RE: Amsted Rail / 089 - 30862 - 00204

FROM: Matthew Stuckey, Branch Chief
Permits Branch
Office of Air Quality

Notice of Decision: Approval – Effective Immediately

Please be advised that on behalf of the Commissioner of the Department of Environmental Management, I have issued a decision regarding the enclosed matter. Pursuant to IC 13-17-3-4 and 326 IAC 2, this permit modification is effective immediately, unless a petition for stay of effectiveness is filed and granted, and may be revoked or modified in accordance with the provisions of IC 13-15-7-1.

If you wish to challenge this decision, IC 4-21.5-3-7 and IC 13-15-7-3 require that you file a petition for administrative review. This petition may include a request for stay of effectiveness and must be submitted to the Office Environmental Adjudication, 100 North Senate Avenue, Government Center North, Suite N 501E, Indianapolis, IN 46204, **within eighteen (18) days of the mailing of this notice**. The filing of a petition for administrative review is complete on the earliest of the following dates that apply to the filing:

- (1) the date the document is delivered to the Office of Environmental Adjudication (OEA);
- (2) the date of the postmark on the envelope containing the document, if the document is mailed to OEA by U.S. mail; or
- (3) The date on which the document is deposited with a private carrier, as shown by receipt issued by the carrier, if the document is sent to the OEA by private carrier.

The petition must include facts demonstrating that you are either the applicant, a person aggrieved or adversely affected by the decision or otherwise entitled to review by law. Please identify the permit, decision, or other order for which you seek review by permit number, name of the applicant, location, date of this notice and all of the following:

- (1) the name and address of the person making the request;
- (2) the interest of the person making the request;
- (3) identification of any persons represented by the person making the request;
- (4) the reasons, with particularity, for the request;
- (5) the issues, with particularity, proposed for considerations at any hearing; and
- (6) identification of the terms and conditions which, in the judgment of the person making the request, would be appropriate in the case in question to satisfy the requirements of the law governing documents of the type issued by the Commissioner.

Pursuant to 326 IAC 2-7-18(d), any person may petition the U.S. EPA to object to the issuance of a Title V operating permit or modification within sixty (60) days of the end of the forty-five (45) day EPA review period. Such an objection must be based only on issues that were raised with reasonable specificity during the public comment period, unless the petitioner demonstrates that it was impracticable to raise such issues, or if the grounds for such objection arose after the comment period.

To petition the U.S. EPA to object to the issuance of a Title V operating permit, contact:

U.S. Environmental Protection Agency
401 M Street
Washington, D.C. 20406

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178. Callers from within Indiana may call toll-free at 1-800-451-6027, ext. 3-0178.

Re: 089-30862-00204
Significant Permit Modification to
Part 70 Renewal No.: T 089-23826-00204

Dear Mr. Ribbing:

Amsted Rail Company, Inc. was issued a Part 70 Operating Permit Renewal on February 20, 2009 for a stationary steel coil spring manufacturing plant. A letter requesting changes to this permit was received on September 1, 2011. Pursuant to the provisions of 326 IAC 2-7-12 a significant permit modification to this permit is hereby approved as described in the attached Technical Support Document.

The modification consists of changes to the testing requirements.

All other conditions of the permit shall remain unchanged and in effect. For your convenience, the entire Part 70 Operating Permit as modified will be provided at issuance. A copy of this permit is available on the Internet at: www.in.gov/ai/appfiles/idem-caats/.

This decision is subject to the Indiana Administrative Orders and Procedures Act – IC 4-21.5-3-5. If you have any questions on this matter, please contact Kimberly Cottrell, OAQ, 100 North Senate Avenue, MC 61-53, Room 1003, Indianapolis, Indiana, 46204-2251, or call at (800) 451-6027, and ask for Kimberly Cottrell or extension (3-0870), or dial (317) 233-0870.

Sincerely,

Tripurari P. Sinha, Ph. D., Section Chief

Part 70 Operating Permit Renewal INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT OFFICE OF AIR QUALITY

Amsted Rail Company, Inc.
(formerly ASF-Keystone, Inc. - Hammond Plant)
4831 Hohman Avenue
Hammond, Indiana 46327

(Herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit is grounds for enforcement action; permit termination, revocation and reissuance, or modification; or denial of a permit renewal application. Noncompliance with any provision of this permit, except any provision specifically designated as not federally enforceable, constitutes a violation of the Clean Air Act. It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in Section B, Emergency Provisions.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-7 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

SECTION A SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permitted should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permitted to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)] [326 IAC 2-7-1(22)]

The Permittee owns and operates a stationary steel coil spring manufacturing plant.

Source Address: 4831 Hohman Avenue, Hammond, Indiana 46327
 General Source Phone Number: (219) 931-1900
 SIC Code: 3493
 County Location: Lake
 Source Location Status: Nonattainment for PM_{2.5} standard
 Attainment for all other criteria pollutants
 Source Status: Part 70 Operating Permit Program
 Minor Source, under PSD
 Minor Source, under Nonattainment New Source Review for PM_{2.5}
 Minor Source, Section 112 of the Clean Air Act
 Not 1 of 28 Source Categories

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)] [326 IAC 2-7-5(15)]

This stationary source consists of the following emission units and pollution control devices:

(a) Natural gas-fired boiler and furnaces, which include the following units:

Unit ID	Unit Description	Maximum Design Capacity (MMBtu/hr heat input)	Year Constructed
2-5027	Large Line Bar Furnace	20.5	1938
2-5075	Medium Line Bar Furnace	13.0	1956

(b) Coil Spring Grinders, which include the following:

Unit ID	Unit Description	Maximum Design Rate (tons springs ground per hour)
3-0386	#2 Beasley Ferris Wheel Grinder	1.11
3-0389	Gardner Tub Grinder	0.55
3-0385	#1 Beasley Ferris Wheel Grinder	1.55
3-0394	Beasley Swing Grinder	0.35
3-0249	Gardner Paddle Wheel Grinder	0.15
3-0247	Torrington Ferris Wheel Grinder	0.91
3-0244	#1 Mattson (Large) Grinder	2.15
3-0393	#2 Mattson (Small) Grinder	2.15
3-0396	Vertical Opposing Disc Grinder	1.11
3-0397	Vertical Opposing Disc Grinder	1.55

All the coil spring grinders above are controlled using a pulse-jet baghouse, identified as 3-3037, exhausting to Stack 3.

- (c) Coil Spring Manufacturing Process Lines, which include the following:
- (1) Small Line Coil Spring Manufacturing Process, with a maximum capacity of 3,000 lbs/hr of coil springs manufactured, includes an oil quench tank, identified as 3-2821, constructed in 1973, using an electrostatic precipitator, identified as 3-3024, to control particulate emissions (oil mists) generated during the quenching operation, and exhausting to Stack 13. The process also includes a natural gas-fired draw furnace, identified as 2-5163, with a maximum design capacity of 5.1 MMBtu/hr heat input, used to stress-relieve the newly coiled springs after the quench operation.
 - (2) Medium Line Coil Spring Manufacturing Process, with a maximum capacity of 5.0 tons/hr of coil springs manufactured, includes an oil quench tank, identified as 3-2838A, permitted in 2011, using a fabric filter, identified as 3-3027A, to control particulate emissions (oil mists) generated during the quenching operation, and exhausting to Stack 14. The process also includes a natural gas-fired draw furnace, identified as 2-5097A, permitted in 2011, with a maximum design capacity of 5.0 MMBtu/hr heat input, used to stress-relieve the newly coiled springs after the quench operation.
 - (3) Large Line Coil Spring Manufacturing Process, with a maximum capacity of 10,000 lbs/hr of coil springs manufactured, includes an oil quench tank, identified as 3-2845, constructed in 1959, using an electrostatic precipitator, identified as 3-3036, to control particulate emissions (oil mists) generated during the quenching operation, and exhausting to Stack 15. The process also includes a natural gas-fired draw furnace, identified as 2-5164, with a maximum design capacity of 9.8 MMBtu/hr heat input, used to stress-relieve the newly coiled springs after the quench operation.
- (d) Paint Spray Booths, which include the following:
- (1) Paint Spray Booth, identified as 3-2715, using dry filters - double wall as PM control, constructed in 1989.
 - (2) Paint Spray Booth, identified as 3-2714, using dry filters - double wall as PM control, constructed in 1980.
- (e) Coil Spring Coating Dip Tanks, for application of rust preventative coatings, which include the following:

Unit ID	Coating
3-2813	Water-based Clear Coating
3-2865	Water-based Clear Coating
3-2865A	Water-based Clear Coating
3-2867	Water-based Clear Coating
3-2870	Water-based Clear Coating
3-2869	Solvent-based or Water-based Clear Coating
3-2872	Solvent-based or Water-based Clear Coating
3-2873	Solvent-based or Water-based Clear Coating

A.3 Specifically Regulated Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities which are specifically regulated, as defined in 326 IAC 2-7-1(21):

- (a) Space heaters, process heaters, heat treat furnaces or boilers using natural gas-fired combustion sources, regulated by 326 IAC 6.8-2-4(b), with heat input equal to or less than ten million (10,000,000) British thermal units per hour, which include the following units:

Unit ID	Unit Description	Maximum Design Capacity (MMBtu/hr heat input)
2-5085	Small Line Bar Furnace	8.0
2-5006	Small Line Slot Furnace	1.5
2-5014	Medium Line Slot Furnace	5.2 (for Units 2-5014 and 2-5015 combined)
2-5015	Medium Line Slot Furnace	
2-5036	Large Line Slot Furnace	2.5
2-5163	Small Line Draw Furnace	5.1
2-5097	Medium Line Draw Furnace	5.1
2-5164	Large Line Draw Furnace	9.8

