SECTION D.1 FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-8-4(10)]:

- (a) One (1) automobile and light metal shredder, exhausting to Stack 0001, equipped with a metal/fluff separation cascade and a cyclonic wet scrubber with a flow rate of 45,000 cfm for air pollution control, capacity: 200,000 pounds of scrap metal per hour.
- (b) Miscellaneous off road construction equipment, payloaders, bulldozers and cranes, capacity: 53.9 gallons of diesel fuel per hour.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-8-4(1)]

D.1.1 PM₁₀ Emission Limitation [326 IAC 2-8-4]

The PM₁₀ emissions from the one (1) automobile and light metal shredder, exhausting through Stack 0001, shall not exceed 19.37 pounds per hour, equivalent to 84.87 tons per year. Therefore, the requirements of 326 IAC 2-7 do not apply.

D.1.2 Particulate Matter (PM) [326 IAC 6-1]

Pursuant to 326 IAC 6-1-2(a), the particulate matter (PM) emissions from the one (1) automobile and light metal shredder shall not exceed 0.03 grains per dry standard cubic foot, equivalent to 11.6 pounds per hour at a flow rate of 45,000 dry standard cubic feet per minute.

D.1.3 NO_x Emission Limit [326 IAC 2-8]

The total diesel fuel oil delivered to the miscellaneous off road construction equipment, payloaders, bulldozers and cranes shall not exceed 463,269 gallons per twelve (12) consecutive month period. This fuel limit is equivalent to NO_x emissions of less than 74.4 tons per year. This limit will insure that the NO_x emissions from the entire source, including insignificant activities will not exceed one hundred (100) tons per year.

D.1.4 Preventive Maintenance Plan [326 IAC 2-8-4(9)]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for this facility and any control devices.

D.1.5 Nonapplicability of 326 IAC 6-3 (Process Operations)

The requirement from Condition D.1.2 from 067-5614, issued on December 12, 1996 which stated that PM emissions from the automobile and light metal shredder operations shall not exceed 21.0 pounds per hour (7.67 tons per month) has not been carried over since 326 IAC 6-1 applies to this source because it is located in Howard County and the potential source PM emissions exceed one hundred (100 tons per year). Thus, Condition D.1.2 of F 067-5614 is hereby rescinded.

Compliance Determination Requirements

D.1.6 Testing Requirements [326 IAC 2-8-5(a)(1), (4)] [326 IAC 2-1.1-11]

Within five (5) years of the date of the last valid stack performance test of the cyclonic wet scrubber in order to demonstrate compliance with Conditions D.1.1 and D.1.2, the Permittee shall perform PM and PM-10 testing utilizing methods as approved by the Commissioner. This test shall be repeated at least once every five (5) years from the date of this valid compliance demonstration. PM-10 includes filterable and condensable PM-10. Testing shall be conducted in accordance with Section C- Performance Testing.

D.1.7 Particulate Matter (PM)

In order to comply with Conditions D.1.1 and D.1.2, the cyclonic wet scrubber for PM control shall be in operation at all times when the one (1) automobile and light metal shredder is in operation.

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

D.1.8 Visible Emissions Notations

- (a) Visible emission notations of the scrubber stack exhaust shall be performed once per shift during normal daylight operations when exhausting to the atmosphere. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed. Failure to take response steps in accordance with Section C - Compliance Monitoring Plan - Failure to Take Response Steps, shall be considered a violation of this permit.

D.1.9 Parametric Monitoring

The Permittee shall monitor amperage to the fan motors and water flow on the wet scrubber. When for any one (1) reading, the fan motor amperage is outside the range of 120 to 140 amps for any motor, the Permittee shall take reasonable response steps in accordance with Section C- Compliance Response Plan - Preparation, Implementation, Records, and Reports. A fan amperage that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a violation of this permit. When for any one (1) reading, the flow rate for the scrubbing liquor is less than the minimum of 225 gallons of water per minute or a flow rate established during the latest stack test, the Permittee shall take reasonable response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports. A flow rate that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a violation of this permit.

The instruments used for determining the flow rate and the amperage shall comply with Section C - Pressure Gauge and Other Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ, and shall be calibrated at least once every six (6) months.

D.1.10 Cyclonic Wet Scrubber Inspection

An inspection shall be performed each calendar quarter of the cyclonic wet scrubber. Defective scrubber part(s) shall be replaced. A record shall be kept of the results of the inspection.

D.1.11 Failure Detection

In the event that a cyclonic wet scrubber failure has been observed:

Failed units and the associated process will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the

Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

D.1.12 Record Keeping Requirements

- (a) To document compliance with Condition D.1.3, the Permittee shall maintain records of the total fuel usage from the miscellaneous off road construction equipment, payloaders, bulldozers and cranes.
- (b) To document compliance with Condition D.1.8, the Permittee shall maintain records of visible emission notations of the scrubber stack exhaust once per shift.
- (c) To document compliance with Condition D.1.9, the Permittee shall maintain the following:

Records of the following operational parameters during normal scrubber operation when venting to the atmosphere:
 - (1) Fan motor amperage readings;
 - (2) Water flow rate readings; and
 - (3) Visual inspection of the scrubber pit to verify water flow;
- (d) To document compliance with Condition D.1.10, the Permittee shall maintain records of the results of the inspections required under Condition D.1.10 and the dates the vents are re-directed.
- (e) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.1.13 Reporting Requirements

A quarterly summary of the information to document compliance with Condition D.1.3 shall be submitted to the addresses listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

SECTION D.2 FACILITY OPERATION CONDITIONS
