Re: 085-29910-00031
Revocation of Significant Source Modification
No. 085-20763-00031

Dear Mr. Mains:

Nautic Global Group Inc. dba Rinker Boat Company was issued Significant Source Modification No. 085-20763-00031 on August 4, 2006, for construction of one (1) fiberglass lay-up operation, one (1) assembly glue application area, enclosed grinding areas in Plant 5 for trimming/grinding boats after being removed from molds, and a variety of insignificant activities. The Office of Air Quality (OAQ) granted two (2) 18-month construction deadline extensions to the source. Administrative Amendment No. 085-25929-00031, issued on February 11, 2008, extended the construction deadline to August 3, 2009, and Administrative Amendment No. 085-27899-00031, issued on June 29, 2009, extended the construction deadline to February 3, 2011. On November 19, 2010, the OAQ received a letter from the source requesting a third extension of the construction deadline.

Pursuant to 326 IAC 2-1.1-9(5), any permit authorizing construction may be revoked for failure to commence construction within eighteen (18) months from the date of the issuance of the permit, or if during the construction of the source or emission unit, work is suspended for a continuous period of one (1) year or more. Since Nautic Global Group Inc. dba Rinker Boat Company has indicated that they have not commenced construction of the units authorized in Significant Source Modification No. 085-20763-00031 by February 3, 2011, the OAQ has determined that the construction approval shall be revoked.

Significant Source Modification No. 085-20763-00031, issued on August 4, 2006, is hereby revoked. Pursuant to IC 4-21.5-3-5(a) and (b), this revocation letter is effective in eighteen (18) days from the date of this letter.

Please be advised that once this revocation is effective, the source will no longer have approval to construct the following emission units and insignificant activities approved under Significant Source Modification No. 085-20763-00031, issued on August 4, 2006:

- (a) one (1) fiberglass lay-up operation (P5-1), to be constructed in 2006, located in Plant 5, utilizing a flow coating and/or High Volume Low Pressure (HVLP) spray lay-up gel coat application system and a resin flow coating application system, producing a maximum of 1.5 fiberglass boats per hour, with dry filters for particulate matter overspray control, and exhausting through seven (7) wall mounted exhaust fans, identified as S5-16 through S5-22;
- (b) One (1) assembly glue application area (P5-2), to be constructed in 2006, located in Plant 5, using a High Volume Low Pressure (HVLP) spray application system, coating a maximum of 1.5 sets of boat parts per hour, exhausting inside the building; and
- (c) Enclosed grinding areas in Plant 5 for trimming/grinding boats after being removed from molds, to be constructed in 2006, with a maximum process weight rate of 3,140 pounds per hour, with one (1) Wheelabrator dust collector (DC-1) for control of PM and PM10 emissions, exhausting through a closed loop ventilation system.

- (d) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour:
- (1) Two (2) space heaters, each rated at 0.10 MMBtu per hour, each exhausting through one (1) stack, identified as S5-1 and S5-2, respectively;
 - (2) One (1) space heater, rated at 0.112 MMBtu per hour, exhausting through one (1) stack, identified as S5-3;
 - (3) One (1) space heater, rated at 0.12 MMBtu per hour, exhausting through one (1) stack, identified as S5-4;
 - (4) One (1) air make-up unit, rated at 2.54 MMBtu per hour, exhausting through one (1) stack, identified as S5-5;
 - (5) Two (2) space heaters, each rated at 0.30 MMBtu per hour, each exhausting through one (1) stack, identified as S5-6 and S5-7, respectively;
 - (6) One (1) air make-up unit, rated at 5.0 MMBtu per hour, exhausting through one (1) stack, identified as S5-8;
 - (7) One (1) space heater, rated at 0.30 MMBtu per hour, exhausting through one (1) stack, identified as S5-9;

 - (2) Hand buffing/polishing of boats in final cleaning operations; and
 - (3) A foam blowing operation using flotation foam with potential VOC emissions less than 1 ton per year.

In addition, if there is a need in the future to construct any new units at this source, construction and operation approval will be necessary pursuant to Indiana's New Source Review regulations. Once effective, this revocation can not be withdrawn or rescinded.
