Re: 049-28559-00023
Third Registration Notice-Only Change to
R049-13660-00023

Dear Ms. Wood:

Camcar, L.L.C was issued a Registration No. R049-13660-00023 on February 13, 2001 for a stationary fabricated metal production operation facility located 4366 N. Old U.S. Highway 31, Rochester, Indiana 46975. On October 9, 2009, the Office of Air Quality (OAQ) received an application from the source relating to construction and operation of a 300,000 BTU natural gas fired furnace. The addition of this unit to the registration is considered a notice-only change, since the potential emissions of regulated criteria pollutants and hazardous air pollutants are less than the ranges specified in 326 IAC 2-5.5-6(d)(10) and 326 IAC 2-5.5-6(d)(12), respectively (see attached appendix A for calculations). The uncontrolled/unlimited potential to emit of the entire source will continue to be within the threshold levels specified in 326 IAC 2-5.5-1(b)(1). No new state rules are applicable to this source. There are no New Source Performance Standards (NSPS) (326 IAC 12 and 40 CFR Part 60) or National Emission standards for Hazardous Air Pollutants (NESHAPs) (326 IAC 14, 20 and 40 CFR Part 61, 63) included in this notice-only change.

In addition, IDEM has begun implementing a new procedure and will no longer list the name or title of the Authorized Individual (AI) in registrations. The permit has been updated to reflect current Registration modeling format. Pursuant to 326 IAC 2-5.5-6, the registration is hereby revised as follows, with deleted language as strikeouts and new language **bolded**:

1. Section A.2 (Emission Units and Pollution Control Equipment Summary) and Section D.1 (Operations Conditions) have been updated as follows:

A.2 Emission Units and Pollution Control Equipment Summary

This stationary source consists of the following emission units and pollution control devices:

- (i) **One (1) natural gas-fired single burner stress relief furnace, with a maximum heat input capacity of 0.30 mmBtu/hr and exhausts through a hood to the parts washer exhaust fan.**

SECTION D.1

OPERATION CONDITIONS

Facility Description [326 IAC 2-5.1-2(f)(2)] [326 IAC 2-5.5-4(a)(2)]:

- (i) **One (1) natural gas-fired single burner stress relief furnace, with a maximum heat input capacity of 0.30 mmBtu/hr and exhausts through a hood to the parts washer exhaust fan.**

2. Section A.2 (Emissions Units and Pollution Control Equipment Summary) and Section D.1 (Operations Conditions) have been renumbered to reflect the above changes.

The source shall continue to operate according to 326 IAC 2-5.5. Please find enclosed the revised registration.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Bruce Farrar, at (800) 451-6027, press 0 and ask for Bruce Farrar or extension 4-5401 or dial (317) 234-5401.

Pursuant to 326 IAC 8-3-5a (Cold Cleaning Operations and Control)

- (a) The Permittee of a cold cleaner degreaser facility shall ensure that the following control equipment requirements are met:
