) Persons opening appliances for maintenance, service, repair, or disposal must comply with the required practices pursuant to 40 CFR 82.156.
- (b) Equipment used during the maintenance, service, repair, or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to 40 CFR 82.158.
- (b) Persons performing maintenance, service, repair, or disposal of appliances must be certified by an approved technician certification program pursuant to 40 CFR 82.161.

## SECTION D.1

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-8-4(10)]:

- (a) one (1) aggregate batch mix dryer, identified as EU-05, constructed in 1986, with a maximum capacity of 125 tons per hour, equipped with one (1) natural gas fired dryer burner with a maximum heat input of 90 million (MM) Btu per hour, using No. 2 distillate fuel oil as back-up fuel; using one (1) baghouse (ID No. B-1) for particulate matter control, exhausting to one (1) stack (ID No. SV-1);
- (b) feeding, conveying and loading operations, processing a maximum of 125 tons per hour;
- (c) cold-mix (stockpile mix) asphalt manufacturing operations, constructed in 1986;
- (d) one (1) 12,000 gallon asphalt cement storage tank (ID No. T-02), constructed in 1986;
- (e) one (1) 15,000 gallon asphalt cement storage tank (ID No. T-06), constructed in 1986; and
- (f) one (1) 500,000 gallon asphalt cement storage tank (ID No. T-09), constructed in 1986;
- (g) one (1) direct-fired hot oil heater, with a maximum heat input of 1.3 MMBtu per hour, firing No. 2 distillate fuel oil with natural gas as back-up fuel, exhausting to one (1) stack (ID No. SV-11);
- (h) sand, crushed stone and reclaimed asphalt pavement storage piles with a maximum total storage capacity of 60,000 tons;
- (i) paved and unpaved roadways [326 IAC 6-4].

Under 40 CFR 60, Subpart I, this hot mix asphalt plant is considered an affected facility.

(The information describing the process contained in this emissions unit description box is descriptive information and does not constitute enforceable conditions.)

### New Source Performance Standards (NSPS) Requirements [326 IAC 2-7-5(1)]

#### D.1.1 General Provisions Relating to NSPS [326 IAC 12-1] [40 CFR 60, Subpart A]

Pursuant to 40 CFR 60, Subpart I, the Permittee shall comply with the provisions of 40 CFR 60 Subpart A - General Provisions, which are incorporated by reference as 326 IAC 12-1, in accordance with the schedule in 40 CFR 60, Subpart A.

#### D.1.2 NSPS, Requirements [40 CFR Part 60, Subpart I] [ 326 IAC 12-1]

Pursuant to CFR Part 60, Subpart I, the Permittee shall comply with the provisions of 40 CFR Part 60, Subpart I, which are incorporated by reference as 326 IAC 12-1, as specified as follows:

#### § 60.90 Applicability and designation of affected facility.

(a) The affected facility to which the provisions of this subpart apply is each hot mix asphalt facility. For the purpose of this subpart, a hot mix asphalt facility is comprised only of any combination of the following: dryers; systems for screening, handling, storing, and weighing hot aggregate; systems for loading, transferring, and storing mineral filler, systems for mixing hot mix asphalt; and the loading, transfer, and storage systems associated with emission control systems.

(b) Any facility under paragraph (a) of this section that commences construction or modification after June 11, 1973, is subject to the requirements of this subpart.

*§ 60.91 Definitions.*

As used in this subpart, all terms not defined herein shall have the meaning given them in the Act and in subpart A of this part.

(a) *Hot mix asphalt facility* means any facility, as described in §60.90, used to manufacture hot mix asphalt by heating and drying aggregate and mixing with asphalt cements.

*§ 60.92 Standard for particulate matter.*

(a) On and after the date on which the performance test required to be conducted by §60.8 is completed, no owner or operator subject to the provisions of this subpart shall discharge or cause the discharge into the atmosphere from any affected facility any gases which:

(1) Contain particulate matter in excess of 90 mg/dscm (0.04 gr/dscf).

(2) Exhibit 20 percent opacity, or greater.

*§ 60.93 Test methods and procedures.*

(a) In conducting the performance tests required in §60.8, the owner or operator shall use as reference methods and procedures the test methods in appendix A of this part or other methods and procedures as specified in this section, except as provided in §60.8(b).

(b) The owner or operator shall determine compliance with the particulate matter standards in §60.92 as follows:

(1) Method 5 shall be used to determine the particulate matter concentration. The sampling time and sample volume for each run shall be at least 60 minutes and 0.90 dscm (31.8 dscf).

(2) Method 9 and the procedures in §60.11 shall be used to determine opacity.

**Emission Limitations and Standards [326 IAC 2-8-4(1)]**

**D.1.3 PSD Minor Limit [326 IAC 2-2]**

---

(a) Particulate matter emissions from the aggregate dryer and mixer shall not exceed 0.830 pound PM per ton of hot mix asphalt produced; and

(b) The amount of hot mix asphalt produced in the batch mixer and dryer shall not exceed 490,185 tons per twelve (12) consecutive month period, with compliance determined at the end of each month.

This limits total source wide PM emissions to less than 250 tons per year. Therefore, compliance with this limit will render 326 IAC 2-2 (Prevention of Significant Deterioration (PSD)) not applicable.

**D.1.4 Particulate Matter (PM<sub>10</sub>) [326 IAC 2-8-4] [326 IAC 2-2]**

---

Pursuant to 326 IAC 2-8-4, the following shall apply:

(a) PM<sub>10</sub> emissions from the aggregate dryer and mixer shall not exceed 0.351 pound PM<sub>10</sub> per ton of hot mix asphalt produced; and

- (b) The amount of hot mix asphalt produced in the batch mixer and dryer shall not exceed 490,185 tons per twelve (12) consecutive month period, with compliance determined at the end of each month.

This will limit the source wide potential to emit PM<sub>10</sub> to less than 100 tons per year. Compliance with this limit will satisfy 326 IAC 2-8-4 (FESOP). Therefore, the requirements of 326 IAC 2-7, Part 70 and 326 IAC 2-2, Prevention of Significant Deterioration (PSD), do not apply.

#### D.1.5 Carbon monoxide (CO) and Nitrogen Oxides (NO<sub>x</sub>) [326 IAC 2-8]

---

Pursuant to 326 IAC 2-8-4, the following shall apply:

- (a) CO emissions from the batch mix dryer shall not exceed 0.4 pound of CO per ton of hot mix asphalt produced.
- (b) NO<sub>x</sub> emissions for the batch mix dryer shall not exceed 0.12 pound of NO<sub>x</sub> per ton of hot mix asphalt produced.
- (c) The amount of hot mix asphalt produced in the batch mixer and dryer shall not exceed 490,185 tons per twelve (12) consecutive month period, with compliance determined at the end of each month.

This limits total source-wide CO emissions to less than 100 tons per year. Compliance with this limit will satisfy 326 IAC 2-8-4 and render the requirements of Part 70 (326 IAC 2-7) not applicable.

#### D.1.6 Sulfur Dioxide (SO<sub>2</sub>) [326 IAC 7-1.1] [326 IAC 7-2-1]

---

Pursuant to 326 IAC 7-1.1 (Sulfur Dioxide Emission Limitations), sulfur dioxide emissions from the 90 million British thermal units per hour burner for the aggregate batch mix dryer shall be limited to 0.5 pound per MMBtu heat input when using distillate oils. This is equivalent to a maximum allowable sulfur content of (0.5%) for No. 2 distillate fuel oil.

Pursuant to 326 IAC 7-1.1-2, this sulfur dioxide limit applies at all times including periods of startup, shutdown, and malfunction. Pursuant to 326 IAC 7-2-1, compliance shall be demonstrated on a calendar month average, with compliance determined at the end of each month.

#### D.1.7 No. 2 Fuel Usage and Equivalent, Sulfur Dioxide (SO<sub>2</sub>) [326 IAC 2-8-4][326 IAC 2-2]

---

Pursuant to 326 IAC 2-8-4(1), the following limits shall apply:

- (a) The sulfur content of the No. 2 fuel oil used in the 90 MMBtu per hour burner for the aggregate dryer shall not exceed 0.5 percent.
- (b) The input of No. 2 distillate fuel oil with a maximum sulfur content of 0.5% to the 125 MMBtu per hour burner for the aggregate dryer shall be limited to 2,732,742 gallons per twelve (12) consecutive month period, with compliance determined at the end of each month. Therefore, the SO<sub>2</sub> emissions are limited to less than 100 tons per year.
- (c) For purposes of determining compliance based on SO<sub>2</sub> emissions, the following shall apply:

every million cubic feet (MMCF) of natural gas burned shall be equivalent to 8.0 gallons of No. 2 distillate fuel oil based on SO<sub>2</sub> emissions, such that the total input of No. 2 distillate fuel oil and No. 2 distillate fuel oil equivalent input does not exceed the limit specified;

Compliance with the above limits shall render the requirements of 326 IAC 2-7 (Part 70) and 326 IAC 2-2 (PSD) not applicable.

**D.1.8 Preventive Maintenance Plan [326 IAC 2-8-4(9)]**

---

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for this facility and any control devices.

**Compliance Determination Requirements**

**D.1.9 Testing Requirements [326 IAC 2-8-5(a)(1), (4)] [326 IAC 2-1.1-11]**

---

Within sixty (60) days after achieving maximum capacity, but not later than one hundred and eighty (180) days after startup, in order to demonstrate compliance with Conditions D.1.3 and D.1.4, the Permittee shall perform PM and PM<sub>10</sub> testing for the aggregate dryer/mixer utilizing methods as approved by the Commissioner. This test shall be repeated at least once every five (5) years from the date of this valid compliance demonstration. PM<sub>10</sub> includes filterable and condensable particulate matter. Testing shall be conducted in accordance with Section C- Performance Testing.

**D.1.10 Sulfur Dioxide Emissions and Sulfur Content**

---

Compliance shall be determined utilizing one of the following options.