- (b) Shot Peeners, regulated by 326 IAC 6.8-2-4(a), which include the following units:
- (1) Pangborn Shot Peener, identified as 3-1804, with a maximum capacity of 0.012 tons steel shots used per hour, using a baghouse, identified as 3-3017, as control, constructed in 1964, and exhausting to Stack 9.
 - (2) Wheelabrator Shot Peener, identified as 3-1821, with a maximum capacity of 0.12 tons steel shots used per hour, using a baghouse, identified as 3-3022, as control, constructed in 1972, and exhausting to Stack 11.
 - (3) Wheelabrator Shot Peener, identified as 3-1823, with a maximum capacity of 0.21 tons steel shots used per hour, using a baghouse, identified as 3-1823, as control, constructed in 1980, and exhausting to Stack 12.
 - (4) One (1) Shot Peener, identified as 3-1824, permitted in 2011, with a maximum capacity of 5.15 tons steel parts used per hour, using a baghouse, identified as 3-3024, for control of particulate matter emissions, and exhausting to Stack 24.
 - (5) One (1) Shot Peener, identified as 3-1825, permitted in 2011, with a maximum capacity of 5.15 tons steel parts used per hour, using a baghouse, identified as 3-3025, for control of particulate matter emissions, and exhausting to Stack 25.
- (c) Two (2) Cold Cleaner Degreasers, solvent not remotely stored. [326 IAC 8-3]
- (d) Paved and unpaved roads and parking lots with public access. [326 IAC 6-4]
- (e) The following equipment related to manufacturing activities not resulting in the emissions of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment. [326 IAC 6.8]
- (f) Grinding and machining operations controlled with fabric filters, scrubbers, mist collectors, wet collectors and electrostatic precipitators with a design grain loading of less than or equal to 0.03 grains per actual cubic foot and a gas flow rate less than or equal to 4,000 actual cubic feet per minute, including the following: deburring, buffing, polishing, abrasive blasting, pneumatic conveying and woodworking operations. [326 IAC 6.5-1-2]

A.4 Other Insignificant Activities [326 IAC 2-7-1(21)]

This stationary source also includes the following insignificant activities which are not specifically regulated, as defined in 326 IAC 2-7-1(21):

- (a) Replacement or repair of electrostatic precipitators, bags in baghouses and filters in other air filtration equipment [326 IAC 2-7-1(21)(G)(X)(AA)].
- (b) A gasoline fuel transfer dispensing operation handling less than or equal to one thousand three hundred (1,300) gallons per day and filling storage tanks having a capacity of less than ten thousand five hundred (10,500) gallons. Such storage tanks may be in a fixed location or on mobile equipment. [326 IAC 2-7-1(21)(G)(ii)(AA)].
- (c) A petroleum fuel or other than gasoline dispensing facility, having a storage tank capacity less than or equal to ten thousand five hundred (10,500) gallons, and dispensing three thousand five hundred (3,500) gallons per day or less. [326 IAC 2-7-1(21)(G)(ii)(BB)].
- (d) Application of oils, greases, lubricants or other non-volatile materials applied as temporary protective coatings.
- (e) Routine maintenance and repair of buildings, structures or vehicles at the source where air emissions from those activities would not be associated with any production process, including the following: purging of gas lines and purging of vessels. [326 IAC 2-7-1(21)(G)(xvii)].
- (f) Three (3) electric induction heating furnaces, permitted in 2011, each with a maximum capacity of 5.0 tons of metal per hour.

A.5 Part 70 Permit Applicability [326 IAC 2-7-2]

This stationary source is required to have a Part 70 permit by 326 IAC 2-7-2 (Applicability) because:

- (a) It is a major source, as defined in 326 IAC 2-7-1(22);
- (b) It is a source in a source category designated by the United States Environmental Protection Agency (U.S. EPA) under 40 CFR 70.3 (Part 70 - Applicability).

SECTION B GENERAL CONDITIONS

B.1 Definitions [326 IAC 2-7-1]

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2 and 326 IAC 2-7) shall prevail.

B.2 Permit Term [326 IAC 2-7-5(2)] [326 IAC 2-1.1-9.5] [326 IAC 2-7-4(a)(1)(D)] [IC 13-15-3-6(a)]

- (a) The Part 70 Operating Permit Renewal, T089-23826-00204, is issued for a fixed term of five (5) years from the issuance date of this permit, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date of this permit.
- (b) If IDEM, OAQ upon receiving a timely and complete renewal permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect, including any permit shield provided in 326 IAC 2-7-15, until the renewal permit has been issued or denied.

B.3 Term of Conditions [326 IAC 2-1.1-9.5]

Notwithstanding the permit term of a permit to construct, a permit to operate, or a permit modification, any condition established in a permit issued pursuant to a permitting program approved in the state implementation plan shall remain in effect until:

- (a) the condition is modified in a subsequent permit action pursuant to Title I of the Clean Air Act; or
- (b) the emission unit to which the condition pertains permanently ceases operation.

B.4 Enforceability [326 IAC 2-7-7]

- (a) Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, OAQ and the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.
- (b) Unless otherwise stated, all terms and conditions in this permit that are local requirements, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM.

B.5 Severability [326 IAC 2-7-5(5)]

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

B.6 Property Rights or Exclusive Privilege [326 IAC 2-7-5(6)(D)]

This permit does not convey any property rights of any sort or any exclusive privilege.

B.7 Duty to Provide Information [326 IAC 2-7-5(6)(E)]

- (a) The Permittee shall furnish to IDEM, OAQ within a reasonable time, any information that IDEM, OAQ may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. Upon request, the Permittee shall also furnish to IDEM, OAQ copies of records required to be kept by this permit.

- (b) For information furnished by the Permittee to IDEM, OAQ, the Permittee may include a claim of confidentiality in accordance with 326 IAC 17.1. When furnishing copies of requested records directly to U. S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.8 Certification [326 IAC 2-7-4(f)] [326 IAC 2-7-6(1)] [326 IAC 2-7-5(3)(C)]

- (a) A certification required by this permit meets the requirements of 326 IAC 2-7-6(1) if:
 - (i) it contains a certification by a "responsible official" as defined by 326 IAC 2-7-1(34), and
 - (ii) the certification states that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) The Permittee may use the attached Certification Form, or its equivalent, with each submittal requiring certification. One (1) certification may cover multiple forms in one (1) submittal.
- (c) A "responsible official" is defined at 326 IAC 2-7-1(34).

B.9 Annual Compliance Certification [326 IAC 2-7-6(5)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. All certifications shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted no later than April 15 of each year to:

Indiana Department of Environmental Management
Compliance and Enforcement Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Air Enforcement Branch - Indiana (AE-17J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
 - (1) Identification of whether compliance during the period was continuous or intermittent;
 - (2) In cases where there was not continuous compliance with all permit terms and conditions, the identification of the permit term(s) or condition(s) for which compliance was intermittent;

- (3) The identification of the method(s) or other means used by the owner or operator for determining the compliance status; and
- (4) Such other facts, as specified in Sections D of this permit, as IDEM, OAQ, may require to determine the compliance status of the source.

The submittal by the Permittee does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

B.10 Preventive Maintenance Plan [326 IAC 2-7-5(13)] [326 IAC 1-6-3]

(a) A Preventive Maintenance Plan meets the requirements of 326 IAC 1-6-3 if it includes, at a minimum:

- (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
- (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
- (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.

The Permittee shall implement the PMPs.

(b) If required by specific condition(s) in Section D of this permit, where no PMP was previously required, the Permittee shall prepare and maintain Preventive Maintenance Plans (PMPs) no later than ninety (90) days after issuance of this permit or ninety (90) days after initial start-up, whichever is later, including the following information on each facility:

- (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
- (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
- (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.

If, due to circumstances beyond the Permittee's control, the PMPs cannot be prepared and maintained within the above time frame, the Permittee may extend the date an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance and Enforcement Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

The PMP extension notification does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

The Permittee shall implement the PMPs.

- (c) A copy of the PMPs shall be submitted to IDEM, OAQ, upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ. IDEM, OAQ, may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or is the primary contributor to an exceedance of any limitation on emissions. The PMPs and their submittal do not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).
- (d) To the extent the Permittee is required by 40 CFR Part 60/63 to have an Operation Maintenance, and Monitoring (OMM) Plan for a unit, such Plan is deemed to satisfy the PMP requirements of 326 IAC 1-6-3 for that unit.

B.11 Emergency Provisions [326 IAC 2-7-16]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describe the following:

- (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
- (2) The permitted facility was at the time being properly operated;
- (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
- (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ and Northwest Regional Office within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Telephone Number: 1-800-451-6027 (ask for Office of Air Quality, Compliance and Enforcement Branch), or
Telephone Number: 317-233-0178 (ask for Compliance and Enforcement Branch)
Facsimile Number: 317-233-6865

Northwest Regional Office phone: (219) 757-0265; fax: (219) 757-0267.

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

Indiana Department of Environmental Management
Compliance and Enforcement Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-7-5(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) The Permittee seeking to establish the occurrence of an emergency shall make records available upon request to ensure that failure to implement a PMP did not cause or contribute to an exceedance of any limitations on emissions. However, IDEM, OAQ may require that the Preventive Maintenance Plans required under 326 IAC 2-7-4(c)(9) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-7 and any other applicable rules.
- (g) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.

B.12 Permit Shield [326 IAC 2-7-15] [326 IAC 2-7-20] [326 IAC 2-7-12]

- (a) Pursuant to 326 IAC 2-7-15, the Permittee has been granted a permit shield. The permit shield provides that compliance with the conditions of this permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that either the applicable requirements are included and specifically identified in this permit or the permit contains an explicit determination or concise summary of a determination that other specifically identified requirements are not applicable. The Indiana statutes from IC 13 and rules from 326 IAC, referenced in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a Part 70 permit under 326 IAC 2-7 or for applicable requirements for which a permit shield has been granted.

This permit shield does not extend to applicable requirements which are promulgated after the date of issuance of this permit unless this permit has been modified to reflect such new requirements.

- (b) If, after issuance of this permit, it is determined that the permit is in nonconformance with an applicable requirement that applied to the source on the date of permit issuance, IDEM, OAQ, shall immediately take steps to reopen and revise this permit and issue a compliance order to the Permittee to ensure expeditious compliance with the applicable requirement until the permit is reissued. The permit shield shall continue in effect so long as the Permittee is in compliance with the compliance order.
- (c) No permit shield shall apply to any permit term or condition that is determined after issuance of this permit to have been based on erroneous information supplied in the permit application. Erroneous information means information that the Permittee knew to be false, or in the exercise of reasonable care should have been known to be false, at the time the information was submitted.
- (d) Nothing in 326 IAC 2-7-15 or in this permit shall alter or affect the following:
 - (1) The provisions of Section 303 of the Clean Air Act (emergency orders), including the authority of the U.S. EPA under Section 303 of the Clean Air Act;
 - (2) The liability of the Permittee for any violation of applicable requirements prior to or at the time of this permit's issuance;
 - (3) The applicable requirements of the acid rain program, consistent with Section 408(a) of the Clean Air Act; and
 - (4) The ability of U.S. EPA to obtain information from the Permittee under Section 114 of the Clean Air Act.
- (e) This permit shield is not applicable to any change made under 326 IAC 2-7-20(b)(2) (Sections 502(b)(10) of the Clean Air Act changes) and 326 IAC 2-7-20(c)(2) (trading based on State Implementation Plan (SIP) provisions).
- (f) This permit shield is not applicable to modifications eligible for group processing until after IDEM, OAQ has issued the modifications. [326 IAC 2-7-12(c)(7)]
- (g) This permit shield is not applicable to minor Part 70 permit modifications until after IDEM, OAQ has issued the modification. [326 IAC 2-7-12(b)(8)]

B.13 Prior Permits Superseded [326 IAC 2-1.1-9.5] [326 IAC 2-7-10.5]

- (a) All terms and conditions of permits established prior to T089-23826-00204 and issued pursuant to permitting programs approved into the state implementation plan have been either:
 - (1) incorporated as originally stated,
 - (2) revised under 326 IAC 2-7-10.5, or
 - (3) deleted under 326 IAC 2-7-10.5.
- (b) Provided that all terms and conditions are accurately reflected in this permit, all previous registrations and permits are superseded by this Part 70 operating permit.

