OFFICE OF AIR MANAGEMENT**

**PETITION FOR INTERIM SIGNIFICANT PERMIT REVISION, SIGNIFICANT SOURCE  
MODIFICATION, MINOR PERMIT REVISION, OR MINOR SOURCE MODIFICATION**

Source Name: Chrysler Group LLC - Kokomo Casting Plant  
Source Address: 1001 E. Boulevard, Kokomo, IN 46904  
Mailing Address: 1001 E. Boulevard, Kokomo, IN 46904  
SIC/NAICS Code: 3363 / 331521

**Description of the Operation or Equipment:**

Chrysler Group LLC (Chrysler) is considering the installation of the following equipment at its Kokomo Casting Plant (KCP). Two (2) Wheelabrator rotary work table shot blast machines and associated dust collectors for the deburring of products manufactured at KCP. The potential criteria pollutant emissions from this equipment will be comprised almost entirely of particulate matter less than 10 microns (PM<sub>10</sub>). Potential Hazardous Air Pollutant (HAP) emissions are minimal.

The allowable emissions, based upon the federally enforceable requirement to use the proposed control devices, are equal to the potential emissions from the shot blast units.

**Potential to Emit:**

The above listed equipment will emit criteria pollutants. Potential emissions from the equipment are presented below in tons per year (TPY).

<b>Criteria Pollutants</b>		
<b>Pollutant</b>	<b>Potential Emissions (TPY)</b>	<b>PSD Permit Threshold (TPY)</b>
NO <sub>x</sub>	-	40
CO	-	100
VOC	-	40
PM <sub>10</sub>	2.66	15
PM <sub>2.5</sub>	2.66	10
SO <sub>2</sub>	-	40
Pb	-	0.6

**PSD Requirements:**

KCP is located in Howard County, which is currently considered an attainment or unclassifiable area for all criteria pollutants. Potential emissions of criteria pollutants have been considered in accordance with U.S. Environmental Protection Agency (EPA) guidance. The requested allowable emissions of criteria pollutants from the installation under consideration will be less than the threshold which would trigger the need for review under the federal PSD program.

**NSPS Requirements:**

There are no NSPS applicable to these types of processes as referenced in 326 IAC 12 or 40 CFR 60.

**NESHAP Requirements:**

The installation under consideration is not subject to NESHAPs (40 CFR 61 and 40 CFR 43, which are incorporated by reference in 326 IAC 14) or the Clean Air Act (CAA) 112(g) case by case Maximum Achievable Control Technology (MACT) requirements. The potential HAP emissions expected from the installation under consideration are well below individual and combined HAP emissions thresholds of 10 TPY and 25 TPY, respectively.

**State Rules & Requirements:**

The State of Indiana does not have an air toxics program other than that required by federal regulations (i.e., 112(g) for HAPs). PM emissions are limited by 326 IAC 6.5-1-2 to 0.03 grains/dscf. The facility will comply with this limitation.

**Federal Enforceability:**

The company consents to the federal enforceability of this interim petition.
