RE: Hisada America, Inc. / 005-28410-00101

FROM: Matthew Stuckey, Branch Chief
Permits Branch
Office of Air Quality

Notice of Decision – Approval

Please be advised that on behalf of the Commissioner of the Department of Environmental Management, I have issued a decision regarding the enclosed matter. Pursuant to 326 IAC 2, this approval was effective immediately upon submittal of the application.

If you wish to challenge this decision, IC 4-21.5-3-7 requires that you file a petition for administrative review. This petition may include a request for stay of effectiveness and must be submitted to the Office of Environmental Adjudication, 100 North Senate Avenue, Government Center North, Suite N 501E, Indianapolis, IN 46204, **within eighteen (18) calendar days from the mailing of this notice**. The filing of a petition for administrative review is complete on the earliest of the following dates that apply to the filing:

- (1) the date the document is delivered to the Office of Environmental Adjudication (OEA);
- (2) the date of the postmark on the envelope containing the document, if the document is mailed to OEA by U.S. mail; or
- (3) The date on which the document is deposited with a private carrier, as shown by receipt issued by the carrier, if the document is sent to the OEA by private carrier.

The petition must include facts demonstrating that you are either the applicant, a person aggrieved or adversely affected by the decision or otherwise entitled to review by law. Please identify the permit, decision, or other order for which you seek review by permit number, name of the applicant, location, date of this notice and all of the following:

- (1) the name and address of the person making the request;
- (2) the interest of the person making the request;
- (3) identification of any persons represented by the person making the request;
- (4) the reasons, with particularity, for the request;
- (5) the issues, with particularity, proposed for considerations at any hearing; and
- (6) identification of the terms and conditions which, in the judgment of the person making the request, would be appropriate in the case in question to satisfy the requirements of the law governing documents of the type issued by the Commissioner.

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178. Callers from within Indiana may call toll-free at 1-800-451-6027, ext. 3-0178.

Edinburgh, IN 46124

October 16, 2009

Re: Exempt Construction and Operation Status,
005-28410-00101

Dear Mr. Ronald Stephens:

The application from Hisada America, Inc., received on August 31, 2009, has been reviewed. Based on the data submitted and the provisions in 326 IAC 2-1.1-3, it has been determined that the following stationary Stamping, Bending, Resistance Welding - Metal Auto Parts facility located at 1191 South Walnut Street, Edinburgh, IN 46124 is classified as exempt from air pollution permit requirements. Hisada America, Inc and Hoosier Metalform, Inc are considered one source as defined under 326 IAC 2-7-1(22).

(a) Hisada America, Inc:

- (1) Fifty-one (51) electrical resistance welders, using no control device, and exhausting indoors.
- (2) One hundred and two (102) metal presses used for metal automotive parts, using no control device, and exhausting indoors.
- (3) Ten (10) bending machines used for metal automotive parts, using no control device, and exhausting indoors.
- (4) Nine (9) roll forming machines used for metal automotive parts, using no control device, and exhausting indoors.
- (5) Eight (8) cutting/shearing machines, using no control device, and exhausting indoors.
- (6) One (1) rivet machine, using no control device, and exhausting indoors.
- (7) Four (4) cold sawing/milling machines, using no control device, and exhausting indoors.
- (8) One (1) deburring machine, used for cleaning cold saw blades, using no control device, and exhausting indoors.
- (9) Natural gas comfort heaters with an input capacity of less than 10 MMBtu per hour, using no control device, and exhausting indoors.
- 10) Routine fabrication, maintenance, and repair of building, structures and equipment:
 - (a) Maintenance area with acetylene torches and MIG welders.
 - (b) Paint booth for maintenance use only.

- (b) Hoosier Metalform, Inc.
- (1) Two (2) metal presses used for metal automotive parts, using no control device, and exhausting indoors.
 - (2) Natural gas comfort heaters with an input capacity of less than 10 MMBtu per hour, using no control device, and exhausting indoors.

The following conditions shall be applicable:

1. 326 IAC 5-1 (Opacity Limitations)
Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:
 - (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
 - (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.
2. 326 IAC 6-4 (Fugitive Dust Emissions Limitations)
Pursuant to 326 IAC 6-4 (Fugitive Dust Emissions Limitations), the source shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4.

This exemption is the first air approval issued to this source. A copy of the Exemption is available on the Internet at: <http://www.in.gov/ai/appfiles/idem-caats/>. For additional information about air permits and how the public and interested parties can participate, refer to the IDEM's Guide for Citizen Participation and Permit Guide on the Internet at: www.idem.in.gov

An application or notification shall be submitted in accordance with 326 IAC 2 to the Office of Air Quality (OAQ) if the source proposes to construct new emission units, modify existing emission units, or otherwise modify the source. If you have any questions on this matter, please contact Bruce Farrar, OAQ, 100 North Senate Avenue, MC 61-53 IGCN 1003, Indianapolis, Indiana, 46204-2251, at 317-234-5401 or at 1-800-451-6027 (ext 4-5401).

Sincerely,

Iryn Callung, Section Chief
Permits Branch
Office of Air Quality

Indiana Department of Environmental Management Office of Air Quality

Technical Support Document (TSD) for an Exemption

Source Description and Location
--

Source Name:	Hisada America, Inc.
Source Location:	1191 South Walnut Street. Edinburgh, IN 46124
County:	Bartholomew
SIC Code:	3714
Exemption No.:	005-28410-00101
Permit Reviewer:	Bruce Farrar

On August 31, 2009, the Office of Air Quality (OAQ) received an application from Hisada America, Inc related to the operation of stamping, bending, resistance welding - metal auto parts operation.

Source Definition

This source consists of two co-located plants.

- (a) Hisada America, Inc is located at 1191 South Walnut Street, Edinburgh, IN 46124, Plant ID: 005-00101; and
- (b) Hoosier Metalform, Inc is located at 1191 South Walnut Street, Edinburgh, IN 46124, Plant ID: no plant ID.

In order to consider both plants as one single source, all three of the following criteria must be met:

- (1) The plants must have common ownership/control;
- (2) The plants must have the same SIC code; and
- (3) The plants must be located on contiguous or adjacent properties.

These plants are located on contiguous properties, have the same SIC codes of 3714 and are under common control; therefore they will be considered one (1) source, as defined by 326 IAC 2-7-1(22) and the approval will be under Hisada America, Inc.

Existing Approvals

There have been no previous approvals issued to this source.

County Attainment Status

The source is located in Bartholomew County.

Pollutant	Designation
SO ₂	Better than national standards.
CO	Unclassifiable or attainment effective November 15, 1990.
O ₃	Unclassifiable or attainment effective June 15, 2004, for the 8-hour ozone standard. ¹
PM ₁₀	Unclassifiable effective November 15, 1990.
NO ₂	Cannot be classified or better than national standards.
Pb	Not designated.

¹Unclassifiable or attainment effective October 18, 2000, for the 1-hour ozone standard which was revoked effective June 15, 2005.

Unclassifiable or attainment effective April 5, 2005, for PM2.5.

- (a) **Ozone Standards**
Volatile organic compounds (VOC) and Nitrogen Oxides (NOx) are regulated under the Clean Air Act (CAA) for the purposes of attaining and maintaining the National Ambient Air Quality Standards (NAAQS) for ozone. Therefore, VOC and NOx emissions are considered when evaluating the rule applicability relating to ozone. Bartholomew County has been designated as attainment or unclassifiable for ozone. Therefore, VOC and NOx emissions were reviewed pursuant to the requirements for Prevention of Significant Deterioration (PSD), 326 IAC 2-2.
- (b) **PM2.5**
Bartholomew County has been classified as attainment for PM2.5. On May 8, 2008 U.S. EPA promulgated the requirements for Prevention of Significant Deterioration (PSD) for PM2.5 emissions, and the effective date of these rules was July 15th, 2008. Indiana has three years from the publication of these rules to revise its PSD rules, 326 IAC 2-2, to include those requirements. The May 8, 2008 rule revisions require IDEM to regulate PM10 emissions as a surrogate for PM2.5 emissions until 326 IAC 2-2 is revised.
- (c) **Other Criteria Pollutants**
Bartholomew County has been classified as attainment or unclassifiable in Indiana for all pollutants. Therefore, these emissions were reviewed pursuant to the requirements for Prevention of Significant Deterioration (PSD), 326 IAC 2-2.

