Re: 089-28210-00514
First Notice-Only Change to
New Source Review and Minor Source
Operating Permit (MSOP) No. M089-23404-
00514

Dear Jose Gonzalez:

Omni Materials, Inc., was issued a New Source Review and Minor Source Operating Permit (MSOP) No. M089-23404-00514 on May 15, 2007, for a stationary lime kiln dust storage facility located at #1 Buffington Harbor Drive, Gary, Indiana 46406. On July 7, 2009, the Office of Air Quality (OAQ) received an application from the source requesting that the permit be revised to remove all requirements related to local air pollution control agencies. Local agencies no longer have effective authority to implement state and federal requirements for IDEM. Therefore, IDEM has removed all references to local agencies from the permit. IDEM has determined that this change to the permit will be processed as a notice-only change pursuant to 326 IAC 2-6.1-6(d).

The revised permit specifies that all reports, notices, applications, and any other required submittals shall be submitted to IDEM. The Permittee should note that the local agency could have its own requirements beyond the state and federal requirements contained in the permit. Please contact the local agency for further information.

Pursuant to the provisions of 326 IAC 2-6.1-6, the permit is hereby revised as follows with the deleted language as ~~strikeouts~~ and new language **bolded**.

1. All references to local agencies have been removed from the permit.
2. The following conditions have been revised to clarify the requirements of the permit.

B.4 Enforceability

- (a) Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, ~~GDEA~~ and the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.
 - (b) ~~Unless otherwise stated, all terms and conditions in this permit that are local requirements, including any provisions designed to limit the source's potential to emit, are enforceable by GDEA.~~
3. Several of IDEM's branches and sections have been renamed. Therefore, IDEM has updated the addresses listed in the permit. References to "Permit Administration and Development Section" and the "Permits Branch" have been changed to "Permit Administration and Support Section". References to "Asbestos Section", "Compliance Data Section", "Air Compliance Section", and "Compliance Branch" have been changed to "Compliance and Enforcement Branch". The permit has been revised as follows:

Indiana Department of Environmental Management
Permit Administration and Support Section, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

Indiana Department of Environmental Management
Compliance and Enforcement Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003

All other conditions of the permit shall remain unchanged and in effect. Attached please find the entire revised permit. A copy of the permit is available on the Internet at: <http://www.in.gov/ai/appfiles/idem-caats/>. For additional information about air permits and how the public and interested parties can participate, refer to the IDEM's Guide for Citizen Participation and Permit Guide on the Internet at: www.idem.in.gov

- (c) If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-6.1 until IDEM, OAQ, takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ, any additional information identified as

Emission Limitations and Standards [326 IAC 2-6.1-5(a)(1)]

D.1.1 Particulate [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Processes), the allowable particulate emission rate from the silo loading and truck loading operations facilities shall not exceed 35.4 pounds per hour each when operating at a process weight rate of 50,000 pounds per hour.

The pounds per hour limitation was calculated with the following equation:

Interpolation of the data for the process weight rate up to 60,000 pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67}$$

where E = rate of emission in pounds per hour;
and P = process weight rate in tons per hour

Fugitive Particulate Matter Emission Control Plan Omni Materials, Inc.

#1 Buffington Harbor Drive, Gary, Indiana 46406
Responsible Official: Philip Hipsher, Chief Financial Officer
Phone 618-262-5118

Processes, operations, and areas which have the potential to emit fugitive particulate matter in accordance with 326 IAC 6-5-4 include truck traffic on paved roads. The plant road is a paved concrete roadway used by trucks transporting lime kiln dust to and from the facility.

Pursuant to 326 IAC 6.8, the following measures shall be implemented to control fugitive particulate matter emissions from these activities:

- (a) The roadway will have water applied by tank truck (approximately 500 gallons) on a daily basis as determined to be necessary by visual observations. The application rate for the water application is approximately 33 gallons per minute. Typically the roadway will be watered once per day. Conditions that would not warrant application of water to the roadway include: freezing conditions, days with measurable precipitation; and days when the facility is not operating.

To document compliance with this plan, records shall be maintained on site for a period of three (3) years and shall be made available upon request to IDEM, OAQ. The records shall document all control measures and activities implemented.