- (a) Pursuant to 326 IAC 3-7-4, the Permittee shall demonstrate that the sulfur dioxide emissions do not exceed five-tenths (0.5) pounds per million British thermal unit heat input when operating on No. 2 distillate oil by:
  - (1) Providing vendor analysis of fuel delivered, if accompanied by a vendor certification; or
  - (2) Analyzing the oil sample to determine the sulfur content of the oil via the procedures in 40 CFR 60, Appendix A, Method 19.
    - (A) Oil samples may be collected from the fuel tank immediately after the fuel tank is filled and before any oil is combusted; and
    - (B) If a partially empty fuel tank is refilled, a new sample and analysis would be required upon filling.
- (b) Compliance may also be determined by conducting a stack test for sulfur dioxide emissions from the aggregate dryer and mixer using 40 CFR 60, Appendix A, Method 6 in accordance with the procedures in 326 IAC 3-6.
- (c) In order to demonstrate compliance with Conditions D.1.5 and D.1.6 the Permittee shall demonstrate that weight percent sulfur dioxide in the fuels used does not exceed one half of a percent (0.5%) by weight when operating on No. 2 distillate fuel oil using the methods described in (a) of this condition.

A determination of noncompliance pursuant to any of the methods specified in (a) or (b) above shall not be refuted by evidence of compliance pursuant to the other method.

**D.1.11 Particulate Matter (PM and PM10)**

---

In order to comply with Conditions D.1.3 and D.1.4, the baghouse for particulate control shall be in operation and control emissions from the aggregate dryer/mixer at all times that the aggregate dryer/mixer is in operation.

## Compliance Monitoring Requirements [326 IAC 2-8-4][326 IAC 2-8-5(a)(1)]

### D.1.12 Visible Emissions Notations

---

- (a) Daily visible emission notations of the aggregate dryer, mixer, and burner baghouse stack exhaust and the conveying, material transfer points, and screening shall be performed during normal daylight operations when exhausting to the atmosphere. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) If abnormal emissions are observed, the Permittee shall take reasonable response steps in accordance with Section C- Response to Excursions or Exceedances. Failure to take response steps in accordance with Section C - Response to Excursions or Exceedances shall be considered a deviation from this permit.

### D.1.13 Parametric Monitoring

---

The Permittee shall record the pressure drop across the baghouse used in conjunction with the aggregate dryer/mixer, once per day when the process is in operation and venting to the atmosphere. When for any one reading, the pressure drop across the baghouse is outside the normal range of 2.0 and 6.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps in accordance with Section C- Response to Excursions or Exceedances. A pressure reading that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps in accordance with Section C - Response to Excursions or Exceedances, shall be considered a deviation from this permit.

The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ, and shall be calibrated at least once every six (6) months.

### D.1.14 Broken or Failed Bag Detection

---

- (a) For a single compartment baghouse controlling emissions from a process operated continuously, a failed unit and the associated process shall be shut down immediately until the failed unit has been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).
- (b) For a single compartment baghouse controlling emissions from a batch process, the feed to the process shall be shut down immediately until the failed unit has been repaired or replaced. The emissions unit shall be shut down no later than the completion of the processing of the material in the emission unit. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Bag failure can be indicated by a significant drop in the baghouse's pressure reading with abnormal visible emissions, by an opacity violation, or by other means such as gas temperature, flow rate, air infiltration, leaks, dust traces or triboflows.

## Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]

### D.1.15 Record Keeping Requirements

---

- (a) To document compliance with conditions D.1.3, D.1.4, and D.1.5, the Permittee shall maintain records in accordance with (1) through (2) below. Records maintained for (1) through (2) shall be taken monthly and shall be complete and sufficient to establish compliance with the annual throughput limits to the aggregate dryers established in conditions D.1.3, D.1.4, and D.1.5.
- (1) Calendar dates covered in the compliance determination period; and
  - (2) Asphalt mix throughput to the batch mix aggregate dryer per month since the last compliance determination period.
- (b) To document compliance with Conditions D.1.6 and D.1.7, the Permittee shall maintain records in accordance with (1) through (6) below. Records maintained for (1) through (6) below shall be complete and sufficient to establish compliance with the SO<sub>2</sub> emission limits established in Conditions D.1.6 and D.1.7.
- (1) Calendar dates covered in the compliance determination period;
  - (2) Actual No. 2 fuel oil and equivalent usage per month since last compliance determination period and equivalent SO<sub>2</sub> emissions; and
  - (3) A certification, signed by the owner or operator, that the records of the fuel supplier certifications represent all of the fuel combusted during the period.

If the fuel supplier certification is used to demonstrate compliance the following, as a minimum shall be maintained:

- (4) Fuel supplier certifications.
- (5) The name of the fuel supplier; and
- (6) A statement from the fuel supplier that certifies the sulfur content of the fuel oil.

The Permittee shall retain records of all recording/monitoring data and support information for a period of five (5) years, or longer if specified elsewhere in this permit, from the date of the monitoring sample, measurement, or report. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit.

- (c) The Permittee shall maintain records sufficient to verify compliance with the procedures specified in Condition D.1.10. Records shall be maintained for a period of five (5) years and shall be made available upon request by IDEM, OAQ.
- (d) To document compliance with Condition D.1.12, the Permittee shall maintain daily records of visible emission notations of the aggregate dryer and batch mixer stack exhaust.
- (e) To document compliance with Condition D.1.13, the Permittee shall maintain daily records of the pressure drop during normal operation when venting to the atmosphere.
- (f) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

#### D.1.16 Reporting Requirements

---

A quarterly summary of the information to document compliance with conditions D.1.3, D.1.4, D.1.5 and D.1.7 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

## SECTION D.2 FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-8-4(10)]:

- (a) cold-mix (stockpile mix) asphalt manufacturing operations, constructed in 1986;

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### Emission Limitations and Standards [326 IAC 2-8-4(1)]

#### D.2.1 Volatile Organic Compounds (VOC) [326 IAC 8-5-2]

Pursuant to 326 IAC 8-5-2 (Miscellaneous Operations: Asphalt Paving), the use of cutback asphalt or asphalt emulsion shall not contain more than seven percent (7%) oil distillate by volume of emulsion for any paving application except the following purposes:

- (a) Penetrating prime coating
- (b) Stockpile storage
- (c) Application during the months of November, December, January, February and March.

#### D.2.2 Cold-Mix (Stockpile Mix) VOC Usage [326 IAC 2-8-4] [326 IAC 2-2]

Emulsified asphalt with VOC solvent liquid binder used in the production of cold mix asphalt shall be limited to 191.91 tons of VOC solvent per twelve (12) consecutive month period, with compliance determined at the end of each month. This is equivalent to VOC emissions of less than 89.05 tons per 12 consecutive month period, based on the following definition:

Emulsified asphalt with solvent - contains a maximum of 15 percent (%) of liquid binder by weight of VOC solvent and 46.4% by weight of the VOC solvent in the liquid blend evaporating. The percent oil distillate in emulsified asphalt with solvent liquid, as determined by ASTM, shall be 7% or less of the total emulsion by volume.

Compliance with this condition will limit source-wide VOC to less than 100 tons per 12 consecutive month period. Therefore, the requirements of 326 IAC 2-7 (Part 70) and 326 IAC 2-2 (PSD) are not applicable.

### Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

#### D.2.3 Record Keeping Requirements

To document compliance with Condition D.2.2, the Permittee shall maintain records in accordance with (a) through (d) below. Records maintained for (a) through (d) shall be taken monthly and shall be complete and sufficient to establish compliance with the VOC usage limits and/or the VOC emission limits established in Condition D.2.2.

- (a) Calendar dates covered in the compliance determination period;
- (b) Emulsified asphalt binder usage per month since the last compliance determination period;
- (c) VOC solvent content by weight of the emulsified asphalt binder used each month; and

- (d) Amount of VOC solvent used in the production of cold mix asphalt, and the amount of VOC emitted each month.

All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

#### D.2.4 Reporting Requirements

---

A quarterly summary of the information to document compliance with Condition D.2.2 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

## INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT OFFICE OF AIR QUALITY COMPLIANCE DATA SECTION

### FESOP Quarterly Report

Source Name: E & B Paving, Inc.  
 Source Address: 320 S. Thomas Road, Ft. Wayne, Indiana 46804  
 Mailing Address: 286 W 300 N, Anderson, IN 46012  
 FESOP No.: F003-23047-03125  
 Facility: 90 MMBtu per hour burner for the aggregate dryer  
 Parameter: No. 2 distillate fuel oil usage limit SO<sub>2</sub> emissions  
 Limit: The usage of No. 2 distillate fuel oil with a maximum sulfur content of 0.5% and No. 2 distillate fuel oil equivalents in the 90 MMBtu per hour burner for the aggregate dryer shall be limited to 2,732,742 gallons per twelve (12) consecutive month period, with compliance determined at the end of each month, where every million cubic feet (MMCF) of natural gas burned shall be equivalent to 8.0 gallons of No. 2 distillate fuel oil. This limit is equivalent to SO<sub>2</sub> emissions of less than 100 tons per year.

## ATTACHMENT A

### ASPHALT PLANT SITE FUGITIVE DUST CONTROL PLAN

1. Fugitive particulate matter (dust) emissions from interior roads and parking lots shall be controlled by one or more of the following measures:
  - A. Paving with asphalt.
  - B. Treating with emulsified asphalt on an as needed basis.
  - C. Treating with calcium chloride on an as needed basis.
  - D. Treating with water on an as needed basis.
2. Fugitive particulate matter (dust) emissions from aggregate stockpiles shall be controlled by one or more of the following measures:
  - A. Clean and maintain stockpile areas.
  - B. Treating around the stockpile areas with water on an as needed basis.
  - C. Treating the stockpiles with water on an as needed basis.
3. Fugitive particulate matter (dust) emissions from conveying of aggregates shall be controlled by treating with water on an as needed basis.
4. Fugitive particulate matter (dust) emissions from the transferring of aggregates shall be controlled by one of the following measures:
  - A. Locate stockpiles as close as possible to feed bins.
  - B. Limit transfer points to three foot drops or less.
  - C. Apply water on an as needed basis.
5. Fugitive particulate matter (dust) emissions from transporting of aggregates shall be controlled by one of the following measures:
  - A. Tarping the aggregate hauling vehicles.
  - B. Ensure tailgates are tight and do not leak.
  - C. Maintain a 10 MPH speed limit on site.
6. Fugitive particulate matter (dust) emissions from the loading and unloading of aggregates shall be controlled by one or more of the following measures:
  - A. Limit free fall distance.
  - B. Limit the rate of discharge of the aggregate.
  - C. Apply water on an as needed basis.
7. **Material Handling Operations**  
The size of the aggregate stockpiles will vary. Materials delivered to the plant site will be kept reasonably balanced with plant production. The actual drying and mixing of the aggregate mixture is done inside the asphalt plant. Emissions are controlled, at this point, by plant dust control systems.

