RE: Nishiwaka Standard Company / 087-27812-00031

FROM: Matthew Stuckey, Branch Chief  
Permits Branch  
Office of Air Quality

## Notice of Decision – Approval

Please be advised that on behalf of the Commissioner of the Department of Environmental Management, I have issued a decision regarding the enclosed matter. Pursuant to 326 IAC 2, this approval was effective immediately upon submittal of the application.

If you wish to challenge this decision, IC 4-21.5-3-7 requires that you file a petition for administrative review. This petition may include a request for stay of effectiveness and must be submitted to the Office of Environmental Adjudication, 100 North Senate Avenue, Government Center North, Suite N 501E, Indianapolis, IN 46204, **within eighteen (18) calendar days from the mailing of this notice**. The filing of a petition for administrative review is complete on the earliest of the following dates that apply to the filing:

- (1) the date the document is delivered to the Office of Environmental Adjudication (OEA);
- (2) the date of the postmark on the envelope containing the document, if the document is mailed to OEA by U.S. mail; or
- (3) The date on which the document is deposited with a private carrier, as shown by receipt issued by the carrier, if the document is sent to the OEA by private carrier.

The petition must include facts demonstrating that you are either the applicant, a person aggrieved or adversely affected by the decision or otherwise entitled to review by law. Please identify the permit, decision, or other order for which you seek review by permit number, name of the applicant, location, date of this notice and all of the following:

- (1) the name and address of the person making the request;
- (2) the interest of the person making the request;
- (3) identification of any persons represented by the person making the request;
- (4) the reasons, with particularity, for the request;
- (5) the issues, with particularity, proposed for considerations at any hearing; and
- (6) identification of the terms and conditions which, in the judgment of the person making the request, would be appropriate in the case in question to satisfy the requirements of the law governing documents of the type issued by the Commissioner.

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178. Callers from within Indiana may call toll-free at 1-800-451-6027, ext. 3-0178.

May 4, 2009

Re: 087-27812-00031  
Administrative Amendment to  
Part 70 Permit No. 087-21424-00031

Dear Mr. Hough:

Nishikawa Standard Company was issued a Part 70 permit renewal on April 17, 2006, for the operation of a stationary rubber automotive parts manufacturing source. An application to amend this permit was received on April 20, 2009. The amendment request states the Permittee plans to add one off line finishing spray booth identified as F-4.

The addition of spray booth F-4 meets the definition of an administrative amendment pursuant to 326 IAC 2-7-11(a)(8)(A), because this activity is an exempt emission unit as described in 326 IAC 2-1.1-3. Calculations of the potential to emit from this spray booth are attached as Appendix A. The permit is hereby amended to include the new spray booth as follows (deletions are marked with a ~~strikeout~~ and the new information is in **bold**):

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)] [326 IAC 2-7-5(15)]

This stationary source consists of the following emission units and pollution control devices:

\*\*\*

(u) **One (1) off line finishing spray booth, identified as F-4, approved for construction in 2009, with a capacity of 10 grams of coating per minute, exhausting to stack F-4, S-1.**

~~(u)~~ (v) CV Line 1, identified as CV-1:

\*\*\*

~~(v)~~ (w) CV Line 4, identified as CV-4:

\*\*\*

**SECTION D.1**

**FACILITY OPERATION CONDITIONS**

**Facility Description [326 IAC 2-7-5(15)]**

\*\*\*

(u) One (1) off line finishing spray booth, identified as F-4, approved for construction in 2009, with a capacity of 10 grams of coating per minute, exhausting to stack F-4, S-1.

~~(u)~~ (v) CV Line 1, identified as CV-1:

\*\*\*

~~(v)~~ (w) CV Line 4, identified as CV-4:

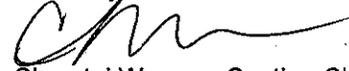

\*\*\*

(The information describing the process contained in this emissions unit description box is descriptive information and does not constitute enforceable conditions.)

All other conditions of the permit shall remain unchanged and in effect. Please find a copy of the entire Part 70 permit as amended.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Roger Osburn, at (800) 451-6027, and ask for Roger Osburn or extension 3-0242, or dial (317) 233-0242.

Sincerely,

Chrystal Wagner, Section Chief  
Permits Branch  
Office of Air Quality

**PART 70 OPERATING PERMIT RENEWAL  
OFFICE OF AIR QUALITY**

**Nishikawa Standard Company  
324 Morrow Street  
Topeka, Indiana 46571**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit is grounds for enforcement action; permit termination, revocation and reissuance, or modification; or denial of a permit renewal application. Noncompliance with any provision of this permit, except any provision specifically designated as not federally enforceable, constitutes a violation of the Clean Air Act. It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in Section B, Emergency Provisions.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-7 as required by 42 USC 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17. This permit also addresses certain new source review requirements for existing equipment and is intended to fulfill the new source review procedures pursuant to 326 IAC 2-2 and 326 IAC 2-7-10.5, applicable to those conditions.

## SECTION A SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

### A.1 General Information [326 IAC 2-7-4(c)][326 IAC 2-7-5(15)][326 IAC 2-7-1(22)]

---

The Permittee owns and operates an extruded rubber seals manufacturing source.

Source Address:	324 Morrow Street, Topeka, Indiana 46571
Mailing Address:	324 Morrow Street, Topeka, Indiana 46571
General Source Phone Number:	(260) 593-2156
SIC Code:	3061
County Location:	LaGrange
Source Location Status:	Attainment for all criteria pollutants
Source Status:	Part 70 Permit Program Minor Source, under PSD Rules; Major Source, Section 112 of the Clean Air Act

### A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)][326 IAC 2-7-5(15)]

---

This stationary source consists of the following emission units and pollution control devices:

- (a) CV Line 5, identified as CV-5, consisting of the following equipment:
  - (1) Two (2) extruders, identified as CV-5Ex, constructed in 1989, with a combined capacity of 400 pounds of rubber per hour, equipped with strip feeders, and two (2) dusters controlled by one (1) dust collector (DC-2) vented internally, and exhausting to general ventilation.
  - (2) One (1) natural gas-fired rubber and coating curing oven, identified as CV-5C, with a heat input capacity of 1.59 MMBtu/hr, exhausting to stack CV-5, S-1.
  - (3) Two (2) exhaust hoods, identified as CV-5EH1 and CV-5EH2, exhausting to stacks CV-5, S-2, and CV-5, S-3, respectively.
  - (4) One (1) Line 5 spray booth coating extruded rubber parts, identified as emission unit CV-5SB, constructed in 2000, equipped with six (6) airless high-volume low-pressure (HVLP) guns coating extruded rubber parts, using dry filters as control, and exhausting to one (1) stack identified as CV-5, S-4, maximum capacity: 7.93 pounds of waterborne urethane coating per hour.
- (b) CV Line 6, identified as CV-6, consisting of the following equipment:
  - (1) One (1) extruder, identified as CV-6Ex, constructed in 1989, with a capacity of 400 pounds of rubber per hour, equipped with strip feeders, and two (2) dusters controlled by one (1) dust collector (DC-2) vented internally, and exhausting to general ventilation.
  - (2) One (1) microwave curing oven, identified as CV-6C2, and exhausting to CV-6, S-2.

- (3) One (1) natural gas-fired rubber and coating curing oven, identified as CV-6C1, with a heat input capacity of 1.59 MMBtu/hr, exhausting to stack CV-6, S-1.
  - (4) Two (2) exhaust hoods, identified as CV-6EH1 and CV-6EH2, CV-6EH1 exhausting to stack CV-5, S-2, and CV-6EH2, exhausting to stacks CV-6, S-2, and CV-5, S-3.
  - (5) One (1) Line 6 spray booth, identified as CV-6SB, constructed in 2000, equipped with six (6) airless high-volume low-pressure (HVLP) guns coating extruded rubber parts, using dry filters as control, and exhausting to one (1) stack identified as CV-6, S-3, maximum capacity: 7.93 pounds of waterborne urethane coating per hour.
- (c) CV Line 7, identified as CV-7, consisting of the following equipment:
- (1) Three (3) extruders, identified as CV-7Ex, constructed in 1991, with a combined capacity of 600 of rubber pounds per hour, equipped with one (1) duster, and exhausting to general ventilation.
  - (2) One (1) natural gas-fired rubber and coating curing oven, identified as CV-C, with a heat input capacity of 1.59 MMBtu/hr, exhausting to stack CV-7, S-1.
  - (3) One (1) exhaust hood, identified as CV-7EH, exhausting to stack CV-6, S-2.
  - (4) One (1) Line 7 waterborne urethane coating booth coating extruded rubber parts, identified as CV-7SB, constructed in 2001, with a capacity of 1.36 gallons of waterborne coating per hour, equipped with spray guns and dry filters, and exhausting to stack CV-7, S-2.
- (d) CV Line 8, identified as CV-8, consisting of the following equipment:
- (1) Four (4) extruders, identified as CV-8Ex, constructed in 1995, with a combined capacity of 400 pounds of rubber per hour, equipped with four (4) strip feeders, and exhausting to general ventilation.
  - (2) One (1) natural gas-fired rubber vulcanizing oven, identified as CV-8C1, with a maximum capacity of 1.59 MMBtu/hr, and exhausting to stacks CV-8, S-1, CV-8, S-2, CV-8, S-3.
  - (3) Two (2) exhaust hoods, identified as CV-8EH1 and CV-8EH2, both exhausting to stack CV-8, S-4.
  - (4) One (1) natural gas fired coating curing oven, identified as CV-8C2, with a maximum capacity of 1.59 MMBtu/hr, and exhausting to stack CV-8, S-4.
  - (5) One (1) urethane application spray booth, identified as CV-8SB, constructed in 1997, equipped with six (6) spray guns coating extruded rubber parts and one (1) blown air dryer, with a capacity of 10 grams of coating per minute per gun, and exhausting to stack CV-8, S-5.
- (e) CV Line 9, identified as CV-9, consisting of the following equipment:
- (1) Two (2) extruders, identified as CV-9Ex, constructed in 1995, with a combined capacity of 400 pounds of rubber per hour, equipped with, two (2) feed hoppers, and one (1) duster controlled by one (1) dust collector (DC-3) vented internally, and exhausting to general ventilation.

- (2) One (1) natural gas fired rubber curing oven, identified as CV-9C1, with a maximum capacity of 1.59 MMBtu/hr, and exhausting to stack CV-9, S-1.
  - (3) One (1) urethane application line, identified as CV-9Ex, constructed in 1996, equipped with six (6) spray guns coating extruded rubber parts and one (1) blown air dryer, with a capacity of 10 grams of coating per minute per gun, and exhausting to stack CV-9, S-5.
  - (4) One (1) natural gas fired coating curing oven with two (2) heat exchangers, identified as CV-9C2, with a maximum capacity of 1.59 MMBt/hr, and exhausting to stacks CV-9, S-2 and CV-9, S-3.
  - (5) One (1) exhaust hood, identified as CV-9EH, and exhausting to stack CV-9, S-4.
- (f) CV Line 10, identified as CV-10, consisting of the following equipment:
- (1) Three (3) extruders, identified as CV-10Ex, with a combined capacity of 750 pounds of rubber per hour, constructed in 2004, and exhausting to general ventilation.
  - (2) Two (2) natural gas-fired microwave curing ovens, identified as CV-10C1, with a heat input capacity of 0.15 MMBtu/hr each, and exhausting to stack CV-10, S-1.
  - (3) One (1) natural gas-fired rubber curing oven, identified as CV-10C2, consisting of four (4) burners each with a heat input capacity of 0.102 MMBtu/hr, and exhausting to stack CV-10, S-2.
  - (4) Six (6) electric heaters, with a capacity of 3 kilowatt hours, each.
  - (5) One (1) exhaust hood, identified as CV-10EH, and exhausting to stack CV-10, S-3.
  - (6) One (1) spray booth, identified as CV-10SB1, constructed in 2004, equipped with four (4) high-volume low-pressure (HVLP) spray guns coating extruded rubber parts, with a capacity of 10 grams of coating per minute per gun, with dry filters for particulate control, exhausting to stack CV-10, S-5.
  - (7) One (1) spray booth, identified as CV-10SB2, constructed in 2004, equipped with four (4) high-volume low-pressure (HVLP) spray guns coating extruded rubber parts, with a capacity of 10 grams of coating per minute per gun, with dry filters for particulate control, exhausting to stack CV-10, S-6.
  - (8) Three (3) infrared coating curing ovens, identified as CV-10C3, CV-10C4, and CV-10C5, the first two exhausting to general ventilation, the third exhausting to stack CV-10, S-4.
  - (9) One (1) plasma arc generator, consisting of one (1) electric generator, with a capacity of 1.2 kilowatt hours, exhausting to stack CV-10, S-1.
- (g) CV Line 11, identified as CV-11, consisting of the following equipment:
- (1) Four (4) extruders, identified as CV-11Ex, constructed in 1987 and modified in 2008, with a combined capacity of 200 pounds of rubber per hour, equipped with four (4) strip feeders, and exhausting to general ventilation.

- (2) One (1) electric microwave rubber curing oven, identified as CV-11C1, and exhausting to stack CV-11, S-1.
  - (3) One (1) natural gas rubber curing oven, identified as CV-11C2, with a heat input capacity of 0.5 MMBtu/hr, and exhausting to stacks CV-11, S-1 and CV-11, S-2.
  - (4) Two (2) exhaust hoods, identified as CV-11EH1 and CV-11EH2, and exhausting to stacks CV-11, S-2 and CV-11, S-1, respectively.
  - (5) One (1) spray booth, identified as CV-11Ex, constructed in 2000 and modified in 2008, equipped with four (4) airless high-volume low-pressure (HVLP) guns coating extruded rubber parts, with a capacity of 10 grams of coating per minute per gun, with dry filters for particulate control, exhausting to stack CV-11 S-3.
  - (6) One (1) natural gas coating curing oven, identified as CV-11C3, with a heat input capacity of 0.5 MMBtu/hr, and exhausting to stacks CV-11, S-1 and CV-11, S-2.
- (h) CV Line 12, identified as CV-12, consisting of the following equipment:
- (1) One (1) extrusion, identified as CV-12Ex, approved for construction in 2008, with a capacity of 200 pounds of rubber per hour, and exhausting to general ventilation.
  - (2) One (1) electric microwave oven, identified as CV-12C1.
  - (3) One (1) natural gas rubber curing oven, identified as CV-12C2, approved for construction in 2008, with a heat input capacity of 0.5 MMBtu/hr, and exhausting to stack CV-12, S-1.
  - (4) One (1) natural gas coating curing oven, identified as CV-12C3, approved for construction in 2008, with a heat input capacity of 0.5 MMBtu/hr, and exhausting to stack CV-12, S-2.
- (i) SDM Line 1 (EA), identified as SDM-1, consisting of the following equipment:
- (1) One (1) core metal heater, identified as SDM-1MH, with two (2) natural gas-fired burners with a maximum heat input rate of 0.375 MMBtu/hr.
  - (2) Four (4) extruders, identified as SDM-1Ex, constructed in 2004, with a combined capacity of 1289 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) Two (2) natural gas-fired microwave curing ovens, identified as SDM-1C1 and SDM-1C2, with a maximum heat input rate 0.143 MMBtu/hr each, exhausting to stack SDM-1, S-1.
  - (4) One (1) natural gas-fired rubber curing oven, identified as SDM-C3, with two (2) burners with a maximum heat input rate of 0.850 MMBtu/hr each, exhausting to stack SDM-1, S-2.
  - (5) One (1) electric plasma arc generator, identified as SDM-1PI, exhausting to stack SDM-1, S-3.
  - (6) One (1) spray booth, identified as SDM-1SB, constructed in 2004, equipped with six (6) high-volume low-pressure (HVLP) spray guns coating extruded rubber parts, using dry filters to control PM overspray emissions, and exhausting to stack SDM-1, S-5.

- (7) One (1) natural gas-fired coating cure oven, identified as SDM-1, C4, with two burners rated at 0.340 MMBtu/hr each, and exhausting to stack SDM-1, S-4.
- (j) SDM Line 2 (EB), identified as SDM-2, consisting of the following equipment:
- (1) One (1) natural gas-fired core metal heater, identified as SDM-2MH, with a heat input capacity of 1.19 MMBtu/hr, and exhausting to stack SDM-2, S-1.
  - (2) Two (2) extruders (one (1) sponge and one (1) dense), identified as SDM-2Ex, constructed in 1989, with a combined capacity of 400 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) One (1) natural gas-fired bead type rubber curing oven and deodorizing furnace, identified as SDM-2C1, with a heat input capacity of 1.99 MMBtu/hr, and exhausting to stacks SDM-2, S-2 and SDM-2, S-3.
  - (4) One (1) bead recovery/dryer system, identified as SDM-2RD, exhausting to stack SDM-2, S-4.
  - (5) One (1) spray booth, identified as SDM-2SB, constructed in 1994, equipped with five (5) spray guns and drip applicators coating extruded rubber parts, with a maximum capacity of 0.00086 gallons per minute and 4080 meters per hour for the drip and wipe and 10 grams of coating per minute per gun for the spray application, and exhausting to stack SDM-2, S-7.
  - (6) One (1) natural gas-fired drying oven (2 sections) rated at 2.0 million British thermal units per hour, and exhausting at stacks SDM-2, S-5 and SDM-2, S-6.
- (k) SDM Line 3 (EC), identified as SDM-3, consisting of the following equipment:
- (1) One (1) natural gas-fired core metal heater, identified as SDM-3MH, with a heat input capacity of 1.19 MMBtu/hr, and exhausting to general ventilation.
  - (2) Three (3) extruders, identified as SDM-3Ex, constructed in 1994, with a combined capacity of 400 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) One (1) natural gas-fired bead type rubber curing over and deodorizing furnace, identified as SDM-3C1, with a heat input capacity of 1.99 MMBtu/hr, and exhausting to stacks SDM, S-2, SDM-3, S-3 and SDM-3, S-4.
  - (4) One (1) bead recovery/dryer system, identified as SDM-3, exhausting to stack SDM-3, S-5.
  - (5) One (1) SDM EC urethane application spray booth, identified as SDM-3SB, constructed in 1996, equipped with three (3) spray guns coating extruded rubber parts, with a capacity of 10 grams of coating per minute per gun, exhausting to stack SDM-3, S-7.
  - (6) One (1) natural gas-fired curing oven, identified as SDM-3C2, with a heat input capacity of 1.0 MMBtu/hr, and exhausting to stack SDM-3, S-6.

- (l) SDM Line 4 (ED), identified as SDM-4, consisting of the following equipment:
  - (1) One (1) core metal heater, identified as SDM-4MH, with two (2) natural gas-fired burners, each has a heat input capacity of 0.375 million British thermal unit per hour, and exhausting to stack SDM-4, S-1.
  - (2) Four (4) extruders, identified as SDM-4Ex, constructed in 2002, with a maximum capacity of 1289 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) Two (2) natural gas-fired microwave rubber curing ovens, identified as SDM-4C1, each with a heat input capacity of 0.143 MMBtu/hr, and both exhausting to stack SDM-4, S-2.
  - (4) One (1) natural gas-fired curing oven, identified as SDM-4C2, with two (2) burners, each with a heat input capacity of 0.850 MMBtu/hr, and exhausting to stack SDM-4, S-3.
  - (5) One (1) electric plasma arc unit, identified as SDM-4PI, exhausting to stack SDM-4, S-4.
  - (6) One (1) spray booth, identified as SDM-4SB, constructed in 2002, equipped with six (6) High-volume low-pressure (HVLP) spray guns coating extruded rubber parts, using dry filters to control PM overspray emissions, exhausting to stack SDM-4, S-6.
  - (7) One (1) natural gas-fired coating cure oven, identified as SDM-4C3, with two burners each having a heat input capacity of 0.34 MMBtu/hr, and exhausting to stack SDM-4, S-5.
  
- (m) SDM Line 5 (EE), identified as SDM-5, consisting of the following equipment:
  - (1) One (1) core metal heater, identified as SDM-5MH, with (2) natural gas-fired burners with heat input capacity of 0.375 MMBtu/hr each.
  - (2) Four (4) extruders, identified as SDM-5Ex, constructed in 2002, with a combined capacity of 1289 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) Two (2) natural gas-fired microwave curing ovens, identified as SDM-5C1, with a heat input capacity of 0.143 MMBtu/hr each, exhausting to stack SDM-5, S-1.
  - (4) One (1) natural gas-fired rubber curing ovens, identified as SDM-5C2, with two (2) burners, each having a heat input capacity of 0.850 MMBtu/hr, exhausting to stack SDM-5, S-2.
  - (5) One (1) electric plasma arc unit, identified as SDM-5PI, and exhausting to stack SDM-5, S-3.
  - (6) One (1) spray line, identified as SDM-5SB, constructed in 2002, equipped with six (6) high-volume low-pressure (HVLP) spray guns coating extruded rubber parts, using dry filters as controls, with a capacity of 10 grams per minute of coating per gun, and exhausting to stack SDM-5, S-5.
  - (7) One (1) natural gas-fired coating cure oven, identified as SDM-5C3, with two (2) 0.340 MMBtu/hr burners, exhausting to stacks SDM-5, S-4.

