RE: Daramic, Inc. / 061-30503-00012

FROM: Matthew Stuckey, Branch Chief  
Permits Branch  
Office of Air Quality

## Notice of Decision – Approval

Please be advised that on behalf of the Commissioner of the Department of Environmental Management, I have issued a decision regarding the enclosed matter. Pursuant to 326 IAC 2, this approval was effective immediately upon submittal of the application.

If you wish to challenge this decision, IC 4-21.5-3-7 requires that you file a petition for administrative review. This petition may include a request for stay of effectiveness and must be submitted to the Office of Environmental Adjudication, 100 North Senate Avenue, Government Center North, Suite N 501E, Indianapolis, IN 46204, **within eighteen (18) calendar days from the mailing of this notice**. The filing of a petition for administrative review is complete on the earliest of the following dates that apply to the filing:

- (1) the date the document is delivered to the Office of Environmental Adjudication (OEA);
- (2) the date of the postmark on the envelope containing the document, if the document is mailed to OEA by U.S. mail; or
- (3) The date on which the document is deposited with a private carrier, as shown by receipt issued by the carrier, if the document is sent to the OEA by private carrier.

The petition must include facts demonstrating that you are either the applicant, a person aggrieved or adversely affected by the decision or otherwise entitled to review by law. Please identify the permit, decision, or other order for which you seek review by permit number, name of the applicant, location, date of this notice and all of the following:

- (1) the name and address of the person making the request;
- (2) the interest of the person making the request;
- (3) identification of any persons represented by the person making the request;
- (4) the reasons, with particularity, for the request;
- (5) the issues, with particularity, proposed for considerations at any hearing; and
- (6) identification of the terms and conditions which, in the judgment of the person making the request, would be appropriate in the case in question to satisfy the requirements of the law governing documents of the type issued by the Commissioner.

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178. Callers from within Indiana may call toll-free at 1-800-451-6027, ext. 3-0178.

July 12, 2011

Re: 061-30503-00012  
Administrative Amendment to  
Part 70 Operating Permit Renewal No: 061-18304-  
00012

Dear Mr. Thompson:

Daramic, Inc. was issued Part 70 Operating Permit Renewal 061-18304-00012 on February 7, 2008, for a stationary battery separator manufacturing plant. A letter requesting changes to the permit was received on May 2, 2011. Daramic, Inc. has requested to replace an existing boiler, identified as 2.1 with a maximum heat input capacity of 20.922 MMBtu per hour, with a new natural gas-fired boiler with a maximum heat input capacity of 11.70 MMBtu per hour. Boiler 2.1 is no longer operational due to a mechanical failure. The replacement boiler will run on natural gas only.

Pursuant to 326 IAC 2-7-11(a)(8), a revision that incorporates an exempt unit as described in 326 IAC 2-1.1-3 may be processed as an administrative amendment. The replacement boiler has the potential to emit the following:

Pollutant	Potential to Emit (tons/year)
PM	0.10
PM <sub>10</sub>	0.39
PM <sub>2.5</sub>	0.39
SO <sub>2</sub>	0.03
NO <sub>x</sub>	5.12
VOC	0.28
CO	4.30
CO <sub>2e</sub>	6,187
Total HAPs	0.09

The source has the potential to emit 12,824.96 tons of CO<sub>2e</sub> (see page 2 of 2 of Attachment A). The addition of this boiler does not change the minor status of the entire source under 326 IAC 2-2 Prevention of Significant Deterioration (PSD)). No regulated pollutant, excluding GHG, is emitted at a rate of two hundred fifty (250) tons per year or more, emissions of GHG are less than one hundred thousand (100,000) tons of CO<sub>2</sub> equivalent emissions (CO<sub>2e</sub>) per year, and it is not one of the twenty-eight (28) listed source categories, as specified in 326 IAC 2-2-1(ff)(1).

The new boiler will be subject to the requirements of 326 IAC 6-2 (Particulate Emission Limitations for Sources of Indirect Heating) and 40 CFR 60, Subpart Dc. These were requirements were already included in the permit for boiler 2.1.

The permit has been administratively amended as follows with the deleted language as ~~strikeouts~~ and new language **bolded**. All changes to the table of contents will not be reproduced herein.

### Change 1:

Section A.2 has been revised as follows to remove the description of the boiler identified as 2.1 and include the description of the new boiler:

- (d) ~~Two (2)~~ **One (1)** boilers, identified as Unit ID #s 1.1 and 2.1, constructed in 1979 and 1991, respectively, each with a maximum heat input capacity of 12.553 and 20.922 MMBtu per hour, respectively, each combusting natural gas or No. 2 fuel oil, each exhausting through one (1) stack, identified as S/V ID #s 1 and 2, respectively;
- (e) **One (1) natural gas-fired boiler, installed in 2011, with a maximum heat input capacity of 11.70 MMBtu per hour.**
- (ef) One (1) tank, identified as Unit #11.7, constructed in 1991, used to store virgin oil, with a maximum storage capacity of 14,384 gallons;
- (fg) One (1) silo dilute phase transporter, identified as Unit ID #13, installed in 2000, used to convey polyethylene pneumatically from rail cars to a silo, utilizing a bin filter for particulate control and exhausting through one (1) stack, identified as S/V ID #20;
- (gh) One (1) polyethylene weigh bin line 3 with maximum weighing capacity of 345 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F05.1;
- (hi) One (1) silica weigh bin line 3 with maximum weighing capacity of 800 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F01.1;
- (ij) One (1) polyethylene weigh bin line 4 with maximum weighing capacity of 345 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F05.2; and
- (jk) One (1) silica weigh bin line 4 with maximum weighing capacity of 800 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F01.2.

### Change 2:

Section D.4 has been revised to remove all references to boiler 2.1 and include the new natural gas-fired boiler. The new natural gas-fired boiler does not have the potential to emit twenty-five (25) tons per year or ten (10) pounds per hour of sulfur dioxide. Therefore, all references to 326 IAC 7 (Sulfur Dioxide Rules) have been removed.

#### SECTION D.4

#### FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]

~~One (1) boiler, identified as Unit ID # 2.1, constructed in 1991, with a maximum heat input capacity of 20.922 MMBtu per hour, combusting natural gas or No. 2 fuel oil, exhausting through one (1) stack, identified as S/V ID # 2.~~

**One (1) natural gas-fired boiler, installed in 2011, with a maximum heat input capacity of 11.70 MMBtu per hour.**

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.4.1 Particulate Matter Limitation (PM) [326 IAC 6-2-4]

Pursuant to 326 IAC 6-2-4 (Particulate Emission Limitations for Sources of Indirect Heating) the PM emissions from the 20.922 11.70 MMBtu per hour boiler (Unit ID # 2.1) shall be limited to 0.44 0.48 pounds per MMBtu heat input.

This limitation is based on the following equation:

$$Pt = \frac{1.09}{Q^{0.26}} \quad \text{where: } Pt = \text{Pounds of particulate matter emitted per MMBtu heat input.}$$

Q = Total source maximum operating capacity rating in MMBtu per hour.

~~D.4.2 Sulfur Dioxide (SO<sub>2</sub>) [326 IAC 7-1.1-1] [326 IAC 7-2-1]~~

~~(a) Pursuant to 326 IAC 7-1.1 (SO<sub>2</sub> Emissions Limitations) the SO<sub>2</sub> emissions from the 20.922 MMBtu per hour boiler shall not exceed five tenths (0.5) pounds per MMBtu heat input or a sulfur content of less than or equal to 0.5% when using distillate oil.~~

~~(b) Pursuant to 326 IAC 7-2-1, compliance shall be demonstrated on a monthly average.~~

D.4.32 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan is required for this facility. Section B - Preventive Maintenance Plan contains the Permittee's obligation with regard to the preventive maintenance plan required by this condition.

~~Compliance Determination Requirements~~

~~D.4.4 Sulfur Dioxide Emissions and Sulfur Content~~

~~Compliance with Condition D.4.2 shall be determined utilizing one of the following options:~~

~~(a) Pursuant to 326 IAC 3-7-4, the Permittee shall demonstrate that the sulfur dioxide emissions do not exceed five tenths (0.5) pound per million Btu heat input by:~~

~~(1) Providing vendor analysis of fuel delivered, if accompanied by a vendor certification, or;~~

~~(2) Analyzing the oil sample to determine the sulfur content of the oil via the procedures in 40 CFR 60, Appendix A, Method 19.~~

~~(A) Oil samples may be collected from the fuel tank immediately after the fuel tank is filled and before any oil is combusted; and~~

~~(B) If a partially empty fuel tank is refilled, a new sample and analysis would be required upon filling.~~

~~(b) Compliance may also be determined by conducting a stack test for sulfur dioxide emissions from the boiler using 40 CFR 60, Appendix A, Method 6 in accordance with the procedures in 326 IAC 3-6.~~

~~A determination of noncompliance pursuant to any of the methods specified in (a) or (b) above shall not be refuted by evidence of compliance pursuant to the other method.~~

~~Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]~~

~~D.4.5 Visible Emissions Notations~~

- ~~(a) Daily visible emission notations of the boiler (Unit ID # 2.1) stack exhaust shall be performed once per day during normal daylight operations when burning No. 2 fuel oil. A trained employee shall record whether emissions are normal or abnormal.~~
- ~~(b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut-down time.~~
- ~~(c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.~~
- ~~(d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.~~
- ~~(e) If abnormal emissions are observed, the Permittee shall take reasonable response steps. Section C Response to Excursions or Exceedances contains the Permittee's obligation with regard to the reasonable response steps required by this condition. Failure to take response steps shall be considered a deviation from this permit.~~

~~Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]~~

~~D.4.6 Record Keeping Requirements~~

- ~~(a) To document the compliance status with Condition D.4.2, the Permittee shall maintain records in accordance with (1) through (6) below. Records maintained for (1) through (6) shall be taken monthly and shall be complete and sufficient to establish compliance with the SO<sub>2</sub> emission limit established in Condition D.4.2.
  - ~~(1) Calendar dates covered in the compliance determination period;~~
  - ~~(2) Actual fuel oil usage since last compliance determination period and equivalent sulfur dioxide emissions;~~
  - ~~(3) To certify compliance when burning natural gas only, the Permittee shall maintain records of fuel used.  
  
If the fuel supplier certification is used to demonstrate compliance, when burning alternate fuels and not determining compliance pursuant to 326 IAC 3-7-4, the following, as a minimum, shall be maintained:
    - ~~(4) Fuel supplier certifications;~~
    - ~~(5) The name of the fuel supplier; and~~
    - ~~(6) A statement from the fuel supplier that certifies the sulfur content of the fuel oil.~~~~~~
- ~~(b) Pursuant to 326 IAC 12, the Permittee shall maintain daily records of the amount and type of fuel combusted by the boilers. This condition expires when the transitions made to 40 CFR 60, Subpart Dc as amended on February 27, 2006, becomes an Indiana law. This condition is not federally enforceable.~~
- ~~(c) To document the compliance status with Condition D.4.5, the Permittee shall maintain records of daily visible emission notations of the boiler (Unit ID # 2.1) stack exhaust when~~

~~burning No. 2 fuel oil. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation, (i.e. the process did not operate that day).~~

~~(d) Section C General Record Keeping Requirements contains the Permittee's obligation with regard to the records required by this condition.~~

#### ~~D.4.7 Reporting Requirements~~

~~The natural gas boiler certification shall be submitted to the address listed in Section C General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or its equivalent, within thirty (30) days after the end of the six (6) month period being reported. The natural gas-fired boiler certification does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).~~

#### Change 3:

Section E.2 has been revised as follows to remove all references to boiler 2.1 and include the new natural gas-fired boiler:

#### SECTION E.2 FACILITY OPERATION CONDITIONS

##### Facility Description [326 IAC 2-7-5(15)]

~~One (1) boiler, identified as Unit ID # 2.1, constructed in 1991, with a maximum heat input capacity of 20.922 MMBtu per hour, combusting natural gas or No. 2 fuel oil, exhausting through one (1) stack, identified as SA-1 ID # 2.~~

**One (1) natural gas-fired boiler, installed in 2011, with a maximum heat input capacity of 11.70 MMBtu per hour.**

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

##### New Source Performance Standards (NSPS) Requirements [326 IAC 2-7-5(1)]

E.2.1 General Provisions Relating to New Source Performance Standards (NSPS) for Small Industrial-Commercial-Institutional Steam Generating Units [326 IAC 12-1][40 CFR Part 60, Subpart A] [40 CFR Part 60, Subpart Dc]

Pursuant to 40 CFR 60, Subpart Dc, the Permittee shall comply with the provisions of 40 CFR Part 60, Subpart A – General Provisions, which are incorporated by reference as 326 IAC 12-1-1 for the for the **natural gas-fired** boiler (Unit ID # 2.1) as specified in Appendix A of 40 CFR Part 60, in accordance with the schedule in 40 CFR 60, Subpart Dc.

E.2.2 New Source Performance Standards (NSPS) for Small Industrial-Commercial-Institutional Steam Generating Units [40 CFR Part 60, Subpart Dc]

Pursuant to 40 CFR Part 60, Subpart Dc, the Permittee shall comply with the provisions of 40 CFR Part 60, Subpart Dc, which are incorporated by reference as 326 IAC 12-1 for the **natural gas-fired** boiler (Unit ID # 2.1). The entire text of 40 CFR 60, Subpart Dc is included as Attachment A to this permit.

- (1) 40 CFR 60.40c
- (2) 40 CFR 60.41c
- (3) 40 CFR 60.42c(d), (g), (h)(1), (i), and (j)
- (4) 40 CFR 60.44c(a), (b), (g), (h)
- (5) 40 CFR 60.46c(e)

(6) 40 CFR 60.48c(a), (b), (d), (e)(1) through (e)(11), (f)(1), (g)(1), (g)(2), (i), and (j)

All other conditions of the permit shall remain unchanged and in effect. Please find enclosed the entire revised permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Anne-Marie C. Hart at (800) 451-6027, ask for extension 4-5400 or dial directly: (317) 234-5400.

Sincerely,

Chrystal Wagner, Section Chief  
Permits Branch  
Office of Air Quality

## PART 70 OPERATING PERMIT OFFICE OF AIR QUALITY

**Daramic, LLC**  
**3430 Cline Road**  
**Corydon, Indiana 47112**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

**The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit is grounds for enforcement action; permit termination, revocation and reissuance, or modification; or denial of a permit renewal application. Noncompliance with any provision of this permit, except any provision specifically designated as not federally enforceable, constitutes a violation of the Clean Air Act. It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in Section B, Emergency Provisions.**

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-7 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

## SECTION A SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

### A.1 General Information [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)] [326 IAC 2-7-1(22)]

---

The Permittee owns and operates a stationary battery separator manufacturing plant.

Source Address:	3430 Cline Road NW, Corydon, Indiana 47112
General Source Phone Number:	(812) 738-0422
SIC Code:	3089
County Location:	Harrison County
Source Location Status:	Attainment for all criteria pollutants
Source Status:	Part 70 Permit Program Minor Source, under PSD Rules; Major Source, Section 112 of the Clean Air Act Not 1 of 28 source categories

### A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)] [326 IAC 2-7-5(15)]

---

This stationary source consists of the following emission units and pollution control devices:

- (a) Sub-Micro (SM) Line 3, installed in 1979, and Sub-Micro (SM) Line 4, installed in 1984, consisting of the following equipment:
- (1) Four (4) silos, identified as Unit ID #s 4.1-4.4, used to store either polyethylene or silica, each with a maximum storage capacity of 168, 168, 75, and 75 tons, respectively, each utilizing a bin filter (Unit ID #s 4.1-4.4) for particulate matter control, each exhausting through one (1) stack, identified as S/V ID #s 4, 5, 6, and 7, respectively;
  - (2) Two (2) day bins, identified as Unit ID #s 6.1 and 6.2, used to store silica and polyethylene, respectively, each with a maximum storage capacity of 2.4 and 0.125 tons, respectively, each utilizing a bin filter (Unit ID #s 6.1 and 6.2) for particulate matter control, each exhausting through one (1) stack, identified as S/V ID #s 10 and 11, respectively;
  - (3) One (1) silo dilute phase transporter, identified as Unit ID #3.1, constructed in 2008, used to convey silica from rail cars to silo #s 4.2-4.5, utilizing a baghouse (Unit ID # 3.1) for particulate control, exhausting through one (1) stack, identified as S/V ID #3;
  - (4) One (1) silica transporter, identified as Unit ID # 5.1, constructed in 1979, used to convey silica from silos 4.3, 4.4, and 4.5 to silica day bin # 6.1, utilizing a baghouse (Unit # 5.1) for particulate matter control, each exhausting through one (1) stack, identified as S/V ID # 9;
  - (5) Two (2) oil extraction systems, identified as Unit ID #s 9.1 and 9.2, each system includes oil extraction pans, a solvent drying oven, a water drying oven, and a

- distillation unit, utilizing a carbon adsorber to control volatile organic compounds and trichloroethylene, exhausting through one (1) stack, identified as S/V ID # 17;
- (6) One (1) extruder, identified as Unit ID #8.1, controlled by a precipitative coalescing filter (smog hog) and exhausting through one (1) stack identified as S/V ID #14;
  - (7) One (1) extruder, identified as Unit ID #8.2, exhausting through one (1) stack identified as S/V ID #16;
  - (8) Two (2) aerosol addition systems (mix towers), identified as Unit ID #s 10.1, 10.2, exhausting inside the building;
- (b) Sub-Micro (SM) Line 6, installed in 1991, consisting of the following equipment:
- (1) One (1) silo, identified as Unit ID # 4.5, used to store silica, with a maximum storage capacity of 75 tons, utilizing a bin filter (Unit ID # 4.5) for particulate matter control, exhausting through one (1) stack, identified as S/V ID # 8;
  - (2) Two (2) day bins, identified as Unit ID #s 7.1 and 7.2, used to store silica and polyethylene, respectively, each with a maximum storage capacity of 2.4 and 0.125 tons, respectively, each utilizing a bin filter (Unit ID #s 7.1 and 7.2) for particulate matter control, each exhausting through one (1) stack, identified as S/V ID #s 12 and 13, respectively;
  - (3) One (1) oil extraction system, identified as Unit ID # 9.3, system includes oil extraction pans, a solvent drying oven, a water drying oven, and a distillation unit, utilizing a carbon adsorber to control volatile organic compounds and trichloroethylene, exhausting through one (1) stack, identified as S/V ID # 17;
  - (4) One (1) extruder, identified as Unit ID # 8.3, exhausting through one (1) stack identified as S/V ID #16;
  - (5) One (1) aerosol addition system (mix tower), identified as Unit ID # 10.3, exhausting inside the building;
- (c) Sub-Micro (SM) Lines 3, 4 and 6 support equipment, consisting of storage tanks (Unit ID #s 11.1 through 11.6) and a trichloroethylene (TCE) recovery system (smokehouse) Unit ID #9.4;
- Under NESHAP Subpart EEEEE, the trichloroethylene (TCE) recovery system (smokehouse) Unit ID # 9.4 is considered an existing affected source.
- (d) One (1) boiler, identified as Unit ID # 1.1, constructed in 1979, with a maximum heat input capacity of 12.553 MMBtu per hour, combusting natural gas or No. 2 fuel oil, exhausting through one (1) stack, identified as S/V ID #;
  - (e) One (1) natural gas-fired boiler, installed in 2011, with a maximum heat input capacity of 11.70 MMBtu per hour.
  - (f) One (1) tank, identified as Unit #11.7, constructed in 1991, used to store virgin oil, with a maximum storage capacity of 14,384 gallons;
  - (g) One (1) silo dilute phase transporter, identified as Unit ID #13, installed in 2000, used to convey polyethylene pneumatically from rail cars to a silo, utilizing a bin filter for particulate control and exhausting through one (1) stack, identified as S/V ID #20;

- (h) One (1) polyethylene weigh bin line 3 with maximum weighing capacity of 345 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F05.1;
- (i) One (1) silica weigh bin line 3 with maximum weighing capacity of 800 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F01.1;
- (j) One (1) polyethylene weigh bin line 4 with maximum weighing capacity of 345 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F05.2; and
- (k) One (1) silica weigh bin line 4 with maximum weighing capacity of 800 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F01.2.

A.3 Specifically Regulated Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)]  
[326 IAC 2-7-5(15)]

---

This stationary source also includes the following insignificant activities which are specifically regulated, as defined in 326 IAC 2-7-1(21):

- (a) Trimmers that do not produce fugitive emissions and that are equipped with a dust collector or trim material recovery device such as a bag filter or cyclone [326 IAC 6-3-2];
- (b) Paved and unpaved roads with public access [326 IAC 6-4];
- (c) One (1) Chop Line: The line utilizes separator material made by the Corydon plant and purchased fiberglass in roll form. The 50 inch wide fiberglass is applied in roll form onto the separator material. Glue is used as an adhesive to bond the fiberglass to the separator material. The roll is heated in an electrically powered oven. The sheet exits the oven to a conveyor belt where it is cut into customer-required dimensions. An exhaust blower is used as a ventilation system directing fiberglass particles to a cyclone and collection bin and venting inside the building. The fiberglass is disposed as plant waste to a local landfill. Based on maximum usage of glue, the potential to emit VOC is less than 100 pounds per year [326 IAC 6-3-2].

A.4 Part 70 Permit Applicability [326 IAC 2-7-2]

---

This stationary source is required to have a Part 70 permit by 326 IAC 2-7-2 (Applicability) because:

- (a) It is a major source, as defined in 326 IAC 2-7-1(22);
- (b) It is a source in a source category designated by the United States Environmental Protection Agency (U.S. EPA) under 40 CFR 70.3 (Part 70 - Applicability).

## SECTION B GENERAL CONDITIONS

### B.1 Definitions [326 IAC 2-7-1]

---

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2 and 326 IAC 2-7) shall prevail.

### B.2 Permit Term [326 IAC 2-7-5(2)][326 IAC 2-1.1-9.5][326 IAC 2-7-4(a)(1)(D)][IC 13-15-3-6(a)]

---

- (a) This permit, T061-26584-00012, is issued for a fixed term of five (5) years from the issuance date of this permit, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date of this permit.
- (b) If IDEM, OAQ, upon receiving a timely and complete renewal permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect, including any permit shield provided in 326 IAC 2-7-15, until the renewal permit has been issued or denied.

### B.3 Term of Conditions [326 IAC 2-1.1-9.5]

---

Notwithstanding the permit term of a permit to construct, a permit to operate, or a permit modification, any condition established in a permit issued pursuant to a permitting program approved in the state implementation plan shall remain in effect until:

- (a) the condition is modified in a subsequent permit action pursuant to Title I of the Clean Air Act; or
- (b) the emission unit to which the condition pertains permanently ceases operation.

### B.4 Enforceability [326 IAC 2-7-7] [IC 13-17-12]

---

Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.

### B.5 Severability [326 IAC 2-7-5(5)]

---

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

### B.6 Property Rights or Exclusive Privilege [326 IAC 2-7-5(6)(D)]

---

This permit does not convey any property rights of any sort or any exclusive privilege.

### B.7 Duty to Provide Information [326 IAC 2-7-5(6)(E)]

---

- (a) The Permittee shall furnish to IDEM, OAQ, within a reasonable time, any information that IDEM, OAQ may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. Upon request, the Permittee shall also furnish to IDEM, OAQ copies of records required to be kept by this permit.
- (b) For information furnished by the Permittee to IDEM, OAQ, the Permittee may include a claim of confidentiality in accordance with 326 IAC 17.1. When furnishing copies of requested records directly to U. S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

### B.8 Certification [326 IAC 2-7-4(f)][326 IAC 2-7-6(1)][326 IAC 2-7-5(3)(C)]

---

- (a) A certification required by the permit meets the requirements of 326 IAC 2-7-6(1) if:

- (1) it contains a certification by a "responsible official", as defined by 326 IAC 2-7-1(34), and
  - (2) the certification states that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) The Permittee may use the attached Certification Form, or its equivalent, with each submittal requiring certification. One (1) certification may cover multiple forms in one (1) submittal.
- (c) A "responsible official" is defined at 326 IAC 2-7-1(34).

B.9 Annual Compliance Certification [326 IAC 2-7-6(5)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. All certifications shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted no later than July 1 of each year to:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

and

United States Environmental Protection Agency, Region V  
Air and Radiation Division, Air Enforcement Branch - Indiana (AE-17J)  
77 West Jackson Boulevard  
Chicago, Illinois 60604-3590

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
- (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
  - (2) The compliance status;
  - (3) Whether compliance was continuous or intermittent;
  - (4) The methods used for determining the compliance status of the source, currently and over the reporting period consistent with 326 IAC 2-7-5(3); and
  - (5) Such other facts, as specified in Sections D of this permit, as IDEM, OAQ may require to determine the compliance status of the source.

The submittal by the Permittee does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

B.10 Preventive Maintenance Plan [326 IAC 2-7-5(1),(3) and (13)][326 IAC 2-7-6(1) and (6)][326 IAC 1-6-3]

---

- (a) A Preventive Maintenance Plan (PMP) meets the requirements of 326 IAC 1-6-3 if it includes, at a minimum:
- (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
  - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
  - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.
- (b) If required by specific condition(s) in Section D of this permit where no PMP was previously required, the Permittee shall prepare and maintain Preventive Maintenance Plans (PMPs) no later than ninety (90) days after issuance of this permit or ninety (90) days after initial start-up, whichever is later, including the following information on each facility:
- (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
  - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
  - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.

If, due to circumstances beyond the Permittee's control, the PMPs cannot be prepared and maintained within the above time frame, the Permittee may extend the date an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

The PMP extension notification does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official", as defined by 326 IAC 2-7-1(34).

- (c) A copy of the PMPs shall be submitted to IDEM, OAQ upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ. IDEM, OAQ may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or is the primary contributor to an exceedance of any limitation on emissions. The PMPs and their submittal do not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).
- (d) To the extent the Permittee is required by 40 CFR Part 60/63 to have an Operation Maintenance, and Monitoring (OMM) Plan for a unit, such Plan is deemed to satisfy the PMP requirements of 326 IAC 1-6-3 for that unit.

**B.11 Emergency Provisions [326 IAC 2-7-16]**

---

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describe the following:
- (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
  - (2) The permitted facility was at the time being properly operated;
  - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
  - (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ, within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Telephone Number: 1-800-451-6027 (ask for Office of Air Quality, Compliance and Enforcement Branch), or  
Telephone Number: 317-233-0178 (ask for Compliance and Enforcement Branch)  
Facsimile Number: 317-233-6865

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-7-5(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.

- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) The Permittee seeking to establish the occurrence of an emergency shall make records available upon request to ensure that failure to implement a PMP did not cause or contribute to an exceedance of any limitations on emissions. However, IDEM, OAQ may require that the Preventive Maintenance Plans required under 326 IAC 2-7-4(c)(9) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-7 and any other applicable rules.
- (g) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.

B.12 Permit Shield [326 IAC 2-7-15][326 IAC 2-7-20][326 IAC 2-7-12]

- (a) Pursuant to 326 IAC 2-7-15, the Permittee has been granted a permit shield. The permit shield provides that compliance with the conditions of this permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that either the applicable requirements are included and specifically identified in this permit or the permit contains an explicit determination or concise summary of a determination that other specifically identified requirements are not applicable. The Indiana statutes from IC 13 and rules from 326 IAC, referenced in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a Part 70 permit under 326 IAC 2-7 or for applicable requirements for which a permit shield has been granted.  
  
This permit shield does not extend to applicable requirements which are promulgated after the date of issuance of this permit unless this permit has been modified to reflect such new requirements.
- (b) If, after issuance of this permit, it is determined that the permit is in nonconformance with an applicable requirement that applied to the source on the date of permit issuance, IDEM, OAQ, shall immediately take steps to reopen and revise this permit and issue a compliance order to the Permittee to ensure expeditious compliance with the applicable requirement until the permit is reissued. The permit shield shall continue in effect so long as the Permittee is in compliance with the compliance order.
- (c) No permit shield shall apply to any permit term or condition that is determined after issuance of this permit to have been based on erroneous information supplied in the permit application. Erroneous information means information that the Permittee knew to be false, or in the exercise of reasonable care should have been known to be false, at the time the information was submitted.
- (d) Nothing in 326 IAC 2-7-15 or in this permit shall alter or affect the following:

- (1) The provisions of Section 303 of the Clean Air Act (emergency orders), including the authority of the U.S. EPA under Section 303 of the Clean Air Act;
  - (2) The liability of the Permittee for any violation of applicable requirements prior to or at the time of this permit's issuance;
  - (3) The applicable requirements of the acid rain program, consistent with Section 408(a) of the Clean Air Act; and
  - (4) The ability of U.S. EPA to obtain information from the Permittee under Section 114 of the Clean Air Act.
- (e) This permit shield is not applicable to any change made under 326 IAC 2-7-20(b)(2) (Sections 502(b)(10) of the Clean Air Act changes) and 326 IAC 2-7-20(c)(2) (trading based on State Implementation Plan (SIP) provisions).
  - (f) This permit shield is not applicable to modifications eligible for group processing until after IDEM, OAQ, has issued the modifications. [326 IAC 2-7-12(c)(7)]
  - (g) This permit shield is not applicable to minor Part 70 permit modifications until after IDEM, OAQ, has issued the modification. [326 IAC 2-7-12(b)(8)]

B.13 Prior Permits Superseded [326 IAC 2-1.1-9.5][326 IAC 2-7-10.5]

- (a) All terms and conditions of permits established prior to T061-26584-00012 and issued pursuant to permitting programs approved into the state implementation plan have been either:
  - (1) incorporated as originally stated,
  - (2) revised under 326 IAC 2-7-10.5, or
  - (3) deleted under 326 IAC 2-7-10.5.
- (b) Provided that all terms and conditions are accurately reflected in this permit, all previous registrations and permits are superseded by this Part 70 operating permit.

B.14 Termination of Right to Operate [326 IAC 2-7-10][326 IAC 2-7-4(a)]

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-7-3 and 326 IAC 2-7-4(a).

B.15 Reserved

B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination [326 IAC 2-7-5(6)(C)][326 IAC 2-7-8(a)][326 IAC 2-7-9]

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a Part 70 Operating Permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-7-5(6)(C)] The notification by the Permittee does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM, OAQ determines any of the following:
  - (1) That this permit contains a material mistake.
  - (2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.
  - (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-7-9(a)(3)]
- (c) Proceedings by IDEM, OAQ to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-7-9(b)]
- (d) The reopening and revision of this permit, under 326 IAC 2-7-9(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM, OAQ at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM, OAQ may provide a shorter time period in the case of an emergency. [326 IAC 2-7-9(c)]

B.17 Permit Renewal [326 IAC 2-7-3][326 IAC 2-7-4][326 IAC 2-7-8(e)]

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ and shall include the information specified in 326 IAC 2-7-4. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(21) and 326 IAC 2-7-1(40). The renewal application does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management  
Permit Administration and Support Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

- (b) A timely renewal application is one that is:
  - (1) Submitted at least nine (9) months prior to the date of the expiration of this permit; and
  - (2) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.
- (c) If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-7 until IDEM, OAQ takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified, pursuant to 326 IAC 2-7-4(a)(2)(D), in writing by IDEM, OAQ any additional information identified as being needed to process the application.

**B.18 Permit Amendment or Modification [326 IAC 2-7-11][326 IAC 2-7-12]**

---

- (a) Permit amendments and modifications are governed by the requirements of 326 IAC 2-7-11 or 326 IAC 2-7-12 whenever the Permittee seeks to amend or modify this permit.
- (b) Any application requesting an amendment or modification of this permit shall be submitted to:  
  
Indiana Department of Environmental Management  
Permit Administration and Support Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251  
  
Any such application does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official", as defined by 326 IAC 2-7-1(34).
- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

**B.19 Permit Revision Under Economic Incentives and Other Programs [326 IAC 2-7-5(8)][326 IAC 2-7-12(b)(2)]**

---

- (a) No Part 70 permit revision or notice shall be required under any approved economic incentives, marketable Part 70 permits, emissions trading, and other similar programs or processes for changes that are provided for in a Part 70 permit.
- (b) Notwithstanding 326 IAC 2-7-12(b)(1) and 326 IAC 2-7-12(c)(1), minor Part 70 permit modification procedures may be used for Part 70 modifications involving the use of economic incentives, marketable Part 70 permits, emissions trading, and other similar approaches to the extent that such minor Part 70 permit modification procedures are explicitly provided for in the applicable State Implementation Plan (SIP) or in applicable requirements promulgated or approved by the U.S. EPA.

**B.20 Operational Flexibility [326 IAC 2-7-20][326 IAC 2-7-10.5]**

---

- (a) The Permittee may make any change or changes at the source that are described in 326 IAC 2-7-20(b),(c), or (e) without a prior permit revision, if each of the following conditions is met:
  - (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
  - (2) Any preconstruction approval required by 326 IAC 2-7-10.5 has been obtained;
  - (3) The changes do not result in emissions which exceed the limitations provided in this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
  - (4) The Permittee notifies the:  
  
Indiana Department of Environmental Management  
Permit Administration and Support Section, Office of Air Quality  
100 North Senate Avenue

MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

and

United States Environmental Protection Agency, Region V  
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)  
77 West Jackson Boulevard  
Chicago, Illinois 60604-3590

in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and

- (5) The Permittee maintains records on-site, on a rolling five (5) year basis, which document all such changes and emission trades that are subject to 326 IAC 2-7-20(b),(c), or (e). The Permittee shall make such records available, upon reasonable request, for public review.

Such records shall consist of all information required to be submitted to IDEM, OAQ in the notices specified in 326 IAC 2-7-20(b)(1), (c)(1), and (e)(2).

- (b) The Permittee may make Section 502(b)(10) of the Clean Air Act changes (this term is defined at 326 IAC 2-7-1(36)) without a permit revision, subject to the constraint of 326 IAC 2-7-20(a). For each such Section 502(b)(10) of the Clean Air Act change, the required written notification shall include the following:
  - (1) A brief description of the change within the source;
  - (2) The date on which the change will occur;
  - (3) Any change in emissions; and
  - (4) Any permit term or condition that is no longer applicable as a result of the change.

The notification which shall be submitted is not considered an application form, report or compliance certification. Therefore, the notification by the Permittee does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

- (c) Emission Trades [326 IAC 2-7-20(c)]  
The Permittee may trade emissions increases and decreases at the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-7-20(c).
- (d) Alternative Operating Scenarios [326 IAC 2-7-20(d)]  
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-7-5(9). No prior notification of IDEM, OAQ, or U.S. EPA is required.
- (e) Backup fuel switches specifically addressed in, and limited under, Section D of this permit shall not be considered alternative operating scenarios. Therefore, the notification requirements of part (a) of this condition do not apply.

**B.21 Source Modification Requirement [326 IAC 2-7-10.5]**

---

A modification, construction, or reconstruction is governed by the requirements of 326 IAC 2 and 326 IAC 2-7-10.5.

**B.22 Inspection and Entry [326 IAC 2-7-6][IC 13-14-2-2][IC 13-30-3-1][IC 13-17-3-2]**

---

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a Part 70 source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, have access to and copy any records that must be kept under the conditions of this permit;
- (c) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, inspect any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
- (d) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, sample or monitor substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
- (e) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

**B.23 Transfer of Ownership or Operational Control [326 IAC 2-7-11]**

---

- (a) The Permittee must comply with the requirements of 326 IAC 2-7-11 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management  
Permit Administration and Support Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

Any such application does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official", as defined by 326 IAC 2-7-1(34).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

**B.24 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-7-5(7)][326 IAC 2-1.1-7]**

---

- (a) The Permittee shall pay annual fees to IDEM, OAQ within thirty (30) calendar days of receipt of a billing. Pursuant to 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM, OAQ the applicable fee is due April 1 of each year.
- (b) Except as provided in 326 IAC 2-7-19(e), failure to pay may result in administrative enforcement action or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-4230 (ask for OAQ, Billing, Licensing, and Training Section), to determine the appropriate permit fee.

**B.25 Credible Evidence [326 IAC 2-7-5(3)][326 IAC 2-7-6][62 FR 8314] [326 IAC 1-1-6]**

---

For the purpose of submitting compliance certifications or establishing whether or not the Permittee has violated or is in violation of any condition of this permit, nothing in this permit shall preclude the use, including the exclusive use, of any credible evidence or information relevant to whether the Permittee would have been in compliance with the condition of this permit if the appropriate performance or compliance test or procedure had been performed.

**SECTION C**

**SOURCE OPERATION CONDITIONS**

Entire Source

**Emission Limitations and Standards [326 IAC 2-7-5(1)]**

**C.1 Particulate Emission Limitations For Processes with Process Weight Rates Less Than One Hundred (100) Pounds per Hour [326 IAC 6-3-2]**

Pursuant to 326 IAC 6-3-2(e)(2), particulate emissions from any process not exempt under 326 IAC 6-3-1(b) or (c) which has a maximum process weight rate less than 100 pounds per hour and the methods in 326 IAC 6-3-2(b) through (d) do not apply shall not exceed 0.551 pounds per hour.

**C.2 Opacity [326 IAC 5-1]**

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-1 (Applicability) and 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

**C.3 Open Burning [326 IAC 4-1] [IC 13-17-9]**

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1.

**C.4 Incineration [326 IAC 4-2] [326 IAC 9-1-2]**

The Permittee shall not operate an incinerator except as provided in 326 IAC 4-2 or in this permit. The Permittee shall not operate a refuse incinerator or refuse burning equipment except as provided in 326 IAC 9-1-2 or in this permit.

**C.5 Fugitive Dust Emissions [326 IAC 6-4]**

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions). 326 IAC 6-4-2(4) is not federally enforceable.

**C.6 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]**

- (a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.
- (b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work

or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:

- (1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or
- (2) If there is a change in the following:
  - (A) Asbestos removal or demolition start date;
  - (B) Removal or demolition contractor; or
  - (C) Waste disposal site.
- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).
- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

- (e) **Procedures for Asbestos Emission Control**  
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-1, emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) **Demolition and Renovation**  
The Permittee shall thoroughly inspect the affected facility or part of the facility where the demolition or renovation will occur for the presence of asbestos pursuant to 40 CFR 61.145(a).
- (g) **Indiana Licensed Asbestos Inspector**  
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Licensed Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement to use an Indiana Licensed Asbestos inspector is not federally enforceable.

## Testing Requirements [326 IAC 2-7-6(1)]

### C.7 Performance Testing [326 IAC 3-6]

---

- (a) For performance testing required by this permit, a test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ if the Permittee submits to IDEM, OAQ a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

## Compliance Requirements [326 IAC 2-1.1-11]

### C.8 Compliance Requirements [326 IAC 2-1.1-11]

---

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements by issuing an order under 326 IAC 2-1.1-11. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

## Compliance Monitoring Requirements [326 IAC 2-7-5(1)][326 IAC 2-7-6(1)]

### C.9 Compliance Monitoring [326 IAC 2-7-5(3)][326 IAC 2-7-6(1)]

---

Unless otherwise specified in this permit, for all monitoring requirements not already legally required, the Permittee shall be allowed up to ninety (90) days from the date of permit issuance or initial start-up, whichever is later, to begin such monitoring. If due to circumstances beyond the Permittee's control, any monitoring equipment required by this permit cannot be installed and operated no later than ninety (90) days after permit issuance or initial start-up, whichever is later, the Permittee may extend the compliance schedule related to the equipment for an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251

in writing, prior to the end of the initial ninety (90) day compliance schedule, with full justification of the reasons for the inability to meet this date.

The notification which shall be submitted by the Permittee does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

Unless otherwise specified in the approval for the new emission unit(s), compliance monitoring for new emission units or emission units added through a source modification shall be implemented when operation begins.

C.10 Reserved

---

C.11 Instrument Specifications [326 IAC 2-1.1-11] [326 IAC 2-7-5(3)] [326 IAC 2-7-6(1)]

---

- (a) When required by any condition of this permit, an analog instrument used to measure a parameter related to the operation of an air pollution control device shall have a scale such that the expected maximum reading for the normal range shall be no less than twenty percent (20%) of full scale.
- (b) The Permittee may request that the IDEM, OAQ approve the use of an instrument that does not meet the above specifications provided the Permittee can demonstrate that an alternative instrument specification will adequately ensure compliance with permit conditions requiring the measurement of the parameters.

**Corrective Actions and Response Steps [326 IAC 2-7-5][326 IAC 2-7-6]**

C.12 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]

---

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

- (a) The Permittee shall prepare written emergency reduction plans (ERPs) consistent with safe operating procedures.
- (b) These ERPs shall be submitted for approval to:  
  
Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251  
  
within ninety (90) days after the date of issuance of this permit.  
  
The ERP does require the certification by a "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) If the ERP is disapproved by IDEM, OAQ, the Permittee shall have an additional thirty (30) days to resolve the differences and submit an approvable ERP.
- (d) These ERPs shall state those actions that will be taken, when each episode level is declared, to reduce or eliminate emissions of the appropriate air pollutants.
- (e) Said ERPs shall also identify the sources of air pollutants, the approximate amount of reduction of the pollutants, and a brief description of the manner in which the reduction will be achieved.
- (f) Upon direct notification by IDEM, OAQ that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level.  
[326 IAC 1-5-3]

C.13 Risk Management Plan [326 IAC 2-7-5(12)] [40 CFR 68]

If a regulated substance, as defined in 40 CFR 68, is present at a source in more than a threshold quantity, the Permittee must comply with the applicable requirements of 40 CFR 68.

C.14 Response to Excursions or Exceedances [326 IAC 2-7-5] [326 IAC 2-7-6]

Upon detecting an excursion where a response step is required by the D Section or an exceedance of a limitation in this permit:

- (a) The Permittee shall take reasonable response steps to restore operation of the emissions unit (including any control device and associated capture system) to its normal or usual manner of operation as expeditiously as practicable in accordance with good air pollution control practices for minimizing excess emissions.
- (b) The response shall include minimizing the period of any start-up, shutdown, or malfunction. The response may include, but is not limited to, the following:
  - (1) initial inspection and evaluation;
  - (2) recording that operations returned or are returning to normal without operator action (such as through response by a computerized distribution control system); or
  - (3) any necessary follow-up actions to return operation to normal or usual manner of operation.
- (c) A determination of whether the Permittee has used acceptable procedures in response to an excursion or exceedance will be based on information available, which may include, but is not limited to, the following:
  - (1) monitoring results;
  - (2) review of operation and maintenance procedures and records; and/or
  - (3) inspection of the control device, associated capture system, and the process.
- (d) Failure to take reasonable response steps shall be considered a deviation from the permit.
- (e) The Permittee shall record the reasonable response steps taken.

C.15 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-7-5][326 IAC 2-7-6]

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall submit a description of its response actions to IDEM, OAQ, no later than seventy-five (75) days after the date of the test.
- (b) A retest to demonstrate compliance shall be performed no later than one hundred eighty (180) days after the date of the test. Should the Permittee demonstrate to IDEM, OAQ that retesting in one hundred eighty (180) days is not practicable, IDEM, OAQ may extend the retesting deadline.
- (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The response action documents submitted pursuant to this condition do require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

**Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]**

C.16 Emission Statement [326 IAC 2-7-5(3)(C)(iii)][326 IAC 2-7-5(7)][326 IAC 2-7-19(c)][326 IAC 2-6]

(a) Pursuant to 326 IAC 2-6-3(b)(3), starting in 2006 and every three (3) years thereafter, the Permittee shall submit by July 1 an emission statement covering the previous calendar year. The emission statement shall contain, at a minimum, the information specified in 326 IAC 2-6-4(c) and shall meet the following requirements:

- (1) Indicate estimated actual emissions of all pollutants listed in 326 IAC 2-6-4(a);
- (2) Indicate estimated actual emissions of regulated pollutants as defined by 326 IAC 2-7-1(32) ("Regulated pollutant, which is used only for purposes of Section 19 of this rule") from the source, for purpose of fee assessment.

The statement must be submitted to:

Indiana Department of Environmental Management  
Technical Support and Modeling Section, Office of Air Quality  
100 North Senate Avenue  
MC 61-50 IGCN 1003  
Indianapolis, Indiana 46204-2251

The emission statement does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

C.17 General Record Keeping Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-6]

(a) Records of all required monitoring data, reports and support information required by this permit shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be physically present or electronically accessible at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.

(b) Unless otherwise specified in this permit, for all record keeping requirements not already legally required, the Permittee shall be allowed up to ninety (90) days from the date of permit issuance or the date of initial start-up, whichever is later, to begin such record keeping.

C.18 General Reporting Requirements [326 IAC 2-7-5(3)(C)] [326 IAC 2-1.1-11]

(a) The Permittee shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported except that a deviation required to be reported pursuant to an applicable requirement that exists independent of this permit, shall be reported according to the schedule stated in the applicable requirement and does not need to be included in this report. This report shall be submitted no later than thirty (30) days of the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by

326 IAC 2-7-1(34). A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit.

- (b) The address for report submittal is:  
  
Indiana Department of Environmental Management  
Compliance and Enforcement Branch, Office of Air Quality  
100 North Senate Avenue  
MC 61-53 IGCN 1003  
Indianapolis, Indiana 46204-2251
- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.
- (d) Reserved
- (e) Reporting periods are based on calendar years, unless otherwise specified in this permit. For the purpose of this permit "calendar year" means the twelve (12) month period from January 1 to December 31 inclusive.

#### **Stratospheric Ozone Protection**

##### **C.19 Compliance with 40 CFR 82 and 326 IAC 22-1**

---

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with applicable standards for recycling and emissions reduction.

## SECTION D.1

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]

- (a) Sub-Micro (SM) Line 3, installed in 1979, and Sub-Micro (SM) Line 4, installed in 1984, consisting of the following equipment:
- (1) Two (2) oil extraction systems, identified as Unit ID #s 9.1 and 9.2, each system includes oil extraction pans, a solvent drying oven, a water drying oven, and a distillation unit, utilizing a carbon adsorber to control volatile organic compounds and trichloroethylene, exhausting through one (1) stack, identified as S/V ID # 17;
  - (2) One (1) extruder, identified as Unit ID #8.1, controlled by a precipitative coalescing filter (smog hog) and exhausting through one (1) stack identified as S/V ID #14;
  - (3) One (1) extruder, identified as Unit ID #8.2, exhausting through one (1) stack identified as S/V ID #16;
  - (4) Two (2) aerosol addition systems (mix towers), identified as Unit ID #s 10.1, 10.2, exhausting inside the building;
- (b) Sub-Micro (SM) Line 6, installed in 1991, consisting of the following equipment:
- (1) One (1) oil extraction system, identified as Unit ID # 9.3, system includes oil extraction pans, a solvent drying oven, a water drying oven, and a distillation unit, utilizing a carbon adsorber to control volatile organic compounds and trichloroethylene, exhausting through one (1) stack, identified as S/V ID # 17;
  - (2) One (1) extruder, identified as Unit ID # 8.3, exhausting through one (1) stack identified as S/V ID #16;
  - (3) One (1) aerosol addition system (mix tower), identified as Unit ID # 10.3, exhausting inside the building;
- (c) Sub-Micro (SM) Lines 3, 4 and 6 support equipment, consisting of storage tanks (Unit ID #s 11.1 through 11.6) and a trichloroethylene (TCE) recovery system (smokehouse) Unit ID #9.4.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### Emission Limitations and Standards [326 IAC 2-7-5(1)]

#### D.1.1 BACT Analysis [326 IAC 8-1-6]

- (a) Pursuant to CP-061-1935-00012, issued on December 21, 1990, a carbon adsorption system (CAS) with 95% control efficiency has been determined by OAQ to be the Best Available Control Technology for SM-3, SM-4, and SM-6. The control system shall be operated at all times that oil extraction systems for SM-3, SM-4, and SM-6; aerosol addition systems for SM-3, SM-4, and SM-6; and tanks (ID #s 11.1 through 11.6) are used. For the purpose of determining compliance, the overall control efficiency of the control system shall be considered to be 95% provided the carbon adsorption unit is operating in compliance with the monitoring provisions specified in Condition D.1.7.

(b) Pursuant to 326 IAC 8-1-6 (BACT):

(1) A leak detection and repair (LDAR) program as described below has been determined by OAQ to be included as Best Available Control Technology for all equipment in trichloroethylene service (i.e., containing more than 5% trichloroethylene and in service more than 300 hours per calendar year). Within 30 days of the issuance of the Significant Permit Modification 061-23800-00012, the Permittee shall develop a written leak detection and repair (LDAR) program requiring leak checks of all equipment in trichloroethylene service. The LDAR plan shall be consistent with the following provisions of 40 CFR Part 63, Subpart H - National Emission Standards for Organic Hazardous Air Pollutants for Equipment Leaks.

- (A) Definitions: § 63.161;
- (B) Standards: §§ 63.162-63.163, 63.165-63.169, 63.171, and 63.174;
- (C) Quality Improvement Program for Valves and Pumps: §§ 63.175 and 63.176 (when applicable);
- (D) Test Methods and Procedures: § 63.180;
- (E) Recordkeeping: § 63.181;
- (F) Reporting: § 63.182 (a), (b) & (d); and
- (G) Implementation: § 63.183.

The Permittee shall implement the LDAR plan by no later than the close of the second calendar month following the month the 12 consecutive month period of the plant-wide trichloroethylene inventory loss first equals or exceeds 125 tons per year. For the purposes of the LDAR plan, the compliance date for determining the applicability of Subpart H Phase 1, Phase II or Phase III requirements shall be the date of implementation of the LDAR plan.

(2) In the event the requirement to implement LDAR Plan is triggered as described in Condition D.1.1(b)(1), the Permittee shall continue to implement the LDAR plan until the 12 month consecutive period sum of source-wide trichloroethylene inventory loss remains less than 125 tons per year for three consecutive calendar months, at which time it may cease implementation of the LDAR Plan for all subsequent time periods during which the 12 consecutive month period sum of source-wide trichloroethylene inventory loss remains less than 125 tons per year.

D.1.2 PSD Minor Limit [326 IAC 2-2]

- (a) The source shall limit non-fugitive VOC emissions from the Sub-Micro Lines 3, 4, and 6 (SM-3, SM-4, and SM-6) to less than 248 tons per twelve (12) month consecutive period.
- (b) Compliance with the requirements of 326 IAC 8-1-6 (BACT) will ensure compliance with this limit.

Compliance with these requirements will limit the sourcewide non-fugitive emissions to less than 250 tons per year and render the requirements of 326 IAC 2-2 (PSD) not applicable.

#### D.1.3 Volatile Organic Compounds (VOC) Operational Requirement

---

Pursuant to EPA Administrative Consent Order No. EPA-5-06-113(a)-IN-03, all off-specification material that is removed from SM Lines 3, 4 and 6 as a result of start-ups, wet folds, or web breaks shall be placed in the trichloroethylene recovery system (smokehouse) identified as Unit ID #9.4.

#### D.1.4 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

---

A Preventive Maintenance Plan is required for these facilities and their control devices. Section B - Preventive Maintenance Plan contains the Permittee's obligation with regard to the preventive maintenance plan required by this condition.

### Compliance Determination Requirements

#### D.1.5 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11]

---

- (a) The Permittee shall perform VOC testing of the carbon adsorption system (CAS) utilizing Method 25/ 25A (40 CFR 60, Appendix A) or other methods as approved by the Commissioner. This test shall be repeated at least once every five (5) years from the date of a valid compliance demonstration. The most recent valid compliance demonstration was performed in April 4, 2007. In addition to these requirements, IDEM may require compliance testing when necessary to determine if the facility is in compliance.

#### D.1.6 Volatile Organic Compounds (VOCs)

---

- (a) The CAS shall be operated at all times when the oil extraction systems for SM-3, SM-4, and SM-6 (ID #s 9.1, 9.2 and 9.3), storage tanks (ID #s 11.1 through 11.6), aerosol addition systems for SM-3, SM-4 and SM-6, and the trichloroethylene recovery system (smokehouse, Unit ID #9.4) are operated.

### Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

#### D.1.7 Process Emissions and Carbon Adsorption System Emissions [40 CFR Part 64]

---

Pursuant to 40 CFR Part 64 (CAM) and to ensure compliance with Conditions D.1.1(a) and D.1.1(b) the following compliance monitoring is required:

- (a) The carbon adsorption system (CAS) shall be equipped with a continuous exhaust gas flow rate monitor. The Permittee shall take daily instantaneous measurements of the outlet VOC concentration of the CAS (using a handheld photo- ionization detector or comparable device) and at the same time record the value of the CAS exhaust gas flow rate. Provided the CAS exhaust gas flow rate is less than or equal to 2,500 cubic feet per minute (cfm), compliance is indicated if the CAS outlet VOC concentration is less than 100 ppmv, and no measurement of the CAS inlet VOC concentration or calculation of CAS efficiency is required for that day. If the outlet CAS VOC concentration is greater than 100 ppmv, then a daily grab measurement of the CAS inlet VOC concentration (using a colorimetric tube analysis) shall also be taken and the CAS control efficiency calculated to provide an indication of compliance. CAS control efficiency shall be calculated using the VOC concentration data as follows:

$$\text{CAS Efficiency (\%)} = [(CAS_{\text{inlet}} - CAS_{\text{outlet}}) / (CAS_{\text{inlet}})] \times 100$$

Daily measurements of CAS exhaust gas flow rate and VOC inlet and outlet concentration(s) shall be taken within the final 30 minutes of a carbon bed cycle and shall be taken when the CAS cooling air blower is not operating. The CAS cooling air blower is not operating when the measured CAS exhaust gas flow rate is less than or equal to 2,500 cfm. In the event that the outlet VOC concentration is greater than 100 ppmv and the CAS efficiency is less than 95%, the Permittee shall perform reasonable response steps to achieve 95% CAS efficiency. The Permittee shall continue to make daily CAS

efficiency calculations until a CAS efficiency of 95% or more is achieved for seven (7) consecutive operating days. Upon achieving a CAS efficiency of 95% or more for seven (7) consecutive operating days, the Permittee may resume daily measurement of the outlet VOC concentration.

- (b) The Permittee shall control trichloroethylene inventory losses by monitoring the trichloroethylene inventory, including but not limited to purchases, releases off-site, and emissions from startups, shutdowns, and process and air pollution control equipment malfunctions, so that the twelve (12) consecutive month period sum of plant-wide trichloroethylene inventory loss does not exceed 141 tons per year. Losses of trichloroethylene resulting from events which are unrelated to process and air pollution control equipment operation and are sudden, reasonably unforeseeable, and beyond the Permittee's reasonable control, including but not limited to power failures, severe weather, and transportation-related accidents, shall not be included in the inventory loss calculation.

Compliance with the above monitoring condition shall also satisfy the requirements of 40 CFR 64, Compliance Assurance Monitoring for the oil extraction systems for SM-3, SM-4, and SM-6.

#### D.1.8 Carbon Adsorption Failure Detection [40 CFR Part 64]

---

In the event that carbon adsorber failure has been observed:

Failed units and the associated process will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions). Section C - Response to Excursions or Exceedances contains the Permittee's obligation with regard to the reasonable response steps required by this condition. Failure to take response steps shall be considered a deviation from this permit.

Compliance with the above monitoring condition shall also satisfy the requirements of 40 CFR 64, Compliance Assurance Monitoring for the oil extraction systems for SM-3, SM-4, and SM-6.

### **Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]**

#### D.1.9 Record Keeping Requirements

---

- (a) To document the compliance status with Conditions D.1.1(a) and D.1.7, the Permittee shall maintain records in accordance with (1) through (5). Records of all data and operating parameters shall be complete and sufficient to establish compliance with the limits established in Condition D.1.1(a) and the monitoring conditions established in Condition D.1.7.
- (1) Daily measurement of CAS outlet VOC concentration;
  - (2) Daily measurement of CAS exhaust gas flow rate;
  - (3) All measurements of CAS inlet VOC concentrations and calculations of CAS control efficiency made pursuant to Condition D.1.7(a);
  - (4) Records of monthly source-wide trichloroethylene inventory losses made pursuant to Condition D.1.7(b); and
  - (5) Records of the date, quantity and cause of each such loss of trichloroethylene excluded from the inventory loss calculation pursuant to Condition D.1.6(b).

- (b) To document the compliance status with Condition D.1.1(b)(2), the Permittee shall maintain the records required by the LDAR.
- (c) Section C - General Record Keeping Requirements contains the Permittee's obligation with regard to the records required by this condition.

#### D.1.10 Reporting Requirements

---

A quarterly summary of the information to document the compliance status with Condition D.1.2(a) shall be submitted to the addresses listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

## SECTION D.2

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]

- (a) Sub-Micro (SM) Line 3 , installed in 1979, and Sub-Micro (SM) Line 4, installed in 1984, consisting of the following equipment:
- (1) Four (4) silos, identified as Unit ID #s 4.1-4.4, used to store either polyethylene or silica, each with a maximum storage capacity of 168, 168, 75, and 75 tons, respectively, each utilizing a bin filter (Unit ID #s 4.1-4.4) for particulate matter control, each exhausting through one (1) stack, identified as S/V ID #s 4, 5, 6, and 7, respectively;
  - (2) Two (2) day bins, identified as Unit ID #s 6.1 and 6.2, used to store silica and polyethylene, respectively, each with a maximum storage capacity of 2.4 and 0.125 tons, respectively, each utilizing a bin filter (Unit ID #s 6.1 and 6.2) for particulate matter control, each exhausting through one (1) stack, identified as S/V ID #s 10 and 11, respectively;
  - (3) One (1) silo dilute phase transporter, identified as Unit ID #3.1, constructed in 2008, used to convey silica from rail cars to silo #s 4.2-4.5, utilizing a baghouse (Unit ID # 3.1) for particulate control, exhausting through one (1) stack, identified as S/V ID # 3;
  - (4) One (1) silica transporter, identified as Unit ID # 5.1, constructed in 1979, used to convey silica from silos 4.3, 4.4, and 4.5 to silica day bin #s 6.1 and 6.2, utilizing a baghouse (Unit # 5.1) for particulate matter control, each exhausting through one (1) stack, identified as S/V ID # 9;
- (b) Sub-Micro (SM) Line 6, installed in 1991, consists of the following equipment:
- (1) One (1) silo, identified as Unit ID # 4.5, used to store silica, with a maximum storage capacity of 75 tons, utilizing a bin filter (Unit ID # 4.5) for particulate matter control, exhausting through one (1) stack, identified as S/V ID # 8; and
  - (2) Two (2) day bins, identified as Unit ID #s 7.1 and 7.2, used to store silica and polyethylene, respectively, each with a maximum storage capacity of 2.4 and 0.125 tons, respectively, each utilizing a bin filter (Unit ID #s 7.1 and 7.2) for particulate matter control, each exhausting through one (1) stack, identified as S/V ID #s 12 and 13, respectively.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### Emission Limitations and Standards [326 IAC 2-7-5(1)]

#### D.2.1 Particulate [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Processes), the allowable PM emission rate from the five (5) silos, four (4) day bins, and two (2) transporters shall not exceed the following pounds per hour when operating at the appropriate process weight rate in tons per hour:

- (a) The allowable particulate matter emissions from the four (4) silos (ID #s 4.1 - 4.4), two (2) day bins (ID #s 6.1 and 6.2), the silo dense phase transporter (ID #3.1) and the SM 3/4 silica transporter for SM-3 and SM-4 (ID # 5.1) shall each not exceed 22.91 pounds per hour, when operating at a process weight rate of 13.04 tons per hour.
- (b) The allowable particulate matter emissions from the one (1) silo (ID #4.5) and two (2) day bins (ID #s 7.1 and 7.2) for SM-6 shall each not exceed 5.09 pounds per hour, when operating at a process weight rate of 1.38 tons per hour.

The pounds per hour limitations were calculated with the following equation:

Interpolation of the data for the process weight rate up to 60,000 pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour; and} \\ P = \text{process weight rate in tons per hour}$$

#### D.2.2 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

---

A Preventive Maintenance Plan is required for this facility and its control device. Section B - Preventive Maintenance Plan contains the Permittee's obligation with regard to the preventive maintenance plan required by this condition.

### Compliance Determination Requirements

#### D.2.3 Particulate Control

---

- (a) The bin filters for the five (5) silos (ID #s 4.1 - 4.5) and four (4) day bins (ID #s 6.1, 6.2, 7.1 and 7.2), and the baghouses for the two (2) transporters (ID #s 3.1 and 5.1) for particulate control shall be in operation at all times when the units are in operation.
- (b) In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.

### Compliance Monitoring Requirements [326 IAC 2-7-6 (1)] [326 IAC 2-7-5 (1)]

#### D.2.4 Visible Emissions Notations [40 CFR Part 64]

---

- (a) Daily visible emission notations of the five (5) silos (ID #s 4.1 - 4.5), four (4) day bins (ID #s 6.1, 6.2, 7.1 and 7.2), and two (2) transporters (ID #s 3.1 and 5.1) stack exhausts shall be performed once per day during normal daylight operations. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.

- (e) If abnormal emissions are observed, the Permittee shall take reasonable response steps. Section C- Response to Excursions or Exceedances contains the Permittee's obligation with regard to the reasonable response steps required by this condition. Failure to take response steps shall be considered a deviation from this permit.

Compliance with the above monitoring condition shall also satisfy the requirements of 40 CFR 64, Compliance Assurance Monitoring for the three (3) silos (Unit #s 4.3 – 4.5), and one (1) transporter (Unit # 3.1).

#### D.2.5 Parametric Monitoring [40 CFR Part 64]

The Permittee shall record the pressure drop across the bin filters and baghouses used in conjunction with the five (5) silos (ID #s 4.1 - 4.5), four (4) day bins (ID #s 6.1, 6.2, 7.1 and 7.2), and two (2) transporters (ID #s 3.1 and 5.1), at least once per day when the five (5) silos, four (4) day bins, and two (2) transporters are in operation. When for any one (1) reading, the pressure drop across the bin filters and baghouses is outside the normal range of 1.0 and 7.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps. Section C- Response to Excursions or Exceedances contains the Permittee's obligation with regard to the reasonable response steps required by this condition. A pressure reading that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps shall be considered a deviation from this permit.

The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ and shall be calibrated at least once every six (6) months.

Compliance with the above monitoring condition shall also satisfy the requirements of 40 CFR 64, Compliance Assurance Monitoring for the three (3) silos (Unit #s 4.3 – 4.5), and one (1) transporter (Unit # 3.1).

#### D.2.6 Broken or Failed Bag Detection [40 CFR Part 64]

- (a) For a single compartment baghouse or bin filter controlling emissions from a process operated continuously, a failed unit and the associated process shall be shut down immediately until the failed unit has been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).
- (b) For a single compartment baghouse or bin filter controlling emissions from a batch process, the feed to the process shall be shut down immediately until the failed unit has been repaired or replaced. The emissions unit shall be shut down no later than the completion of the processing of the material in the line. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Bag or filter failure can be indicated by a significant drop in the baghouse's or bin filter's pressure reading with abnormal visible emissions, by an opacity violation, or by other means such as gas temperature, flow rate, air infiltration, leaks, dust traces or triboflows.

Compliance with the above monitoring condition shall also satisfy the requirements of 40 CFR 64, Compliance Assurance Monitoring for the three (3) silos (Unit #s 4.3 – 4.5), and one (1) transporter (Unit # 3.1).

## **Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]**

### **D.2.7 Record Keeping Requirements**

---

- (a) To document the compliance status with Condition D.2.4, the Permittee shall maintain records of daily visible emission notations of the five (5) silos, four (4) day bins, and two (2) transporters stack exhausts. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation, (i.e. the process did not operate that day).
- (b) To document the compliance status with Condition D.2.5, the Permittee shall maintain daily records of the pressure drop during normal operation. The Permittee shall include in its daily record when a pressure drop reading is not taken and the reason for the lack of a pressure drop reading, (i.e. the process did not operate that day).
- (c) Section C - General Record Keeping Requirements contains the Permittee's obligation with regard to the records required by this condition.

## SECTION D.3

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]

One (1) boiler, identified as Unit ID # 1.1, constructed in 1979, with a maximum heat input capacity of 12.553 MMBtu per hour, combusting natural gas or No. 2 fuel oil, exhausting through one (1) stack, identified as S/V ID # 1.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### Emission Limitations and Standards [326 IAC 2-7-5(1)]

#### D.3.1 Particulate Matter Limitation (PM) [326 IAC 6-2-3]

Pursuant to 326 IAC 6-2-3 (e) (Particulate Emission Limitations for Sources of Indirect Heating) the PM from the 12.553 MMBtu per hour heat input boiler (Unit ID # 1.1) shall be limited to 0.6 pounds per MMBtu heat input.

### Compliance Monitoring Requirements [326 IAC 2-7-6 (1)] [326 IAC 2-7-5 (1)]

#### D.3.2 Visible Emissions Notations

- (a) Daily visible emission notations of the boiler (Unit ID # 1.1) stack exhaust shall be performed during normal daylight operations when burning No. 2 fuel oil. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) If abnormal emissions are observed, the Permittee shall take reasonable response steps. Section C- Response to Excursions or Exceedances contains the Permittee's obligation with regard to the reasonable response steps required by this condition. Failure to take response steps shall be considered a deviation from this permit.

### Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

#### D.3.3 Record Keeping Requirements

- (a) To document the compliance status with Condition D.3.2, the Permittee shall maintain records of daily visible emission notations of the boiler (Unit ID # 1.1) stack exhaust when burning No. 2 fuel oil. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation, (i.e. the process did not operate that day).
- (b) Section C - General Record Keeping Requirements contains the Permittee's obligation with regard to the records required by this condition.

#### D.3.4 Reporting Requirements

---

The natural gas boiler certification shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or its equivalent, within thirty (30) days after the end of the six (6) month period being reported. The natural gas-fired boiler certification does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

## SECTION D.4

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]

One (1) natural gas-fired boiler, installed in 2011, with a maximum heat input capacity of 11.70 MMBtu per hour.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### Emission Limitations and Standards [326 IAC 2-7-5(1)]

#### D.4.1 Particulate Matter Limitation (PM) [326 IAC 6-2-4]

Pursuant to 326 IAC 6-2-4 (Particulate Emission Limitations for Sources of Indirect Heating) the PM emissions from the 11.70 MMBtu per hour boiler shall be limited to 0.48 pounds per MMBtu heat input.

This limitation is based on the following equation:

$$P_t = \frac{1.09}{Q^{0.26}} \quad \text{where: } P_t = \text{Pounds of particulate matter emitted per MMBtu heat input.}$$

$Q = \text{Total source maximum operating capacity rating in MMBtu per hour.}$

#### D.4.2 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan is required for this facility. Section B - Preventive Maintenance Plan contains the Permittee's obligation with regard to the preventive maintenance plan required by this condition.

## SECTION D.5

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]

One (1) silo dilute phase transporter, identified as Unit ID #13, installed in 2000, used to convey polyethylene pneumatically from rail cars to a silo, utilizing a bin filter for particulate control and exhausting through one (1) stack, identified as S/V ID #20.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### Emission Limitations and Standards [326 IAC 2-7-5(1)]

#### D.5.1 Particulate [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Processes), the allowable particulate emission rate from the silo dilute phase transporter (Unit ID #13) shall not exceed 5.68 pounds per hour when operating at a process weight rate of 1.625 tons per hour.

The pounds per hour limitation was calculated with the following equation:

Interpolation of the data for the process weight rate up to 60,000 pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67}$$

where E = rate of emission in pounds per hour; and  
P = process weight rate in tons per hour

#### D.5.2 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan is required for this facility and its control device. Section B - Preventive Maintenance Plan contains the Permittee's obligation with regard to the preventive maintenance plan required by this condition.

### Compliance Determination Requirements

#### D.5.3 Particulate Control

- (a) The control device for particulate control shall be in operation and control emissions from the facility at all times that the facility is in operation.
- (b) In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.

### Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

#### D.5.4 Visible Emissions Notations

- (a) Visible emission notations of the silo dilute phase transporter (Unit ID #13) stack exhaust shall be performed once per day during normal daylight operations. A trained employee shall record whether emissions are normal or abnormal.

- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) If abnormal emissions are observed, the Permittee shall take reasonable response steps. Section C- Response to Excursions or Exceedances contains the Permittee's obligation with regard to the reasonable response steps required by this condition. Failure to take response steps shall be considered a deviation from this permit.

#### D.5.5 Parametric Monitoring

---

The Permittee shall record the pressure drop across the bin filter used in conjunction with the silo dilute phase transporter (Unit ID #13), at least once per day when systems are in operation. When for any one reading, the pressure drop across the bin filter is outside the normal range of 1.0 to 7.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps. Section C - Response to Excursions or Exceedances contains the Permittee's obligation with regard to the reasonable response steps required by this condition. A pressure reading that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps shall be considered a deviation from this permit.

The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ and shall be calibrated at least once every six (6) months.

#### D.5.6 Broken or Failed Bin Filter Detection

---

- (a) For a single compartment bin filter controlling emissions from a process operated continuously, a failed unit and the associated process shall be shut down immediately until the failed unit has been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).
- (b) For a single compartment bin filter controlling emissions from a batch process, the feed to the process shall be shut down immediately until the failed unit has been repaired or replaced. The emissions unit shall be shut down no later than the completion of the processing of the material in the line. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Filter failure can be indicated by a significant drop in the bin filter's pressure reading with abnormal visible emissions, by an opacity violation, or by other means such as gas temperature, flow rate, air infiltration, leaks, dust traces or triboflows.

### **Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]**

#### D.5.7 Record Keeping Requirements

---

- (a) To document the compliance status with Condition D.5.4, the Permittee shall maintain daily records of visible emission notations of the silo dilute phase transporter (Unit ID #13) stack exhaust. The Permittee shall include in its daily record when a visible emission

notation is not taken and the reason for the lack of visible emission notation, (i.e. the process did not operate that day).

- (b) To document the compliance status with Condition D.5.5, the Permittee shall maintain daily records of the pressure drop during normal operation for the bin filter used in conjunction with the silo dilute phase transporter (Unit ID #13). The Permittee shall include in its daily record when a pressure drop reading is not taken and the reason for the lack of a pressure drop reading, (i.e. the process did not operate that day).
- (c) Section C - General Record Keeping Requirements contains the Permittee's obligation with regard to the records required by this condition.

## SECTION D.6 FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]

- (a) One (1) polyethylene weigh bin line 3 with maximum weighing capacity of 345 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F05.1;
- (b) One (1) silica weigh bin line 3 with maximum weighing capacity of 800 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F01.1;
- (c) One (1) polyethylene weigh bin line 4 with maximum weighing capacity of 345 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F05.2; and
- (d) One (1) silica weigh bin line 4 with maximum weighing capacity of 800 pounds per hour, installed in 2004, equipped with a baghouse for particulate control and exhausting through one (1) stack identified as F01.2.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### Emission Limitations and Standards [326 IAC 2-7-5(1)]

#### D.6.1 Particulate [326 IAC 6-3]

The particulate emissions from the emission units listed in the table below shall be limited by the following:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

The allowable emissions for each facility operating at its maximum process weight rate are as follows:

Facilities	Process Weight Rate (tons/hr)	PM Allowable Emissions (lb/hr)
Polyethylene weigh bin line 3 (F05.1)	0.1725	1.26
Silica weigh bin line 3 (F01.1)	0.40	2.20
Polyethylene weigh bin line 4 (F05.2)	0.1725	1.26
Silica weigh bin line 4 (F01.2)	0.40	2.20

#### D.6.2 Preventive Maintenance Plan [326 IAC 2-8-4(9)]

A Preventive Maintenance Plan is required for these facilities and its control devices. Section B - Preventive Maintenance Plan contains the Permittee's obligation with regard to the preventive maintenance plan required by this condition.

## Compliance Determination Requirements

### D.6.3 Particulate Control

---

- (a) The baghouses for particulate control identified as F05.1, F01.1, F05.2 and F01.2 shall be in operation and control emissions from the polyethylene and silica weigh bin lines 3 and 4 at all times that these facilities are in operation.
- (b) In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.

## Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

### D.6.4 Visible Emissions Notations [40 CFR Part 64]

---

- (a) Visible emission notations of the F05.1, F01.1, F05.2, and F01.2 baghouse stack exhausts shall be performed once per day during normal daylight operations. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) If abnormal emissions are observed, the Permittee shall take reasonable response steps. Section C - Response to Excursions or Exceedances contains the Permittee's obligation with regard to the reasonable response steps required by this condition. Failure to take response steps shall be considered a deviation from this permit.

Compliance with the above monitoring condition shall also satisfy the requirements of 40 CFR 64, Compliance Assurance Monitoring for weigh bin lines 3 and 4.

### D.6.5 Parametric Monitoring [40 CFR Part 64]

---

The Permittee shall record the pressure drop across each of the baghouses identified as F05.1, F01.1, F05.2, and F01.2, at least once per day when systems are in operation. When for any one reading, the pressure drop across the baghouses is outside the normal range of 1.0 to 7.0 inches of water, or a range established during the latest stack test, the Permittee shall take reasonable response steps. Section C - Response to Excursions or Exceedances contains the Permittee's obligation with regard to the reasonable response steps required by this condition. A pressure reading that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps shall be considered a deviation from this permit.

The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ and shall be calibrated at least once every six (6) months.

Compliance with the above monitoring condition shall also satisfy the requirements of 40 CFR 64, Compliance Assurance Monitoring for weigh bin lines 3 and 4.

#### D.6.6 Broken or Failed Bag Detection [40 CFR Part 64]

- (a) For a single compartment baghouse controlling emissions from a process operated continuously, a failed unit and the associated process shall be shut down immediately until the failed unit has been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).
- (b) For a single compartment baghouse controlling emissions from a batch process, the feed to the process shall be shut down immediately until the failed unit has been repaired or replaced. The emissions unit shall be shut down no later than the completion of the processing of the material in the line. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Bag failure can be indicated by a significant drop in the baghouse's pressure reading with abnormal visible emissions, by an opacity violation, or by other means such as gas temperature, flow rate, air infiltration, leaks, dust traces or triboflows.

Compliance with the above monitoring condition shall also satisfy the requirements of 40 CFR 64, Compliance Assurance Monitoring for weigh bin lines 3 and 4.

### **Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]**

#### D.6.7 Record Keeping Requirements

- (a) To document the compliance status with Condition D.6.4, the Permittee shall maintain daily records of visible emission notations of the baghouse F05.1, F01.1, F05.2, and F01.2 stack exhausts. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation, (i.e. the process did not operate that day).
- (b) To document the compliance status with Condition D.6.5, the Permittee shall maintain daily records of the pressure drop during normal operation for each baghouse. The Permittee shall include in its daily record when a pressure drop reading is not taken and the reason for the lack of a pressure drop reading, (i.e. the process did not operate that day).
- (c) Section C - General Record Keeping Requirements contains the Permittee's obligation with regard to the records required by this condition.

## SECTION E.1

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]

- (a) Sub-Micro (SM) Lines 3, 4 and 6 support equipment, consisting of storage tanks (Unit ID #s 11.1 through 11.6) and a trichloroethylene (TCE) recovery system (smokehouse) Unit ID #9.4.

Under NESHAP Subpart EEEE, the trichloroethylene (TCE) recovery system (smokehouse) Unit ID # 9.4 is considered an existing affected source.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### National Emission Standards for Hazardous Air Pollutants (NESHAP) Requirements [326 IAC 2-7-5(1)]

#### E.1.1 General Provisions Relating to NESHAP EEEE [40 CFR Part 63, Subpart A]

Pursuant to 40 CFR 63.2398, the Permittee shall comply with the provisions of 40 CFR Part 63, Subpart A – General Provisions, as specified in Table 12 of 40 CFR Part 63, Subpart EEEE in accordance with schedule in 40 CFR 63 Subpart EEEE.

#### E.1.2 NESHAP Subpart EEEE Requirements [40 CFR Part 63, Subpart EEEE]

Pursuant to 40 CFR Part 63, Subpart EEEE, the Permittee shall comply with the provisions of 40 CFR Part 63.2330, as specified below. The entire text of 40 CFR 63, Subpart EEEE is included as Attachment B to this permit.

- (1) 40 CFR 63.2330
- (2) 40 CFR 63.2334
- (3) 40 CFR 63.2338
- (4) 40 CFR 63.2342(b)(1)
- (5) 40 CFR 63.2343(b), (c), (d)
- (6) 40 CFR 63.2350
- (7) 40 CFR 63.2382(a), (b)(1)
- (8) 40 CFR 63.2386(a), (b), (c)(1) through (4), (c)(10)
- (9) 40 CFR 63.2390(a)
- (10) 40 CFR 63.2394
- (11) 40 CFR 63.2398
- (12) 40 CFR 63.2402
- (13) 40 CFR 63.2406
- (14) Applicable Portions of Table 1 of Subpart EEEE
- (15) Applicable Portions of Table 12 of Subpart EEEE

#### E.1.3 One Time Deadlines Relating to NESHAP EEEE

- (a) The Permittee submitted Initial Notification on November 9, 2006 [40 CFR 63.2382(b)].
- (b) The Permittee shall conduct initial compliance demonstrations no later than February 3, 2007 [40 CFR 63.2342].
- (c) The Permittee shall submit first Semi-annual Compliance Report no later than July 31, 2007 [40 CFR 63.2386(b)(1)(ii)].

## SECTION E.2

## FACILITY OPERATION CONDITIONS

### Facility Description [326 IAC 2-7-5(15)]

One (1) natural gas-fired boiler, installed in 2011, with a maximum heat input capacity of 11.70 MMBtu per hour.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

### New Source Performance Standards (NSPS) Requirements [326 IAC 2-7-5(1)]

E.2.1 General Provisions Relating to New Source Performance Standards (NSPS) for Small Industrial-Commercial-Institutional Steam Generating Units [326 IAC 12-1][40 CFR Part 60, Subpart A] [40 CFR Part 60, Subpart Dc]

---

Pursuant to 40 CFR 60, Subpart Dc, the Permittee shall comply with the provisions of 40 CFR Part 60, Subpart A – General Provisions, which are incorporated by reference as 326 IAC 12-1-1 for the for the natural gas-fired boiler as specified in Appendix A of 40 CFR Part 60, in accordance with the schedule in 40 CFR 60, Subpart Dc.

E.2.2 New Source Performance Standards (NSPS) for Small Industrial-Commercial-Institutional Steam Generating Units [40 CFR Part 60, Subpart Dc]

---

Pursuant to 40 CFR Part 60, Subpart Dc, the Permittee shall comply with the provisions of 40 CFR Part 60, Subpart Dc, which are incorporated by reference as 326 IAC 12-1 for the natural gas-fired boiler. The entire text of 40 CFR 60, Subpart Dc is included as Attachment A to this permit.

- (1) 40 CFR 60.40c
- (2) 40 CFR 60.41c
- (3) 40 CFR 60.42c(d), (g), (h)(1), (i), and (j)
- (4) 40 CFR 60.44c(a), (b), (g), (h)
- (5) 40 CFR 60.46c(e)
- (6) 40 CFR 60.48c(a), (b), (d), (e)(1) through (e)(11), (f)(1), (g)(1), (g)(2), (i), and (j)

**Reviewer: Anne-Marie C. Hart**  
**Date: June 6, 2011**

Heat Input Capacity MMBtu/hr	HHV mmBtu mmscf	Potential Throughput MMCF/yr
11.7	1000	102.5

	Pollutant					
	PM*	PM10*	SO2	NOx	VOC	CO
Emission Factor in lb/MMCF	1.9	7.6	0.6	100 **see below	5.5	84
Potential Emission in tons/yr	0.10	0.39	0.03	5.12	0.28	4.30

\*PM emission factor is filterable PM only. PM10 emission factor is filterable and condensable PM10 combined.  
 \*\*Emission Factors for NOx: Uncontrolled = 100, Low NOx Burner = 50, Low NOx Burners/Flue gas recirculation = 32

**Methodology**

All emission factors are based on normal firing.  
 MMBtu = 1,000,000 Btu  
 MMCF = 1,000,000 Cubic Feet of Gas  
 Emission Factors are from AP 42, Chapter 1.4, Tables 1.4-1, 1.4-2, 1.4-3, SCC #1-02-006-02, 1-01-006-02, 1-03-006-02, and 1-03-006-03  
 Potential Throughput (MMCF) = Heat Input Capacity (MMBtu/hr) x 8,760 hrs/yr x 1 MMCF/1,000 MMBtu  
 Emission (tons/yr) = Throughput (MMCF/yr) x Emission Factor (lb/MMCF)/2,000 lb/ton

	HAPs - Organics				
	Benzene	Dichlorobenzene	Formaldehyde	Hexane	Toluene
Emission Factor in lb/MMcf	2.1E-03	1.2E-03	7.5E-02	1.8E+00	3.4E-03
Potential Emission in tons/yr	1.076E-04	6.150E-05	3.843E-03	9.224E-02	1.742E-04

	HAPs - Metals				
	Lead	Cadmium	Chromium	Manganese	Nickel
Emission Factor in lb/MMcf	5.0E-04	1.1E-03	1.4E-03	3.8E-04	2.1E-03
Potential Emission in tons/yr	2.562E-05	5.637E-05	7.174E-05	1.947E-05	1.076E-04

**Total 9.67E-02**

Methodology is the same as above.

The five highest organic and metal HAPs emission factors are provided above.  
 Additional HAPs emission factors are available in AP-42, Chapter 1.4.

**Appendix A: Emissions Calculations  
Greenhouse Gas Emissions  
MM BTU/HR <100**

**Company Name:** Daramic, LLC  
**Address City IN Zip:** 3430 Cline Road NW, Corydon, Indiana 47112  
**Permit Number:** 061-30503-00012  
**Reviewer:** Anne-Marie C. Hart  
**Date:** June 6, 2011

Heat Input Capacity MMBtu/hr	HHV mmBtu mmscf	Potential Throughput MMCF/yr
11.70	1000	102.5
12.55	1000	110.0
<b>Total</b>		<b>212.5</b>

Natural Gas	Greenhouse Gas		
	CO2	CH4	N2O
Emission Factor in lb/MMcf	120,000	2.3	2.2
Potential Emission in tons/yr	12747.38	0.24	0.23
Summed Potential Emissions in tons/yr	12,747.85		
CO2e Total in tons/yr	12,824.96		

**Methodology**

The N2O Emission Factor for uncontrolled is 2.2. The N2O Emission Factor for low Nox burner is 0.64. Emission Factors are from AP 42, Table 1.4-2 SCC #1-02-006-02, 1-01-006-02, 1-03-006-02, and 1-03-006-03. Greenhouse Warming Potentials (GWP) from Table A-1 of 40 CFR Part 98 Subpart A. Emission (tons/yr) = Throughput (MMCF/yr) x Emission Factor (lb/MMCF)/2,000 lb/ton  
CO2e (tons/yr) = CO2 Potential Emission ton/yr x CO2 GWP (1) + CH4 Potential Emission ton/yr x CH4 GWP (21) + N2O Potential Emission ton/yr x N2O GWP (310).

No. 2 Fuel Oil	Greenhouse Gas		
	CO2	CH4	N2O
Emission Factor in lb/kgal	21,500	0.216	0.26
Potential Emission in tons/yr	2283.91	0.02	0.03
Summed Potential Emissions in tons/yr	2283.96		
CO2e Total in tons/yr	2292.95		

**Methodology**

The CO2 Emission Factor for #1 Fuel Oil is 21500. The CO2 Emission Factor for #2 Fuel Oil is 22300. Emission Factors are from AP 42, Tables 1.3-3, 1.3-8, and 1.3-12 (SCC 1-03-005-01/02/03) Supplement E 9/99 (see erata file) Greenhouse Warming Potentials (GWP) from Table A-1 of 40 CFR Part 98 Subpart A. Emission (tons/yr) = Throughput (kgals/ yr) x Emission Factor (lb/kgal)/2,000 lb/ton  
CO2e (tons/yr) = CO2 Potential Emission ton/yr x CO2 GWP (1) + CH4 Potential Emission ton/yr x CH4 GWP (21) + N2O Potential Emission ton/yr x N2O GWP (310).

**Note: The boiler with the maximum heat input capacity of 12.55 uses No. 2 fuel oil as a back-up fuel. Natural gas is the worst-case fuel for GHGs. The source-wide potential to emit CO<sub>2</sub>e is based on 100% natural gas usage.**

## **SENT VIA U.S. MAIL: CONFIRMED DELIVERY AND SIGNATURE REQUESTED**

**TO:** Brian Thompson  
Daramic, LLC  
3430 Cline Rd NW  
Corydon, IN 47112

**DATE:** July 12, 2011

**FROM:** Matt Stuckey, Branch Chief  
Permits Branch  
Office of Air Quality

**SUBJECT:** Final Decision  
Administrative Amendment  
061-30503-00012

Enclosed is the final decision and supporting materials for the air permit application referenced above. Please note that this packet contains the original, signed, permit documents.

The final decision is being sent to you because our records indicate that you are the contact person for this application. However, if you are not the appropriate person within your company to receive this document, please forward it to the correct person.

A copy of the final decision and supporting materials has also been sent via standard mail to:  
Roger Calloway – Site Manager  
OAQ Permits Branch Interested Parties List

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178, or toll-free at 1-800-451-6027 (ext. 3-0178), and ask to speak to the permit reviewer who prepared the permit. If you think you have received this document in error, please contact Joanne Smiddie-Brush of my staff at 1-800-451-6027 (ext 3-0185), or via e-mail at [jbrush@idem.IN.gov](mailto:jbrush@idem.IN.gov).