B.14 Termination of Right to Operate [326 IAC 2-7-10] [326 IAC 2-7-4(a)]

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-7-3 and 326 IAC 2-7-4(a).

B.15 RESERVED

B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination
[326 IAC 2-7-5(6)(C)] [326 IAC 2-7-8(a)] [326 IAC 2-7-9]

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a Part 70 Operating Permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-7-5(6)(C)] The notification by the Permittee does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).
- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM, OAQ determines any of the following:
- (1) That this permit contains a material mistake.
 - (2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.
 - (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-7-9(a)(3)]
- (c) Proceedings by IDEM, OAQ to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-7-9(b)]
- (d) The reopening and revision of this permit, under 326 IAC 2-7-9(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM, OAQ at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM, OAQ may provide a shorter time period in the case of an emergency. [326 IAC 2-7-9(c)]

B.17 Permit Renewal [326 IAC 2-7-3] [326 IAC 2-7-4] [326 IAC 2-7-8(e)]

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ and shall include the information specified in 326 IAC 2-7-4. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(40) and 326 IAC 2-7-1(21). The renewal application does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management
Permit Administration and Support Section, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

- (b) A timely renewal application is one that is:
- (1) Submitted at least nine (9) months prior to the date of the expiration of this permit; and

- (2) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.
- (c) If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-7 until IDEM, OAQ takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified, pursuant to 326 IAC 2-7-4(a)(2)(D), in writing by IDEM, OAQ any additional information identified as being needed to process the application.

B.18 Permit Amendment or Modification [326 IAC 2-7-11] [326 IAC 2-7-12]

- (a) Permit amendments and modifications are governed by the requirements of 326 IAC 2-7-11 or 326 IAC 2-7-12 whenever the Permittee seeks to amend or modify this permit.
- (b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management
Permit Administration and Support Section, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

Any such application does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

B.19 Permit Revision Under Economic Incentives and Other Programs [326 IAC 2-7-5(8)] [326 IAC 2-7-12(b)(2)]

- (a) No Part 70 permit revision or notice shall be required under any approved economic incentives, marketable Part 70 permits, emissions trading, and other similar programs or processes for changes that are provided for in a Part 70 permit.
- (b) Notwithstanding 326 IAC 2-7-12(b)(1) and 326 IAC 2-7-12(c)(1), minor Part 70 permit modification procedures may be used for Part 70 modifications involving the use of economic incentives, marketable Part 70 permits, emissions trading, and other similar approaches to the extent that such minor Part 70 permit modification procedures are explicitly provided for in the applicable State Implementation Plan (SIP) or in applicable requirements promulgated or approved by the U.S. EPA.

B.20 Operational Flexibility [326 IAC 2-7-20] [326 IAC 2-7-10.5]

- (a) The Permittee may make any change or changes at the source that are described in 326 IAC 2-7-20(b),(c), or (e) without a prior permit revision, if each of the following conditions is met:
 - (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
 - (2) Any preconstruction approval required by 326 IAC 2-7-10.5 has been obtained;

(3) The changes do not result in emissions which exceed the limitations provided in this permit (whether expressed herein as a rate of emissions or in terms of total emissions);

(4) The Permittee notifies the:

Indiana Department of Environmental Management
Permit Administration and Support Section, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and

(5) The Permittee maintains records on-site, on a rolling five (5) year basis, which document all such changes and emission trades that are subject to 326 IAC 2-7-20(b), (c), or (e). The Permittee shall make such records available, upon reasonable request, for public review.

Such records shall consist of all information required to be submitted to IDEM, OAQ in the notices specified in 326 IAC 2-7-20(b)(1), (c)(1), and (e)(2).

(b) The Permittee may make Section 502(b)(10) of the Clean Air Act changes (this term is defined at 326 IAC 2-7-1(36)) without a permit revision, subject to the constraint of 326 IAC 2-7-20(a). For each such Section 502(b)(10) of the Clean Air Act change, the required written notification shall include the following:

(1) A brief description of the change within the source;

(2) The date on which the change will occur;

(3) Any change in emissions; and

(4) Any permit term or condition that is no longer applicable as a result of the change.

The notification which shall be submitted is not considered an application form, report or compliance certification. Therefore, the notification by the Permittee does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

(c) Emission Trades [326 IAC 2-7-20(c)]

The Permittee may trade emissions increases and decreases at the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-7-20(c).

- (d) **Alternative Operating Scenarios [326 IAC 2-7-20(d)]**
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-7-5(9). No prior notification of IDEM, OAQ or U.S. EPA is required.
- (e) Backup fuel switches specifically addressed in, and limited under, Section D of this permit shall not be considered alternative operating scenarios. Therefore, the notification requirements of part (a) of this condition do not apply.

B.21 Source Modification Requirement [326 IAC 2-7-10.5]

A modification, construction, or reconstruction is governed by the requirements of 326 IAC 2.

B.22 Inspection and Entry [326 IAC 2-7-6] [IC 13-14-2-2] [IC 13-30-3-1] [IC 13-17-3-2]

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a Part 70 source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, have access to and copy any records that must be kept under the conditions of this permit;
- (c) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, inspect any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
- (d) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, sample or monitor substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
- (e) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

B.23 Transfer of Ownership or Operational Control [326 IAC 2-7-11]

- (a) The Permittee must comply with the requirements of 326 IAC 2-7-11 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management
Permit Administration and Support Section, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

Any such application does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

B.24 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-7-5(7)] [326 IAC 2-1.1-7]

- (a) The Permittee shall pay annual fees to IDEM, OAQ within thirty (30) calendar days of receipt of a billing. Pursuant to 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM, OAQ the applicable fee is due April 1 of each year.
- (b) Except as provided in 326 IAC 2-7-19(e), failure to pay may result in administrative enforcement action or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-4230 (ask for OAQ, Billing, Licensing, and Training Section), to determine the appropriate permit fee.

B.25 Credible Evidence [326 IAC 2-7-5(3)] [326 IAC 2-7-6] [62 FR 8314] [326 IAC 1-1-6]

For the purpose of submitting compliance certifications or establishing whether or not the Permittee has violated or is in violation of any condition of this permit, nothing in this permit shall preclude the use, including the exclusive use, of any credible evidence or information relevant to whether the Permittee would have been in compliance with the condition of this permit if the appropriate performance or compliance test or procedure had been performed.

SECTION C SOURCE OPERATION CONDITIONS

Entire Source

Emission Limitations and Standards [326 IAC 2-7-5(1)]

C.1 Opacity [326 IAC 5-1]

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-1 (Applicability) and 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of twenty percent (20%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute non-overlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

C.2 Open Burning [326 IAC 4-1] [IC 13-17-9]

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1.

C.3 Incineration [326 IAC 4-2] [326 IAC 9-1-2]

The Permittee shall not operate an incinerator except as provided in 326 IAC 4-2 or in this permit. The Permittee shall not operate a refuse incinerator or refuse burning equipment except as provided in 326 IAC 9-1-2 or in this permit.

C.4 Fugitive Dust Emissions [326 IAC 6-4]

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions). 326 IAC 6-4-2(4) is not federally enforceable.

C.5 Fugitive Dust Emissions [326 IAC 6.8-10-3]

Pursuant to 326 IAC 6.8-10-3 (formerly 326 IAC 6-1-11.1) (Lake County Fugitive Particulate Matter Control Requirements), the particulate matter emissions from source wide activities shall meet the following requirements:

- (a) The average instantaneous opacity of fugitive particulate emissions from a paved road shall not exceed ten percent (10%).
- (b) The average instantaneous opacity of fugitive particulate emissions from an unpaved road shall not exceed ten percent (10%).
- (c) The average instantaneous opacity of fugitive particulate emissions from batch transfer shall not exceed ten percent (10%).
- (d) The opacity of fugitive particulate emissions from continuous transfer of material onto and out of storage piles shall not exceed ten percent (10%) on a three (3) minute average.
- (e) The opacity of fugitive particulate emissions from storage piles shall not exceed ten percent (10%) on a six (6) minute average.

- (f) There shall be a zero (0) percent frequency of visible emission observations of a material during the inplant transportation of material by truck or rail at any time.
- (g) The opacity of fugitive particulate emissions from the inplant transportation of material by front end loaders and skip hoists shall not exceed ten percent (10%).
- (h) There shall be a zero (0) percent frequency of visible emission observations from a building enclosing all or part of the material processing equipment, except from a vent in the building.
- (i) The PM10 emissions from building vents shall not exceed twenty-two thousandths (0.022) grains per dry standard cubic foot and ten percent (10%) opacity.
- (j) The opacity of particulate emissions from dust handling equipment shall not exceed ten percent (10%).
- (k) Any facility or operation not specified in 326 IAC 6.8-10-3 shall meet a twenty percent (20%), three (3) minute average opacity standard.

The Permittee shall achieve these limits by controlling fugitive particulate matter emissions according to the Fugitive Dust Control Plan, included as Attachment A.

C.6 Lake County: Particulate Matter Contingency Measures [326 IAC 6.8-11]

The Permittee shall comply with the applicable provisions of 326 IAC 6.8-11 (Lake County: Particulate Matter Contingency Measures).

C.7 Stack Height [326 IAC 1-7]

The Permittee shall comply with the applicable provisions of 326 IAC 1-7 (Stack Height Provisions), for all exhaust stacks through which a potential (before controls) of twenty-five (25) tons per year or more of particulate matter or sulfur dioxide is emitted. The provisions of 326 IAC 1-7-1(3), 326 IAC 1-7-2, 326 IAC 1-7-3(c) and (d), 326 IAC 1-7-4, and 326 IAC 1-7-5(a), (b), and (d) are not federally enforceable.

