Source Description and Location

Source Name:	Indiana Bell Telephone Company, Incorporated dba AT&T Indiana

Operation Permit No.:	S097-26344-00130

The Office of Air Quality (OAQ) and the Office of Environmental Services (OES) have reviewed an application, submitted by Indiana Bell Telephone Company, Incorporated dba AT&T Indiana on March 31, 2008 for a New Source Review (NSR) Permit and a Source Specific Operating Agreement (SSOA) for construction and operation of a stationary diesel fired emergency generator.

Existing Approvals

There have been no previous approvals issued to this source.

Permit Level Determination – NSR and SSOA

This source is obtaining a New Source Review (NSR) Permit and Source Specific Operating Agreement (SSOA) for approval to construct (pursuant to 326 IAC 2-5.1-3) and operate (pursuant to 326 IAC 2-9) the following operations:

- (a) Internal Combustion Sources [326 IAC 2-9-14].

Based on emission factors from EPA's Compilation of Air Pollutant Emission Factors AP-42, Chapter 3, Stationary Internal Combustion Sources, IDEM has determined that internal combustion sources complying with the fuel usage limitations contained in this SSOA have a limited PTE of SO₂ and NO_x greater than twenty-five (25) tons per year. Therefore, a New Source Review Permit for approval to construct is required for this operation pursuant to 326 IAC 2-5.1-3(a)(1)(E).

For a source that operates under 326 IAC 2-9 (Source Specific Operating Agreement Program), the source is required to comply with the pre-established emission limitations and standards contained in the specific SSOA(s) under 326 IAC 2-9. For a detailed description of the requirements specific to each SSOA, see 326 IAC 2-9.

Enforcement Issues

IDEM and OES are aware that equipment has been constructed and operated prior to receipt of the proper permit. IDEM and OES are reviewing this matter and will take the appropriate action. This proposed approval is intended to satisfy the requirements of the construction permit rules.

Federal Rule Applicability Determination

New Source Performance Standards (NSPSs)

- (a) The requirements of New Source Performance Standard 40 CFR Part 60.4200, Subpart IIII, (Standards of Performance for Stationary Compression Ignition Internal Combustion Engines), are not included in the permit. The emergency generator was constructed before July 11, 2005, and manufactured before April 1, 2006, therefore this NSPS does not apply.
- (b) The requirements of New Source Performance Standard 40 CFR Part 60.4230, Subpart JJJJ (Standards of Performance for Stationary Spark Ignition Internal Combustion Engines)(326 IAC 12), are not included in the permit. The emergency generator is not a stationary spark ignition internal combustion engine, therefore this NSPS does not apply.
- (c) There are no other New Source Performance Standards (NSPS)(40 CFR Part 60) included in the permit.

National Emission Standards for Hazardous Air Pollutants (NESHAPs)

- (a) The requirements of NESHAP for Stationary Reciprocating Internal Combustion Engines, 40 CFR 63. 6585, Subpart ZZZZ (326 IAC 20) are not included in the permit. Pursuant to 40 CFR 63.6590(b)(3), this source is not subject to the requirements of Subpart ZZZZ and 40 CFR 63 Subpart A because this is an existing stationary reciprocating internal combustion engine installed before June 12, 2006. There have been no modifications since that date.
- (b) There are no other National Emission Standards for Hazardous Air Pollutants (NESHAPs) (326 IAC 14, 326 IAC 20 and 40 CFR Part 63) included in the permit.

State Rule Applicability Determination

The following state rules are applicable to the source:

- (a) 326 IAC 2-9 (Source Specific Operating Agreement Program)
SSOA applicability is discussed under the Permit Level Determination – SSOA section above.
- (b) 326 IAC 5-1 (Opacity Limitations)
Pursuant to 326 IA C 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:
 - (1) Opacity shall not exceed an average of thirty percent (30%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
 - (2) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.
- (c) 326 IAC 6-4 (Fugitive Dust Emissions Limitations)
Pursuant to 326 IAC 6-4 (Fugitive Dust Emissions Limitations), the source shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4.
- (d) 326 IAC 6-5 (Fugitive Particulate Matter Emission Limitations)

The requirements of 326 IAC 6-5 are not included in the SSOA, since each of the SSOAs contained under 326 IAC 2-9 (Source Specific Operating Agreement Program) that limit fugitive emissions include pre-established fugitive dust control measures.

- (e) 326 IAC 12 (New Source Performance Standards)
See Federal Rule Applicability Section of this TSD.
- (f) 326 IAC 20 (Hazardous Air Pollutants)
See Federal Rule Applicability Section of this TSD.

Compliance Determination, Monitoring, Record Keeping, and Reporting Requirements

For a source that operates under 326 IAC 2-9 (Source Specific Operating Agreement Program), the source is required to comply with the pre-established emission limitations and standards, compliance determination, compliance monitoring, and record keeping and reporting requirements contained in the specific SSOA(s) under 326 IAC 2-9. For a detailed description of the requirements specific to each SSOA, see 326 IAC 2-9.

Conclusion and Recommendation

Unless otherwise stated, information used in this review was derived from the application and additional information submitted by the applicant. An application for the purposes of this review was received on March 31, 2008.

The construction and operation of this source shall be subject to the conditions of the attached proposed New Source Review (NSR) Permit and SSOA No. S097-26344-00130. The staff recommends that this NSR Permit and SSOA be approved.