- (n) L-Coat Extrusion Line, identified as LC-1, consisting of the following equipment:
  - (1) Four (4) plastic extruders identified as LC-1Ex, constructed in 2006, with a capacity of 19.0 pounds per hour each, and exhausting to general ventilation.
  - (2) Three (3) rubber extruders, identified as LC-1Ex, constructed in 2006, with a capacity of 447.0 pounds per hour each, and exhausting to general ventilation.
  - (3) One (1) natural gas curing oven, identified as LC-1C1, exhausting to stacks LC, S-1, LC, S-2, and LC, S-3, consisting of the following burners:
    - (A) Four (4) natural gas-fired burners, constructed in 2006, with a heat input capacity of 0.782 MMBtu/hr each.
    - (B) Five (5) natural gas-fired burners, constructed in 2007, with a heat input capacity of 0.782 MMBtu/hr each.
  - (4) Three (3) exhaust hoods, identified as LC-1EH1, LC-1EH2, and LC-1EH3, and exhausting to LC, S-4, LC, S-5, and LC, S-6, respectively.
  - (5) One (1) plasma arc unit, identified as LC-1PI, exhausting to stack LC, S-7.
  - (6) One (1) L-Coat Glassline Spray Booth, identified as LC-1SB1, constructed in 2006, utilizing seven (7) high-volume low-pressure (HVLP) spray guns with a maximum capacity of 1.0 unit per hour and particulate emissions controlled by dry filters, and exhausting to stack LC, S-9.
  - (7) One (1) L-Coat Glassline Spray Booth, identified as LC-1SB2, constructed in 2007, utilizing seven (7) high-volume low-pressure (HVLP) spray guns with a maximum capacity of 1.0 unit per hour and particulate emissions controlled by dry filters, and exhausting to one (1) stack LC, S-10.
  - (8) One (1) natural gas coating curing oven, identified as LC-1C2, consisting of six (6) natural gas-fired burners with a maximum heat input capacity of 0.086 MMBtu/hr each, and exhausting to stack LC, S-8.
- (o) One (1) mixing department, identified as Mix-1, constructed in 1987, equipped with one (1) carbon black weigh station and one (1) raw chemical weigh station, both exhausting to a small baghouse identified as Mix-1, S-1, with a capacity of 416.7 pounds of rubber per hour, 3.2 pounds of talc per hour, and 83.3 pounds of carbon black per hour.
- (p) One (1) spray coating booth coating extruded rubber parts, identified as emission unit L42C Nissan, constructed in 2008, equipped with one (1) spray gun, using dry filters as particulate control, with a capacity of ten (10) grams per hour, and exhausting to stack LC-42C, S-1.
- (q) One (1) VN surface coating line, identified as VN-1SB, constructed in 2004, including:
  - (1) One (1) surface coating booth, equipped with one (1) high-volume low-pressure (HVLP) spray gun coating extruded rubber parts, applying surface coatings to rubber parts at a maximum design rate of 0.15 gallons per hour, with particulate emissions controlled by a dry filter system, with emissions exhausted through Stack VN-1, S-1.
  - (2) One (1) electric curing oven, identified as VN-1C.

- (r) One (1) off line finishing spray booth, identified as F-1, constructed in 2007, with a capacity of 10 grams of coating per minute, exhausting at stack F-1, S-1.
- (s) One (1) off line finishing spray booth, identified as F-2, constructed in 2007, with a capacity of 10 grams of coating per minute, exhausting at stack F-2, S-1.
- (t) One (1) off line finishing spray booth, identified as F-3, constructed in 2007, with a capacity of 10 grams of coating per minute, exhausting at stack F-3, S-1.
- (u) One (1) off line finishing spray booth, identified as F-4, approved for construction in 2009, with a capacity of 10 grams of coating per minute, exhausting to stack F-4, S-1.
- (v) CV Line 1, identified as CV-1, consisting of the following equipment:
  - (1) One (1) extruder, identified as CV-1Ex, constructed in 1987, with a capacity of 200 pounds of rubber per hour, equipped with extruders, strip feeders, and one (1) duster controlled by one (1) dust collector (DC-1) vented internally, and exhausting to general ventilation.
  - (2) One (1) natural gas-fired rubber and coating curing oven, identified as CV-1C, with a heat input capacity of 1.59 MMBtu/hr, and exhausting to stack CV-1, S-1.
  - (3) One (1) natural gas-fired pre-heater, identified as CV-1Pr, with a heat input capacity of 0.298 MMBtu/hr, and exhausting to stack CV-1, S-2.
  - (4) One (1) exhaust hood, exhausting to stack CV-1, S-2.
  - (5) One (1) spray booth, identified as CV-1SB, constructed in 2000, equipped with three (3) airless high-volume low-pressure (HVL) guns coating extruded rubber parts, using dry filters as particulate control, and exhausting to stack identified as CV-1 S-3, maximum capacity: 3.97 pounds of waterborne urethane coating per hour.
- (w) CV Line 4, identified as CV-4, consisting of the following equipment:
  - (1) Two (2) extruders, identified as CV-4Ex, constructed in 1988, with a combined capacity of 200 pounds of rubber per hour, equipped with strip feeders, and one (1) duster controlled by one (1) dust collector (DC-1) vented internally, curing ovens, and exhausting to general ventilation.
  - (2) One (1) natural gas-fired pre-heater, identified as CV-4Pr, with a heat input capacity of 0.298 MMBtu/hr, and exhausting to stack CV-1, S-2.
  - (3) One (1) exhaust hood, exhausting to stack CV-1, S-2.
  - (4) One (1) natural gas-fired rubber and coating curing oven, identified as CV-4C, with a heat input capacity of 1.59 MMBtu/hr, and exhausting to stack CV-4, S-1.
  - (5) One (1) Line 4 waterborne urethane coating booth coating extruded rubber parts, identified as CV-4SB, constructed in 2001, with a capacity of 0.45 gallons per hour, equipped with dry filters and exhausting to stack CV-4, S-2.

A.3 Specifically Regulated Insignificant Activities [326 IAC 2-7-1(21)][326 IAC 2-7-4(c)][326 IAC 2-7-5(15)]

---

This stationary source also includes the following insignificant activities which are specifically regulated, as defined in 326 IAC 2-7-1(21):

- (a) Tumblers [326 IAC 6-3]
- (b) Dango Mixing Mills B and F, each with a dispersion system, using particulate filters as control [326 IAC 6-3]
- (c) Color Mixing Mill [326 IAC 6-3]
- (d) SDM Finishing Drill and Fastener Insetter Units [326 IAC 6-3]
- (e) Mold Tech Repair Sandblast Unit [326 IAC 6-3]
- (f) Mold Tech Repair Weld and Metalworking Equipment [326 IAC 6-3]
- (g) Dango Barwell Extruders [326 IAC 6-3]
- (h) Polymer Block Cutting Station [326 IAC 6-3]
- (i) Scrap Cardboard Bailing Unit [326 IAC 6-3]
- (j) Weld Shop Equipment [326 IAC 6-3]
- (k) Silicone Coating Mixing Station [326 IAC 6-3]
- (l) Die Room Metalworking Equipment [326 IAC 6-3]
- (m) SDM Mezzanine Units [326 IAC 6-3]
- (n) Barwell Warm-Up Mill [326 IAC 6-3]

A.4 Part 70 Permit Applicability [326 IAC 2-7-2]

---

This stationary source is required to have a Part 70 permit by 326 IAC 2-7-2 (Applicability) because it is a major source, as defined in 326 IAC 2-7-1(22).

## **SECTION B GENERAL CONDITIONS**

### **B.1 Definitions [326 IAC 2-7-1]**

---

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2 and 326 IAC 2-7) shall prevail.

### **B.2 Permit Term [326 IAC 2-7-5(2)][326 IAC 2-1.1-9.5][326 IAC 2-7-4(a)(1)(D)][IC 13-15-3-6(a)]**

- (a) This permit, T087-21424-00031, is issued for a fixed term of five (5) years from the issuance date of this permit, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date of this permit.
- (b) If IDEM, OAQ, upon receiving a timely and complete renewal permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect, including any permit shield provided in 326 IAC 2-7-15, until the renewal permit has been issued or denied.

### **B.3 Term of Conditions [326 IAC 2-1.1-9.5]**

---

Notwithstanding the permit term of a permit to construct, a permit to operate, or a permit modification, any condition established in a permit issued pursuant to a permitting program approved in the state implementation plan shall remain in effect until:

- (a) the condition is modified in a subsequent permit action pursuant to Title I of the Clean Air Act; or
- (b) the emission unit to which the condition pertains permanently ceases operation.

### **B.4 Enforceability [326 IAC 2-7-7]**

---

Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.

### **B.5 Severability [326 IAC 2-7-5(5)]**

---

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

### **B.6 Property Rights or Exclusive Privilege [326 IAC 2-7-5(6)(D)]**

---

This permit does not convey any property rights of any sort or any exclusive privilege.

### **B.7 Duty to Provide Information [326 IAC 2-7-5(6)(E)]**

- (a) The Permittee shall furnish to IDEM, OAQ, within a reasonable time, any information that IDEM, OAQ, may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The submittal by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34). Upon request, the Permittee shall also furnish to IDEM, OAQ, copies of records required to be kept by this permit.
- (b) For information furnished by the Permittee to IDEM, OAQ, the Permittee may include a claim of confidentiality in accordance with 326 IAC 17.1. When furnishing copies of requested records directly to U. S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.8 Certification [326 IAC 2-7-4(f)][326 IAC 2-7-6(1)][326 IAC 2-7-5(3)(C)]

- (a) Where specifically designated by this permit or required by an applicable requirement, any application form, report, or compliance certification submitted shall contain certification by a responsible official of truth, accuracy, and completeness. This certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) One (1) certification shall be included, using the attached Certification Form, with each submittal requiring certification. One (1) certification may cover multiple forms in one (1) submittal.
- (c) A responsible official is defined at 326 IAC 2-7-1(34).

B.9 Annual Compliance Certification [326 IAC 2-7-6(5)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. All certifications shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted in letter form no later than July 1 of each year to:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

and

United States Environmental Protection Agency, Region V  
Air and Radiation Division, Air Enforcement Branch - Indiana (AE-17J)  
77 West Jackson Boulevard  
Chicago, Illinois 60604-3590

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
  - (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
  - (2) The compliance status;
  - (3) Whether compliance was continuous or intermittent;
  - (4) The methods used for determining the compliance status of the source, currently and over the reporting period consistent with 326 IAC 2-7-5(3); and
  - (5) Such other facts, as specified in Sections D of this permit, as IDEM, OAQ, may require to determine the compliance status of the source.

The submittal by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

**B.10 Preventive Maintenance Plan [326 IAC 2-7-5(1),(3) and (13)][326 IAC 2-7-6(1) and (6)][326 IAC 1-6-3]**

---

- (a) If required by specific condition(s) in Section D of this permit, the Permittee shall maintain and implement Preventive Maintenance Plans (PMPs) including the following information on each facility:
- (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
  - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
  - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.
- (b) A copy of the PMPs shall be submitted to IDEM, OAQ, upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ. IDEM, OAQ, may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or is the primary contributor to an exceedance of any limitation on emissions or potential to emit. The PMPs do not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) To the extent the Permittee is required by 40 CFR Part 60/63 to have an Operation Maintenance, and Monitoring (OMM) Plan for a unit, such Plan is deemed to satisfy the PMP requirements of 326 IAC 1-6-3 for that unit.

**B.11 Emergency Provisions [326 IAC 2-7-16]**

---

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describe the following:
- (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
  - (2) The permitted facility was at the time being properly operated;
  - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
  - (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ, within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;  
  
Telephone Number: 1-800-451-6027 (ask for Office of Air Quality,  
Compliance and Enforcement Branch), or  
Telephone Number: 317-233-0178 (ask for Compliance and Enforcement Branch)  
Facsimile Number: 317-233-6865
  - (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-7-5(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) The Permittee seeking to establish the occurrence of an emergency shall make records available upon request to ensure that failure to implement a PMP did not cause or contribute to an exceedance of any limitations on emissions. However, IDEM, OAQ, may require that the Preventive Maintenance Plans required under 326 IAC 2-7-4(c)(9) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ, by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-7 and any other applicable rules.
- (g) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
- (h) The Permittee shall include all emergencies in the Quarterly Deviation and Compliance Monitoring Report.

**B.12 Permit Shield [326 IAC 2-7-15][326 IAC 2-7-20][326 IAC 2-7-12]**

---

- (a) Pursuant to 326 IAC 2-7-15, the Permittee has been granted a permit shield. The permit shield provides that compliance with the conditions of this permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that either the applicable requirements are included and specifically identified in this permit or the permit contains an explicit determination or concise summary of a determination that other specifically identified requirements are not applicable. The

Indiana statutes from IC 13 and rules from 326 IAC, referenced in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a Part 70 permit under 326 IAC 2-7 or for applicable requirements for which a permit shield has been granted.

This permit shield does not extend to applicable requirements which are promulgated after the date of issuance of this permit unless this permit has been modified to reflect such new requirements.

- (b) If, after issuance of this permit, it is determined that the permit is in nonconformance with an applicable requirement that applied to the source on the date of permit issuance, IDEM, OAQ, shall immediately take steps to reopen and revise this permit and issue a compliance order to the Permittee to ensure expeditious compliance with the applicable requirement until the permit is reissued. The permit shield shall continue in effect so long as the Permittee is in compliance with the compliance order.
- (c) No permit shield shall apply to any permit term or condition that is determined after issuance of this permit to have been based on erroneous information supplied in the permit application. Erroneous information means information that the Permittee knew to be false, or in the exercise of reasonable care should have been known to be false, at the time the information was submitted.
- (d) Nothing in 326 IAC 2-7-15 or in this permit shall alter or affect the following:
  - (1) The provisions of Section 303 of the Clean Air Act (emergency orders), including the authority of the U.S. EPA under Section 303 of the Clean Air Act;
  - (2) The liability of the Permittee for any violation of applicable requirements prior to or at the time of this permit's issuance;
  - (3) The applicable requirements of the acid rain program, consistent with Section 408(a) of the Clean Air Act; and
  - (4) The ability of U.S. EPA to obtain information from the Permittee under Section 114 of the Clean Air Act.
- (e) This permit shield is not applicable to any change made under 326 IAC 2-7-20(b)(2) (Sections 502(b)(10) of the Clean Air Act changes) and 326 IAC 2-7-20(c)(2) (trading based on State Implementation Plan (SIP) provisions).
- (f) This permit shield is not applicable to modifications eligible for group processing until after IDEM, OAQ, has issued the modifications. [326 IAC 2-7-12(c)(7)]
- (g) This permit shield is not applicable to minor Part 70 permit modifications until after IDEM, OAQ, has issued the modification. [326 IAC 2-7-12(b)(8)]

**B.13 Prior Permits Superseded [326 IAC 2-1.1-9.5][326 IAC 2-7-10.5]**

---

- (a) All terms and conditions of permits established prior to T087-21424-00031 and issued pursuant to permitting programs approved into the state implementation plan have been either:
  - (1) incorporated as originally stated,
  - (2) revised under 326 IAC 2-7-10.5, or

(3) deleted under 326 IAC 2-7-10.5.

(b) Provided that all terms and conditions are accurately reflected in this permit, all previous registrations and permits are superseded by this Part 70 Operating Permit.

**B.14 Termination of Right to Operate [326 IAC 2-7-10][326 IAC 2-7-4(a)]**

---

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-7-3 and 326 IAC 2-7-4(a).

**B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-7-5(3)(C)(ii)]**

---

(a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provisions), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent. A deviation required to be reported pursuant to an applicable requirement that exists independent of this permit, shall be reported according to the schedule stated in the applicable requirement and does not need to be included in this report.

The Quarterly Deviation and Compliance Monitoring Report does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

(b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit.

**B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination [326 IAC 2-7-5(6)(C)] [326 IAC 2-7-8(a)][326 IAC 2-7-9]**

---

(a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a Part 70 permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-7-5(6)(C)] The notification by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

(b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM, OAQ, determines any of the following:

(1) That this permit contains a material mistake.

(2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.

(3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-7-9(a)(3)]

(c) Proceedings by IDEM, OAQ, to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-7-9(b)]

- (d) The reopening and revision of this permit, under 326 IAC 2-7-9(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM, OAQ, at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM, OAQ, may provide a shorter time period in the case of an emergency. [326 IAC 2-7-9(c)]

**B.17 Permit Renewal [326 IAC 2-7-3][326 IAC 2-7-4][326 IAC 2-7-8(e)]**

---

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ, and shall include the information specified in 326 IAC 2-7-4. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(21) and 326 IAC 2-7-1(40). The renewal application does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management  
Permit Administration and Support Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

- (b) A timely renewal application is one that is:
  - (1) Submitted at least nine (9) months prior to the date of the expiration of this permit; and
  - (2) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (c) If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-7 until IDEM, OAQ, takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ, any additional information identified as being needed to process the application.

**B.18 Permit Amendment or Modification [326 IAC 2-7-11][326 IAC 2-7-12]**

---

- (a) Permit amendments and modifications are governed by the requirements of 326 IAC 2-7-11 or 326 IAC 2-7-12 whenever the Permittee seeks to amend or modify this permit.
- (b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management  
Permit Administration and Support Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

Any such application shall be certified by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

**B.19 Permit Revision Under Economic Incentives and Other Programs [326 IAC 2-7-5(8)][326 IAC 2-7-12 (b)(2)]**

---

- (a) No Part 70 permit revision shall be required under any approved economic incentives, marketable Part 70 permits, emissions trading, and other similar programs or processes for changes that are provided for in a Part 70 permit.
- (b) Notwithstanding 326 IAC 2-7-12(b)(1) and 326 IAC 2-7-12(c)(1), minor Part 70 permit modification procedures may be used for Part 70 modifications involving the use of economic incentives, marketable Part 70 permits, emissions trading, and other similar approaches to the extent that such minor Part 70 permit modification procedures are explicitly provided for in the applicable State Implementation Plan (SIP) or in applicable requirements promulgated or approved by the U.S. EPA.

**B.20 Operational Flexibility [326 IAC 2-7-20][326 IAC 2-7-10.5]**

---

- (a) The Permittee may make any change or changes at the source that are described in 326 IAC 2-7-20(b), (c), or (e), without a prior permit revision, if each of the following conditions is met:
  - (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
  - (2) Any preconstruction approval required by 326 IAC 2-7-10.5 has been obtained;
  - (3) The changes do not result in emissions which exceed the limitations provided in this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
  - (4) The Permittee notifies the:  
  
Indiana Department of Environmental Management  
Permit Administration and Support Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251  
  
and  
  
United States Environmental Protection Agency, Region V  
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)  
77 West Jackson Boulevard  
  
Chicago, Illinois 60604-3590  
  
in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and
  - (5) The Permittee maintains records on-site, on a rolling five (5) year basis, which document all such changes and emission trades that are subject to 326 IAC 2-7-20(b), (c), or (e). The Permittee shall make such records available, upon reasonable request, for public review.

Such records shall consist of all information required to be submitted to IDEM, OAQ, in the notices specified in 326 IAC 2-7-20(b)(1), (c)(1), and (e)(2).

- (b) The Permittee may make Section 502(b)(10) of the Clean Air Act changes (this term is defined at 326 IAC 2-7-1(36)) without a permit revision, subject to the constraint of 326 IAC 2-7-20(a). For each such Section 502(b)(10) of the Clean Air Act change, the required written notification shall include the following:
- (1) A brief description of the change within the source;
  - (2) The date on which the change will occur;
  - (3) Any change in emissions; and
  - (4) Any permit term or condition that is no longer applicable as a result of the change.

The notification which shall be submitted is not considered an application form, report or compliance certification. Therefore, the notification by the Permittee does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (c) Emission Trades [326 IAC 2-7-20(c)]  
The Permittee may trade emissions increases and decreases at the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-7-20(c).
- (d) Alternative Operating Scenarios [326 IAC 2-7-20(d)]  
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-7-5(9). No prior notification of IDEM, OAQ, or U.S. EPA is required.
- (e) Backup fuel switches specifically addressed in, and limited under, Section D of this permit shall not be considered alternative operating scenarios. Therefore, the notification requirements of part (a) of this condition do not apply.