Fugitive Emissions

The fugitive emissions of criteria pollutants and hazardous air pollutants are counted toward the determination of 326 IAC 2-1.1-3 (Exemptions) applicability.

Background and Description of Emission Units and Pollution Control Equipment

The Office of Air Quality (OAQ) has reviewed an application, submitted by Hisada America, Inc. on August 31, 2009, relating to stamping, bending, and resistance welding for metal automobile parts. The source consists of exempt units and total source wide emissions are less than the exemption level.

The source consists of the following existing emission units:

- (a) Hisada America, Inc:
 - (1) Fifty-one (51) electrical resistance welders, using no control device, and exhausting indoors.
 - (2) One hundred and two (102) metal presses used for metal automotive parts, using no control device, and exhausting indoors.
 - (3) Ten (10) bending machines used for metal automotive parts, using no control device, and exhausting indoors.
 - (4) Nine (9) roll forming machines used for metal automotive parts, using no control device, and exhausting indoors.
 - (5) Eight (8) cutting/shearing machines, using no control device, and exhausting indoors.
 - (6) One (1) rivet machine, using no control device, and exhausting indoors.
 - (7) Four (4) cold sawing/milling machines, using no control device, and exhausting indoors.

- (8) One (1) deburring machine, used for cleaning cold saw blades, using no control device, and exhausting indoors.
 - (9) Natural gas comfort heaters with an input capacity of less than 10 MMBtu per hour, using no control device, and exhausting indoors.
 - (10) Routine fabrication, maintenance, and repair of building, structures and equipment:
 - (a) Maintenance area with acetylene torches and MIG welders.
 - (b) Paint booth for maintenance use only.
- (b) Hoosier Metalform, Inc.
- (1) Two (2) metal presses used for metal automotive parts, using no control device, and exhausting indoors.
 - (2) Natural gas comfort heaters with an input capacity of less than 10 MMBtu per hour, using no control device, and exhausting indoors.

Enforcement Issues

There are no pending enforcement actions related to this source.

Emission Calculations

See Appendix A of this TSD for detailed emission calculations.

Permit Level Determination – Exemption

The following table reflects the unlimited potential to emit (PTE) of the entire source before controls. Control equipment is not considered federally enforceable until it has been required in a federally enforceable permit.

Process/emission units	Potential To Emit of the Entire Source (tons/year)								
	PM	PM10 *	PM2.5	SO ₂	NOx	VOC	CO	Total HAPs	Worst Single HAP
electrical resistance welding	-	-	-	-	-	0.771	-	-	-
metal presses	-	-	-	-	-		-	-	-
bending machines	-	-	-	-	-		-	-	-
roll forming machines	-	-	-	-	-		-	-	-
cutting/shearing machines	-	-	-	-	-		-	-	-
cold sawing/milling machines	-	-	-	-	-		-	-	-
rivet machine	-	-	-	-	-		-	-	-
Space Heaters	0.1	0.3	0.3	0.03	4.4	0.2	3.7	0.08	negl.
Total PTE of Entire Source	0.1	0.3	0.3	0.03	4.4	0.871	3.7	0.08	negl.
Exemptions Levels	5	5	5	10	10	5 or 10	25	25	10
negl. = negligible * Under the Part 70 Permit program (40 CFR 70), particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM10), not particulate matter (PM), is considered as a "regulated air pollutant".									

- (a) The potential to emit (PTE) (as defined in 326 IAC 2-1.1-1(16)) of all regulated criteria pollutants are less than the levels listed in 326 IAC 2-1.1-3(e)(1). Therefore, the source is subject to the provisions of 326 IAC 2-1.1-3 (Exemptions).
- (b) The potential to emit (PTE) (as defined in 326 IAC 2-1.1-1(16)) of any single HAP is less than ten (10) tons per year and the PTE of a combination of HAPs is less than twenty-five (25) tons per year. Therefore, this source is an area source under Section 112 of the Clean Air Act (CAA) and not subject to the provisions of 326 IAC 2-7.

