Re: Response to Review Request
No. 089-28192-00509
Permit Status Evaluation
Plant ID: 089-00509

Dear Mr. Smith:

USS -J. L. Smith Services-contractor was issued a Part 70 Operating Permit No. T089-23525-00509 on December 15, 2006 for a portable crushing and screening plant located at One North Broadway, Gary, Indiana 46402. On June 30, 2009, the Office of Air Quality (OAQ) received a request from the source for review of permit level to replace the existing permitted screen with a double deck screen and move this screening operation such that it is followed by the existing permitted crusher in material flow sequence.

There is no emission increase due to the replacement because throughput capacity has not been changed. There is no emission increase due to the change of screening operation location in material flow sequence because the screening size range of the screening operation has not been changed. Since there is no emission increase of any pollutant, this physical change is not subject to the requirements of source modification (326 IAC 2-7-10.5). There are no permit changes required due to this physical change.

All conditions of the permit shall remain unchanged and in effect. For additional information about air permits and how the public and interested parties can participate, refer to the IDEM's Guide for Citizen Participation and Permit Guide on the Internet at: www.idem.in.gov

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Mehul Sura, of my staff, at 317-233-6868 or 1-800-451-6027, and ask for extension 3-6868.

Sincerely,

Chrystal A. Wagner, Section Chief