**Indiana Department of Environmental Management  
Office of Air Quality**

Technical Support Document (TSD) for a Federally Enforceable State Operating Permit  
(FESOP) Renewal

**Source Background and Description**

<b>Source Name:</b>	<b>E &amp; B Paving, Inc.</b>
<b>Source Location:</b>	<b>320 S. Thomas Road, Ft. Wayne, Indiana 46804</b>
<b>County:</b>	<b>Allen</b>
<b>SIC Code:</b>	<b>2951</b>
<b>Operation Permit No.:</b>	<b>F003-14404-03125</b>
<b>Operation Permit Issuance Date:</b>	<b>April 17, 2002</b>
<b>Permit Renewal No.:</b>	<b>F003-23047-03125</b>
<b>Permit Reviewer:</b>	<b>Julia Handley/EVP</b>

The Office of Air Quality (OAQ) has reviewed a FESOP renewal application from E & B Paving Inc. relating to the operation of a stationary batch hot mix asphalt plant.

**Permitted Emission Units and Pollution Control Equipment**

The stationary source consists of the following permitted emission units and pollution control devices:

- (a) one (1) aggregate batch mix dryer, identified as EU-05, constructed in 1986, with a maximum capacity of 125 tons per hour, equipped with one (1) natural gas fired dryer burner with a maximum heat input of 90 million (MM) Btu per hour, using No. 2 distillate fuel oil as back-up fuel, using one (1) baghouse (ID No. B-1) for particulate matter control, exhausting to one (1) stack (ID No. SV-1);
- (b) feeding, conveying and loading operations, processing a maximum of 125 tons per hour;
- (c) cold-mix (stockpile mix) asphalt manufacturing operations, constructed in 1986;
- (d) one (1) 12,000 gallon asphalt cement storage tank (ID No. T-02), constructed in 1986;
- (e) one (1) 15,000 gallon asphalt cement storage tank (ID No. T-06), constructed in 1986;  
and
- (f) one (1) 500,000 gallon asphalt cement storage tank (ID No. T-09), constructed in 1986.

Under 40 CFR 60, Subpart I, this hot mix asphalt plant is considered an affected facility.

**Unpermitted Emission Units and Pollution Control Equipment**

There are no unpermitted emission units operating at this source during this review process.

### Insignificant Activities

- (a) one (1) direct-fired hot oil heater, with a maximum heat input of 1.3 MMBtu per hour, firing No. 2 distillate fuel oil with natural gas as back-up fuel, exhausting to one (1) stack (ID No. SV-11);
- (b) sand, crushed stone and reclaimed asphalt pavement storage piles with a maximum total storage capacity of 60,000 tons;
- (c) paved and unpaved roadways;
- (d) one (1) 10,000 gallon asphalt cement storage tank (ID No. T-01);
- (e) one (1) 6,000 gallon asphalt cement storage tank (ID No. T-03);
- (f) two (2) 8,000 gallon asphalt cement storage tanks (ID Nos. T-04 & T-05);
- (g) one (1) 300 gallon gasoline storage tank (ID No. T-07);
- (h) one (1) 4,000 gallon fuel oil storage tank (ID No. T-08); and
- (i) one (1) test trailer.

### Existing Approvals

The source has been operating under the previous FESOP 003-14404-03125 issued on April 17, 2002, and the following amendments and revisions:

- (a) First Administrative Amendment, 003-20500-03125 issued on February 22, 2005.

All conditions from previous approvals were incorporated into this FESOP except the following:

- (a) FESOP 003-14404-03125, issued on April 17, 2002

#### D.3.1 Record Keeping Requirements [326 IAC 12] [40 CFR 60.110b, Subpart Kb]

Pursuant to the New Source Performance Standard (NSPS), 326 IAC12 and 40 CFR Part 60.116 Subpart Kb, the Permittee shall maintain permanent accessible records at the source for the life of each volatile liquid storage tank as follows:

- (a) The dimension of each storage vessel (tanks T-02, T-06 and T-09);
- (b) An analysis showing the capacity of each storage vessel (tanks T-02, T-06 and T-09); and
- (c) the true vapor pressure of the VOC stored in one (1) asphalt cement storage tank (tank T-09 only), to be less than 3.5 kPa.

*Reason not incorporated:* 40 CFR 60.110b, Subpart Kb, which was amended October 15, 2003, exempts storage vessels with a design capacity less than 75 cubic meters and tanks over 151 cubic meters storing a liquid with a maximum true vapor pressure less than 3.5 kilopascals (kPa) . Accordingly, storage tanks (ID Nos. T-02, T-06, and T-09) are not subject to the New Source Performance Standard, 326 IAC 12, (40 CFR Part 60.110b, Subpart Kb) Standards of Performance for Volatile Organic Liquid Storage Vessels.

(b) FESOP 003-14404-03125, issued on April 17, 2002

**D.1.11 Used Oil Requirements [329 IAC 13]**

---

The waste oil burned in the aggregate dryer burner shall comply with the used oil requirements specified in 329 IAC 13 (Used Oil Management). Pursuant to 329 IAC 13-3-2 (Used Oil Specifications), used oil burned for energy recovery that is classified as off-specification used oil fuel shall comply with the provisions of 329 IAC 13-8 (Used Oil Burners Who Burn Off-specification Used Oil For Energy Recovery), including:

- (a) Receipt of an EPA identification number as outlined in 329 IAC 13-8-3 (Notification),
- (b) Compliance with the used oil storage requirements specified in 329 IAC 13-8-5 (Used Oil Storage), and
- (c) Maintaining records pursuant to 329 IAC 13-8-6 (Tracking).

The burning of mixtures of used oil and hazardous waste that is regulated under 329 IAC 3.1 is prohibited at this source.

*Reason not incorporated:* IDEM has determined that the above conditions do not need to be included in the permit, since the source is no longer using waste oil as back-up fuel for the aggregate burner.

**Enforcement Issue**

There are no enforcement actions pending.

**Recommendation**

The staff recommends to the Commissioner that the FESOP renewal be approved. This recommendation is based on the following facts and conditions:

Unless otherwise stated, information used in this review was derived from the application and additional information submitted by the applicant.

An administratively complete FESOP renewal application for the purposes of this review was received on May 3, 2006.

There was no notice of completeness letter mailed to the source.

**Emission Calculations**

See Appendix A pages 1 through 9 of this document for detailed emission calculations.

**Unrestricted Potential Emissions**

This table reflects the unrestricted potential emissions of the source, excluding the emission limits that were contained in the previous FESOP.

Pollutant	Potential to Emit (tons/yr)
PM	Greater than 250
PM-10	Greater than 250
SO <sub>2</sub>	Less than 250, greater than 100
VOC	Greater than 250
CO	Less than 250, greater than 100
NO <sub>x</sub>	Less than 100

HAPs	Unrestricted Potential Emissions (tons/yr)
Acetaldehyde	Less than 10
Arsenic:	Less than 10
Benzene:	Less than 10
Beryllium:	Less than 10
Cadmium:	Less than 10
Chromium:	Less than 10
Ethyl benzene:	Less than 10
Formaldehyde:	Less than 10
Lead:	Less than 10
Manganese:	Less than 10
Mercury:	Less than 10
Nickel:	Less than 10
Quinone	Less than 10
Selenium:	Less than 10
Toluene:	Less than 10
Total PAH:	Less than 10
Xylene:	Less than 10
Total	Less than 25

- (a) The unrestricted potential emissions of PM-10, SO<sub>2</sub>, VOC and CO are equal to or greater than 100 tons per year. Therefore, the source is subject to the provisions of 326 2-7. The source will be issued a FESOP because the source will limit its emissions below the Title V levels.
- (b) Fugitive Emissions  
 This type of operation is not one of the twenty-eight (28) listed source categories under 326 IAC 2-2. Since there are applicable New Source Performance Standards that were in effect on August 7, 1980, the fugitive particulate matter (PM) and volatile organic compound (VOC) emissions are counted toward determination of PSD and Emission Offset applicability.

**Potential to Emit After Issuance**

The source has opted to remain a FESOP source. The table below summarizes the potential to emit, reflecting all limits of the emission units. Any control equipment is considered enforceable only after issuance of this FESOP and only to the extent that the effect of the control equipment is made practically enforceable in the permit. Since the source has not constructed any new emission units, the source's potential to emit is based on the emission units included in the original FESOP.

Process/emission unit	Potential To Emit (tons/year)							
	PM	PM-10	SO <sub>2</sub>	VOC	CO	NO <sub>x</sub>	Ind. <sup>(4)</sup> HAPs	Combined HAPs
aggregate batch mix dryer and burner <sup>(1)</sup>	203.46 <sup>(2)</sup>	86.13 <sup>(3)</sup>	97.01	2.01	98.04	29.41	0.67	1.88
hot oil heater	0.08	0.13	2.89	0.03	0.48	0.81	Negl.	Negl
conveying / handling	6.05	2.86	--	--	--	--	--	--
unpaved roads	39.23	10.00	--	--	--	--	--	--
storage	0.46	0.16	--	--	--	--	--	--
load-out & silo-filling	0.61	0.61	--	8.81	1.38	--	Negl.	Negl.
cold mix VOC storage	--	--	--	89.05	--	--	--	--
Total Emissions	249.90	99.90	99.90	99.90	99.9	30.22	<10	<25

- (1) Limited PTE for aggregate mixer and burner reflects fuel usage limitation to comply with 326 IAC 2-8 (FESOP).
- (2) Maximum allowable PM emissions for 326 IAC 2-2 (PSD) avoidance.
- (3) Maximum allowable PM10 emissions in order to comply with 326 IAC 2-8 (FESOP).
- (4) Largest single HAP is Xylene with a PTE of 0.67 tons per year.

**County Attainment Status**

The source is located in Allen County.