Federal Rule Applicability Determination

New Source Performance Standards (NSPS)

- (a) The requirements of 40 CFR 60, Subpart MM (Standards of Performance for Automobile and Light Duty Truck Surface Coating Operations) (326 IAC 12) are not included in this permit because this source does not apply surface coatings to automobiles or light duty trucks.
- (b) There are no other New Source Performance Standards (NSPS) (326 IAC 12 and 40 CFR Part 60) included in the permit.

National Emission Standards for Hazardous Air Pollutants (NESHAP)

- (c) The requirements of the National Perchloroethylene Air Emission Standards for Dry Cleaning

- Facilities), 40 CFR 63.320, Subpart M (326 IAC 20-7), are not included in the permit, since this source is not a dry cleaning facility.
- (d) The requirements of the Emission Standards for Chromium Emissions From Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks, 40 CFR 63.340, Subpart N (326 IAC 20-8), are not included in the permit, since this source does not use decorative chromium electroplating.
 - (e) The requirements of the National Emission Standards for Hazardous Air Pollutants (NESHAPs) for Ethylene Oxide Emissions Standards for Sterilization Facilities, 40 CFR 63.360, Subpart O (326 IAC 20-5), are not included in the permit, since this source is not a sterilization source.
 - (f) The requirements of the National Emission Standards for Halogenated Solvent Cleaning, 40 CFR 63.460, Subpart T (326 IAC 20-6), are not included in the permit, since this source does not use halogenated solvent cleaners.
 - (g) The requirements of 40 CFR 63, Subpart IIII (National Emission Standard for Hazardous Air Pollutants: Surface Coating of Automobiles and Light-Duty Trucks) (326 IAC 20-85) are not included in this permit for this source because this source does not apply surface coating materials to the automobiles or light-duty trucks.
 - (h) There are no other National Emission Standards for Hazardous Air Pollutants (NESHAPs) (326 IAC 14, 326 IAC 20 and 40 CFR Part 63) included in the permit.

Compliance Assurance Monitoring (CAM)

- (i) Pursuant to 40 CFR 64.2, Compliance Assurance Monitoring (CAM) is not included in the permit, because the unlimited potential to emit of the source is less than the Title V major source thresholds and the source is not required to obtain a Part 70 or Part 71 permit.

State Rule Applicability Determination

The following state rules are applicable to the source:

- (a) 326 IAC 2-1.1-3 (Exemptions)
Exemption applicability is discussed under the Permit Level Determination – Exemption section above.
- (b) 326 IAC 2-4.1 (Major Sources of Hazardous Air Pollutants (HAP))
The potential to emit of any single HAP is less than ten (10) tons per year and the potential to emit of a combination of HAPs is less than twenty-five (25) tons per year. Therefore, this source is an area source under Section 112 of the Clean Air Act (CAA) and not subject to the provisions of 326 IAC 2-4.1.
- (c) 326 IAC 2-6 (Emission Reporting)
Pursuant to 326 IAC 2-6-1, this source is not subject to this rule, because it is not required to have an operating permit under 326 IAC 2-7 (Part 70), it is not located in Lake, Porter, or LaPorte County, and it does not emit lead into the ambient air at levels equal to or greater than 5 tons per year. Therefore, 326 IAC 2-6 does not apply.
- (d) 326 IAC 5-1 (Opacity Limitations)
Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (1) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
 - (2) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.
- (e) 326 IAC 6-4 (Fugitive Dust Emissions Limitations)
Pursuant to 326 IAC 6-4 (Fugitive Dust Emissions Limitations), the source shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4.
- (f) 326 IAC 6-5 (Fugitive Particulate Matter Emission Limitations)
The source is not subject to the requirements of 326 IAC 6-5, because the source does not have potential fugitive particulate emissions greater than 25 tons per year. Therefore, 326 IAC 6-5 does not apply.
- (g) 326 IAC 8-1-6 (VOC Rules: General Reduction Requirements for New Facilities)
Each of the emission units at this source is not subject to the requirements of 326 IAC 8-1-6, since the unlimited VOC potential emissions from each emission unit is less than twenty-five (25) tons per year.