B.21 Source Modification Requirement [326 IAC 2-7-10.5]

A modification, construction, or reconstruction is governed by the requirements of 326 IAC 2 and 326 IAC 2-7-10.5.

B.22 Inspection and Entry [326 IAC 2-7-6][IC 13-14-2-2][IC 13-30-3-1][IC 13-17-3-2]

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a Part 70 source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, have access to and copy any records that must be kept under the conditions of this permit;
- (c) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, inspect any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;

- (d) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, sample or monitor substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
- (e) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

**B.23** Transfer of Ownership or Operational Control [326 IAC 2-7-11]

- (a) The Permittee must comply with the requirements of 326 IAC 2-7-11 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:  
  
Permit Administration and Support Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251  
  
The application which shall be submitted by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

**B.24** Annual Fee Payment [326 IAC 2-7-19][326 IAC 2-7-5(7)][326 IAC 2-1.1-7]

- (a) The Permittee shall pay annual fees to IDEM, OAQ, within thirty (30) calendar days of receipt of a billing. Pursuant to 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM, OAQ, the applicable fee is due April 1 of each year.
- (b) Except as provided in 326 IAC 2-7-19(e), failure to pay may result in administrative enforcement action or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-4230 (ask for OAQ, Billing, Licensing, and Training Section), to determine the appropriate permit fee.

**B.25** Credible Evidence [326 IAC 2-7-5(3)][326 IAC 2-7-6][62 FR 8314][326 IAC 1-1-6]

For the purpose of submitting compliance certifications or establishing whether or not the Permittee has violated or is in violation of any condition of this permit, nothing in this permit shall preclude the use, including the exclusive use, of any credible evidence or information relevant to whether the Permittee would have been in compliance with the condition of this permit if the appropriate performance or compliance test or procedure had been performed.

## SECTION C

## SOURCE OPERATION CONDITIONS

Entire Source

### Emission Limitations and Standards [326 IAC 2-7-5(1)]

**C.1 Particulate Emission Limitations For Processes with Process Weight Rates Less Than One Hundred (100) Pounds per Hour [326 IAC 6-3-2]**

Pursuant to 326 IAC 6-3-2(e)(2), particulate emissions from any process not exempt under 326 IAC 6-3-1(b) or (c) which has a maximum process weight rate less than 100 pounds per hour and the methods in 326 IAC 6-3-2(b) through (d) do not apply shall not exceed 0.551 pounds per hour.

**C.2 Opacity [326 IAC 5-1]**

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

**C.3 Open Burning [326 IAC 4-1][IC 13-17-9]**

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1.

**C.4 Incineration [326 IAC 4-2][326 IAC 9-1-2]**

The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and 326 IAC 9-1-2.

**C.5 Fugitive Dust Emissions [326 IAC 6-4]**

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions).

**C.6 Asbestos Abatement Projects [326 IAC 14-10][326 IAC 18][40 CFR 61, Subpart M]**

- (a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.
- (b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:
  - (1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or

- (2) If there is a change in the following:
  - (A) Asbestos removal or demolition start date;
  - (B) Removal or demolition contractor; or
  - (C) Waste disposal site.
- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).
- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management  
Asbestos Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-52 IGCN 1003  
Indianapolis, Indiana 46204-2251

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (e) **Procedures for Asbestos Emission Control**  
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-1, emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) **Demolition and Renovation**  
The Permittee shall thoroughly inspect the affected facility or part of the facility where the demolition or renovation will occur for the presence of asbestos pursuant to 40 CFR 61.145(a).
- (g) **Indiana Accredited Asbestos Inspector**  
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement to use an Indiana Accredited Asbestos inspector is not federally enforceable.

### **Testing Requirements [326 IAC 2-7-6(1)]**

#### **C.7 Performance Testing [326 IAC 3-6]**

---

- (a) All testing shall be performed according to the provisions of 326 IAC 3-6 (Source Sampling Procedures), except as provided elsewhere in this permit, utilizing any applicable procedures and analysis methods specified in 40 CFR 51, 40 CFR 60, 40 CFR 61, 40 CFR 63, 40 CFR 75, or other procedures approved by IDEM, OAQ.

A test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ, if the Permittee submits to IDEM, OAQ, a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

#### **Compliance Requirements [326 IAC 2-1.1-11]**

##### **C.8 Compliance Requirements [326 IAC 2-1.1-11]**

---

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements by issuing an order under 326 IAC 2-1.1-11. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

#### **Compliance Monitoring Requirements [326 IAC 2-7-5(1)][326 IAC 2-7-6(1)]**

##### **C.9 Compliance Monitoring [326 IAC 2-7-5(3)][326 IAC 2-7-6(1)]**

---

Unless otherwise specified in this permit, all monitoring and record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance. If required by Section D, the Permittee shall be responsible for installing any necessary equipment and initiating any required monitoring related to that equipment. If due to circumstances beyond its control, that equipment cannot be installed and operated within ninety (90) days, the Permittee may extend the compliance schedule related to the equipment for an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

in writing, prior to the end of the initial ninety (90) day compliance schedule, with full justification of the reasons for the inability to meet this date.

The notification which shall be submitted by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

Unless otherwise specified in the approval for the new emission unit(s), compliance monitoring for new emission units or emission units added through a source modification shall be implemented when operation begins.

**C.10 Monitoring Methods [326 IAC 3][40 CFR 60][40 CFR 63]**

---

Any monitoring or testing required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, 40 CFR 60 Appendix B, 40 CFR 63, or other approved methods as specified in this permit.

**C.11 Instrument Specifications [326 IAC 2-1.1-11][326 IAC 2-7-5(3)][326 IAC 2-7-6(1)]**

---

- (a) When required by any condition of this permit, an analog instrument used to measure a parameter related to the operation of an air pollution control device shall have a scale such that the expected maximum reading for the normal range shall be no less than twenty percent (20%) of full scale.
- (b) The Permittee may request that the IDEM, OAQ approve the use of an instrument that does not meet the above specifications provided the Permittee can demonstrate that an alternative instrument specification will adequately ensure compliance with permit conditions requiring the measurement of the parameters.

**Corrective Actions and Response Steps [326 IAC 2-7-5][326 IAC 2-7-6]**

**C.12 Emergency Reduction Plans [326 IAC 1-5-2][326 IAC 1-5-3]**

---

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

- (a) The Permittee prepared and submitted written emergency reduction plans (ERPs) consistent with safe operating procedures on November 15, 1996.
- (b) Upon direct notification by IDEM, OAQ, that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level. [326 IAC 1-5-3]

**C.13 Risk Management Plan [326 IAC 2-7-5(12)][40 CFR 68]**

---

If a regulated substance, as defined in 40 CFR 68, is present at a source in more than a threshold quantity, the Permittee must comply with the applicable requirements of 40 CFR 68.

**C.14 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-7-5][326 IAC 2-7-6]**

---

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM, OAQ, within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.
- (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM, OAQ that retesting in one-hundred and twenty (120) days is not practicable, IDEM, OAQ may extend the retesting deadline.
- (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The response action documents submitted pursuant to this condition do require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

## **Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)][326 IAC 2-7-19]**

### **C.15 Emission Statement [326 IAC 2-7-5(3)(C)(iii)][326 IAC 2-7-5(7)][326 IAC 2-7-19(c)][326 IAC 2-6]**

- (a) In accordance with the compliance schedule specified in 326 IAC 2-6-3(b)(1), starting in 2007 and every three (3) years thereafter, the Permittee shall submit by July 1 an emission statement covering the previous calendar year. The emission statement shall contain, at a minimum, the information specified in 326 IAC 2-6-4(c) and shall meet the following requirements:
- (1) Indicate estimated actual emissions of all pollutants listed in 326 IAC 2-6-4(a);
  - (2) Indicate estimated actual emissions of regulated pollutants as defined by 326 IAC 2-7-1 (32) ("Regulated pollutant, which is used only for purposes of Section 19 of this rule") from the source, for purpose of fee assessment.

The statement must be submitted to:

Indiana Department of Environmental Management  
Technical Support and Modeling Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-50 IGCN 1003  
Indianapolis, Indiana 46204-2251

The emission statement does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) The emission statement required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.

### **C.16 General Record Keeping Requirements [326 IAC 2-7-5(3)][326 IAC 2-7-6]**

- (a) Records of all required monitoring data, reports and support information required by this permit shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be physically present or electronically accessible at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.
- (b) Unless otherwise specified in this permit, all record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

### **C.17 General Reporting Requirements [326 IAC 2-7-5(3)(C)][326 IAC 2-1.1-11]**

- (a) The Permittee shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported. This report shall be submitted within thirty (30) days of the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (b) The report required in (a) of this condition and reports required by conditions in Section D of this permit shall be submitted to:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (d) Unless otherwise specified in this permit, all reports required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. All reports do require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (e) Reporting periods are based on calendar years, unless otherwise specified in this permit. For the purpose of this permit "calendar year" means the twelve (12) month period from January 1 to December 31 inclusive.

### **Stratospheric Ozone Protection**

#### **C.18 Compliance with 40 CFR 82 and 326 IAC 22-1**

---

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with the standards for recycling and emissions reduction:

- (a) Persons opening appliances for maintenance, service, repair, or disposal must comply with the required practices pursuant to 40 CFR 82.156.
- (b) Equipment used during the maintenance, service, repair, or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to 40 CFR 82.158.
- (c) Persons performing maintenance, service, repair, or disposal of appliances must be certified by an approved technician certification program pursuant to 40 CFR 82.161.