Pollutant	Status
PM2.5	Attainment
PM-10	Attainment
SO <sub>2</sub>	Attainment
NO <sub>2</sub>	Attainment
8-hour Ozone	Basic Nonattainment
CO	Attainment
Lead	Attainment

- (a) Volatile organic compounds (VOC) and Nitrogen Oxides (NOx) are regulated under the Clean Air Act (CAA) for the purposes of attaining and maintaining the National Ambient Air Quality Standards (NAAQS) for ozone. Therefore, VOC and NOx emissions are considered when evaluating the rule applicability relating to the ozone standards. Allen County has been designated as nonattainment for the 8-hour ozone standard. Therefore, VOC and NOx emissions were reviewed pursuant to the requirements for Emission Offset, 326 IAC 2-3.

- (b) On October 25, 2006, the Indiana Air Pollution Control Board finalized a rule revision to 326 IAC 1-4-1 redesignating Delaware, Greene, Jackson, Vanderburgh, Vigo and Warrick Counties to attainment for the eight-hour ozone standard, redesignating Lake County to attainment for the sulfur dioxide standard, and revoking the one-hour ozone standard in Indiana.
- (c) Allen County has been classified as attainment for PM2.5. U.S. EPA has not yet established the requirements for Prevention of Significant Deterioration (PSD), 326 IAC 2-2 for PM 2.5 emissions. Therefore, until the U.S.EPA adopts specific provisions for PSD review for PM2.5 emissions, it has directed states to regulate PM10 emissions as surrogate for PM2.5 emissions. See the State Rule Applicability for the source section.
- (d) Allen County has been classified as attainment or unclassifiable in Indiana for all other regulated pollutants. Therefore, these emissions were reviewed pursuant to the requirements for Prevention of Significant Deterioration (PSD), 326 IAC 2-2. See the State Rule Applicability for the source section.

### Source Status

Existing Source FESOP Definition (emissions after controls, based on 8760 hours of operation per year at rated capacity and/or as otherwise limited):

Pollutant	Emissions (tons/yr)
PM	<250
PM-10	<100
SO <sub>2</sub>	<100
VOC	<100
CO	<100
NO <sub>x</sub>	<100
Single HAP	<10
Combination HAPs	<25

- (a) This existing source is not a major stationary source because no nonattainment regulated pollutant is emitted at a rate of 100 tons per year or greater, and it is not in one of the 28 listed source categories.
- (b) This existing source is not a major stationary source because no attainment regulated pollutant is emitted at a rate of 250 tons per year or greater and it is not in one of the 28 listed source categories.

### Federal Rule Applicability

- (a) This stationary drum hot mix asphalt plant constructed in 1986 is subject to the New Source Performance Standard, 326 IAC 12, (40 CFR 60.90, Subpart I) because it meets the definition of a hot mix asphalt facility pursuant to the rule and it was constructed after June 11, 1973. This rule limits particulate matter emissions to 0.04 grains per dry standard cubic foot (gr/dscf) and also limits visible emissions to 20% opacity.

The source will be able to comply with this rule by using a baghouse to limit particulate matter emissions to less than 0.04 gr/dscf.

The aggregate dryer and aggregate drum mix plant are subject to the following portions of 40 CFR 60, Subpart I.

- (1) 40 CFR 60.90.
- (2) 40 CFR 60.91.
- (3) 40 CFR 60.92
- (4) 40 CFR 60.93.

The provisions of 40 CFR 60 Subpart A – General Provisions, which are incorporated as 326 IAC 12-1-1, apply to the facility described in this section except when otherwise specified in 40 CFR 60, Subpart I.

- (b) Provisions of the New Source Performance Standard 326 IAC 12, (40 CFR Part 60.110, Subpart Kb) “Standards of Performance for Volatile Organic Liquid Storage Vessels” (Including Petroleum Liquid Storage Vessels) apply to storage tanks for which Construction, Reconstruction, or Modification Commenced after July 23, 1984. Tanks having a storage capacity less than 75 cubic meters are exempted from this rule. Also, tanks with a storage capacity greater than 151 cubic meters that store liquid with a maximum true vapor pressure of less than 3.5 kPa are exempted from this rule. All the storage tanks at this plant were constructed after 1984.
- i. Storage tanks (ID Nos. T-01, T-02, T-03, T-04, T-05, T-06, T-07 and T-08) each have capacities of less than 75 cubic meters ( $m^3$ ) (19,813 gallons), and are therefore not subject to this rule.
  - ii. Storage tank (ID No. T-09), constructed in 1986, has capacity of greater than 151 cubic meters ( $m^3$ ) (39,890 gallons) and stores asphalt cement with a maximum true vapor pressure of less than 3.5 kPa. Therefore, it is not subject to this rule.

Therefore, these requirements were not included in the permit.

- (c) The asphalt plant is not subject to the New Source Performance Standard 326 IAC 12 (40CFR 60.670 through 60.676, Subpart OOO) “Standards of Performance for Nonmetallic Mineral Processing Plants” for recycled asphalt pavement (RAP) usage since the RAP is received onsite ready-to-use, and there is no crushing or grinding of the RAP prior to loading into the first storage silo/bin. Therefore, these requirements were not included in the permit.
- (d) There are no National Emission Standards for Hazardous Air Pollutants (NESHAPs) (326 IAC 14, 326 IAC 20, 40 CFR Part 61 and 40 CFR Part 63) included in this permit for this source, because it is not a major source of HAP emissions.
- (e) The requirements of 40 CFR Part 64, Compliance Assurance Monitoring, are not included in this permit. These requirements apply to a Part 70 source that involves a pollutant-specific emissions unit (PSEU), as defined in 40 CFR 64.1, which meets the following criteria:
- (1) The unit is subject to an emission limitation or standard for an applicable regulated air pollutant;
  - (2) The unit uses a control device as defined in 40 CFR 64.1 to comply with that emission limitation or standard; and

- (3) The unit has a potential to emit before controls equal to or greater than the applicable Part 70 major source threshold for the regulated pollutant.

As a FESOP source, this source has accepted federally enforceable limits such that the requirements of 326 IAC 2-7 (Part 70) do not apply. Therefore, the requirements of 40 CFR 64, Compliance Assurance Monitoring, are not applicable to this source.

### **State Rule Applicability – Entire Source**

#### **326 IAC 2-2 (Prevention of Significant Deterioration, PSD)**

This source, constructed in 1986, after the applicability date of August 7, 1977, is not considered a major source because it is not one of the 28 listed source categories and shall continue to limit pollutant emissions to less than 250 tons per year (tpy) as follows. Particulate matter emissions from the aggregate dryer and mixer shall not exceed 0.830 pounds of PM per ton of asphalt mix based on a maximum throughput of 490,185 tons of asphalt mix per year. This is equivalent to 203.46 04 tons of PM emissions per year and will limit source wide PM emissions to less than 250 tons per year. VOC, SO<sub>2</sub>, CO, NO<sub>x</sub> and PM-10 emissions shall be limited to less than 100 tpy as described under the FESOP section below. Therefore, the requirements of 326 IAC 2-7 (Part 70), and 326 IAC 2-2 (PSD) are not applicable.

#### **326 IAC 2-3 Emission Offset**

Allen County has been designated as basic nonattainment for the 8-hour ozone standard. This source is not considered a major source because the potential to emit of NO<sub>x</sub> is less than 100 tons per year and the VOC emissions shall be limited to less than 100 tpy as described under the FESOP section below. Therefore, this source has been operating as a minor source pursuant to 326 IAC 2-3, Emission Offset.

#### **326 IAC 2-6 (Emission Reporting)**

Pursuant to 326 IAC 2-6-1, this source is not subject to this rule because it is complying with 326 IAC 2-8 (FESOP) and is not required to have an operating permit under 326 IAC 2-7 (Part 70). In addition, the source is not located in Lake or Porter counties, and it does not emit lead into the ambient air at levels equal to or greater than 5 tons per year. Therefore, 326 IAC 2-6 does not apply.

#### **326 IAC 2-8-4 (FESOP)**

Pursuant to 326 IAC 2-8-4, the following limits shall apply:

- (a) The annual throughput of aggregate to the drum mixer and dryer shall be limited to 490,185 tons of asphalt per twelve (12) consecutive month period, with compliance determined at the end of each month. This limit is required to limit the source's emissions of PM-10 and CO to less than 100 tons per year. Therefore, the requirements of 326 IAC 2-7 (Part 70) and 326 IAC 2-2 (PSD) are not applicable.
- (b) CO emissions from the batch mix dryer shall not exceed 0.40 pounds of CO per ton of hot mix asphalt produced. This will limit total source-wide CO emissions to less than 100 tons per year. Compliance with this limit will satisfy 326 IAC 2-8-4 and render the requirements of Part 70 (326 IAC 2-7) PSD (326 IAC 2-2) not applicable.
- (c) NO<sub>x</sub> emissions from the batch mix dryer shall not exceed 0.12 pound of NO<sub>x</sub> per ton of hot mix asphalt produced. This will limit total source-wide NO<sub>x</sub> emissions to less than 100 tons per year. Compliance with this limit will satisfy 326 IAC 2-8-4 and render the requirements of Part 70 (326 IAC 2-7) not applicable.

- (d) The input of No. 2 distillate fuel oil with a maximum sulfur content of 0.5% to the 90 MMBtu per hour burner for the aggregate dryer shall be limited to 2,732,742 gallons per twelve (12) consecutive month period, with compliance determined at the end of each month. Therefore, the SO<sub>2</sub> emissions are limited to less than 100 tons per year.

For purposes of determining compliance based on SO<sub>2</sub> emissions (See calculations within Appendix A page 5 of 9), the following shall apply:

- (1) every million cubic feet (MMCF) of natural gas burned shall be equivalent to 8.0 gallons of No. 2 distillate fuel oil based on SO<sub>2</sub> emissions, such that the total input of No. 2 distillate fuel oil and No. 2 distillate fuel oil equivalent input does not exceed the limit specified;

This limit will render the requirements of 326 IAC 2-7 (Part 70) not applicable.

- (e) Emulsified asphalt with VOC solvent liquid binder used in the production of cold mix asphalt shall be limited to 191.91 tons of VOC solvent per twelve (12) consecutive month period, with compliance determined at the end of each month. This is equivalent to VOC emissions of less than 89.05 tons per 12 consecutive month period, based on the following definition:

Emulsified asphalt with solvent - contains a maximum of 15 percent (%) of liquid binder by weight of VOC solvent and 46.4% by weight of the VOC solvent in the liquid blend evaporating. The percent oil distillate in emulsified asphalt with solvent liquid, as determined by ASTM, shall be 7% or less of the total emulsion by volume.

Compliance with this condition will limit source wide VOC to less than 100 tons per 12 consecutive month period. Therefore, the requirements of 326 IAC 2-7 (Part 70) and 326 IAC 2-2 (PSD) are not applicable.

- (d) PM-10 emissions from the aggregate dryer shall be limited to 0.351 pounds of PM-10 emitted per ton of asphalt produced, based on a maximum throughput of 490,185 tons of asphalt mix per year. The source will be able to comply with the PM-10 emission limit by utilizing a baghouse for controlling PM-10 emissions from the aggregate dryer to less than 0.351 pounds per ton of asphalt produced. Operation of the baghouse is required at all times to be able to comply with this limit. Compliance with this limit shall limit the source's potential to emit of PM-10 to less than 100 tons per twelve (12) consecutive month period. Therefore, the requirements of 326 IAC 2-7 (Part 70) and 326 IAC 2-2 (PSD) are not applicable.

#### 326 IAC 5-1 (Opacity Limitations)

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in the permit:

- (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

326 IAC 6-4 (Fugitive Dust Emissions)

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions).

326 IAC 6-5 (Fugitive Particulate Matter Emissions Limitations)

This source is subject to 326 IAC 6-5, for fugitive particulate matter emissions. Pursuant to the rule, fugitive particulate matter emissions shall be controlled according to the dust control plan submitted on April 30, 1996. The source shall continue to comply with all the dust abatement measures of the dust control plan which consists of the following:

- (a) Fugitive particulate matter (dust) emissions from interior roads and parking lots shall be controlled by one or more of the following measures:
  - (1) Paving with asphalt.
  - (2) Treating with emulsified asphalt on an as needed basis.
  - (3) Treating with calcium chloride on an as needed basis.
  - (4) Treating with water on an as needed basis.
- (b) Fugitive particulate matter (dust) emissions from aggregate stockpiles shall be controlled by one or more of the following measures:
  - (1) Clean and maintain stockpile areas.
  - (2) Treating around the stockpile areas with water on an as needed basis.
  - (3) Treating the stockpiles with water on an as needed basis.
- (c) Fugitive particulate matter (dust) emissions from conveying of aggregates shall be controlled by treating with water on an as needed basis.
- (d) Fugitive particulate matter (dust) emissions from the transferring of aggregates shall be controlled by one of the following measures:
  - (1) Locate stockpiles as close as possible to feed bins.
  - (2) Limit transfer points to three foot drops or less.
  - (3) Apply water on an as needed basis.
- (e) Fugitive particulate matter (dust) emissions from transporting of aggregates shall be controlled by one of the following measures:
  - (1) Tarping the aggregate hauling vehicles.
  - (2) Ensure tailgates are tight and do not leak.
  - (3) Maintain a 10 MPH speed limit on site.
- (f) Fugitive particulate matter (dust) emissions from the loading and unloading of aggregates shall be controlled by one or more of the following measures:
  - (1) Limit free fall distance.
  - (2) Limit the rate of discharge of the aggregate.
  - (3) Apply water on an as needed basis.
- (g) Material Handling Operations  
The size of the aggregate stockpiles will vary. Materials delivered to the plant site will be kept reasonably balanced with plant production. The actual drying and mixing of the aggregate mixture is done inside the asphalt plant. Emissions are controlled, at this point, by plant dust control systems.

**326 IAC 2-4.1-1 (New Source Toxics Control)**

Pursuant to 326 IAC 2-4.1-1 (New Source Toxics Control), any new process or production unit, which in and of itself emits or has the potential to emit 10 tons per year of a single HAP or 25 tons per year of the combination of HAPs, and is constructed or reconstructed after July 27, 1997, must be controlled using technologies consistent with Maximum Achievable Control Technology (MACT). This source has potential single HAP and combined HAP emissions of less than 10 and 25 tons per year, respectively, therefore, this rule does not apply.

**State Rule Applicability - Individual Facilities**

**326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Processes)**

The aggregate mixing and drying operation is not subject to the requirements of 326 IAC 6-3-2. This rule does not apply if the limitation established in the rule is not consistent with applicable limitations in 326 IAC 12, 40 CFR 60, Subpart I. Since the applicable PM limit established by 326 IAC 12, 40 CFR 60, Subpart I, is more stringent than the PM limits that would be established by 326 IAC 6-3-2, the limits pursuant to 326 IAC 6-3-2 do not apply. (See Appendix A pages 9 of 9, for details.)

**326 IAC 6.5-1-2 (Particulate Emissions Limitations)**

The requirements of this rule apply to stationary sources located in the counties listed in 326 IAC 6.5-1-1. This source is located in Allen County which is not one of the specifically listed counties in 326 IAC 6.5-1-1(a). Therefore, this rule is not applicable to this source.

**326 IAC 7-1.1 (Sulfur Dioxide Emissions Limitations)**

The batch mix dryer (ID No. EU-05) is subject to 326 IAC 7-1.1 because it has potential SO<sub>2</sub> emissions of greater than 25 tons per year (limited potential emissions are 97.05 tons per year). Pursuant to this rule, sulfur dioxide emissions from the dryer burner shall be limited to 0.5 pounds per MMBtu for distillate oil combustion. This equates to a maximum allowable sulfur content of (0.5%) for No. 2 distillate fuel oil. (See Appendix A: Emission Calculations, page 9 of 9.)

**326 IAC 7-2-1 (Sulfur Dioxide Reporting Requirements)**

Pursuant to this rule, the source shall submit reports of calendar month average sulfur content, heat content, fuel consumption, and sulfur dioxide emission rate (pounds SO<sub>2</sub> per MMBtu), to the OAQ upon request.

**326 IAC 8-5-2 (Asphalt paving rules)**

This rule applies to any paving application constructed after January 1, 1980 located anywhere in the state. Pursuant to this rule, the source shall not cause or allow the use of cutback asphalt or asphalt emulsion containing more than seven percent (7%) oil distillate by volume of emulsion for any paving application, except in the following purposes:

- (a) penetrating prime coating
- (b) stockpile storage
- (c) application during the months of November, December, January, February and March.

This source uses stockpile mix containing 7% (wt) emulsified asphalt binder, which contains 1% (wt) fuel oil, for a net fuel oil content in the stockpile mix of 0.07% (wt), which equates to less than 7% (by vol). The operation will be able to comply with 326 IAC 8-5-2.

**326 IAC 8-4-3 (Petroleum Liquid Storage Facilities)**

Pursuant to 326 IAC 8-4-1 (Applicability) and 326 IAC 8-4-3 (Petroleum Liquid Storage Facilities), all petroleum liquid storage vessels with capacities greater than one hundred fifty thousand (150,000) liters (39,000 gallons) containing VOC whose true vapor pressure is greater than 10.5 kPa (1.52 psi) shall comply with the requirements for external fixed and floating roof tanks and the specified record keeping and reporting requirements. The asphalt cement storage tank (T-09) (500,000 gallons), is not subject to IAC 8-4-3 because its liquid asphalt vapor pressure is less than the rule applicability threshold of 10.5 kPa, and tanks (ID Nos. T-01, T-02, T-03, T-04, T-05, T-06, T-07 and T-08), are not subject to IAC 8-4-3 because their capacities are less than the rule applicability threshold capacity of 39,000 gallons.

**326 IAC 8-7 (Specific VOC Reduction Requirements for Lake, Porter, Clark and Floyd Counties)**

The requirements of this rule apply to stationary sources located in Lake, Porter, Clark and Floyd Counties that emit or have the potential to emit VOCs at levels equal to or greater than 25 tons per year in Lake and Porter Counties; 100 tons per year in Clark and Floyd Counties; and to any coating facility that emits or has the potential to emit 10 tons per year or greater in Lake, Porter, Clark or Floyd County. This source is located in Allen County. Therefore, this rule is not applicable to this source.

**326 IAC 8-9 (Volatile Organic Liquid Storage Vessels)**

Pursuant to 326 IAC 8-9-1, on and after October 1, 1995 stationary vessels used to store volatile organic liquids (VOL) must comply with the requirement of the rule if located in Clark, Floyd, Lake or Porter Counties. Stationary vessels with capacities less than 39,000 gallons are only subject to the reporting and record keeping requirements of the rule. Stationary storage vessels subject to any provision of 40 CFR Part 60.110b, New Source Performance Standard for Volatile Organic Liquid Storage, are exempt from this rule. The storage tanks (T-01, T-02, T-03, T-04, T-05 and T-06), are not subject to IAC 8-9 because they are not located in a specified county.

**326 IAC 10-1 (Nitrogen Oxides Control in Clark and Floyd Counties)**

The source is not located in Clark or Floyd Counties, therefore, the requirements of 326 IAC 10-1 are not applicable.

**326 IAC 10-3 (Nitrogen Oxide Reduction Program for Specific Source Category)**

This source does not operate a Portland cement kiln or a blast furnace gas boiler with a heat input greater than two hundred fifty million (250,000,000) British thermal units per hour. The one 90 million Btu burner is not subject to this rule, therefore the requirements of 326 IAC 10-3 are not applicable.

**326 IAC 12-1 (New Source Performance Standards)**

The hot mix asphalt plant is required to comply with the requirements of 40 CFR 60.90, Subpart I, Standards of Performance for Hot Mix Asphalt Facilities, as described in the "Federal Rule Applicability" section of this TSD.

## **Testing Requirements**

All testing requirements from previous approvals were incorporated into this FESOP. This source is subject to 40 CFR 60, Subpart I (Standards of Performance for Hot Mix Asphalt Facilities), and shall comply with the particulate matter (PM) and opacity compliance testing requirements of the rule for the batch mix plants. The PM test for 40 CFR 60, Subpart I also will be used to demonstrate compliance with 326 IAC 2-2 (PSD). OAQ also required PM-10 testing to demonstrate FESOP compliance.

## Compliance Requirements

Permits issued under 326 IAC 2-8 are required to ensure that sources can demonstrate compliance with applicable state and federal rules on a more or less continuous basis. All state and federal rules contain compliance provisions, however, these provisions do not always fulfill the requirement for a more or less continuous demonstration. When this occurs IDEM, OAQ in conjunction with the source, must develop specific conditions to satisfy 326 IAC 2-8-4. As a result, compliance requirements are divided into two sections: Compliance Determination Requirements and Compliance Monitoring Requirements.