Electrical Resistance Welding Operation

- (h) 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Process)
Pursuant to 326 IAC 6-3-1(b)(13), the electrical resistance welding is not subject to 326 IAC 6-3-2, because it does not emit particulate matter.

Metal Press Operations

- (i) 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Process)
Pursuant to 326 IAC 6-3-1(b)(13), the one hundred and two (102) metal presses are not subject to 326 IAC 6-3-2, because the PM emission rate does not exceed 0.551 pounds per hour.

Cold Sawing/Milling Operations

- (j) 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Process)
Pursuant to 326 IAC 1-2-52, the four (4) cold sawing/milling machines produce particulate matter greater than 100 micrometers. Therefore, they are not subject to 326 IAC 6-3-2, because they do not emit particulate matter.

Conclusion and Recommendation

Unless otherwise stated, information used in this review was derived from the application and additional information submitted by the applicant. An application for the purposes of this review was received on August 31, 2009.

The operation of this source shall be subject to the conditions of the attached proposed Exemption No. 005-28410-00101. The staff recommends to the Commissioner that this Exemption be approved.

IDEM Contact

- (a) Questions regarding this proposed permit can be directed to Bruce Farrar at the Indiana Department Environmental Management, Office of Air Quality, Permits Branch, 100 North Senate

Avenue, MC 61-53 IGCN 1003, Indianapolis, Indiana 46204-2251 or by telephone at (317) 234-5401 or toll free at 1-800-451-6027 extension 4-5401.

- (b) A copy of the findings is available on the Internet at: <http://www.in.gov/ai/appfiles/idem-caats/>
- (c) For additional information about air permits and how the public and interested parties can participate, refer to the IDEM's Guide for Citizen Participation and Permit Guide on the Internet at: www.idem.in.gov

Date: August 31, 2009**

Material	Density (Lb/Gal)	Weight % Volatile (H2O & Organics)	Weight % Water	Usage per month (gal/month)	Potential VOC tons per year
Isopropyl Alcohol	6.59	100.00%	0.0%	19.50	0.771

Actual Monthly Isopropyl Alcohol Usage = 6.5 gal/month

METHODOLOGY

VOC Emissions are based on actual usage multiplied by 3. This should provide extremely conservative estimate of potential emissions from the use of Isopropyl Alcohol.

Potential VOC Tons per Year = Pounds of VOC per Gallon coating (lb/gal) * Usage per month(gal/montht) * 12 months/1 year * (1 ton/2000 lbs)

Emission Factor in lb/MMCF	Pollutant					
	PM*	PM10*	SO2	NOx	VOC	CO
	1.9	7.6	0.6	100	5.5	84
				**see below		
Potential Emission in tons/yr	0.1	0.3	0.03	4.4	0.2	3.7

*PM emission factor is filterable PM only. PM10 emission factor is filterable and condensable PM10 combined.

**Emission Factors for NOx: Uncontrolled = 100, Low NOx Burner = 50, Low NOx Burners/Flue gas recirculation = 32

Methodology

All emission factors are based on normal firing.

MMBtu = 1,000,000 Btu

MMCF = 1,000,000 Cubic Feet of Gas

Emission Factors are from AP 42, Chapter 1.4, Tables 1.4-1, 1.4-2, 1.4-3, SCC #1-02-006-02, 1-01-006-02, 1-03-006-02, and 1-03-006-03

Potential Throughput (MMCF) = Heat Input Capacity (MMBtu/hr) x 8,760 hrs/yr x 1 MMCF/1,000 MMBtu

Emission (tons/yr) = Throughput (MMCF/yr) x Emission Factor (lb/MMCF)/2,000 lb/ton

See page 4 for HAPs emissions calculations.
