Re: Source Specific Operation Status (SSOA),  
S 097-23236-00589.

Dear Ms. Dickerson:

Your application for Source Specific Operation Status was received on June 15, 2006, and has been reviewed by the Indianapolis Office of Environmental Services. Based on the information submitted and the provisions in 326 IAC 2, it has been determined that your emission source, an aluminum copper film coating operation for lithium batteries, located at 8740 Hague Road, Indianapolis, Indiana 46256, has met the criteria under 326 IAC 2-9 required to obtain a Source Specific Operating Agreement.

Pursuant to IC 4-21.5-3-5(a) and (b), approval of this Source Specific Operating Agreement shall not be effective until fifteen (15) days from the date of this letter. The facilities and processes of this source are hereby granted Source Specific Operating Agreement (SSOA) provided that the following requirements of the 326 IAC 2-9 are satisfied:

**Section A: Surface Coating or Graphic Arts Operation: [326 IAC 2-9-3]**

1. The combined total amount of volatile organic compounds (VOC) and hazardous air pollutants (HAP) delivered to the surface coating operation at the source shall not exceed fifteen (15) pounds per day.
2. The source shall keep the following records of the surface coating operation:
  - (a) The number of gallons of each solvent containing material used,
  - (b) the VOC and HAP content (pounds per gallon as supplied) of each solvent containing material used,
  - (c) material safety data sheets (MSDS) for all VOC and HAP containing material used,
  - (d) a monthly summation of VOC and HAP usage, and
  - (e) purchase orders and invoices for each solvent containing material used.

These records shall be kept for a minimum period of five (5) years, and made available upon request of the IDEM, OAQ and OES.

3. Particulate matter emissions shall be controlled by a dry filter system or an equivalent control device. The source shall operate the particulate control device at all times the surface coating operation is in operation in accordance with the manufacturer's specifications. A source shall be considered in compliance with this requirement provided that the overspray is not visibly detectable at the exhaust or accumulated on the rooftops or on the ground.
4. Include with the annual notice required in Condition 1 of the General Requirements Section, an inventory listing of the monthly volatile organic compound (VOC) and hazardous air pollutant (HAP) totals, and the total VOC and HAP emissions for the previous twelve (12) months.

If an exceedance is the result of a malfunction, then the provisions of 326 IAC 1-6 apply.
3. Pursuant to 326 IAC 2-9-1(i), the owner or operator is hereby notified that this operating agreement does not relieve the permittee of the responsibility to comply with the provisions of any applicable federal, state, or local rules, or any New Source Performance Standards (NSPS), 40 CFR Part 60, National Emission Standards for Hazardous Air Pollutants (NESHAP), 40 CFR Part 61 and 40 CFR Part 63.

Any change or modification which will alter operations in such a way that it will no longer comply with the applicable restrictions and conditions of this operating agreement, must obtain the appropriate approval from the IDEM, OAQ, and OES under 326 IAC 2-5.1, 326 IAC 2-5.5, 326 IAC 2-6.1, 326 IAC 2-2, 326 IAC 2-3, 326 IAC 2-7, and 326 IAC 2-8, before such change may occur.