C.8 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

- (a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.
- (b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:
 - (1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or
 - (2) If there is a change in the following:
 - (A) Asbestos removal or demolition start date;
 - (B) Removal or demolition contractor; or

(C) Waste disposal site.

- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).
- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management
Compliance and Enforcement Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

- (e) **Procedures for Asbestos Emission Control**
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-1, emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) **Demolition and Renovation**
The Permittee shall thoroughly inspect the affected facility or part of the facility where the demolition or renovation will occur for the presence of asbestos pursuant to 40 CFR 61.145(a).
- (g) **Indiana Licensed Asbestos Inspector**
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Licensed Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement to use an Indiana Licensed Asbestos inspector is not federally enforceable.

Testing Requirements [326 IAC 2-7-6(1)]

C.9 Performance Testing [326 IAC 3-6]

- (a) For performance testing required by this permit, a test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management
Compliance and Enforcement Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).
- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ no later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ if the Permittee submits to IDEM, OAQ a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

Compliance Requirements [326 IAC 2-1.1-11]

C.10 Compliance Requirements [326 IAC 2-1.1-11]

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements by issuing an order under 326 IAC 2-1.1-11. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

Compliance Monitoring Requirements [326 IAC 2-7-5(1)] [326 IAC 2-7-6(1)]

C.11 Compliance Monitoring [326 IAC 2-7-5(3)] [326 IAC 2-7-6(1)]

Unless otherwise specified in this permit, for all monitoring requirements not already legally required, the Permittee shall be allowed up to ninety (90) days from the date of permit issuance or of initial start-up, whichever is later, to begin such monitoring. If due to circumstances beyond the Permittee's control, any monitoring equipment required by this permit cannot be installed and operated no later than ninety (90) days after permit issuance or the date of initial startup, whichever is later, the Permittee may extend the compliance schedule related to the equipment for an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance and Enforcement Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

in writing, prior to the end of the initial ninety (90) day compliance schedule, with full justification of the reasons for the inability to meet this date.

The notification which shall be submitted by the Permittee does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

Unless otherwise specified in the approval for the new emission unit(s), compliance monitoring for new emission units or emission units added through a source modification shall be implemented when operation begins.

C.12 Lake County: Continuous Compliance Plan [326 IAC 6.8-8]

Pursuant to 326 IAC 6.8-8 (Lake County: Continuous Compliance Plan), the Permittee shall submit to IDEM, OAQ and maintain at the source a copy of the Continuous Compliance Plan. The Permittee shall perform the inspections, monitoring, and record keeping requirements as specified in 326 IAC 6.8-8-7. The Permittee shall update the CCP, as needed, retain a copy on site, and make the updated CCP available for inspection as specified in 326 IAC 6.8-8-8.

C.13 Instrument Specifications [326 IAC 2-1.1-11] [326 IAC 2-7-5(3)] [326 IAC 2-7-6(1)]

- (a) When required by any condition of this permit, an analog instrument used to measure a parameter related to the operation of an air pollution control device shall have a scale such that the expected maximum reading for the normal range shall be no less than twenty percent (20%) of full scale.
- (b) The Permittee may request that the IDEM, OAQ approve the use of an instrument that does not meet the above specifications provided the Permittee can demonstrate that an alternative instrument specification will adequately ensure compliance with permit conditions requiring the measurement of the parameters.

Corrective Actions and Response Steps [326 IAC 2-7-5] [326 IAC 2-7-6]

C.14 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

- (a) The Permittee maintain the most recently submitted written emergency reduction plans (ERPs) consistent with safe operating procedures.
- (b) Upon direct notification by IDEM, OAQ that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level. [326 IAC 1-5-3]

C.15 Risk Management Plan [326 IAC 2-7-5(12)] [40 CFR 68]

If a regulated substance, as defined in 40 CFR 68, is present at a source in more than a threshold quantity, the Permittee must comply with the applicable requirements of 40 CFR 68.

C.16 Response to Excursions or Exceedances[326 IAC 2-7-5] [326 IAC 2-7-6]

Upon detecting an excursion where a response step is required by the D Section or an exceedance of a limitation in this permit:

- (a) The Permittee shall take reasonable response steps to restore operation of the emissions unit (including any control device and associated capture system) to its normal or usual manner of operation as expeditiously as practicable in accordance with good air pollution control practices for minimizing excess emissions.
- (b) The response shall include minimizing the period of any startup, shutdown or malfunction. The response may include, but is not limited to, the following:
 - (1) initial inspection and evaluation;
 - (2) recording that operations returned or are returning to normal without operator action (such as through response by a computerized distribution control system); or
 - (3) any necessary follow-up actions to return operation to normal or usual manner of operation.
- (c) A determination of whether the Permittee has used acceptable procedures in response to an excursion or exceedance will be based on information available, which may include, but is not limited to, the following:
 - (1) monitoring results;
 - (2) review of operation and maintenance procedures and records; and/or

- (3) inspection of the control device, associated capture system, and the process.
- (d) Failure to take reasonable response steps shall be considered a deviation from the permit.
- (e) The Permittee shall record the reasonable response steps taken.

C.17 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-7-5] [326 IAC 2-7-6]

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall submit a description of its response actions to IDEM, OAQ, no later than seventy-five (75) days after the date of the test.
- (b) A retest to demonstrate compliance shall be performed no later than one hundred eighty (180) days after the date of the test. Should the Permittee demonstrate to IDEM, OAQ, that retesting in one hundred eighty (180) days is not practicable, IDEM, OAQ, may extend the retesting deadline.
- (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The response action documents submitted pursuant to this condition do require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

C.18 Emission Statement [326 IAC 2-7-5(3)(C)(iii)] [326 IAC 2-7-5(7)] [326 IAC 2-7-19(c)] [326 IAC 2-6]

Pursuant to 326 IAC 2-6-3(a)(1), the Permittee shall submit by July 1 of each year an emission statement covering the previous calendar year. The emission statement shall contain, at a minimum, the information specified in 326 IAC 2-6-4(c) and shall meet the following requirements:

- (a) Indicate estimated actual emissions of all pollutants listed in 326 IAC 2-6-4(a);
- (b) Indicate estimated actual emissions of regulated pollutants as defined by 326 IAC 2-7-1(32) ("Regulated pollutant, which is used only for purposes of Section 19 of this rule") from the source, for purposes of Part 70 fee assessment.

This statement must be submitted to:

Indiana Department of Environmental Management
Technical Support and Modeling Section, Office of Air Quality
100 North Senate Avenue
MC 61-50 IGCN 1003
Indianapolis, Indiana 46204-2251

The emission statement does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34).

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

C.19 General Record Keeping Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-6]

- (a) Records of all required monitoring data, reports and support information required by this permit shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be physically present or electronically accessible at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.
- (b) Unless otherwise specified in this permit, for all record keeping requirements not already legally required, the Permittee shall be allowed up to ninety (90) days from the date of permit issuance or the date of initial start-up, whichever is later, to begin such record keeping.

C.20 General Reporting Requirements [326 IAC 2-7-5(3)(C)] [326 IAC 2-1.1-11]

- (a) The Permittee shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported except that a deviation required to be reported pursuant to an applicable requirement that exists independent of this permit, shall be reported according to the schedule stated in the applicable requirement and does not need to be included in this report. This report shall be submitted not later than thirty (30) days after the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34). A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit.
- (b) The address for report submittal is:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251
- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.
- (d) The first report shall cover the period commencing on the date of issuance of this permit or the date of initial start-up, whichever is later, and ending on the last day of the reporting period. Reporting periods are based on calendar years, unless otherwise specified in this permit. For the purpose of this permit "calendar year" means the twelve (12) month period from January 1 to December 31 inclusive.

Stratospheric Ozone Protection

C.21 Compliance with 40 CFR 82 and 326 IAC 22-1

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with applicable standards for recycling and emissions reduction.

SECTION D.1 EMISSIONS UNIT OPERATION CONDITIONS**Facility Description [326 IAC 2-7-5(15)]:**

Natural gas-fired boiler and furnaces, which include the following:

Unit ID	Unit Description	Maximum Design Capacity (MMBtu/hr heat input)	Year Constructed
2-5027	Large Line Bar Furnace	20.5	1938
2-5075	Medium Line Bar Furnace	13.0	1956

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]**D.1.1 Particulate Matter less than 10 microns in diameter (PM₁₀)[326 IAC 6.8-2]**

Pursuant to 326 IAC 6.8-2-4(b) (Lake County: PM₁₀ Emission Requirements), Large Line Bar Furnace (Unit ID 2-5027), and Medium Line Bar Furnace (Unit ID 2-5075) shall fire natural gas only.

SECTION D.2 EMISSIONS UNIT OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]: Coil Spring Grinders, which include the following:

Unit ID	Unit Description	Maximum Design Rate <i>(tons springs ground per hour)</i>
3-0386	#2 Besley Ferris Wheel Grinder	1.11
3-0389	Gardner Tub Grinder	0.55
3-0385	#1 Besley Ferris Wheel Grinder	1.55
3-0394	Besley Swing Grinder	0.35
3-0249	Gardner Paddle Wheel Grinder	0.15
3-0247	Torrington Ferris Wheel Grinder	0.91
3-0244	#1 Mattison (Large) Grinder	2.15
3-0393	#2 Mattison (Small) Grinder	2.15
3-0396	Vertical Opposing Disc Grinder	1.11
3-0397	Vertical Opposing Disc Grinder	1.55

All the coil spring grinders above are controlled using a pulse-jet baghouse, identified as 3-3037, exhausting to Stack 3.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.2.1 Particulate Matter Limitations for Lake County [326 IAC 6.8]

Pursuant to 326 IAC 6.8-1-2, particulate matter emissions from the stack of the baghouse controlling emissions from the Vertical Opposing Disc Grinders 3-0396 and 3-0397 shall not exceed 0.03 grain per dry standard cubic foot (dscf).

D.2.2 Particulate Matter less than 10 microns in diameter (PM₁₀) [326 IAC 6.8-2-4]

Pursuant to 326 IAC 6.8-2-4(a) (Lake County PM₁₀ Emission Requirements), emissions of particulate matter less than ten microns in diameter (PM₁₀) from the following coil spring grinders shall be limited to the following:

Unit ID	Emission Limit <i>(lb/hr)</i>
Stack serving the following spring grinders: 3-0244, 3-0247, 3-0249, 3-0385, 3-0386, 3-0389, 3-0393, and 3-0394	2.085

D.2.3 PSD Minor Limits [326 IAC 2-2]

PM and PM₁₀ emissions shall be limited to:

Emission Unit	ID	PM Limit (lb/hr)	PM ₁₀ Limit (lb/hr)
#1 Mattison (Large) Grinder	3-0244	0.99	2.085
Torrington Ferris Wheel Grinder	3-0247		
Gardner Paddle Wheel Grinder	3-0249		
#1 Besley Ferris Wheel Grinder	3-0385		
#2 Besley Ferris Wheel Grinder	3-0386		
Gardner Tub Grinder	3-0389		
#2 Mattison (Small) Grinder	3-0393		
Besley Swing Grinder	3-0394		1.89
Vertical Opposing Disc Grinder	3-0396		2.64
Vertical Opposing Disc Grinder	3-0397		

Compliance with these emission limits combined with the limits in Conditions D.3.4 and D.7.3, and the unrestricted potential to emit PM and PM₁₀ emissions from all other equipment at this source will limit the potential to emit of PM and PM₁₀ from the entire source to less than two hundred fifty (250) tons per year, each. Therefore the requirements of 326 IAC 2-2 (PSD) are not applicable to the entire source for PM and PM₁₀.

D.2.4 Nonattainment New Source Review Minor Limit [326 IAC 2-1.1-5]

PM_{2.5} emissions shall be limited to:

Emission Unit	ID	PM _{2.5} Limit (lb/hr)
#1 Mattison (Large) Grinder	3-0244	0.99
Torrington Ferris Wheel Grinder	3-0247	
Gardner Paddle Wheel Grinder	3-0249	
#1 Besley Ferris Wheel Grinder	3-0385	
#2 Besley Ferris Wheel Grinder	3-0386	
Gardner Tub Grinder	3-0389	
#2 Mattison (Small) Grinder	3-0393	
Besley Swing Grinder	3-0394	
Vertical Opposing Disc Grinder	3-0396	
Vertical Opposing Disc Grinder	3-0397	

Compliance with these emission limits combined with the limits in Conditions D.3.5 and D.7.4, and the unrestricted potential to emit PM_{2.5} emissions from all other equipment at this source will limit the potential to emit from the entire source to less than one hundred (100) tons per year of PM_{2.5}. Therefore the requirements of 326 IAC 2-1.1-5 (Nonattainment New Source Review) are not applicable to the entire source.

D.2.5 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan (PMP) is required for these facilities and the associated baghouse. Section B - Preventive Maintenance Plan contains the Permittee's obligations with regard to the preventive maintenance plan required by this condition.

Compliance Determination Requirements

D.2.6 Particulate Matter [326 IAC 6.8-2] [326 IAC 2-7-6(6)] [326 IAC 2-1.1-5]

In order to comply with Conditions D.2.1, D.2.2, D.2.3, and D.2.4, the baghouse for PM, PM₁₀, and PM_{2.5} control shall be in operation and control emissions at all times when any of the grinders is in operation.

D.2.7 Broken or Failed Bag Detection – Single Compartment Baghouse

- (a) For a single compartment baghouse controlling emissions from a process operated continuously, a failed unit and the associated process shall be shut down immediately until the failed unit has been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).
- (b) For a single compartment baghouse controlling emissions from a batch process, the feed to the process shall be shut down immediately until the failed unit has been repaired or replaced. The emissions unit shall be shut down no later than the completion of the processing of the material in the emissions unit. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Bag failure can be indicated by a significant drop in the baghouse pressure reading with abnormal visible emissions, by an opacity violation, or by other means such as gas temperature, flow rate, air infiltration, leaks, dust traces or triboflows.

D.2.8 Testing Requirements [326 IAC 2-1.1-11]

In order to demonstrate compliance with Conditions D.2.1, D.2.2, and D.2.3, the Permittee shall perform PM, PM₁₀, and PM_{2.5} testing of the baghouse controlling the grinders. This testing shall be conducted utilizing methods as approved by the Commissioner. These tests shall be repeated at least once every five (5) years from the date of the most recent valid compliance demonstration. Testing shall be conducted in accordance with the provisions of 326 IAC 3-6 (Source Sampling Procedures). Section C – Performance Testing contains the Permittee's obligations with regard to the testing required by this condition. PM₁₀ and PM_{2.5} include filterable and condensable PM. A demonstration of compliance with the PM₁₀ limits in D.2.2 may be used to demonstrate compliance with the PM limit in D.2.1.

Compliance Monitoring Requirements [326 IAC 2-7-5(1)] [326 IAC 2-7-6(1)]

D.2.9 Visible Emissions Notations

- (a) Visible emission notations of the baghouse stack exhausts shall be performed at least once per day during normal daylight operations. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) If abnormal emissions are observed, the Permittee shall take reasonable response steps. Observation of abnormal emissions that do not violate an applicable opacity limit is not a deviation from this permit. Failure to take response steps shall be considered a deviation from this permit. Section C – Response to Excursions and Exceedances contains the Permittee's obligations with regard to the reasonable response steps required by this condition.

D.2.10 Parametric Monitoring (Dust Collector)

- (a) The Permittee shall record the total static pressure drop across the baghouse used in conjunction with the coil spring grinders at least once per day when any of the coil spring grinders is in operation. When for any one reading, the pressure drop across the baghouse is outside the normal range of 3.0 and 6.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps. A pressure reading that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps shall be considered a deviation from this permit. Section C – Response to Excursions or Exceedances contains the Permittee's obligations with regard to the reasonable response steps required by this condition.
- (b) The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ and shall be calibrated or replaced at least once every six (6) months.

D.2.11 Broken or Failed Bag Detection – Multi-Compartment Baghouse

In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.2.12 Record Keeping Requirements

- (a) To document the compliance status with Condition D.2.9, the Permittee shall maintain a daily record of visible emission notations of the baghouse stack exhaust. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation (e.g. the process did not operate that day).
- (b) To document the compliance status with Condition D.2.10(a), the Permittee shall maintain a daily record of the pressure drop reading across the baghouse controlling the processes. The Permittee shall include in its daily record when a pressure drop reading is not taken and the reason for the lack of a pressure drop reading (e.g. the process did not operate that day).
- (c) To document the compliance status with Condition D.2.10(b), the Permittee shall maintain records of calibrations of the instrument used for determining the pressure drop across the baghouse.
- (d) Section C - General Record Keeping Requirements contains the Permittee's obligations with regard to the record keeping required by this condition.

SECTION D.3 EMISSIONS UNIT OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]: Coil Spring Manufacturing Process Lines, which include the following:

- (1) Small Line Coil Spring Manufacturing Process, with a maximum capacity of 3,000 lbs/hr of coil springs manufactured, includes an oil quench tank, identified as 3-2821, constructed in 1973, using an electrostatic precipitator, identified as 3-3024, to control particulate emissions (oil mists) generated during the quenching operation, and exhausting to Stack 13. The process also includes a natural gas-fired draw furnace, identified as 2-5163, with a maximum design capacity of 5.1 MMBtu/hr heat input, used to stress-relieve the newly coiled springs after the quench operation.
- (2) Medium Line Coil Spring Manufacturing Process, with a maximum capacity of 5.0 tons/hr of coil springs manufactured, includes an oil quench tank, identified as 3-2838A, permitted in 2011, using a fabric filter, identified as 3-3027A, to control particulate emissions (oil mists) generated during the quenching operation, and exhausting to Stack 14. The process also includes a natural gas-fired draw furnace, identified as 2-5097A, permitted in 2011, with a maximum design capacity of 5.0 MMBtu/hr heat input, used to stress-relieve the newly coiled springs after the quench operation.
- (3) Large Line Coil Spring Manufacturing Process, with a maximum capacity of 10,000 lbs/hr of coil springs manufactured, includes an oil quench tank, identified as 3-2845, constructed in 1959, using an electrostatic precipitator, identified as 3-3036, to control particulate emissions (oil mists) generated during the quenching operation, and exhausting to Stack 15. The process also includes a natural gas-fired draw furnace, identified as 2-5164, with a maximum design capacity of 9.8 MMBtu/hr heat input, used to stress-relieve the newly coiled springs after the quench operation.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.3.1 Particulate Matter less than 10 microns in diameter (PM₁₀) [326 IAC 6.8-2]

Pursuant to 326 IAC 6.8-2-4(a) (Lake County: PM₁₀ Emission Requirements) emissions of particulate matter less than ten microns in diameter (PM₁₀) from these units shall be limited to:

Unit ID	Emission Limit (lb/hr)
Small Line Coil Spring Manufacturing Process (ESP 3-3024)	1.05
Large Line Coil Spring Manufacturing Process (ESP 3-3028)	1.75

D.3.2 Particulate Matter Limitations for Lake County [326 IAC 6.8-1-2]

Pursuant to 326 IAC 6.8-1-2(a) (Particulate Matter Limitations for Lake County) emissions of particulate matter (PM) less from the oil quench tank (3-2838A) shall be limited to 0.03 grains per dry standard cubic foot (gr/dscf).

D.3.3 VOC BACT Minor Limit [326 IAC 8-1-6]

The uncontrolled VOC emissions from this Medium Quench Tank (3-2838A) shall be limited to less than 25 tons per twelve consecutive month period, with compliance determined each month.

This limit shall render the requirements of 326 IAC 8-1-6 (New Facilities; General Reduction Requirements) are not applicable to the medium line quench tank (3-2838A).

D.3.4 PSD Minor Limits [326 IAC 2-2]

PM and PM₁₀ emissions shall be limited to:

Emission Unit	ID	PM Limit (lb/hr)	PM ₁₀ Limit (lb/hr)
Medium Line Quench Tank	3-2838A	2.97	2.97
Small Line Quench Tank	3-2821	2.97	1.05
Large Line Quench Tank	3-2845	2.97	1.75

Compliance with these emission limits combined with the limits in Conditions D.2.3 and D.7.3, and the unrestricted potential to emit PM and PM₁₀ emissions from all other equipment at this source will limit the potential to emit of PM and PM₁₀ from the entire source to less than two hundred fifty (250) tons per year, each. Therefore the requirements of 326 IAC 2-2 (PSD) are not applicable to the entire source for PM and PM₁₀.