**SECTION D.1**

**FACILITY OPERATION CONDITIONS**

**Facility Description [326 IAC 2-7-5(15)]:**

- (a) CV Line 5, identified as CV-5:
  - (4) One (1) Line 5 spray booth coating extruded rubber parts, identified as emission unit CV-5SB, constructed in 2000, equipped with six (6) airless high-volume low-pressure (HVLV) guns coating extruded rubber parts, using dry filters as control, and exhausting to one (1) stack identified as CV-5, S-4, maximum capacity: 7.93 pounds of waterborne urethane coating per hour.
- (b) CV Line 6, identified as CV-6:
  - (5) One (1) Line 6 spray booth, identified as CV-6SB, constructed in 2000, equipped with six (6) airless high-volume low-pressure (HVLV) guns coating extruded rubber parts, using dry filters as control, and exhausting to one (1) stack identified as CV-6, S-3, maximum capacity: 7.93 pounds of waterborne urethane coating per hour.
- (c) CV Line 7, identified as CV-7:
  - (4) One (1) Line 7 waterborne urethane coating booth coating extruded rubber parts, identified as CV-7SB, constructed in 2001, with a capacity of 1.36 gallons of waterborne coating per hour, equipped with spray guns and dry filters, and exhausting to stack CV-7, S-2.
- (d) CV Line 8, identified as CV-8:
  - (4) One (1) natural gas fired coating curing oven, identified as CV-8C2, with a maximum capacity of 1.59 MMBtu/hr, and exhausting to stack CV-8, S-4.
  - (5) One (1) urethane application spray booth, identified as CV-8SB, constructed in 1997, equipped with six (6) spray guns coating extruded rubber parts and one (1) blown air dryer, with a capacity of 10 grams of coating per minute per gun, and exhausting to stack CV-8, S-5.
- (e) CV Line 9, identified as CV-9:
  - (3) One (1) urethane application line, identified as CV-9Ex, constructed in 1996, equipped with six (6) spray guns coating extruded rubber parts and one (1) blown air dryer, with a capacity of 10 grams of coating per minute per gun, and exhausting to stack CV-9, S-5.
  - (4) One (1) natural gas fired coating curing oven with two (2) heat exchangers, identified as CV-9C2, with a maximum capacity of 1.59 MMBt/hr, and exhausting to stacks CV-9, S-2 and CV-9, S-3.
- (f) CV Line 10, identified as CV-10:
  - (6) One (1) spray booth, identified as CV-10SB1, constructed in 2004, equipped with four (4) high-volume low-pressure (HVLV) spray guns coating extruded rubber parts, with a capacity of 10 grams of coating per minute per gun, with dry filters for particulate control, exhausting to stack CV-10, S-5.

- (7) One (1) spray booth, identified as CV-10SB2, constructed in 2004, equipped with four (4) high-volume low-pressure (HVLP) spray guns coating extruded rubber parts, with a capacity of 10 grams of coating per minute per gun, with dry filters for particulate control, exhausting to stack CV-10, S-6.
- (8) Three (3) infrared coating curing ovens, identified as CV-10C3, CV-10C4, and CV-10C5, the first two exhausting to general ventilation, the third exhausting to stack CV-10, S-4.
- (g) CV Line 11, identified as CV-11:
  - (5) One (1) spray booth, identified as CV-11Ex, constructed in 2000 and modified in 2008, equipped with four (4) airless high-volume low-pressure (HVLP) guns coating extruded rubber parts, with a capacity of 10 grams of coating per minute per gun, with dry filters for particulate control, exhausting to stack CV-11 S-3.
  - (6) One (1) natural gas coating curing oven, identified as CV-11C3, with a heat input capacity of 0.5 MMBtu/hr, and exhausting to stacks CV-11, S-1 and CV-11, S-2.
- (i) SDM Line 1 (EA), identified as SDM-1:
  - (6) One (1) spray booth, identified as SDM-1SB, constructed in 2004, equipped with six (6) high-volume low-pressure (HVLP) spray guns coating extruded rubber parts, using dry filters to control PM overspray emissions, and exhausting to stack SDM-1, S-5.
  - (7) One (1) natural gas-fired coating cure oven, identified as SDM-1, C4, with two burners rated at 0.340 MMBtu/hr each, and exhausting to stack SDM-1, S-4.
- (j) SDM Line 2 (EB), identified as SDM-2:
  - (5) One (1) spray booth, identified as SDM-2SB, constructed in 1994, equipped with five (5) spray guns and drip applicators coating extruded rubber parts, with a maximum capacity of 0.00086 gallons per minute and 4080 meters per hour for the drip and wipe and 10 grams of coating per minute per gun for the spray application, and exhausting to stack SDM-2, S-7.
  - (6) One (1) natural gas-fired drying oven (2 sections) rated at 2.0 million British thermal units per hour, and exhausting at stacks SDM-2, S-5 and SDM-2, S-6.
- (k) SDM Line 3 (EC), identified as SDM-3:
  - (5) One (1) SDM EC urethane application spray booth, identified as SDM-3SB, constructed in 1996, equipped with three (3) spray guns coating extruded rubber parts, with a capacity of 10 grams of coating per minute per gun, exhausting to stack SDM-3, S-7.
  - (6) One (1) natural gas-fired curing oven, identified as SDM-3C2, with a heat input capacity of 1.0 MMBtu/hr, and exhausting to stack SDM-3, S-6.
- (l) SDM Line 4 (ED), identified as SDM-4:
  - (6) One (1) spray booth, identified as SDM-4SB, constructed in 2002, equipped with six (6) High-volume low-pressure (HVLP) spray guns coating extruded rubber parts, using dry filters to control PM overspray emissions, exhausting to stack SDM-4, S-6.
  - (7) One (1) natural gas-fired coating cure oven, identified as SDM-4C3, with two burners each having a heat input capacity of 0.34 MMBtu/hr, and exhausting to stack SDM-4, S-5.

- (m) SDM Line 5 (EE), identified as SDM-5:
- (6) One (1) spray line, identified as SDM-5SB, constructed in 2002, equipped with six (6) high-volume low-pressure (HVLP) spray guns coating extruded rubber parts, using dry filters as controls, with a capacity of 10 grams per minute of coating per gun, and exhausting to stack SDM-5, S-5.
  - (7) One (1) natural gas-fired coating cure oven, identified as SDM-5C3, with two (2) 0.340 MMBtu/hr burners, exhausting to stacks SDM-5, S-4.
- (n) L-Coat Extrusion Line, identified as LC-1:
- (1) Four (4) plastic extruders identified as LC-1Ex, constructed in 2006, with a capacity of 19.0 pounds per hour each, and exhausting to general ventilation.
  - (2) Three (3) rubber extruders, identified as LC-1Ex, constructed in 2006, with a capacity of 447.0 pounds per hour each, and exhausting to general ventilation.
  - (3) One (1) natural gas curing oven, identified as LC-1C1, exhausting to stacks LC, S-1, LC, S-2, and LC, S-3, consisting of the following burners:
    - (A) Four (4) natural gas-fired burners, constructed in 2006, with a heat input capacity of 0.782 MMBtu/hr each.
    - (B) Five (5) natural gas-fired burners, constructed in 2007, with a heat input capacity of 0.782 MMBtu/hr each.
  - (4) Three (3) exhaust hoods, identified as LC-1EH1, LC-1EH2, and LC-1EH3, and exhausting to LC, S-4, LC, S-5, and LC, S-6, respectively.
  - (5) One (1) plasma arc unit, identified as LC-1PI, exhausting to stack LC, S-7.
  - (6) One (1) L-Coat Glassline Spray Booth, identified as LC-1SB1, constructed in 2006, utilizing seven (7) high-volume low-pressure (HVLP) spray guns with a maximum capacity of 1.0 unit per hour and particulate emissions controlled by dry filters, and exhausting to stack LC, S-9.
  - (7) One (1) L-Coat Glassline Spray Booth, identified as LC-1SB2, constructed in 2007, utilizing seven (7) high-volume low-pressure (HVLP) spray guns with a maximum capacity of 1.0 unit per hour and particulate emissions controlled by dry filters, and exhausting to one (1) stack LC, S-10.
  - (8) One (1) natural gas coating curing oven, identified as LC-1C2, consisting of six (6) natural gas-fired burners with a maximum heat input capacity of 0.086 MMBtu/hr each, and exhausting to stack LC, S-8.
- (p) One (1) spray coating booth coating extruded rubber parts, identified as emission unit L42C Nissan, constructed in 2008, equipped with one (1) spray gun, using dry filters as particulate control, with a capacity of ten (10) grams per hour, and exhausting to stack LC-42C, S-1.
- (q) One (1) VN surface coating line, identified as VN-1SB, constructed in 2004:
- (1) One (1) surface coating booth, equipped with one (1) high-volume low-pressure (HVLP) spray gun coating extruded rubber parts, applying surface coatings to rubber parts at a maximum design rate of 0.15 gallons per hour, with particulate emissions controlled by a dry filter system, with emissions exhausted through Stack VN-1, S-1.

- (2) One (1) electric curing oven, identified as VN-1C.
- (r) One (1) off line finishing spray booth, identified as F-1, constructed in 2007, with a capacity of 10 grams of coating per minute, exhausting at stack F-1, S-1.
- (s) One (1) off line finishing spray booth, identified as F-2, constructed in 2007, with a capacity of 10 grams of coating per minute, exhausting at stack F-2, S-1.
- (t) One (1) off line finishing spray booth, identified as F-3, constructed in 2007, with a capacity of 10 grams of coating per minute, exhausting at stack F-3, S-1.
- (u) One (1) off line finishing spray booth, identified as F-4, approved for construction in 2009, with a capacity of 10 grams of coating per minute, exhausting to stack F-4, S-1.
- (v) CV Line 1, identified as CV-1:
  - (5) One (1) spray booth, identified as CV-1SB, constructed in 2000, equipped with three (3) airless high-volume low-pressure (HVLPP) guns coating extruded rubber parts, using dry filters as particulate control, and exhausting to stack identified as CV-1 S-3, maximum capacity: 3.97 pounds of waterborne urethane coating per hour.
- (w) CV Line 4, identified as CV-4:
  - (5) One (1) Line 4 waterborne urethane coating booth coating extruded rubber parts, identified as CV-4SB, constructed in 2001, with a capacity of 0.45 gallons per hour, equipped with dry filters and exhausting to stack CV-4, S-2.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### **Emission Limitations and Standards [326 IAC 2-7-5(1)]**

#### **D.1.1 Volatile Organic Compounds (VOCs) [326 IAC 8-1-6][326 IAC 2-2]**

Pursuant to 326 IAC 8-1-6, New facilities; General reduction requirements, the best available control technology (BACT) for the one (1) silicone application line (X019) shall be as follows:

- (a) The total VOC usage at the four (4) spray booths (CV Line 11, CV Line 1, CV Line 5, and CV Line 6), SDM Line 2 (EB), three (3) urethane application lines (CV Line 9, SDM Line 3 (EC), and CV Line 8), three (3) waterborne urethane coating booths (CV Line 4, CV Line 7, and L42C Nissan), one (1) surface coating line (VN surface coating line), two (2) spray lines (SDM Line 4 (ED) and SDM Line 5 (EE)), one (1) spray line (SDM Line 1 (EA)), and two (2) spray lines (CV Line 10) shall be limited to no more than 148 tons per consecutive twelve (12) month period, with compliance determined at the end of each month.
- (b) All coating, urethane and silicone application devices at these facilities shall be drip; high volume, low pressure (HVLPP) spray guns; or a coating application device at least as efficient. HVLPP spray is the technology used to apply coating to substrate by means of coating application equipment which operates between one-tenth (0.1) and ten (10) pounds per square inch gauge (psig) air pressure measured dynamically at the center of the air cap and at the air horns of the spray system.
- (c) All VOC containing containers shall be kept covered when not in use.

