Office of Air Quality**

Technical Support Document (TSD) for a New Source Review (NSR)  
Permit and a Source Specific Operating Agreement (SSOA)

**Source Description and Location**

<b>Source Name:</b>	<b>VCNA Prairie Aggregates - Yard 72</b>
<b>Source Location:</b>	<b>Mooreville, Indiana 46158</b>
<b>County:</b>	<b>Morgan</b>
<b>SIC Code:</b>	<b>1442 (Construction Sand and Gravel)</b>
<b>Operation Permit No.:</b>	<b>109-30845-00054</b>
<b>Permit Reviewer:</b>	<b>Charles Sullivan</b>

The Office of Air Quality (OAQ) has reviewed an application, submitted by VCNA Prairie Aggregates - Yard 72 on September 20, 2011, for a New Source Review (NSR) Permit and a Source Specific Operating Agreement (SSOA) for construction and operation of a stationary sand and gravel plant.

**Existing Approvals**

The source has been operating under SSOA No. 109-30845-00054, issued on June 19, 2001.

Due to this application, the source is transitioning from a SSOA to a New Source Review (NSR) and SSOA because the sand and gravel annual production is increasing from 410,000 tons per year to 1,000,000 tons per year.

**Permit Level Determination – NSR and SSOA**

This source is obtaining a New Source Review (NSR) Permit and Source Specific Operating Agreement (SSOA) for approval to construct (pursuant to 326 IAC 2-5.1-3) and operate (pursuant to 326 IAC 2-9) the following operations:

- (1) Sand and gravel operation complying with 326 IAC 2-9-7(b)(2)

Based on emission factors from EPA's Compilation of Air Pollutant Emission Factors AP-42, Section 11.19.1, Sand and Gravel Processing, IDEM has determined that sand and gravel processing plants complying with this SSOA (i.e., limiting throughput to less than 1,000,000 tons per year with no more than 9 crushers, 20 screens, and 1 conveying system) will have a limited PTE of PM greater than twenty-five (25) tons per year, including fugitive emissions. Therefore, a New Source Review Permit for approval to construct is required for this operation pursuant to 326 IAC 2-5.1-3(a)(1)(E).

For a source that operates under 326 IAC 2-9 (Source Specific Operating Agreement Program), the source is required to comply with the pre-established emission limitations and standards contained in the specific SSOA(s) under 326 IAC 2-9. For a detailed description of the requirements specific to each SSOA, see 326 IAC 2-9.

**Enforcement Issues**

There are no pending enforcement actions related to this source.

### **Federal Rule Applicability Determination**

#### New Source Performance Standards (NSPSs)

- (a) The requirements of the NSPS for Nonmetallic Mineral Processing Plants, 40 CFR 60, Subpart OOO (40 CFR Part 60.670 - 60.676) (326 IAC 12), are not included in the permit, since the facility does not have a crusher, and all materials are pulled from below the water table.
- (b) There are no New Source Performance Standards (NSPS) (326 IAC 12 and 40 CFR Part 60) included in the permit.

#### National Emission Standards for Hazardous Air Pollutants (NESHAPs)

- (c) There are no National Emission Standards for Hazardous Air Pollutants (NESHAPs) (326 IAC 14, 326 IAC 20 and 40 CFR Part 63) included in the permit.

#### Compliance Assurance Monitoring (CAM)

- (d) Pursuant to 40 CFR 64.2, Compliance Assurance Monitoring (CAM) is not included in the permit, because the potential to emit of the source is limited to less than the Title V major source thresholds and the source is not required to obtain a Part 70 or Part 71 permit.

### **State Rule Applicability Determination**

The following state rules are applicable to the source:

- (a) 326 IAC 2-9 (Source Specific Operating Agreement Program)  
SSOA applicability is discussed under the Permit Level Determination – SSOA section above.
- (b) 326 IAC 6-5 (Fugitive Particulate Matter Emission Limitations)  
The requirements of 326 IAC 6-5 are not included in the SSOA, since each of the SSOAs contained under 326 IAC 2-9 (Source Specific Operating Agreement Program) that limit fugitive emissions include pre-established fugitive dust control measures.

### **Compliance Determination, Monitoring, Record Keeping, and Reporting Requirements**

For a source that operates under 326 IAC 2-9 (Source Specific Operating Agreement Program), the source is required to comply with the pre-established emission limitations and standards, compliance determination, compliance monitoring, and record keeping and reporting requirements contained in the specific SSOA(s) under 326 IAC 2-9. For a detailed description of the requirements specific to each SSOA, see 326 IAC 2-9.

### **Conclusion and Recommendation**

Unless otherwise stated, information used in this review was derived from the application and additional information submitted by the applicant. An application for the purposes of this review was received on August 29, 2011 and supplemental new source review data was received on September 20, 2011.