Compliance Determination Requirements in Section D of the permit are those conditions that are found more or less directly within state and federal rules and the violation of which serves as grounds for enforcement action. If these conditions are not sufficient to demonstrate continuous compliance, they will be supplemented with Compliance Monitoring Requirements, also in Section D of the permit. Unlike Compliance Determination Requirements, failure to meet Compliance Monitoring conditions would serve as a trigger for corrective actions and not grounds for enforcement action. However, a violation in relation to a compliance monitoring condition will arise through a source's failure to take the appropriate corrective actions within a specific time period.

This plant has applicable compliance monitoring conditions as specified below:

- (a) Daily visible emission notations of the aggregate dryer, mixer, and burner baghouse stack exhaust and the conveying, material transfer points, and screening shall be performed during normal daylight operations when exhausting to the atmosphere. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) If abnormal emissions are observed, the Permittee shall take reasonable response steps in accordance with Section C- Response to Excursions or Exceedances. Failure to take response steps in accordance with Section C - Response to Excursions or Exceedances shall be considered a deviation from this permit.
- (f) The Permittee shall record the pressure drop across the baghouse used in conjunction with the aggregate dryer/mixer, once per day when the process is in operation and venting to the atmosphere. When for any one reading, the pressure drop across the baghouse is outside the normal range of 2.0 and 6.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps in accordance with Section C- Response to Excursions or Exceedances. A pressure reading that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps in accordance with Section C - Response to Excursions or Exceedances, shall be considered a deviation from this permit.

The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ, and shall be calibrated at least once every six (6) months.

- (g) In the event that bag failure has been observed:
- (1) For a single compartment baghouse controlling emissions from a process operated continuously, a failed unit and the associated process shall be shut down immediately until the failed unit has been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).
  - (2) For a single compartment baghouse controlling emissions from a batch process, the feed to the process shall be shut down immediately until the failed unit has been repaired or replaced. The emissions unit shall be shut down no later than the completion of the processing of the material in the line. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Bag failure can be indicated by a significant drop in the baghouse's pressure reading with abnormal visible emissions, by an opacity violation, or by other means such as gas temperature, flow rate, air infiltration, leaks, dust traces or triboflows.

These monitoring conditions are necessary because the baghouses for the aggregate mixing and drying process must operate properly to be able to comply with 326 IAC 12, 40 CFR 60.90, Subpart I (Standards of Performance for Hot Mix Asphalt Facilities) and 326 IAC 2-8 (FESOP) and to be able to comply with the PM and PM10 emission limits so that the requirements of 326 IAC 2-2 (PSD) do not apply.

## **Conclusion**

The operation of this batch hot mix asphalt plant shall be subject to the conditions of the FESOP 003-23047-03125.

**\*\* aggregate dryer burner\*\***

The following calculations determine the amount of emissions created by natural gas combustion, from the aggregate dryer burner, based on 8,760 hours of operation and US EPA's AP-42, 5th Edition, Section 1.4 - Natural Gas Combustion, Tables 1.4-1 and 1.4-2.

<b>Criteria Pollutant:</b>	<b>90 MMBtu/hr * 8,760 hr/yr</b>	<b>* Ef (lb/MMcf) = (ton/yr)</b>
	<b>1000 Btu/cf * 2,000 lb/ton</b>	
<b>P M:</b>	1.9 lb/MMcf =	<b>0.75 ton/yr</b>
<b>P M-10:</b>	7.6 lb/MMcf =	<b>3.00 ton/yr</b>
<b>S O 2:</b>	0.6 lb/MMcf =	<b>0.24 ton/yr</b>
<b>N O x:</b>	100.0 lb/MMcf =	<b>39.42 ton/yr</b>
<b>V O C:</b>	5.5 lb/MMcf =	<b>2.17 ton/yr</b>
<b>C O:</b>	84.0 lb/MMcf =	<b>33.11 ton/yr</b>

The following calculations determine the amount of emissions created by the combustion of # 2 distillate fuel oil @ 0.50 % sulfur, from the aggregate dryer burner, based on 8,760 hours of use and US EPA's AP-42, 5th Edition, Section 1.3 - Fuel Oil Combustion, Tables 1.3-1, 1.3-2, and 1.3-3.

<b>Criteria Pollutant:</b>	<b>90 MMBtu/hr * 8,760 hr/yr</b>	<b>* Ef (lb/1,000 gal) = (ton/yr)</b>
	<b>140,000 Btu/gal * 2,000 lb/ton</b>	
<b>P M:</b>	2.0 lb/1000 gal =	<b>5.63 ton/yr</b>
<b>P M-10:</b>	3.3 lb/1000 gal =	<b>9.29 ton/yr</b>
<b>S O 2:</b>	71.0 lb/1000 gal =	<b>199.92 ton/yr</b>
<b>N O x:</b>	20.0 lb/1000 gal =	<b>56.31 ton/yr</b>
<b>V O C:</b>	0.34 lb/1000 gal =	<b>0.96 ton/yr</b>
<b>C O:</b>	5.0 lb/1000 gal =	<b>14.08 ton/yr</b>

The maximum potential emissions from the aggregate dryer burner due to fuel combustion are the following:

<b>Criteria Pollutant:</b>		<b>Worst Case Fuel</b>
<b>P M:</b>	<b>5.63 ton/yr</b>	No. 2 Fuel Oil
<b>P M-10:</b>	<b>9.29 ton/yr</b>	No. 2 Fuel Oil
<b>S O 2:</b>	<b>199.92 ton/yr</b>	No. 2 Fuel Oil
<b>N O x:</b>	<b>56.31 ton/yr</b>	No. 2 Fuel Oil
<b>V O C:</b>	<b>2.17 ton/yr</b>	Natural Gas
<b>C O:</b>	<b>33.11 ton/yr</b>	Natural Gas

**\*\*Insignificant Combustion Sources\*\*****\*\*hot oil heater\*\***

The following calculations determine the amount of emissions created by the combustion of #2 distillate fuel oil, from the hot oil heater, @ 0.50 % sulfur, from hot oil heater, based on 8760 hours of use and US EPA's AP-42, 5th Edition, Section 1.3 - Fuel Oil Combustion, Tables 1.3-1, 1.3-2, and 1.3-3.

<b>Criteria Pollutant:</b>	<b>1.3 MMBtu/hr * 8,760 hr/yr</b>	<b>* Ef (lb/1,000 gal) = (ton/yr)</b>
	<b>140,000 Btu/gal * 2,000 lb/ton</b>	
<b>P M:</b>	2.0 lb/1000 gal =	<b>0.08 ton/yr</b>
<b>P M-10:</b>	3.3 lb/1000 gal =	<b>0.13 ton/yr</b>
<b>S O 2:</b>	71.0 lb/1000 gal =	<b>2.89 ton/yr</b>
<b>N O x:</b>	20.0 lb/1000 gal =	<b>0.81 ton/yr</b>
<b>V O C:</b>	0.34 lb/1000 gal =	<b>0.01 ton/yr</b>
<b>C O:</b>	5.0 lb/1000 gal =	<b>0.20 ton/yr</b>

The following calculations determine the amount of emissions created by natural gas combustion, from hot oil heating, based on 8,760 hours of operation and US EPA's AP-42, 5th Edition, Section 1.4 - Natural Gas Combustion, Tables 1.4-1, 1.4-2, and 1.4-3.

<b>Criteria Pollutant:</b>	<u>1.3 MMBtu/hr * 8,760 hr/yr</u>	* Ef (lb/MMcf) = (ton/yr)
	<u>1000 Btu/cf * 2,000 lb/ton</u>	
<b>P M:</b>	1.9 lb/MMcf =	<b>0.01 ton/yr</b>
<b>P M-10:</b>	7.6 lb/MMcf =	<b>0.04 ton/yr</b>
<b>S O 2:</b>	0.6 lb/MMcf =	<b>3.42E-03 ton/yr</b>
<b>N O x:</b>	100.0 lb/MMcf =	<b>0.57 ton/yr</b>
<b>V O C:</b>	5.5 lb/MMcf =	<b>0.03 ton/yr</b>
<b>C O:</b>	84.0 lb/MMcf =	<b>0.48 ton/yr</b>

The maximum potential emissions from the hot oil heater due to fuel combustion are the following		
<b>Criteria Pollutant:</b>		<b>Worst Case Fuel</b>
<b>P M:</b>	<b>0.08 ton/yr</b>	Fuel Oil No. 2
<b>P M-10:</b>	<b>0.13 ton/yr</b>	Fuel Oil No. 2
<b>S O 2:</b>	<b>2.89 ton/yr</b>	Fuel Oil No. 2
<b>N O x:</b>	<b>0.81 ton/yr</b>	Fuel Oil No. 2
<b>V O C:</b>	<b>0.03 ton/yr</b>	Natural Gas
<b>C O:</b>	<b>0.48 ton/yr</b>	Natural Gas

**\*\* aggregate drying: batch-mix plant \*\***

The following calculations determine the amount of worst case emissions created by aggregate drying before controls, based on 8,760 hours of use and US EPA's AP-42, 5th Edition, Section 11.1 - Hot Mix Asphalt Plants, Tables 11.1-1, and 11.1-6 for a batch mix dryer which has the capability of combusting either fuel oil or natural gas:

Pollutant:	<u>Ef</u>	<u>lb/ton x</u>	<u>125</u>	<u>ton/hr x</u>	<u>8,760</u>
			<u>2,000</u>	<u>lb/ton</u>	<u>hr/yr</u>
<b>Criteria Pollutant:</b>					
<b>P M:</b>	32	lb/ton =		<b>17,520.00</b>	<b>ton/yr</b>
<b>P M-10:</b>	4.5	lb/ton =		<b>2,463.75</b>	<b>ton/yr</b>
<b>VOC:</b>	0.0082	lb/ton =		<b>4.49</b>	<b>ton/yr</b>
<b>CO:</b>	0.4	lb/ton =		<b>219.00</b>	<b>ton/yr</b>
<b>NOx:</b>	0.12	lb/ton =		<b>65.70</b>	<b>ton/yr</b>

**\*\* conveying / handling \*\***

The following calculations determine the amount of emissions created by material handling, based on 8,760 hours of use and AP-42, Section 13.2.4, Equation 1. The emission factor for calculating PM emissions is calculated as follows:

PM-10 Emissions:

$$E = k * (0.0032) * ((U/5)^{1.3}) / ((M/2)^{1.4})$$

$$= 5.23E-03 \text{ lb PM-10/ton}$$

$$= 1.11E-02 \text{ lb PM/ton}$$

where k = 0.35 (particle size multiplier for <10um)  
0.74 (particle size multiplier for <30um)

U = 12 mph mean wind speed  
M = 1.5 material moisture content (%)

$$\frac{125 \text{ ton/hr} * 8,760 \text{ hrs/yr} * \text{Ef (lb/ton of material)}}{2,000 \text{ lb/ton}} = (\text{ton/yr})$$

**Total PM 10 Emissions: 2.86 tons/yr**  
**Total PM Emissions: 6.05 tons/yr**

**\*\* unpaved roads \*\***

The following calculations determine the amount of emissions created by vehicle traffic on unpaved industrial roads, based on 8,760 hours of use and AP-42, Section 13.2.2.2, 13.2.2-2, 13.2.2-1 (1/2006)

I. Dump Truck

$$9 \text{ trip/hr} \times 0.0625 \text{ mile/trip} \times 2 \text{ (round trip)} \times 8,760 \text{ hr/yr} = 9,855 \text{ mile/yr}$$

$$E_f = k \cdot (s/12)^a \cdot (W/3)^b \cdot [(365-P)/365]$$

= 1.14 lb PM-10/mile  
= 4.48 lb PM/mile

where k = 1.5 (particle size multiplier for PM-10)  
k = 4.9 (particle size multiplier for PM)  
s = 4.8 mean % silt content of unpaved roads  
a = 0.9 Constant for PM-10  
a = 0.7 Constant for PM  
b = 0.45 Constant for PM and PM-10  
W = 26 tons average vehicle weight  
P = 125 number of days with at least 0.01 in of precipitation

$$\text{PM-10: } \frac{1.14 \text{ lb/mi} \times 9,855 \text{ mi/yr}}{2000 \text{ lb/ton}} = 5.63 \text{ tons/yr}$$

$$\text{PM: } \frac{4.48 \text{ lb/mi} \times 9,855 \text{ mi/yr}}{2000 \text{ lb/ton}} = 22.09 \text{ tons/yr}$$

II. Front End Loader

$$62 \text{ trip/hr} \times 0.02 \text{ mile/trip} \times 2 \text{ (round trip)} \times 8,760 \text{ hr/yr} = 21,725 \text{ mile/yr}$$

$$E_f = k \cdot (s/12)^a \cdot (W/3)^b \cdot [(365-P)/365]$$

= 1.32 lb PM-10/mile  
= 5.19 lb PM/mile

where k = 1.5 (particle size multiplier for PM-10)  
k = 4.9 (particle size multiplier for PM)  
s = 4.8 mean % silt content of unpaved roads  
a = 0.9 Constant for PM-10  
a = 0.7 Constant for PM  
b = 0.45 Constant for PM and PM-10  
W = 36 tons average vehicle weight  
P = 125 number of days with at least 0.01 in of precipitation

$$\text{PM-10: } \frac{1.32 \text{ lb/mi} \times 21,725 \text{ mi/yr}}{2000 \text{ lb/ton}} = 14.37 \text{ tons/yr}$$

$$\text{PM: } \frac{5.19 \text{ lb/mi} \times 21,725 \text{ mi/yr}}{2000 \text{ lb/ton}} = 56.38 \text{ tons/yr}$$

**\*\* storage \*\***

The following calculations determine the amount of emissions created by wind erosion of storage stockpiles, based on 8,760 hours of use and US EPA's AP-42 (Pre 1983 Edition), Section 11.2.3.

Material	Silt Content (wt %)	Pile Size (acres)	Storage Capacity (tons)	PM Emissions tons/yr	PM-10 Emissions tons/yr
Sand	1.1	0.49	15,000	0.11	0.04
Stone	1.1	1.160	30,000	0.27	0.09
RAP	0.8	0.470	15,000	0.079	0.03
<b>Total</b>				<b>0.46</b>	<b>0.16</b>

Sample Calculation:

$$E_f = 1.7 \cdot (s/1.5) \cdot (365-p)/235 \cdot (f/15)$$

= 1.27 lb/acre/day

where s = 1.1 % silt  
p = 125 days of rain greater than or equal to 0.01 inches  
f = 15 % of wind greater than or equal to 12 mph

$$\text{Emissions (storage)} = \frac{E_f \cdot (\text{Pile Size in acres}) \cdot (365 \text{ day/yr})}{(2,000 \text{ lb/ton})}$$

**\*\* load-out \*\***

The following calculations determine the amount of emissions created by plant load-out, based on 8,760 hours of use and US EPA's AP-42, Section 11.1, Tables 11.1-14 through 11.1-16.

$$\begin{aligned} \text{PM/PM10 Ef} &= 0.000181 + 0.00141(-V)e^{((0.0251)(T+460)-20.43)} \\ &= 5.22\text{E-}04 \text{ lb PM or PM-10 per ton of asphalt mix produced} \\ \text{where V} &= -0.5 \text{ asphalt volatility (default value of -0.5 used per AP-42)} \\ T &= 325 \text{ hot mix asphalt (HMA)} \end{aligned}$$

**PM/PM10 = 0.29 tons/yr**  
**Total PAH HAPs = 0.02 tons/yr** (5.93% of Organic PM emissions per AP-42)\*  
**Phenol = 0.00 tons/yr** (1.18% of Organic PM emissions per AP-42)\*

$$\begin{aligned} \text{TOC Ef} &= 0.0172(-V)e^{((0.0251)(T+460)-20.43)} \\ &= 4.16\text{E-}03 \text{ lb TOC per ton of asphalt mix produced} \\ \text{where V} &= -0.5 \text{ asphalt volatility (default value of -0.5 used per AP-42)} \\ T &= 325 \text{ hot mix asphalt (HMA)} \end{aligned}$$

**VOC = 2.14 tons/yr** (94% of TOC emissions per AP-42)

**Worst Case Single HAP (Xylenes) = 0.01 tons/yr** (0.49% of TOC emissions per AP-42)  
**Total Volatile HAPs = 0.03 tons/yr** (1.5% of TOC emissions per AP-42)

$$\begin{aligned} \text{CO Ef} &= 0.00558(-V)e^{((0.0251)(T+460)-20.43)} \\ &= 1.35\text{E-}03 \text{ lb CO per ton of asphalt mix produced} \\ \text{where V} &= -0.5 \text{ asphalt volatility (default value of -0.5 used per AP-42)} \\ T &= 325 \text{ hot mix asphalt (HMA)} \end{aligned}$$

**CO = 0.74 tons/yr**

**\*\* silo filling \*\***

The following calculations determine the amount of emissions created by silo filling, based on 8,760 hours of use and US EPA's AP-42, Section 11.1, Tables 11.1-14 through 11.1-16.

$$\begin{aligned} \text{PM/PM10 Ef} &= 0.000332 + 0.00105(-V)e^{((0.0251)(T+460)-20.43)} \\ &= 5.86\text{E-}04 \text{ lb PM or PM-10 per ton of asphalt mix produced} \\ \text{where V} &= -0.5 \text{ asphalt volatility (default value of -0.5 used per AP-42)} \\ T &= 325 \text{ hot mix asphalt (HMA)} \end{aligned}$$

**PM/PM10 = 0.32 tons/yr**  
**Total PAH HAPs = 0.02 tons/yr** (11.40% of Organic PM emissions per AP-42)\*

$$\begin{aligned} \text{TOC Ef} &= 0.0504(-V)e^{((0.0251)(T+460)-20.43)} \\ &= 1.22\text{E-}02 \text{ lb TOC per ton of asphalt mix produced} \\ \text{where V} &= -0.5 \text{ asphalt volatility (default value of -0.5 used per AP-42)} \\ T &= 325 \text{ hot mix asphalt (HMA)} \end{aligned}$$

**VOC = 6.67 tons/yr** (100% of TOC emissions per AP-42)

**Worst Case Single HAP (Formaldehyde) = 0.05 tons/yr** (0.69% of TOC emissions per AP-42)

**Total Volatile HAPs = 0.09 tons/yr** (1.3% of TOC emissions per AP-42)

$$\begin{aligned} \text{CO Ef} &= 0.00488(-V)e^{((0.0251)(T+460)-20.43)} \\ &= 1.18\text{E-}03 \text{ lb CO per ton of asphalt mix produced} \\ \text{where V} &= -0.5 \text{ asphalt volatility (default value of -0.5 used per AP-42)} \\ T &= 325 \text{ hot mix asphalt (HMA)} \end{aligned}$$

**CO = 0.65 tons/yr**

\* Organic PM emissions are calculated using the equation from Table 11.1-14.

$$\begin{aligned} \text{Organic PM Ef} &= 0.00141(-V)e^{((0.0251)(T+460)-20.43)} \\ &= 3.41\text{E-}04 \text{ lb PM or PM-10 per ton of asphalt mix produced} \\ \text{where V} &= -0.5 \text{ asphalt volatility (default value of -0.5 used per AP-42)} \\ T &= 325 \text{ hot mix asphalt (HMA)} \end{aligned}$$

**\*\* cold mix VOC storage emissions \*\***

The following calculations determine the amount of VOC emissions created by the application of emulsified asphalt with 1.0% fuel oil in emulsified asphalt mix, based on 8,760 hours of operation.

VOC Emission Factor = **0.07 weight percent flash-off of cold mix**  
 Potential Throughput (tons/yr) = **1,095,000 tons/yr stockpile mix**

Potential VOC Emissions (tons/yr) = Potential Throughput (tons/yr) \* VOC Emission Factor (wt% flash-off)  
 Potential VOC Emissions = **766.50 tons/yr**

\* Weight percent flash-off is based on a 7.0 weight percent of emulsified asphalt mix in stockpile mix.