D.3.5 Nonattainment New Source Review Minor Limit [326 IAC 2-1.1-5]

PM_{2.5} emissions shall be limited to:

Emission Unit	ID	PM _{2.5} Limit (lb/hr)
Medium Line Quench Tank	3-2838A	2.97
Small Line Quench Tank	3-2821	1.05
Large Line Quench Tank	3-2845	1.75

Compliance with these emission limits combined with the limits in Conditions D.2.4 and D.7.4, and the unrestricted potential to emit PM_{2.5} emissions from all other equipment at this source will limit the potential to emit from the entire source to less than one hundred (100) tons per year of PM_{2.5}. Therefore the requirements of 326 IAC 2-1.1-5 (Nonattainment New Source Review) are not applicable to the entire source.

D.3.6 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan (PMP) is required for these facilities and their associated control devices. Section B - Preventive Maintenance Plan contains the Permittee's obligations with regard to the preventive maintenance plan required by this condition.

Compliance Determination Requirements [326 IAC 2-7-5(1)] [326 IAC 2-7-6(1)]

D.3.7 Particulate Matter [326 IAC 6.8-2] [326 IAC 2-7-6(6)] [326 IAC 2-1.1-5] [40 CFR 64]

- (a) In order to comply with Conditions D.3.1, D.3.4, and D.3.5, the electrostatic precipitators for PM, PM₁₀, and PM_{2.5}, control shall be in operation and control emissions at all times when the associated Small Line Coil Spring Manufacturing Process or Large Line Coil Spring Manufacturing Process is in operation.
- (b) In order to comply with Conditions D.3.2, D.3.4, and D.3.5, the baghouse for PM, PM₁₀, PM_{2.5}, and VOC control shall be in operation and control emissions at all times when the associated Medium Line Coil Spring Manufacturing Process is in operation.

D.3.8 Testing Requirements [326 IAC 2-1.1-11] [40 CFR 64]

- (a) In order to demonstrate compliance with Conditions D.3.2, D.3.4, and D.3.5, the Permittee shall perform PM, PM₁₀, and PM_{2.5}, testing of the baghouse controlling the oil quench tank (3-2838A) associated with the Medium Line Coil Spring Manufacturing Process no later than one hundred eighty (180) days after the start of operation of the Medium Line Coil Spring Manufacturing Process. PM₁₀ and PM_{2.5} includes filterable and condensable PM.

- (b) In order to demonstrate compliance with Conditions D.3.1, D.3.4 and D.3.5, the Permittee shall perform PM, PM₁₀, and PM_{2.5}, testing of the electrostatic precipitator controlling the oil quench tank (3-2821) associated with the Small Line Coil Spring Manufacturing Process, and the electrostatic precipitator controlling the oil quench tank (3-2845) associated with the Large Line Coil Spring Manufacturing Process no later than three hundred sixty-five (365) days of issuance of SPM No. 089-30862-00204. PM₁₀ and PM_{2.5} includes filterable and condensable PM.
- (c) In order to demonstrate compliance with Condition D.3.3, the Permittee shall perform testing of VOC emissions from the inlet and outlet of the baghouse controlling the medium line quench tank (3-2838A) no later than one hundred eighty (180) days of issuance of SSM No. 089-30392-00204.

PM, PM₁₀, PM_{2.5}, and VOC testing shall be conducted utilizing methods as approved by the Commissioner. These PM, PM₁₀, PM_{2.5}, tests shall be repeated at least once every five (5) years from the date of this valid compliance demonstration. Testing shall be conducted in accordance with the provisions of 326 IAC 3-6 (Source Sampling Procedures). Section C – Performance Testing contains the Permittee's obligations with regard to the testing required by this condition.

D.3.9 Volatile Organic Compounds (VOC)

Compliance with Condition D.3.3 shall be determined using the following equation:

$$E = \frac{T \times EF}{2000lb / ton}$$

where:

E = Uncontrolled VOC emissions in tons/month

T = Process Throughput in tons/month

EF = Uncontrolled VOC (point source and fugitives) emission factor in lb VOC /ton steel, as determined by a valid compliance demonstration

Compliance Monitoring Requirements [326 IAC 2-7-5(1)] [326 IAC 2-7-6(1)] [40 CFR 64]

D.3.10 Visible Emissions Notations [40 CFR 64]

(a) Visible Emissions Notations:

- (1) Visible emission notations of the electrostatic precipitator stack exhaust for the Large Line Coil Spring Manufacturing Process shall be performed at least once per day during normal daylight operations.
- (2) Visible emission notations of the baghouse stack exhaust for the Medium Line Coil Spring Manufacturing Process shall be performed at least once per day during normal daylight operations.
- (3) Visible emission notations of the electrostatic precipitator stack exhaust for the Small Line Coil Spring Manufacturing Process shall be performed at least once per day during normal daylight operations.

A trained employee shall record whether emissions are normal or abnormal.

- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.

- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) If abnormal emissions are observed, the Permittee shall take reasonable response steps. Observation of abnormal emissions that do not violate an applicable opacity limit is not a deviation from this permit. Failure to take response steps shall be considered a deviation from this permit. Section C – Response to Excursions and Exceedances contains the Permittee's obligations with regard to the reasonable response steps required by this condition.

D.3.11 Parametric Monitoring(Baghouse) [40 CFR 64]

- (a) The Permittee shall record the total static pressure drop across the baghouse used in conjunction with the Medium Line Coil Spring Manufacturing Process at least once per day when the Medium Line Coil Spring Manufacturing Process is in operation. When for any one reading, the pressure drop across the baghouse is outside the normal range of 3.0 and 6.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps. A pressure reading that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps shall be considered a deviation from this permit. Section C – Response to Excursions and Exceedances contains the Permittee's obligations with regard to the reasonable response steps required by this condition.
- (b) The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ and shall be calibrated or replaced at least once every six (6) months.

D.3.12 Broken or Failed Bag Detection – Multi-Compartment Baghouse

In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19] [40 CFR 64]

D.3.13 Record Keeping Requirements [40 CFR 64]

- (a) To document the compliance status with Conditions D.3.3 and D.3.9, the Permittee shall maintain records of the monthly VOC emissions (tons) and the monthly process throughput (tons) for the medium line quench tank (3-2838A).
- (b) To document the compliance status with Condition D.3.10, the Permittee shall maintain daily records of visible emission notations of the Large Line Coil Spring Manufacturing Process and Small Line Coil Spring Manufacturing Process electrostatic precipitator stack exhausts and the Medium Line Coil Spring Manufacturing Process baghouse stack exhaust. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation (e.g. the process did not operate that day).

- (c) To document the compliance status with Condition D.3.11, the Permittee shall maintain a daily record of the pressure drop reading across the baghouse controlling the process. The Permittee shall include in its daily record when a pressure drop reading is not taken and the reason for the lack of a pressure drop reading (e.g. the process did not operate that day).
- (d) Section C - General Record Keeping Requirements contains the Permittee's obligations with regard to the record keeping required by this condition.

D.3.14 Reporting Requirements

A quarterly summary of the information to document the compliance status with Conditions D.3.3 (uncontrolled fugitive VOC emissions and controlled VOC emissions from the medium line quench tank (3-2838A)), and D.3.9, shall be submitted using the reporting forms located at the end of this permit, or their equivalent, no later than thirty (30) days following the end of each quarter. The report submitted by the Permittee does require a certification that meets the requirements of 326 IAC 2-7-6(1) by a "responsible official" as defined by 326 IAC 2-7-1(34). Section C - General Reporting Requirements contains the Permittee's obligations with regard to the reporting required by this condition.

SECTION D.4 EMISSIONS UNIT OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Paint Spray Booths, which include the following:

- (1) Paint Spray Booth, identified as 3-2715, using dry filters - double wall as PM control, constructed in 1989.
- (2) Paint Spray Booth, identified as 3-2714, using dry filters - double wall as PM control, constructed in 1980.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.4.1 Volatile Organic Compounds (VOC) [326 IAC 8-1-2] [326 IAC 8-2-9]

Pursuant to 326 IAC 8-2-9 (Miscellaneous Metal Coating Operations), the volume weighted average volatile organic compound (VOC) content of coating applied at each of the two (2) paint spray booths, identified as 3-2715 and 3-2714, shall be limited to 2.8 pounds of VOC per gallon of coating less water, as delivered to the applicator for any calendar day, for air-dried/general, one component coatings.

Compliance with the VOC content limit shall be determined pursuant to 326 IAC 8-1-2(a)(7), using a volume weighted average of coatings on a daily basis. The volume weighted average shall be determined by the following equation:

$$A = [\sum(C \times U) / \sum U]$$

Where:

A = volume weighted average in pounds VOC per gallon less water, as applied
C = VOC content of the coating in pounds VOC per gallon less water, as applied; and
U = usage rate of the coating in gallons per day.

Solvent sprayed from application equipment during cleanup or color changes shall be directed into containers. Such containers shall be closed as soon as such solvent spraying is complete, and the waste solvent shall be disposed of in such a manner that evaporation is minimized.

D.4.2 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan (PMP) is required for these facilities and their dry filters. Section B - Preventive Maintenance Plan contains the Permittee's obligations with regard to the preventive maintenance plan required by this condition.

Compliance Determination Requirements

D.4.3 Volatile Organic Compounds (VOC) [326 IAC 8-1-4] [326 IAC 8-1-2]

Compliance with the VOC content and usage limitations contained in Condition D.4.1 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) by preparing or obtaining from the manufacturer copies of the "as supplied" and "as applied" VOC data sheets. IDEM, OAQ reserve the authority to determine compliance using Method 24 in conjunction with the analytical procedures specified in 326 IAC 8-1-4.

D.4.4 Particulate Matter (PM) [326 IAC 2-7-6]

Pursuant to 326 IAC 2-7-6, the dry filters for PM control shall be in operation at all times when the associated paint spray booths are in operation.

Compliance Monitoring Requirements [326 IAC 2-7-5(1)] [326 IAC 2-7-6(1)]

D.4.5 Monitoring Requirements

- (a) Daily inspections shall be performed to verify the placement, integrity, and particle loading of the dry filters. To monitor the performance of the dry filters, weekly observations of overspray from each paint booth shall be made while the booth is in operation. If a condition exists which should result in a response step, the Permittee shall take a reasonable response.
- (b) Monthly inspections shall be performed of coating emissions from the stack of paint spray booth, identified as 3-2714, by ground-level examination and the presence of overspray on the nearby ground of both paint spray booths, identified as 3-2715 and 3-2714. The Response to Excursions or Exceedances for these units shall contain troubleshooting contingency and response steps for when a noticeable change in overspray emission, or evidence of overspray emission is observed. If a condition exists which should result in a response step, the Permittee shall take a reasonable response.
- (c) Failure to take response steps shall be considered a deviation of this permit. Section C – Response to Excursions or Exceedances contains the Permittee's obligations with regard to the reasonable response steps required by this condition.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.4.6 Record Keeping Requirements

- (a) To document the compliance status with Condition D.4.1, the Permittee shall maintain records of the following:
 - (1) The dates of operation, per paint spray booth.
 - (2) The quantity and VOC content of each coating less water and solvent used per day of operation, per paint spray booth.
 - (A) Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used.
 - (B) Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents.
 - (3) The volume weighted VOC content of the coatings less water as applied per day of operation, per paint spray booth.
- (b) To document the compliance status with Condition D.4.5, the Permittee shall maintain records of daily inspections of the dry filters, weekly paint booth overspray observations, and monthly inspections of nearby ground for presence of overspray.
- (c) Section C - General Record Keeping Requirements contains the Permittee's obligations with regard to the record keeping required by this condition.

SECTION D.5 EMISSIONS UNIT OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Coil Spring Coating Dip Tanks, for application of rust preventative coatings, which include the following:

Unit ID	Coating
3-2813	Water-based Clear Coating
3-2865	Water-based Clear Coating
3-2865A	Water-based Clear Coating
3-2867	Water-based Clear Coating
3-2870	Water-based Clear Coating
3-2869	Solvent-based or Water-based Clear Coating
3-2872	Solvent-based or Water-based Clear Coating
3-2873	Solvent-based or Water-based Clear Coating

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.5.1 Volatile Organic Compounds (VOC) [326 IAC 8-1-2] [326 IAC 8-2-9]

- (a) Pursuant to 326 IAC 8-2-9 (Miscellaneous Metal Coating Operations), the volume weighted average volatile organic compound (VOC) content of clear coating applied at each of the coating dip tanks shall be limited to 2.8 pounds of VOC per gallon of coating less water, as delivered to the applicator for any calendar day, for air-dried/general, one component coatings.
- (b) Compliance with the VOC content limits in Permit Conditions D.5.1(a) and (b) shall be determined pursuant to 326 IAC 8-1-2(a)(7), using a volume weighted average of coatings on a daily basis. The volume-weighted average shall be determined by the following equation:

$$A = [\sum(C \times U) / \sum U]$$

Where:

A = volume weighted average in pounds VOC per gallon less water, as applied
C = VOC content of the coating in pounds VOC per gallon less water, as applied; and
U = usage rate of the coating in gallons per day.

D.5.2 PSD Minor Limit [326 IAC 2-2]

VOC emissions shall be limited to:

Emission Unit	ID	VOC Limit (ton/yr)
Dip Coating	3-2813	74.81
Dip Coating	3-2865	
Dip Coating	3-2865A	
Dip Coating	3-2867	
Dip Coating	3-2870	
Dip Coating	3-2869	55.19
Dip Coating	3-2872	
Dip Coating	3-2873	

Compliance with these emission limits combined with the limit in Condition D.3.3, and the potential to emit VOC emissions from all other equipment at this source will limit the potential to emit of VOC from the entire source to less than two hundred fifty (250) tons per year. Therefore the requirements of 326 IAC 2-2 (PSD) are not applicable to the entire source for VOC.

Compliance Determination Requirements

D.5.3 Volatile Organic Compounds (VOC) [326 IAC 8-1-4] [326 IAC 8-1-2]

Compliance with the VOC content and usage limitations contained in Condition D.5.1 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) by preparing or obtaining from the manufacturer the copies of "as supplied" and "as applied" VOC data sheets. IDEM, OAQ reserves the authority to determine compliance using Method 24 in conjunction with the analytical procedures specified in 326 IAC 8-1-4.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.5.4 Record Keeping Requirements

- (a) To document the compliance status with Conditions D.5.1 and D.5.2, the Permittee shall maintain monthly records of the following for compliant coatings:
- (1) The dates of operation during each month, per coating type.
 - (2) The quantity and VOC content of each coating less water and solvent used each month, per coating type (e.g., water-based clear coatings, solvent-based clear coatings, or other coatings).
 - (A) Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used.
 - (B) Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents.
 - (3) The volume weighted average VOC content of the coatings less water as applied per day of operation, per coating type (e.g., water-based clear coatings, solvent-based clear coatings, or other coatings).
 - (4) In the event solvent is added to a compliant coating by the Permittee, the Permittee shall maintain daily records of the information required in Condition D.5.3(a)(1)-(3) for the coating and solvent added.
- (b) Section C - General Record Keeping Requirements contains the Permittee's obligations with regard to the record keeping required by this condition.

SECTION D.6 EMISSIONS UNIT OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Natural gas-fired furnaces, which include the following:

Unit ID	Unit Description	Maximum Design Capacity (MMBtu/hr heat input)
2-5085	Small Line Bar Furnace	8.0
2-5006	Small Line Slot Furnace	1.5
2-5014	Medium Line Slot Furnace	5.2
2-5015	Medium Line Slot Furnace	(for Units 2-5014 and 2-5015 combined)
2-5036	Large Line Slot Furnace	2.5
2-5163	Small Line Draw Furnace	5.1
2-5097A	Medium Line Draw Furnace	5.0
2-5164	Large Line Draw Furnace	9.8

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.6.1 Particulate Matter less than 10 microns in diameter (PM₁₀) [326 IAC 6.8-2]

Pursuant to 326 IAC 6.8-2-4(b) (Lake County: PM₁₀ and total suspended particulates (TSP) emissions), the Small Line Bar Furnace (2-5085), Small Line Slot Furnace (2-5006), Medium Line Slot Furnaces (2-5014 and 2-5015), Large Line Slot Furnace (2-5036), Small Line Draw Furnace (2-5163), and Large Line Draw Furnace (2-5164) shall fire natural gas only.

D.6.2 Particulate Matter Limitations for Lake County [326 IAC 6.8-1-2]

Pursuant to 326 IAC 6.8-1-2(a) (Particulate Matter Limitations for Lake County) emissions of particulate matter (PM) from the Medium Line Draw Furnace (2-5097A), shall be limited to 0.03 grains per dry standard cubic foot (gr/dscf).

SECTION D.7 EMISSIONS UNIT OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

- (b) Shot Peeners, regulated by 326 IAC 6.8-2-4(a), which include the following units:
- (1) Pangborn Shot Peener, identified as 3-1804, with a maximum capacity of 0.012 tons steel shots used per hour, using a baghouse, identified as 3-3017, as control, constructed in 1964, and exhausting to Stack 9.
 - (2) Wheelabrator Shot Peener, identified as 3-1821, with a maximum capacity of 0.12 tons steel shots used per hour, using a baghouse, identified as 3-3022, as control, constructed in 1972, and exhausting to Stack 11.
 - (3) Wheelabrator Shot Peener, identified as 3-1823, with a maximum capacity of 0.21 tons steel shots used per hour, using a baghouse, identified as 3-1823, as control, constructed in 1980, and exhausting to Stack 12.
 - (4) One (1) Shot Peener, identified as 3-1824, permitted in 2011, with a maximum capacity of 5.15 tons steel parts used per hour, using a baghouse, identified as 3-3024, for control of particulate matter emissions, and exhausting to Stack 24.
 - (5) One (1) Shot Peener, identified as 3-1825, permitted in 2011, with a maximum capacity of 5.15 tons steel parts used per hour, using a baghouse, identified as 3-3025, for control of particulate matter emissions, and exhausting to Stack 25.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.7.1 Particulate Matter less than 10 microns in diameter (PM₁₀) [326 IAC 6.8-2]

Pursuant to 326 IAC 6.8-2-4(a) (Lake County: PM₁₀ Emission Requirements) emissions of particulate matter less than ten microns in diameter (PM₁₀) from these units shall be limited to:

Facility	Emission Limit (lb/ton)	Emission Limit (lb/hr)
Pangborn Shot Peener (3-1804)	0.011	0.06
Wheelabrator Shot Peener (3-1821)	0.016	0.06
Wheelabrator Shot Peener (3-1823)	0.016	0.06

D.7.2 Particulate Matter Limitations for Lake County [326 IAC 6.8-1-2]

Pursuant to 326 IAC 6.8-1-2(a) (Particulate Matter Limitations for Lake County) emissions of particulate matter (PM) from Shot Peener (3-1824) and Shot Peener (3-1825) shall be limited to 0.03 grains per dry standard cubic foot (gr/dscf).

D.7.3 PSD Minor Limits [326 IAC 2-2]

PM and PM₁₀ emissions shall be limited to:

Emission Unit	ID	PM Limit (lb/hr)	PM ₁₀ Limit (lb/hr)
Shot Peener	3-1824	0.99	0.99
Shot Peener	3-1825	0.99	0.99
Shot Peener	3-1804	0.99	0.06
Shot Peener	3-1821	0.99	0.06

Shot Peener	3-1823	0.99	0.06
-------------	--------	------	------

Compliance with these emission limits combined with the limits in Conditions D.2.3 and D.3.4, and the unrestricted potential to emit PM and PM₁₀ emissions from all other equipment at this source will limit the potential to emit of PM and PM₁₀ from the entire source to less than two hundred fifty (250) tons per year, each. Therefore the requirements of 326 IAC 2-2 (PSD) are not applicable to the entire source for PM and PM₁₀.

D.7.4 Nonattainment New Source Review Minor Limit [326 IAC 2-1.1-5]

PM_{2.5} emissions shall be limited to:

Emission Unit	ID	PM _{2.5} Limit (lb/hr)
Shot Peener	3-1824	0.99
Shot Peener	3-1825	0.99
Shot Peener	3-1804	0.06
Shot Peener	3-1821	0.06
Shot Peener	3-1823	0.06

Compliance with these emission limits combined with the limits in Conditions D.2.4 and D.3.5, and the unrestricted potential to emit PM_{2.5} emissions from all other equipment at this source will limit the potential to emit from the entire source to less than one hundred (100) tons per year of PM_{2.5}. Therefore the requirements of 326 IAC 2-1.1-5 (Nonattainment New Source Review) are not applicable to the entire source.

D.7.5 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan (PMP) is required for these facilities and their associated baghouses. Section B - Preventive Maintenance Plan contains the Permittee's obligations with regard to the preventive maintenance plan required by this condition.