#### D.1.2 Volatile Organic Compound Limitation [326 IAC 2-2]

---

The total VOC usage at the four (4) spray booths (CV Line 11, CV Line 1, CV Line 5, and CV Line 6), SDM Line 2 (EB), three (3) urethane application lines (CV Line 9, SDM Line 3 (EC), and CV Line 8), three (3) waterborne urethane coating booths (CV Line 4, CV Line 7, and L42C Nissan), one (1) surface coating line (VN surface coating line), two (2) spray lines (SDM Line 4 (ED) and SDM Line 5 (EE)), one (1) spray line (SDM Line 1 (EA)), two (2) spray lines (CV Line 10), the two (2) L-Coat Glassline spray booths (LC-1SB1 and LC-1SB2), and four (4) plastic extruders and three (3) rubber extruders (L-Coat Extrusion Line), shall be limited to no more than 148 tons per consecutive twelve (12) month period, with compliance determined at the end of each month. Emissions from these surface coating operations in combination with uncontrolled potential VOC emissions of 97.63 tons per year from extruding and curing operations (except the L-Coat Extrusion Line), 1.90 tons per year from mixing and milling, 0.892 tons per year from insignificant activities that include three (3) off line finishing spray booths (F-1, F-2, and F-3), and 1.30 tons per year from combustion, shall limit the total VOC emitted at this source to less than 250 tons per year.

Compliance with this limit shall render the requirements of 326 IAC 2-2 (PSD) not applicable.

#### D.1.3 Particulate [326 IAC 6-3-2(d)]

---

Particulate from the surface coating manufacturing processes shall be controlled by a dry particulate filter, waterwash, or an equivalent control device, and the Permittee shall operate the control device in accordance with manufacturer's specifications.

#### D.1.4 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

---

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for these surface coating facilities and all control devices.

### Compliance Determination Requirements

#### D.1.5 Volatile Organic Compounds (VOCs)

---

Compliance with the VOC usage limitations contained in Conditions D.1.1 and D.1.2 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) using formulation data supplied by the coating manufacturer. IDEM, OAQ, reserves the authority to determine compliance using Method 24 in conjunction with the analytical procedures specified in 326 IAC 8-1-4.

#### D.1.6 VOC Emissions

---

Compliance with Conditions D.1.1 and D.1.2 shall be demonstrated within 30 days of the end of each month based on the total volatile organic compound for the most recent twelve (12) month period.

### Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)][326 IAC 2-7-19]

#### D.1.7 Record Keeping Requirements

---

- (a) To document compliance with Conditions D.1.1 and D.1.2, the Permittee shall maintain records in accordance with (1) through (4) below. Records maintained for (1) through (4) shall be taken monthly and shall be complete and sufficient to establish compliance with the VOC usage limits and the VOC emission limits established in Conditions D.1.1 and D.1.2.
- (1) The amount and VOC content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
  - (2) The cleanup solvent usage for each month;

- (3) The total VOC usage for each month; and
  - (4) The weight of VOCs emitted for each compliance period.
- (b) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

#### D.1.8 Reporting Requirements

---

A quarterly summary of the information to document compliance with Conditions D.1.1 and D.1.2 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

## SECTION D.2

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]:

- (a) CV Line 5, identified as CV-5:
  - (1) Two (2) extruders, identified as CV-5Ex, constructed in 1989, with a combined capacity of 400 pounds of rubber per hour, equipped with strip feeders, and two (2) dusters controlled by one (1) dust collector (DC-2) vented internally, and exhausting to general ventilation.
  - (2) One (1) natural gas-fired rubber and coating curing oven, identified as CV-5C, with a heat input capacity of 1.59 MMBtu/hr, exhausting to stack CV-5, S-1.
  - (3) Two (2) exhaust hoods, identified as CV-5EH1 and CV-5EH2, exhausting to stacks CV-5, S-2, and CV-5, S-3, respectively.
- (b) CV Line 6, identified as CV-6:
  - (1) One (1) extruder, identified as CV-6Ex, constructed in 1989, with a capacity of 400 pounds of rubber per hour, equipped with strip feeders, and two (2) dusters controlled by one (1) dust collector (DC-2) vented internally, and exhausting to general ventilation.
  - (2) One (1) microwave curing oven, identified as CV-6C2, and exhausting to CV-6, S-2.
  - (3) One (1) natural gas-fired rubber and coating curing oven, identified as CV-6C1, with a heat input capacity of 1.59 MMBtu/hr, exhausting to stack CV-6, S-1.
  - (4) Two (2) exhaust hoods, identified as CV-6EH1 and CV-6EH2, CV-6EH1 exhausting to stack CV-5, S-2, and CV-6EH2, exhausting to stacks CV-6, S-2, and CV-5, S-3.
- (c) CV Line 7, identified as CV-7:
  - (1) Three (3) extruders, identified as CV-7Ex, constructed in 1991, with a combined capacity of 600 of rubber pounds per hour, equipped with one (1) duster, and exhausting to general ventilation.
  - (2) One (1) natural gas-fired rubber and coating curing oven, identified as CV-C, with a heat input capacity of 1.59 MMBtu/hr, exhausting to stack CV-7, S-1.
  - (3) One (1) exhaust hood, identified as CV-7EH, exhausting to stack CV-6, S-2.
- (d) CV Line 8, identified as CV-8:
  - (1) Four (4) extruders, identified as CV-8Ex, constructed in 1995, with a combined capacity of 400 pounds of rubber per hour, equipped with four (4) strip feeders, and exhausting to general ventilation.
  - (2) One (1) natural gas-fired rubber vulcanizing oven, identified as CV-8C1, with a maximum capacity of 1.59 MMBtu/hr, and exhausting to stacks CV-8, S-1, CV-8, S-2, CV-8, S-3.
  - (3) Two (2) exhaust hoods, identified as CV-8EH1 and CV-86EH2, both exhausting to stack CV-8, S-4.

- (e) CV Line 9, identified as CV-9:
- (1) Two (2) extruders, identified as CV-9Ex, constructed in 1995, with a combined capacity of 400 pounds of rubber per hour, equipped with, two (2) feed hoppers, and one (1) duster controlled by one (1) dust collector (DC-3) vented internally, and exhausting to general ventilation.
  - (2) One (1) natural gas fired rubber curing oven, identified as CV-9C1, with a maximum capacity of 1.59 MMBtu/hr, and exhausting to stack CV-9, S-1.
  - (5) One (1) exhaust hood, identified as CV-9EH, and exhausting to stack CV-9, S-4.
- (f) CV Line 10, identified as CV-10:
- (1) Three (3) extruders, identified as CV-10Ex, with a combined capacity of 750 pounds of rubber per hour, constructed in 2004, and exhausting to general ventilation.
  - (2) Two (2) natural gas-fired microwave curing ovens, identified as CV-10C1, with a heat input capacity of 0.15 MMBtu/hr each, and exhausting to stack CV-10, S-1.
  - (3) One (1) natural gas-fired rubber curing oven, identified as CV-10C2, consisting of four (4) burners each with a heat input capacity of 0.102 MMBtu/hr, and exhausting to stack CV-10, S-2.
  - (4) Six (6) electric heaters, with a capacity of 3 kilowatt hours, each.
  - (5) One (1) exhaust hood, identified as CV-10EH, and exhausting to stack CV-10, S-3.
  - (9) One (1) plasma arc generator, consisting of one (1) electric generator, with a capacity of 1.2 kilowatt hours, exhausting to stack CV-10, S-1.
- (g) CV Line 11, identified as CV-11:
- (1) Four (4) extruders, identified as CV-11Ex, constructed in 1987 and modified in 2008, with a combined capacity of 200 pounds of rubber per hour, equipped with, four (4) strip feeders, and exhausting to general ventilation.
  - (2) One (1) electric microwave rubber curing oven, identified as CV-11C1, and exhausting to stack CV-11, S-1.
  - (3) One (1) natural gas rubber curing oven, identified as CV-11C2, with a heat input capacity of 0.5 MMBtu/hr, and exhausting to stacks CV-11, S-1 and CV-11, S-2.
  - (4) Two (2) exhaust hoods, identified as CV-11EH1 and CV-11EH2, and exhausting to stacks CV-11, S-2 and CV-11, S-1, respectively.
- (h) CV Line 12, identified as CV-12:
- (1) One (1) extrusion, identified as CV-12Ex, approved for construction in 2008, with a capacity of 200 pounds of rubber per hour, and exhausting to general ventilation.
  - (2) One (1) electric microwave oven, identified as CV-12C1.
  - (3) One (1) natural gas rubber curing oven, identified as CV-12C2, approved for construction in 2008, with a heat input capacity of 0.5 MMBtu/hr, and exhausting to stack CV-12, S-1.

- (4) One (1) natural gas coating curing oven, identified as CV-12C3, approved for construction in 2008, with a heat input capacity of 0.5 MMBtu/hr, and exhausting to stack CV-12, S-2.
- (i) SDM Line 1 (EA), identified as SDM-1:
- (1) One (1) core metal heater, identified as SDM-1MH, with two (2) natural gas-fired burners with a maximum heat input rate of 0.375 MMBtu/hr.
  - (2) Four (4) extruders, identified as SDM-1Ex, constructed in 2004, with a combined capacity of 1289 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) Two (2) natural gas-fired microwave curing ovens, identified as SDM-1C1 and SDM-1C2, with a maximum heat input rate 0.143 MMBtu/hr each, exhausting to stack SDM-1, S-1.
  - (4) One (1) natural gas-fired rubber curing oven, identified as SDM-C3, with two (2) burners with a maximum heat input rate of 0.850 MMBtu/hr each, exhausting to stack SDM-1, S-2.
  - (5) One (1) electric plasma arc generator, identified as SDM-1PI, exhausting to stack SDM-1, S-3.
- (j) SDM Line 2 (EB), identified as SDM-2:
- (1) One (1) natural gas-fired core metal heater, identified as SDM-2MH, with a heat input capacity of 1.19 MMBtu/hr, and exhausting to stack SDM-2, S-1.
  - (2) Two (2) extruders (one (1) sponge and one (1) dense), identified as SDM-2Ex, constructed in 1989, with a combined capacity of 400 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) One (1) natural gas-fired bead type rubber curing oven and deodorizing furnace, identified as SDM-2C1, with a heat input capacity of 1.99 MMBtu/hr, and exhausting to stacks SDM-2, S-2 and SDM-2, S-3.
  - (4) One (1) bead recovery/dryer system, identified as SDM-2RD, exhausting to stack SDM-2, S-4.
- (k) SDM Line 3 (EC), identified as SDM-3:
- (1) One (1) natural gas-fired core metal heater, identified as SDM-3MH, with a heat input capacity of 1.19 MMBtu/hr, and exhausting to general ventilation.
  - (2) Three (3) extruders, identified as SDM-3Ex, constructed in 1994, with a combined capacity of 400 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) One (1) natural gas-fired bead type rubber curing over and deodorizing furnace, identified as SDM-3C1, with a heat input capacity of 1.99 MMBtu/hr, and exhausting to stacks SDM, S-2, SDM-3, S-3 and SDM-3, S-4.
  - (4) One (1) bead recovery/dryer system, identified as SDM-3, exhausting to stack SDM-3, S-5.