Criteria Pollutants:		<b>** summary of source emissions before controls **</b>	
	<b>P M:</b>	<b>17,611.30</b>	<b>ton/yr</b>
	<b>P M-10:</b>	<b>2,496.81</b>	<b>ton/yr</b>
	<b>S O 2:</b>	<b>202.80</b>	<b>ton/yr</b>
	<b>N O x:</b>	<b>66.51</b>	<b>ton/yr</b>
	<b>V O C:</b>	<b>779.83</b>	<b>ton/yr</b>
	<b>C O:</b>	<b>220.86</b>	<b>ton/yr</b>

**\*\* source emissions after controls \*\***

In order to qualify for the FESOP program, this source must limit SO2 emissions to 99.9 tons per year. Consequently, SO2 emissions from the aggregate dryer must be limited as follows:

SO2 limited emissions=	99.9 tons per year -	2.89	tpy SO2 from the hot oil heater	97.01	tons per year
------------------------	----------------------	------	---------------------------------	-------	---------------

\* Emissions of PM and PM-10 from aggregate drying operations are controlled with a 99.935 % control efficiency.

The following calculations determine the amount of emissions created by natural gas combustion, from the aggregate dryer, based on a maximum fuel usage of 788.40 MMcf

Criteria Pollutant:	788.40 MMcf/yr	2,000 lb/ton	* Ef (lb/MMcf) = (ton/yr)
<b>P M:</b>	1.9 lb/MMcf =		<b>4.87E-04 ton/yr *</b>
<b>P M-10:</b>	7.6 lb/MMcf =		<b>1.95E-03 ton/yr *</b>
<b>S O 2:</b>	0.6 lb/MMcf =		<b>0.24 ton/yr</b>
<b>N O x:</b>	100.0 lb/MMcf =		<b>39.42 ton/yr</b>
<b>V O C:</b>	5.5 lb/MMcf =		<b>2.17 ton/yr</b>
<b>C O:</b>	84.0 lb/MMcf =		<b>33.11 ton/yr</b>

The following calculations determine the amount of emissions created by the combustion of No. 2 distillate fuel oil @ 0.50 % sulfur, from the aggregate dryer burner, based on a fuel usage limitation of 2,732,742 gal/yr:

Criteria Pollutant:	2,733 Kgal/yr	2,000 lb/ton	* Ef (lb/1,000 gal) = (ton/yr)
<b>P M:</b>	2.0 lb/1000 gal =		<b>1.78E-03 ton/yr *</b>
<b>P M-10:</b>	3.3 lb/1000 gal =		<b>2.93E-03 ton/yr *</b>
<b>S O 2:</b>	71.0 lb/1000 gal =		<b>97.01 ton/yr</b>
<b>N O x:</b>	20.0 lb/1000 gal =		<b>27.33 ton/yr</b>
<b>V O C:</b>	0.34 lb/1000 gal =		<b>0.46 ton/yr</b>
<b>C O:</b>	5.0 lb/1000 gal =		<b>6.83 ton/yr</b>

Criteria Pollutant:		Worst Case Fuel
<b>P M:</b>	<b>1.78E-03 ton/yr *</b>	No. 2 distillate fuel
<b>P M-10:</b>	<b>2.93E-03 ton/yr *</b>	No. 2 distillate fuel
<b>S O 2:</b>	<b>97.01 ton/yr</b>	No. 2 distillate fuel
<b>N O x:</b>	<b>39.42 ton/yr</b>	Natural Gas
<b>V O C:</b>	<b>2.17 ton/yr</b>	Natural Gas
<b>C O:</b>	<b>33.11 ton/yr</b>	Natural Gas

**\*\* Fuel Usage Limitations \*\***

**Fuel: Natural Gas**

A fuel usage limitation for natural gas is not needed because the potential to emit of each criteria pollutant is less than 100 tons per year.

**Fuel: #2 distillate oil**

$$\frac{97.01 \text{ tons SO}_2/\text{year limited}}{199.92 \text{ tons SO}_2/\text{year potential}} \times 5631.43 \frac{\text{Kgals}}{\text{year potential}} = 2732.742 \frac{\text{Kgals}}{\text{year limited}}$$

**\*\* Fuel Equivalence Limitations \*\***

**Fuel: Natural Gas**

Fuel equivalence limit for natural gas based on SO2 emissions from #2 distillate fuel oil:

$$\frac{199.92 \text{ \#2 F.O. potential emissions (ton/yr)}}{5631.43 \text{ \#2 F.O. potential usage (kgal/yr)}} / \frac{0.24 \text{ n.g. potential emissions (ton/yr)}}{788.40 \text{ n.g. potential usage (MMCFyr)}} = 118.33 \text{ MMCF n.g. burned} \text{ or } 0.008 \text{ Kgal \#2 F.O. burned}$$

Kgal #2 F.O. burned

MMCF n.g. burned

Source wide CO emissions shall be limited to less than 100 tons per year by limiting the throughput to the aggregate mixer. Consequently, the annual throughput shall be limited as follows:

Annual throughput limit = 490,185 tons asphalt/year

\* Emissions of PM and PM-10 from drying operations are controlled with a 99.900 % control efficiency.

**\*\* aggregate drying: drum-mix plant - Limited Throughput\*\***

The following calculations determine the amount of worst case emissions created by aggregate drying after controls, based on 8,760 hours of use and US EPA's AP-42, 5th Edition, Section 11.1 - Hot Mix Asphalt Plants, Tables 11.1-5 and 11.1-10 for a drum mix dryer which has the capability of combusting either fuel oil, natural gas, or re-refined waste oil

Pollutant:	Ef	lb/ton x	490,184.78	ton/yr
			2,000	lb/ton
<b>Criteria Pollutant:</b>				
<b>PM:</b>		32	lb/ton =	<b>7.84 ton/yr</b>
<b>PM-10:</b>		4.5	lb/ton =	<b>1.10 ton/yr</b>
<b>VOC:</b>		0.0082	lb/ton =	<b>2.01 ton/yr</b>
<b>CO:</b>		0.4	lb/ton =	<b>98.04 ton/yr</b>
<b>NOx:</b>		0.12	lb/ton =	<b>29.41 ton/yr</b>

**\*\*cold mix VOC storage limitations \*\***

The following calculations determine the amount of VOC emissions created by the application of liquid binder for cold mix stockpiles, based on the source's use of emulsified asphalt with solvent as the liquid binder type. Emulsified asphalt with solvent is defined with the following properties:

Maximum Weight % of VOC solvent in binder	15 %
Weight % of VOC solvent in binder that evaporates:	46.4 %
Volume of diluent allowed	7 % (per 326 IAC 8-5-2)

In order to qualify for the FESOP program, this source must limit VOC emissions to less than 99.90 tons per year. Deducting the VOC emitted from other activities, VOC solvent usage as diluent in the liquid binder used in the production of cold mix asphalt from the plant shall be limited as follows:

99.90 tons VOC/yr - 10.85 tons VOC/yr from other sources after controls = 89.05 tons of VOC emitted per year

This is equivalent to limiting the usage of emulsified asphalt with solvent liquid binder to less than the following:  
191.91 tons of VOC solvent per 12 consecutive month period for emulsified asphalt.

**\*\* source emissions after controls \*\***

**\*\* miscellaneous \*\***

**326 IAC 7 Compliance Calculations:**

The following calculations determine the maximum sulfur content of distillate # 2 fuel oil allowable by 326 IAC 7:

$$\begin{aligned} &0.5 \text{ lb/MMBtu} \times 140,000 \text{ Btu/gal} = 70 \text{ lb/1000gal} \\ &70 \text{ lb/1000gal} / 142 \text{ lb/1000 gal} = 0.5 \% \end{aligned}$$

Sulfur content must be less than or equal to 0.5% to comply with 326 IAC 7.

**326 IAC 6-3-2 Compliance Calculations:**

The following calculations determine compliance with 326 IAC 6-3-2 for process weight rates in excess of 30 tons per hour:

$$\text{limit} = 55 * (125 ^{0.11}) - 40 = 53.55 \text{ lb/hr or } 234.53 \text{ ton/yr}$$

Since the emission limit pursuant to 40 CFR 60 Subpart I is more stringent than this limit, the limit pursuant to 326 IAC 6-3-2 does not apply. The emission limit pursuant to Subpart I shall also render the requirements of 326 IAC 2-2 (PSD) not applicable.

**PM-10 Emission Limit for Aggregate Dryer:**

$$\begin{aligned} &(99.90 \text{ tons PM-10/yr} - 13.77 \text{ tons PM-10/yr from other sources}) \\ &= 86.13 \text{ tons PM-10/yr} = 19.66 \text{ lbs/hr} \quad (\text{will be able to comply}) \\ \text{Controlled PM-10 emissions from the aggregate dryer are } &0.2525 \text{ lbs/hr} < 19.66 \text{ lbs/hr} \\ \text{Based on a asphalt mix throughput max of 493,985 tons/yr, this emission limit is equivalent to } &0.351 \text{ lb PM-10 per ton} \end{aligned}$$

**PM Emission Limit for Aggregate Mixer and Dryer:**

$$\begin{aligned} &(249.90 \text{ tons PM/yr} - 46.44 \text{ tons PM/yr from other sources}) \\ &= 203.46 \text{ tons PM/yr} = 46.45 \text{ lbs/hr} \quad (\text{will be able to comply}) \\ \text{Controlled PM emissions from the aggregate dryer are } &1.7910 \text{ lbs/hr} < 46.45 \text{ lbs/hr} \\ \text{Based on a asphalt mix throughput max of 125 tons/hr, this emission limit is equivalent to } &0.830 \text{ lb PM per ton} \end{aligned}$$

**40 CFR Part 60.90, Subpart I (Standards of Performance for Hot Mix Asphalt Plants) Compliance Calculations:**

The following calculations determine compliance with NSPS, which limits stack emissions from asphalt plants to 0.04 gr/dscf:

$$\frac{7.84 \text{ ton/yr} * 2000 \text{ lb/ton} * 7000 \text{ gr/lb}}{525,600 \text{ min/yr} * 20,823 \text{ dscf/min}} = 0.010 \text{ gr/dscf} \quad (\text{will be able to comply})$$

Allowable particulate emissions under NSPS equate to 31.27 tons per year. 7.14 lbs/hr

Note:

$$\begin{aligned} \text{SCFM} &= 28,000 \text{ acfm} * (460 + 68) / (460 + 250) \\ &= 20,823 \text{ scfm} \end{aligned}$$

Assumes exhaust gas temperature of 250F, and exhaust gas flow of 28,000 acfm.
