Re: 097-29642-00365
Third Notice Only Change to
M097-19967-00365

Dear Mr. Stevens:

SVC Manufacturing Inc. was issued a Minor Source Operating Permit (MSOP) Renewal No. M097-19667-00365 on August 12, 2005 for the operation of a stationary beverage manufacturing and packaging plant located at 5858 Decatur Blvd., Indianapolis, Indiana. A First Notice Only Change 097-24559-00365 was issued to SVC Manufacturing on May 3, 2007 and a second 097-25821-00365 was issued on January 14, 2008. On September 3, 2010, the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) received an application from the source requesting that the MSOP Renewal permit revise the number of natural gas-fired combustion units with heat input capacity equal or less than ten (10) million Btu per hour each at the facility and notify the agency that the solvent degreasers have been removed. This change to the permit is considered a notice-only change since the potential emissions of regulated criteria pollutants and hazardous air pollutants are less than the ranges specified 326 IAC 2-6.1-6(g)(4) and 326 IAC 2-6.1-6(d)(10), respectively. The uncontrolled/unlimited potential to emit of the entire source will continue to be less than the threshold levels specified in 326 IAC 2-7. The addition of these units will not cause the source's potential to emit to be greater than the threshold levels specified in 326 IAC 2-2 or 326 IAC 2-3. Pursuant to the provisions of 326 IAC 2-6.1-6, the permit is hereby revised as follows with the deleted language as ~~strikeouts~~ and new language **bolded**.

(a) Section A.2 item (h) is updated as follows:

* * * *

(h) Various natural gas-fired combustion units, with heat input equal to or less than ten million (10,000,000) Btu per hour **each**, including:

- (1) ~~Five (5)~~ **Fourteen (14)** natural gas-fired space heaters, identified as SH-1 ~~through SH-14~~, SH-2, SH-3, SH-4 and SH-5, with a **combined** heat input capacity of 132,000 ~~2,860,000~~ Btu/hr., for a combined total of 660,000 ~~Btu/hr.~~
- (2) Two (2) natural gas-fired hot water heaters, identified as WH-1 and WH-2, with a combined heat input capacity of 5,510,000 Btu/hr;
- (3) ~~Two (2)~~ **Sixteen (16)** natural gas-fired dock door space heaters, identified as DH-1 through DH-16 and ~~DH-2~~, with a combined heat input capacity of 580,000 ~~3,790,000~~ Btu/hr.

* * * *

2. Section A.2 item (i), and Section D.2 Degreasing Operations with the associated operation conditions is removed since the source has replaced the solvent degreasers with non-solvent based parts washers. Associated numbering of items in Section A.2 updated.

A.2 Emissions Units and Pollution Control Equipment Summary

This stationary source is approved to operate the following emissions units and pollution control devices:

- ~~(i) Degreasing operations, identified as DO-1, that do not exceed 145 gallons per 12 months. [326 IAC 8-3-5] [326 IAC 8-3-2]~~
- ~~(j-i) One (1) bead blasting machine located in the Maintenance Dept., identified as BB-1, controlled by a fabric filter baghouse with a designed grain loading of less than 0.03 grain/dscf and a gas flow rate of 100 cfm.~~

SECTION D.2 EMISSIONS UNITS OPERATION CONDITIONS

Emissions Unit Description:

- ~~(i) Degreasing operations, identified as DO-1, that do not exceed 145 gallons per 12 months. [326 IAC 8-3-5] [326 IAC 8-3-2]~~

~~(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)~~

Emission Limitations and Standards

D.2.1 Volatile Organic Compounds (VOC) [326 IAC 8-3-2]

~~Pursuant to 326 IAC 8-3-2 (Cold Cleaner Operations), for cold cleaning operations constructed after January 1, 1980, the Permittee shall:~~

- ~~(a) equip the cleaner with a cover;~~
- ~~(b) equip the cleaner with a facility for draining cleaned parts;~~
- ~~(c) close the degreaser cover whenever parts are not being handled in the cleaner;~~
- ~~(d) drain cleaned parts for at least fifteen (15) seconds or until dripping ceases;~~
- ~~(e) provide a permanent, conspicuous label summarizing the operating requirement;~~
- ~~(f) store waste solvent only in covered containers and not dispose of waste solvent or transfer it to another party, in such a manner that greater than twenty percent (20%) of the waste solvent (by weight) can evaporate into the atmosphere.~~

D.2.2 Volatile Organic Compounds (VOC) [326 IAC 8-3-5]

~~Pursuant to 326 IAC 8-3-5 (Cold Cleaner Degreaser Operation and Control), the owner or~~

~~operator of a cold cleaner degreaser facility shall ensure that the following control equipment requirements are met:~~

~~(a) Equip the degreaser with a cover. The cover must be designed so that it can be easily operated with one (1) hand if:~~

~~(1) the solvent volatility is greater than two (2) kiloPascals (fifteen (15) millimeters of mercury or three tenths (0.3) pounds per square inch) measured at thirty eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F));~~

~~_____ (2) the solvent is agitated; or~~

~~_____ (3) the solvent is heated.~~

~~(b) Equip the degreaser with a facility for draining cleaned articles. If the solvent volatility is greater than four and three tenths (4.3) kiloPascals (thirty two (32) millimeters of mercury or six tenths (0.6) pounds per square inch) measured at thirty eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F)), then the drainage facility must be internal such that articles are enclosed under the cover while draining. The drainage facility may be external for applications where an internal type cannot fit into the cleaning system.~~

~~(c) Provide a permanent, conspicuous label which lists the operating requirements outlined in subsection (b).~~

~~(d) The solvent spray, if used, must be a solid, fluid stream and shall be applied at a pressure which does not cause excessive splashing.~~

~~(e) Equip the degreaser with one (1) of the following control devices if the solvent volatility is greater than four and three tenths (4.3) kiloPascals (thirty two (32) millimeters of mercury or six tenths (0.6) pounds per square inch) measured at thirty eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F)), or if the solvent is heated to a temperature greater than forty eight and nine tenths degrees Celsius (48.9°C) (one hundred twenty degrees Fahrenheit (120°F)):~~

~~(A) A freeboard that attains a freeboard ratio of seventy five hundredths (0.75) or greater.~~

~~(B) A water cover when solvent used is insoluble in, and heavier than water.~~

~~(C) Other systems of demonstrated equivalent control such as a refrigerated chiller or carbon adsorption. Such systems shall be submitted to the U.S. EPA as a SIP revision.~~

~~(f) The owner or operator of a cold cleaning facility shall ensure that the following operating requirements are met:~~

~~(A) Close the cover whenever articles are not being handled in the degreaser.~~

~~(B) Drain cleaned articles for at least fifteen (15) seconds or until dripping ceases.~~

~~(C) Store waste solvent only in covered containers and prohibit the disposal or transfer of waste solvent in any manner in which greater than twenty percent (20%) of the waste solvent by weight could evaporate.~~

3. Section D.3 Blasting Operations numbering is revised to reflect the removal of the solvent degreasers with non-solvent based parts washer.

SECTION D.32

EMISSIONS UNITS OPERATION CONDITIONS

Emissions Unit Description:

- (ji) One (1) bead blasting machine located in the Maintenance Dept., identified as BB-1, controlled by a fabric filter baghouse with a designed grain loading of less than 0.03 grain/dscf and a gas flow rate of 100 cfm.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards

D.32.1 Emission Limitations for Manufacturing Processes [326 IAC 6-3]

Pursuant to 326 IAC 6-3-2, the particulate matter (PM) from BB-1 shall not exceed 0.94 pounds per hour when operating at a process weight rate of 0.111 tons per hour. The pound per hour limitation was calculated with the following equation:

Interpolation of the data in this table for process weight rates up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

Compliance Determination Requirements

D.32.2 Particulate Control

In order to comply with condition D.32.1, the baghouse for particulate control on the bead blast machine (BB-1) shall be in operation and control emissions from the bead blast machine at all times that the bead blast machine is in operation.

IDEM, OAQ has decided to make additional revisions to the permit as described below in order to update the language to match the most current version of the applicable rule, to eliminate redundancy within the permit, and to provide clarification regarding the requirements of these conditions.

1. Several of IDEM's branches and sections have been renamed. Therefore, IDEM has updated the addresses listed in the permit. References to "Permit Administration and Development Section" and the "Permits Branch" have been changed to "Permit Administration and Support Section". References to "Asbestos Section", "Compliance Data Section", "Air Compliance Section", and "Compliance Branch" have been changed to "Compliance and Enforcement Branch". In addition, all occurrences of IDEM's mailing addresses have been updated in the permit to include a mail code (MC) and to have a zip code of 46204-2251.

2. Section A.1 has been revised to indicate that Marion County is now in unclassifiable or attainment for the 8-hour ozone standard. In addition, Section A.1 has of the permit has been revised to remove the name or title of the Authorized Individual (A.I.), since IDEM no longer lists this information in the permit document.
3. Section A.1 of the permit and the reporting forms have been revised to remove all references to the source mailing address. IDEM, OAQ will continue to maintain records of the mailing address.
4. For clarity, IDEM has changed references to the general conditions: "in accordance with Section B", in accordance with Section C", or other similar language to "Section C...contains the Permittee's obligations with regard to the records required by this condition."
5. IDEM has decided that the phrases "no later than" and "not later than" are clearer than "within" in relation to the end of a timeline. Therefore all timelines have been switched to "no later than" or "not later than" except when the underlying rule states "within."
6. IDEM has determined that rather than having a certification condition and various references throughout the permit as to whether a particular report, notice, or correspondence needs to include a certification, the specific conditions that require an affirmation of truth and completeness shall state so. The certification condition has been removed. All statements to whether a certification, pursuant to the former Section B - Certification, is needed or not have been removed. Section B - Credible Evidence and Section C - Asbestos Abatement Projects still require certification as the underlying rules also require certifications.
7. IDEM has decided to clarify the requirements of Section B – Preventive Maintenance Plan and to add a new paragraph (b) to handle a future situation where the Permittee adds units that need preventive maintenance plans.
8. IDEM has revised the language of the Section B - Preventive Maintenance Plan, Section C - General Record Keeping, and Section C - General Reporting to allow the Permittee to not have to begin implementing the requirements of these conditions until ninety day after initial start up.
9. IDEM has revised the language of the Section B - Permit Renewal and Section B - Termination of Right to Operate to change the MSOP renewal application due date to one hundred twenty (120) prior to expiration of the current permit in order to match the rule.
10. IDEM has revised Section B - Permit Renewal paragraph (c) to state which rule establishes the authority to set a deadline for the Permittee to submit additional information.
11. IDEM has added 326 IAC 5-1-1 to the exception clause of Section C - Opacity, since 326 IAC 5-1-1 does list exceptions.
12. IDEM has revised Section C - Incineration to more closely reflect the two underlying rules.
13. IDEM has revised the language of the Section C - Asbestos Abatement Projects to change the terminology "Accredited" to "Licensed" in order to match the rule.
14. IDEM has removed the first paragraph of Section C - Performance Testing as due to the fact that specific testing conditions elsewhere in the permit will specify the timeline and procedures.
15. IDEM has removed Section C - Monitoring Methods. The conditions that require the monitoring or testing, if required, state what methods shall be used.

16. IDEM has revised Section C - Response to Excursions or Exceedances. The introduction sentence has been added to clarify that it is only when an excursion or exceedance is detected that the requirements of this condition need to be followed. The word "excess" was added to the last sentence of paragraph (a) because the Permittee only has to minimize excess emissions. The middle of paragraph (b) has been deleted as it was duplicative of paragraph (a). The phrase "or are returning" was added to subparagraph (b)(2) as this is an acceptable response assuming the operation or emission unit does return to normal or its usual manner of operation. The phrase "within the indicator range, designated condition, or below the applicable emission limitation or standard, as applicable" was replaced with "normal or usual manner of operation" because the first phrase is just a limited list of the second phrase. The recordkeeping required by paragraph (e) was changed to require only records of the response because the previously listed items are required to be recorded elsewhere in the permit.
17. IDEM has revised Section C - Actions Related to Noncompliance Demonstrated by a Stack Test. The requirements to take response steps and minimize excess emissions have been removed because Section C - Response to Excursions or Exceedances already requires response steps related to exceedances and excess emissions minimization. The start of the timelines was switched from "the receipt of the test results" to "the date of the test." There was confusion if the "receipt" was by IDEM, the Permittee, or someone else. Since the start of the timelines has been moved up, the length of the timelines was increased. The new timelines require action within a comparable timeline; and the new timelines still ensure that the Permittee will return to compliance within a reasonable timeframe.
18. The voice of paragraph (b) of Section C - General Record Keeping Requirements has been changed to clearly indicate that it is the Permittee that must follow the requirements of the paragraph.
19. Local agencies no longer have effective authority to implement state and federal requirements for IDEM. Therefore, IDEM has removed all references to local agencies from the permit. The revised permit specifies that all reports, notices, applications, and any other required submittals shall be submitted to IDEM. The Permittee should note that the local agency could have its own requirements beyond the state and federal requirements contained in the permit. Please contact the local agency for further information.

In addition to removing all references to local agencies from the permit, Section B - Enforceability, Section B - Affidavit of Construction, and Section B - Annual Fee Payment have been revised to remove language that no longer has legal basis in an underlying state or federal requirement.

The permit has been revised as follows with deleted language as ~~strikeouts~~ and new language **bolded**:

Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date of this permit.~~
- ~~(b) If IDEM, OAQ and OES upon receiving a timely and complete renewal permit application, fail to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue to be in effect, until the renewal permit has been issued or denied.~~

~~B.4 Term of Conditions [326 IAC 2-1.1-9.5]~~

~~Notwithstanding the permit term of a permit to construct, a permit to operate, or a permit modification, any condition established in a permit issued pursuant to a permitting program approved in the state implementation plan shall remain in effect until:~~

- ~~(a) the condition is modified in a subsequent permit action pursuant to Title I of the Clean Air Act;
or~~

~~B.5 Annual Notification [326 IAC 2-6.1-5(a)(5)]~~

- ~~(a) An annual notification shall be submitted by an authorized individual to the Office of Air Quality stating whether or not the source is in operation and in compliance with the terms and conditions contained in this permit.~~
- ~~(b) Noncompliance with any condition must be specifically identified. If there are any permit conditions or requirements for which the source is not in compliance at any time during the year, the Permittee must provide a narrative description of how the source did or will achieve compliance and the date compliance was, or will be, achieved. The notification must be signed by an authorized individual.~~
- ~~(c) The annual notice shall be submitted in the format attached no later than March 1 of each year to:~~

~~Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality

~~Indianapolis OES
Air Compliance
2700 South Belmont Ave.
Indianapolis, IN 46224~~

- ~~(d) The notification shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, and OES on or before the date it is due.~~

~~B.6 Preventive Maintenance Plan [326 IAC 1-6-3]~~

- ~~(a) If required by specific condition(s) in Section D of this permit, the Permittee shall maintain~~

and implement Preventive Maintenance Plans (PMPs) including the following information on each facility:

- (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
 - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
 - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.
- (b) The Permittee shall implement the PMPs, including any required record keeping, as necessary to ensure that failure to implement a PMP does not cause or contribute to an exceedance of any limitation on emissions or potential to emit.
- (c) A copy of the PMPs shall be submitted to IDEM, OAQ, and OES upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ, and OES. IDEM, OAQ, and OES may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or is the primary contributor to an exceedance of any limitation on emissions or potential to emit. The PMP does not require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (d) To the extent the Permittee is required by 40 CFR Part 60/63 to have an Operation, Maintenance, and Monitoring (OMM) Plan for a unit, such Plan is deemed to satisfy the PMP requirements of 326 IAC 1-6-3 for that unit.

B.7 Permit Renewal [326 IAC 2-6.1-7]

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ and OES and shall include the information specified in 326 IAC 2-6.1-7. Such information shall be included in the application for each emission unit at this source. The renewal application does require the certification by the "Authorized Individual" as defined by 326 IAC 2-1.1-1(1).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management
Permit Branch, Office of Air Quality

Indianapolis, IN 46224

- (b) A timely renewal application is one that is:
- (1) Submitted at least one hundred twenty (120) days prior to the date of the expiration of this permit; and

~~(2) — If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ and OES on or before the date it is due.~~

~~(c) — If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-6.1 until IDEM, OAQ and OES take final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ and OES any additional information identified as being needed to process the application.~~

~~B.8 — Permit Amendment or Revision [326 IAC 2-5.1-3(e)(3)] [326 IAC 2-6.1-6]~~

~~(a) — Enter upon the Permittee's premises where a permitted source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;~~

~~(b) — As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, have access to and copy, at reasonable times, any records that must be kept under this title or the conditions of this permit or any operating permit revisions;~~

~~Pursuant to [326 IAC 2-6.1-6(d)(3)]:~~

- (a) ~~In the event that ownership of this source is changed, the Permittee shall notify IDEM, OAQ, Permits Branch, and OES, Air Permits, within thirty (30) days of the change.~~

- (a) ~~Violation of any conditions of this permit.~~

- ~~(b) — Failure to disclose all the relevant facts, or misrepresentation in obtaining this permit.~~

Emission (tons/yr) = Throughput (MMCF/yr) x Emission Factor (lb/MMCF)/2,000 lb/ton
