Re: 141-24138-00063
Notice-Only Change to
Minor Source Operating Permit Renewal No: 141-23299-00063

Dear Mr. Vandenburg:

Mossberg & Company, Inc. was issued a Minor Source Operating Permit (MSOP) on March 2, 2007 for an offset and flexographic printing operation located at 301 East Sample Street, South Bend, Indiana. A letter notifying IDEM, OAQ of the addition of one (1) flexographic printing press (identified as Press M) was received on December 29, 2006. After the addition of Press M, the potential to emit of each criteria pollutant will remain less than 100 tons per year, the potential to emit of any single HAP will remain less than 10 tons per year, and the potential to emit a combination of HAPs will remain less than 25 tons per year. The modification is being made pursuant to 326 IAC 2-6.1-6(d)(13) because it involves the addition of an emission unit of the same type that is already permitted and that will comply with the same applicable requirements and permit terms and conditions as the existing emission units, and the modification does not result in potential to emit greater than the thresholds in 326 IAC 2-2 or 2-3 (see attached calculations).

Table with 7 columns: Potential to Emit (tons/year) for PM/PM10, CO, SO2, NOx, VOC, and Total HAPS. Rows include Existing Units, New Unit, Revised Total, and MSOP Thresholds.

(1) The potential to emit of the existing units is from the TSD for MSOP Renewal 141-23299-00063.

Pursuant to the provisions of 326 IAC 2-6.1-6(d), the MSOP is hereby revised as follows. New language is shown and bold and language removed is shown in strikeout.

- 2. The new emission unit description was added to Section A.2 and Section D.1. Certain conditions in D.1 have been modified to include the additional flexographic printing press (Press M) and applicable requirements as shown below.

A.2 Emission Units and Pollution Control Equipment Summary

...

- (a) The printing operation:

...

- (9) Press M: a non-heatset 16" web flexographic press, installed in February 2007, with a maximum capacity of 500 feet per minute, press width of 16 inches, exhausting to stack S014.

~~(9)~~(10) One prepress department producing printing plates for all presses.

The Indiana Air Pollution Control Board has begun the process for a permanent rule revision to incorporate these changes into 326 IAC 1-4-1. The permanent revision to 326 IAC 1-4-1 should take effect prior to the expiration of the emergency rule. Therefore, section A.1 of the permit has been revised as follows.