- (l) SDM Line 4 (ED), identified as SDM-4:
  - (1) One (1) core metal heater, identified as SDM-4MH, with two (2) natural gas-fired burners, each has a heat input capacity of 0.375 million British thermal unit per hour, and exhausting to stack SDM-4, S-1.
  - (2) Four (4) extruders, identified as SDM-4Ex, constructed in 2002, with a maximum capacity of 1289 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) Two (2) natural gas-fired microwave rubber curing ovens, identified as SDM-4C1, each with a heat input capacity of 0.143 MMBtu/hr, and both exhausting to stack SDM-4, S-2.
  - (4) One (1) natural gas-fired curing oven, identified as SDM-4C2, with two (2) burners, each with a heat input capacity of 0.850 MMBtu/hr, and exhausting to stack SDM-4, S-3.
  - (5) One (1) electric plasma arc unit, identified as SDM-4PI, exhausting to stack SDM-4, S-4.
- (m) SDM Line 5 (EE), identified as SDM-5:
  - (1) One (1) core metal heater, identified as SDM-5MH, with (2) natural gas-fired burners with heat input capacity of 0.375 MMBtu/hr each.
  - (2) Four (4) extruders, identified as SDM-5Ex, constructed in 2002, with a combined capacity of 1289 pounds of rubber per hour, and exhausting to general ventilation.
  - (3) Two (2) natural gas-fired microwave curing ovens, identified as SDM-5C1, with a heat input capacity of 0.143 MMBtu/hr each, exhausting to stack SDM-5, S-1.
  - (4) One (1) natural gas-fired rubber curing ovens, identified as SDM-5C2, with two (2) burners, each having a heat input capacity of 0.850 MMBtu/hr, exhausting to stack SDM-5, S-2.
  - (5) One (1) electric plasma arc unit, identified as SDM-5PI, and exhausting to stack SDM-5, S-3.
- (u) CV Line 1, identified as CV-1:
  - (1) One (1) extruder, identified as CV-1Ex, constructed in 1987, with a capacity of 200 pounds of rubber per hour, equipped with extruders, strip feeders, and one (1) duster controlled by one (1) dust collector (DC-1) vented internally, and exhausting to general ventilation.
  - (2) One (1) natural gas-fired rubber and coating curing oven, identified as CV-1C, with a heat input capacity of 1.59 MMBtu/hr, and exhausting to stack CV-1, S-1.
  - (3) One (1) natural gas-fired pre-heater, identified as CV-1Pr, with a heat input capacity of 0.298 MMBtu/hr, and exhausting to stack CV-1, S-2.
  - (4) One (1) exhaust hood, exhausting to stack CV-1, S-2.
- (v) CV Line 4, identified as CV-4:
  - (1) Two (2) extruders, identified as CV-4Ex, constructed in 1988, with a combined capacity of 200 pounds of rubber per hour, equipped with strip feeders, and one (1) duster controlled by one (1) dust collector (DC-1) vented internally, curing ovens, and exhausting to general ventilation.

- (2) One (1) natural gas-fired pre-heater, identified as CV-4Pr, with a heat input capacity of 0.298 MMBtu/hr, and exhausting to stack CV-1, S-2.
- (3) One (1) exhaust hood, exhausting to stack CV-1, S-2.
- (4) One (1) natural gas-fired rubber and coating curing oven, identified as CV-4C, with a heat input capacity of 1.59 MMBtu/hr, and exhausting to stack CV-4, S-1.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

**Emission Limitations and Standards [326 IAC 2-7-5(1)]**

**D.2.1 Particulate [326 IAC 6-3-2]**

Pursuant to 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Processes), particulate emitted from the facilities listed below shall be limited as stated, based on the following:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67}$$

where E = rate of emission in pounds per hour and  
 P = process weight rate in tons per hour

Emission Unit	Process Weight Rate (tons per hour)	Allowable PM Emission Rate [326 IAC 6-3-2] (pounds per hour)
CV Line 1	0.101	0.882
CV Line 11	0.101	0.882
CV Line 4	0.101	0.882
CV Line 5	0.201	1.40
CV Line 6	0.201	1.40
CV Line 7	0.301	1.83
CV Line 8	0.201	1.40
CV Line 9	0.201	1.40
SDM Line 1 (EA)	0.65	3.05
SDM Line 2 (EB)	0.60	2.91
SDM Line 3 (EC)	0.60	2.91
SDM Line 4 (ED)	0.65	3.05
SDM Line 5 (EEA)	0.65	3.05

<b>Emission Unit</b>	<b>Process Weight Rate (tons per hour)</b>	<b>Allowable PM Emission Rate [326 IAC 6-3-2] (pounds per hour)</b>
CV Line 10	0.375	2.91

**SECTION D.3**

**FACILITY OPERATION CONDITIONS**

**Facility Description [326 IAC 2-7-5(15)]:**

- (o) One (1) mixing department, identified as Mix-1, constructed in 1987, equipped with one (1) carbon black weigh station and one (1) raw chemical weigh station, both exhausting to a small baghouse identified as Mix-1, S-1, with a capacity of 416.7 pounds of rubber per hour, 3.2 pounds of talc per hour, and 83.3 pounds of carbon black per hour.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

**Emission Limitations and Standards [326 IAC 2-7-5(1)]**

**D.3.1 Particulate Matter (PM) [326 IAC 6-3-2]**

Pursuant to 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Processes), particulate emitted from the facilities listed below shall be limited as stated, based on the following:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67}$$

where E = rate of emission in pounds per hour and  
P = process weight rate in tons per hour

Emission Unit	Process Weight Rate (tons per hour)	Allowable PM Emission Rate [326 IAC 6-3-2] (pounds per hour)
Mix-1	0.25	1.63

**Compliance Determination Requirements**

**D.3.2 Particulate Matter (PM)**

In order to comply with Condition D.3.1, the baghouse (Mix-1, S-1) for PM control shall be in operation and control emissions from the mixing department at all times that the mixing department is in operation.

## SECTION D.4

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]:

- (a) Tumblers [326 IAC 6-3]
- (b) Dango Mixing Mills B and F, each with a dispersion system, using particulate filters as control [326 IAC 6-3]
- (c) Color Mixing Mill [326 IAC 6-3]
- (d) SDM Finishing Drill and Fastener Inserter Units [326 IAC 6-3]
- (e) Mold Tech Repair Sandblast Unit [326 IAC 6-3]
- (f) Mold Tech Repair Weld and Metalworking Equipment [326 IAC 6-3]
- (g) Dango Barwell Extruders [326 IAC 6-3]
- (h) Polymer Block Cutting Station [326 IAC 6-3]
- (i) Scrap Cardboard Bailing Unit [326 IAC 6-3]
- (j) Weld Shop Equipment [326 IAC 6-3]
- (k) Silicone Coating Mixing Station [326 IAC 6-3]
- (l) Die Room Metalworking Equipment [326 IAC 6-3]
- (m) SDM Mezzanine Units [326 IAC 6-3]
- (n) Barwell Warm-Up Mill [326 IAC 6-3]

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### Emission Limitations and Standards [326 IAC 2-7-5(1)]

#### D.4.1 Particulate Matter (PM) [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Processes), particulate emitted from each of the insignificant activities shall not exceed the allowable PM emission rate based on the following equation:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

### PART 70 OPERATING PERMIT CERTIFICATION

Source Name: Nishikawa Standard Company  
Source Address: 324 Morrow Street, Topeka, Indiana 46571  
Mailing Address: 324 Morrow Street, Topeka, Indiana 46571  
Part 70 Permit No.: T087-21424-00031

**This certification shall be included when submitting monitoring, testing reports/results or other documents as required by this permit.**

Please check what document is being certified:

- Annual Compliance Certification Letter
- Test Result (specify)
- Report (specify)
- Notification (specify)
- Affidavit (specify)
- Other (specify)

I certify that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

Mailing Address: 324 Morrow Street, Topeka, Indiana 46571  
Part 70 Permit No.: T087-21424-00031

**This form consists of 2 pages**

**Page 1 of 2**

- This is an emergency as defined in 326 IAC 2-7-1(12)
- The Permittee must notify the Office of Air Quality (OAQ), within four (4) business hours (1-800-451-6027 or 317-233-0178, ask for Compliance and Enforcement Branch); and
  - The Permittee must submit notice in writing or by facsimile within two (2) working days (Facsimile Number: 317-233-6865), and follow the other requirements of 326 IAC 2-7-16.

If any of the following are not applicable, mark N/A

Facility/Equipment/Operation:
Control Equipment:
Permit Condition or Operation Limitation in Permit:
Description of the Emergency:
Describe the cause of the Emergency:

If any of the following are not applicable, mark N/A

**Page 2 of 2**

Date/Time Emergency started:
Date/Time Emergency was corrected:
Was the facility being properly operated at the time of the emergency?    Y    N
Type of Pollutants Emitted: TSP, PM-10, SO <sub>2</sub> , VOC, NO <sub>x</sub> , CO, Pb, other:
Estimated amount of pollutant(s) emitted during emergency:
Describe the steps taken to mitigate the problem:
Describe the corrective actions/response steps taken:
Describe the measures taken to minimize emissions:
If applicable, describe the reasons why continued operation of the facilities are necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw materials of substantial economic value:
