Re: 073-26398-00008
Significant Permit Modification to
Part 70 No.: T 073-6792-00008

Dear Mr. Ross:

NIPSCO – R.M. Schahfer Generating Station was issued a Part 70 Operating Permit on September 7, 2006, for the NIPSCO – R.M. Schahfer Generating Station, a stationary electric utility generating station.

On July 11, 2008, the D.C. Circuit Court identified flaws in the federal Clean Air Interstate Rule (CAIR) and remanded the rule to the U.S. EPA; therefore, CAIR requirements were not included in Part 70 Operation Permit Renewal issued on December 2, 2008. On December 23, 2008, the U.S. Court of Appeals for the D.C. Circuit decided to remand CAIR to the U.S. EPA without vacature, allowing CAIR to remain in effect until it is replaced by a rule that remedies the flaws identified by the Court.

The modification to include the federal and state provisions of CAIR will be incorporated into the Part 70 Operating Permit Renewal through a significant permit modification issued pursuant to 326 IAC 2-7-12(d) because the modification adds new emission limitations and monitoring, record keeping, and reporting requirements.

Pursuant to the provisions of 326 IAC 2-7-12 a significant permit modification to this permit is hereby approved as described in the attached Technical Support Document. All other conditions of the permit shall remain unchanged and in effect. For your convenience, the entire Part 70 Operating Permit as modified will be provided at issuance.

This decision is subject to the Indiana Administrative Orders and Procedures Act – IC 4-21.5-3-5. If you have any questions on this matter, please contact Heath Hartley, OAQ, 100 North Senate Avenue, MC 61-53, Room 1003, Indianapolis, Indiana, 46204-2251, or call at (800) 451-6027, and ask for Heath Hartley or extension (2-8217), or dial (317) 232-8217.

- (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
 - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
 - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.

If, due to circumstances beyond the Permittee's control, the PMPs cannot be prepared and maintained within the above time frame, the Permittee may extend the date an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53, IGCN 1003
Indianapolis, Indiana 46204-2251

The PMP extension notification does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) A copy of the PMPs shall be submitted to IDEM, OAQ, upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ. IDEM, OAQ, may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or is the primary contributor to an exceedance of any limitation on emissions or potential to emit. The PMPs do not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) To the extent the Permittee is required by 40 CFR Part 63 to have an Operation, Maintenance, and Monitoring (OMM) Plan for a unit, such Plan is deemed to satisfy the PMP requirements of 326 IAC 1-6-3 for that unit.

B.11 Emergency Provisions [326 IAC 2-7-16]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describe the following:
- (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
 - (2) The permitted facility was at the time being properly operated;
 - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;

- (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ, within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Telephone Number: 1-800-451-6027 (ask for Office of Air Quality, Compliance Section), or
Telephone Number: 317-233-0178 (ask for Compliance Section)
Facsimile Number: 317-233-6885.

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53, IGCN 1003
Indianapolis, Indiana 46204-2251

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-7-5(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) The Permittee seeking to establish the occurrence of an emergency shall make records available upon request to ensure that failure to implement a PMP did not cause or contribute to an exceedance of any limitations on emissions. However, IDEM, OAQ, may require that the Preventive Maintenance Plans required under 326 IAC 2-7-4-(c)(9) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ, by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-7 and any other applicable rules.

- (g) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
- (h) The Permittee shall include all emergencies in the Quarterly Deviation and Compliance Monitoring Report.

B.12 Permit Shield [326 IAC 2-7-12] [326 IAC 2-7-15] [326 IAC 2-7-20]

- (a) Pursuant to 326 IAC 2-7-15, the Permittee has been granted a permit shield. The permit shield provides that compliance with the conditions of this permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that either the applicable requirements are included and specifically identified in this permit or the permit contains an explicit determination or concise summary of a determination that other specifically identified requirements are not applicable. The Indiana statutes from IC 13 and rules from 326 IAC, referenced in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a Part 70 permit under 326 IAC 2-7 or for applicable requirements for which a permit shield has been granted.

This permit shield does not extend to applicable requirements which are promulgated after the date of issuance of this permit unless this permit has been modified to reflect such new requirements.
- (b) If, after issuance of this permit, it is determined that the permit is in nonconformance with an applicable requirement that applied to the source on the date of permit issuance, IDEM, OAQ, shall immediately take steps to reopen and revise this permit and issue a compliance order to the Permittee to ensure expeditious compliance with the applicable requirement until the permit is reissued. The permit shield shall continue in effect so long as the Permittee is in compliance with the compliance order.

- (c) A determination of whether the Permittee has used acceptable procedures in response to an excursion or exceedance will be based on information available, which may include, but is not limited to, the following:
- (1) monitoring results;
 - (2) review of operation and maintenance procedures and records; and
 - (3) inspection of the control device, associated capture system, and the process.

D.1.0 NOV Provisions

U.S. EPA has issued a Notice of Violation to this Permittee for allegedly failing to obtain, and comply with, New Source Review ("NSR"), Prevention of Significant Deterioration, and/or NSR for minor source Permits authorizing construction of physical modifications to units and operation of the modified units, as required by provisions set out in the Clean Air Act and 326 IAC 2. Therefore, the permit shield in Section B - Permit Shield does not shield the Permittee from possible enforcement actions initiated by U.S. EPA, IDEM or citizens involving boiler Unit 14. Compliance with the terms of this permit does not serve as proof of compliance for boiler Unit 14 or the matters addressed in the NOV. Following resolution of this action, IDEM will reopen this permit, if necessary, to incorporate a compliance schedule or any new applicable requirements. The standard language of Section B - Permit Shield does not shield any activity on which the permit is silent.

 - (2) If the CEMS is down for twenty-four (24) hours or more:
 - (A) Either fuel sampling and fuel preparation and analysis shall be conducted in accordance with 326 IAC 3-7-2(b) and (c), 326 IAC 3-7-2 (d) and 326 IAC 3-7-2(e) or, alternatively, a portable analyzer, properly calibrated according to the manufacturer specifications (such as manufacturer operating or maintenance manuals), shall be used to monitor SO₂ emissions. To the extent the Permittee elects to conduct fuel sampling: the Permittee shall collect the coal sample as bunkered; coal shall be sampled at least three (3) times per day and at least one (1) time per eight (8) hour period unless no coal is bunkered during the preceding eight (8) hour period; and minimum sample size shall be five hundred (500) grams.

or

The provisions of 40 CFR Part 60, Subpart A - General Provisions, which are incorporated by reference in 326 IAC 12-1, apply to the facilities described in this section except when otherwise specified in 40 CFR Part 60, Subpart Da.

Compliance Determination Requirements

D.3.5 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11]

By December 31 of the second calendar year following the most recent stack test, or within 180 days after issuance of this permit, whichever is later, compliance with the PM limitation in Condition D.3.1 shall be determined by a performance stack test conducted using Method 5B or 17, or other methods as approved by the Commissioner. This testing shall be repeated by December 31 of every second calendar year following this valid compliance demonstration. Testing shall be conducted in accordance with Section C - Performance Testing.

For the purpose of this permit, "calendar year" means the twelve (12) month period from January 1 to December 31 inclusive.

D.3.6 Operation of Electrostatic Precipitator [326 IAC 2-7-6(6)]

Except as otherwise provided by statute or rule or in this permit, the electrostatic precipitator (ESP) shall be operated at all times that the corresponding boiler is in operation.

D.3.7 Scrubber Operation [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

Except as otherwise provided by statute or rule or in this permit, the flue gas desulfurization (FGD) system shall be operated as needed to maintain compliance with all applicable SO₂ emission limits.

D.3.8 NSPS Compliance Provisions [326 IAC 12] [40 CFR 60, Subpart Da]

- (a) Compliance with the pound per million Btu (lb/MMBtu) PM emission limitation in Condition D.3.2 constitutes compliance with the percent reduction requirements for PM in Condition D.3.2. [40 CFR 60.46a(a)]
- (b) Compliance with the pound per million Btu (lb/MMBtu) NO_x emission limitations in Condition D.3.2 constitutes compliance with the percent reduction requirements for NO_x in Condition D.3.2. [40 CFR 60.46a(b)]
- (c) The PM and opacity emission limitations in Condition D.3.2(a) and the NO_x emission limitations in Condition D.3.2(c) apply at all times except during periods of startup, shutdown, or malfunction. [40 CFR 60.46a(c)]
- (d) The SO₂ emission limitations in Condition D.3.2 apply at all times except during periods of startup, shutdown, or when emergency conditions exist and the procedures under 40 CFR 40.46a(d) are implemented. [40 CFR 60.46a(c)]
- (e) Pursuant to 40 CFR 60.46a(d), during emergency conditions in the principal company, an affected facility with a malfunctioning flue gas desulfurization (FGD) system may be operated if sulfur dioxide emissions are minimized by:
 - (1) Operating all operable FGD system modules, and bringing back into operation any malfunctioned module as soon as repairs are completed,
 - (2) Bypassing flue gases around only those FGD system modules that have been taken out of operation because they were incapable of any sulfur dioxide emission reduction or which would have suffered significant physical damage if they had remained in operation, and
 - (3) Designing, constructing, and operating a spare FGD system module. The Administrator may at his discretion require the owner or operator within 60 days of notification to demonstrate spare module capability.
- (f) Compliance with the SO₂ emission limitations and SO₂ percent reduction requirements under 40 CFR 60.43a and the NO_x emission limitations under 40 CFR 60.44a (shown in Condition D.3.2) shall be based on the average emission rate for 30 successive boiler operating days. A separate performance test is completed at the end of each boiler operating day after the initial performance test, and a new 30 day average emission rate for both SO₂ and NO_x and a new percent reduction for sulfur dioxide are calculated to show compliance. [40 CFR 60.46a(e)]

- (g) Compliance is determined by calculating the arithmetic average of all hourly emission rates for SO₂ and NO_x for the 30 successive boiler operating days, except for data obtained during startup, shutdown, or malfunction for NO_x, and data obtained during startup, shutdown, or emergency conditions for SO₂. Compliance with the percentage reduction requirements for SO₂ is determined based on the average inlet and average outlet SO₂ emission rates for the 30 successive boiler operating days. [40 CFR 60.46a(g)]
- (h) If an owner or operator has not obtained the minimum quantity of emission data as required under 40 CFR 60.47a, compliance of the affect facility with the emission requirements under 40 CFR 60.43a and 40 CFR 60.44a for the day on which the 30-day period ends may be determined by the Administrator by following the applicable procedures in section 7 of Method 19. [40 CFR 60.46a(h)]

Technical Support Document (TSD) for a Part 70 Significant Permit Modification

Source Background and Description

Source Name:	NIPSCO – R.M. Schahfer Generating Station
Source Location:	2723 East 1500 North, Wheatfield, IN 46392
County:	Jasper
SIC Code:	4911
Operating Permit No.:	T 073-6792-00008
Operation Permit Issuance Date:	September 7, 2006
Significant Permit Modification No.:	T 073-26398-00008
Permit Reviewer:	Heath Hartley

Existing Approvals

Since the issuance of the Part 70 Operating Permit No. T 073-6792-00008 on September 7, 2006, the source has constructed or has been operating under the following approvals as well:

- (a) Significant Permit Modification No. T 073-26402-00008 issued on November 7, 2008;
- (b) Significant Source Modification No. T 073-26380-00008 issued on September 22, 2008;
- (c) Appeal Resolution No. T 073-23745-00008 issued on May 7, 2008;

All terms and conditions of previous permits issued pursuant to permitting programs approved into the state implementation plan have been either incorporated as originally stated, revised, or deleted by this permit. All previous registrations and permits are superseded by this permit.

Description of Proposed Modification

On July 11, 2008, the D.C. Circuit Court identified flaws in the federal Clean Air Interstate Rule (CAIR) and remanded the rule to the U.S. EPA; therefore, CAIR requirements were not included in Part 70 Operation Permit issued on September 7, 2006. On December 23, 2008, the U.S. Court of Appeals for the D.C. Circuit decided to remand CAIR to the U.S. EPA without vacature, allowing CAIR to remain in effect until it is replaced by a rule that remedies the flaws identified by the Court.

The modification to include the federal and state provisions of CAIR will be incorporated into the Part 70 Operating Permit Renewal through a significant permit modification issued pursuant to 326 IAC 2-7-12(d) because the modification adds new emission limitations and monitoring, record keeping, and reporting requirements.

Enforcement Issue

There are no enforcement actions pending.

Emission Calculations

There is no increase in the potential to emit due to this modification.

Federal Rule Applicability Determination

The following federal rules are applicable to the source and incorporated into the operating permit as part of this modification:

Clean Air Interstate Rule (CAIR)

Units 14, 15, 17, 18, 16A, and 16B are subject to the Clean Air Interstate Rule (CAIR) Nitrogen Oxides Annual, Sulfur Dioxide, and Nitrogen Oxides Ozone Season Trading Programs – CAIR Permit for CAIR Units under 40 CFR 97.

State Rule Applicability

The following state rules are applicable to the source and incorporated into the operating permit as part of this modification:

326 IAC 24 (Clean Air Interstate Rule (CAIR))

Units 14, 15, 17, 18, 16A, and 16B are subject to the Clean Air Interstate Rule (CAIR) Nitrogen Oxides Annual, Sulfur Dioxide, and Nitrogen Oxides Ozone Season Trading Programs – CAIR Permit for CAIR Units under 326 IAC 24-1-1(a), 326 IAC 24-2-1(a), and 326 IAC 24-3-1(a).

Compliance Determination and Monitoring Requirements

Permits issued under 326 IAC 2-7 are required to ensure that sources can demonstrate compliance with all applicable state and federal rules on a continuous basis. All state and federal rules contain compliance provisions; however, these provisions do not always fulfill the requirement for a continuous demonstration. When this occurs, IDEM, OAQ, in conjunction with the source, must develop specific conditions to satisfy 326 IAC 2-7-5. As a result, Compliance Determination Requirements are included in the permit. The Compliance Determination Requirements in Section D of the permit are those conditions that are found directly within state and federal rules and the violation of which serves as grounds for enforcement action.

If the Compliance Determination Requirements are not sufficient to demonstrate continuous compliance, they will be supplemented with Compliance Monitoring Requirements, also in Section D of the permit. Unlike Compliance Determination Requirements, failure to meet Compliance Monitoring conditions would serve as a trigger for corrective actions and not grounds for enforcement action. However, a violation in relation to a compliance monitoring condition will arise through a source's failure to take the appropriate corrective actions within a specific time period.

Compliance Determination Requirements

There are no changes to the Compliance Determination Requirements as a result of this modification.

Compliance Monitoring Requirements

There are no changes to the Compliance Monitoring Requirements as a result of this modification.

Proposed Changes

The changes listed below have been made to Part 70 Operating Permit No. T 073-26398-00008. Deleted language appears as ~~strikethroughs~~ and new language appears in **bold**:

Change No. 1 Applicable requirements of the Clean Air Interstate Rule (CAIR) have been incorporated into the permit as a new Section G as follows:
