S 097-24848-00611

Dear Mr. Oxener:

Your application for Source Specific Operation Status was received on May 16, 2007 and has been reviewed. Based on the data submitted and the provisions in 326 IAC 2, it has been determined that your emission source, a stationary painting operation located at 2610 Fortune Circle East, Indianapolis, Indiana, 46241, has met the criteria required to obtain a Source Specific Operating Agreement.

Pursuant to IC 4-21.5-3-5(a) and (b), approval of this Source Specific Operating Agreement shall not be effective until fifteen (15) days from the date of this letter.

The facilities and processes of this source are hereby granted the Source Specific Operating Agreement provided that the following requirements of 326 IAC 2-9 are satisfied:

Section A: Surface Coating Operation: [326 IAC 2-9-2.5]

1. The total amount of solvent containing material from the surface coating operation at the source shall not exceed two thousand (2,000) gallons per twelve (12) month period.
2. The source shall keep the following records of the surface coating operation:
 - (1) purchase orders or invoices of all solvent containing materials, and
 - (2) an annual summation on a calendar year basis of purchase orders or invoices for all solvent containing materials.

These records shall be kept for a minimum period of five (5) years, and shall be made available upon request of the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) and Indianapolis Office of Environmental Services (OES).

3. Particulate matter emissions shall be controlled by a dry filter system or an equivalent control device. The source shall operate the particulate control device at all times the surface coating operation is in operation in accordance with the manufacturer's specifications. A source shall be considered in compliance with this requirement provided the overspray is not visibly detectable at the exhaust or accumulated on the rooftops or on the ground.
4. Include with the annual notice required in Condition 1 of the General Requirements Section, an inventory listing of the monthly volatile organic compound (VOC) and hazardous air pollutant (HAP) totals, and the total VOC and HAP emissions for the previous twelve (12) months.