Compliance Determination Requirements [326 IAC 2-7-5(1)] [326 IAC 2-7-6(1)]

D.7.6 Particulate Matter [326 IAC 6.8-2] [326 IAC 2-7-6(6)] [326 IAC 2-1.1-5]

In order to comply with Conditions D.7.1, D.7.2, D.7.3, and D.7.4, the bag filter dust collectors for PM, PM₁₀, and PM_{2.5} control shall be in operation and control emissions from their associated facilities at all times that the facilities are in operation.

D.7.7 Testing Requirements [326 IAC 2-1.1-11]

- (a) In order to demonstrate compliance with Conditions D.7.2, D.7.3, and D.7.4, the Permittee shall perform PM, PM₁₀, and PM_{2.5} testing on one of the baghouses controlling Shot Peener (3-1824) or Shot Peener (3-1825) no later than one hundred eighty (180) days after the start of operation of each Shot Peener. PM₁₀ and PM_{2.5} includes filterable and condensable PM.
- (b) In order to demonstrate compliance with Conditions D.7.1, D.7.3 and D.7.4, the Permittee shall perform PM, PM₁₀, and PM_{2.5} testing on one of the baghouses controlling Shot Peener (3-1804), Shot Peener (3-1821), or Shot Peener (3-1823) no later than three hundred sixty-five (365) days of issuance of SPM No. 089-30862-00204. PM₁₀ and PM_{2.5} includes filterable and condensable PM.

This testing shall be conducted utilizing methods as approved by the Commissioner. These tests shall be repeated at least once every five (5) years on alternate baghouses from the date of this valid compliance demonstration. Testing shall be conducted in accordance with the provisions of 326 IAC 3-6 (Source Sampling Procedures). Section C – Performance Testing contains the Permittee's obligations with regard to the testing required by this condition.

Compliance Monitoring Requirements [326 IAC 2-7-5(1)] [326 IAC 2-7-6(1)]

D.7.8 Visible Emissions Notations

- (a) Visible emission notations of the baghouse stack exhausts for Shot Peener (3-1824) and Shot Peener (3-1825) shall be performed at least once per day during normal daylight operations. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) If abnormal emissions are observed, the Permittee shall take reasonable response steps. Observation of abnormal emissions that do not violate an applicable opacity limit is not a deviation from this permit. Failure to take response steps shall be considered a deviation from this permit. Section C – Response to Excursions and Exceedances contains the Permittee's obligations with regard to the reasonable response steps required by this condition.

D.7.9 Parametric Monitoring

- (a) The Permittee shall record the total static pressure drop across the baghouses used in conjunction with Shot Peener (3-1824) and Shot Peener (3-1825) at least once per day when any of Shot Peeners are in operation. When for any one reading, the pressure drop across a baghouse is outside the normal range of 3.0 and 6.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps. A pressure reading that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps shall be considered a deviation from this permit. Section C – Response to Excursions and Exceedances contains the Permittee's obligations with regard to the reasonable response steps required by this condition.
- (b) The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ and shall be calibrated or replaced at least once every six (6) months.

D.7.10 Broken or Failed Bag Detection – Multi-Compartment Baghouse

In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.7.11 Record Keeping Requirements

- (a) To document the compliance status with Condition D.7.8, the Permittee shall maintain daily records of visible emission notations of the Shot Peener (3-1824) and Shot Peener (3-1825) baghouse stack exhausts. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation (e.g. the process did not operate that day).
- (b) To document the compliance status with Condition D.7.9, the Permittee shall maintain a daily record of the pressure drop reading across the baghouses controlling Shot Peener (3-1824) and Shot Peener (3-1825). The Permittee shall include in its daily record when a pressure drop reading is not taken and the reason for the lack of a pressure drop reading (e.g. the process did not operate that day).
- (c) Section C - General Record Keeping Requirements contains the Permittee's obligations with regard to the record keeping required by this condition.

SECTION D.8 EMISSIONS UNIT OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]:

Two (2) Cold Cleaner Degreasers, solvent not remotely stored.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.8.1 Volatile Organic Compounds (VOC) [326 IAC 8-3]

- (a) Pursuant to 326 IAC 8-3-8 (Material requirements for cold cleaning degreasers), users of solvents for use in cold cleaner degreaser operations located in Clark, Floyd, Lake, and Porter Counties shall not operate a cold cleaning degreaser with a solvent vapor pressure that exceeds (1) millimeter of mercury (nineteen-thousandths (0.019) pound per square inch) measured at twenty (20) degrees Celsius (sixty-eight degrees Fahrenheit (68 °F)).
- (b) Pursuant to 326 IAC 8-3-5(a) (Cold Cleaner Degreaser Operation and Control), the Permittee shall ensure that the following requirements are met:
 - (1) Equip the degreaser with a cover. The cover must be designed so that it can be easily operated with one (1) hand if:
 - (A) The solvent volatility is greater than two (2) kiloPascals (fifteen (15) millimeters of mercury or three-tenths (0.3) pounds per square inch) measured at thirty-eight degrees Celsius (38 °C) (one hundred degrees Fahrenheit (100 °F));
 - (B) The solvent is agitated; or
 - (C) The solvent is heated.
 - (2) Equip the degreaser with a facility for draining cleaned articles. If the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38 °C) (one hundred degrees Fahrenheit (100 °F)), then the drainage facility must be internal such that articles are enclosed under the cover while draining. The drainage facility may be external for applications where an internal type cannot fit into the cleaning system.
 - (3) Provide a permanent, conspicuous label which lists the operating requirements outlined in subsection (b).
 - (4) The solvent spray, if used, must be a solid, fluid stream and shall be applied at a pressure which does not cause excessive splashing.
 - (5) Equip the degreaser with one (1) of the following control devices if the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38 °C) (one hundred degrees Fahrenheit (100 °F)), or if the solvent is heated to a temperature greater than forty-eight and nine-tenths degrees Celsius (48.9 °C) (one hundred twenty degrees Fahrenheit (120 °F)):

- (A) A freeboard that attains a freeboard ratio of seventy-five hundredths (0.75) or greater.
 - (B) A water cover when solvent is used is insoluble in, and heavier than, water.
 - (C) Other systems of demonstrated equivalent control such as a refrigerated chiller or carbon adsorption. Such systems shall be submitted to the U.S. EPA as a SIP revision.
- (C) Pursuant to 326 IAC 8-3-5(b) (Cold Cleaner Degreaser Operation and Control), the Permittee ensure that the following operating requirements are met:
- (1) Close the cover whenever articles are not being handled in the degreaser.
 - (2) Drain cleaned articles for at least fifteen (15) seconds or until dripping ceases.
 - (3) Store waste solvent only in covered containers and prohibit the disposal or transfer of waste solvent in any manner in which greater than twenty percent (20%) of the waste solvent by weight could evaporate.

Compliance Determination Requirements

D.8.2 Volatile Organic Compounds (VOC) [326 IAC 8-3-8] [326 IAC 8-3-5]

- (a) Compliance with the solvent vapor pressure limitations contained in Condition D.8.1(a) shall be determined pursuant to 326 IAC 8-1-4(h) or obtaining from the manufacturer copies of the Material Safety Data Sheets (MSDS).
- (b) Pursuant to 326 IAC 8-3-5(b) (Cold Cleaner Degreaser Operation and Control), the owner or operator of a cold cleaning shall close the degreaser covers whenever articles are not being handled in the degreasers.

Air Pollution Control Division
5925 Calumet Avenue
Hammond, IN 46320

**RE: PART 70 OPERATING PERMIT NO. T089-8273-00204 – FUGITIVE DUST CONTROL PLAN;
EMERGENCY REDUCTION PLAN**

Mr. Biscocho:

Pursuant to Section C.5 ("Fugitive Dust Emissions") and Section C.17 ("Emergency Reduction Plans") of the permit referenced above, ASF-Keystone, Inc. is enclosing the required Plans.

Should you have any questions or concerns, please call Bob Wille at 931-1900, extension 225, or e-mail him at rwille@asfglobal.com. Thank you.

Sincerely,

A handwritten signature in black ink, appearing to read 'G.H. Radermacher', written over a light gray dotted background.

A) Name and Address of Source:

ASF-Keystone, Inc.
4831 Hohman Ave.
Hammond, IN 46327

B) Name and Address of Source Owner:

ASF-Keystone, Inc.
1700 Walnut St.
Granite City, IL 62040

C) Applicable Operations (with Permit Section References)

1) Paved Roads - C.5(a)

All roadways within the boundaries of ASF-Keystone are paved. The current configuration of the roadways within the plant proper, along with plant rules, limit speed to 5 miles per hour.

2) Unpaved Roads - C.5(b)

There exist no unpaved roads within the boundaries of ASF-Keystone.

3) Batch Transfer - C.5(c)

ASF-Keystone has no facility or operation in which batch transfer takes place.

4) Transfer Of Material Onto And Out Of Storage Piles - C.5(d)

ASF-Keystone employs a concrete pad, near the east end of the property, for temporary storage of special (non-hazardous) waste. The waste is periodically transferred by payloader to a twenty-cubic-yard box, immediately adjacent to the pad. The waste is composed steel scale, too heavy to become airborne, and dust from grinding and shotpeening operations. The dust is stored in bags.

5) Storage Piles - C.5(e)

Please see number 4 above.

6) Inplant Transportation Of Material By Truck Or Rail - C.5(f)

While ASF-Keystone engages in transportation of material inplant, neither the material, the roadway, nor the vehicle used produce visible fugitive dust. There are no rail operations.

7) Inplant Transportation of Material by Front-end Loaders and Skip Hoists - C.5(g)

ASF-Keystone has no operation involving inplant transportation of material by front-end loaders and/or skip hoists.

8) Building Enclosing All Or Part Of The Material Processing Equipment - C.5(h)

ASF-Keystone recognizes a potential for fugitive emissions from its electrostatic precipitators. This potential will be addressed by compliance with the visible emissions notation and compliance response requirements of the Permit (Sections D.4.5, D.5.5, D.6.5).

October 29, 2002
Page 4 of 4

9) PM₁₀ Emissions from Building Vents – C.5(i)

Please see number 8 above.

10) Dust Handling Equipment – C.5(j)

All dust created by grinding and shotpeening is confined to bags. The bags are transported to the concrete pad for temporary storage of special waste.

11) Any Facility or Operation not Specified in 326 IAC 6-1-11.1(d)

ASF-Keystone does not have any other facility or operation, other than those specified in numbers 1 through 10 above, that have the potential for producing fugitive dust emissions.

ACTION PLAN FOR TOTAL SUSPENDED PARTICULATE (TSP):

FORECAST: Notify all department managers whose requirement use may be affected by steps taken in alert, warning, and emergency levels of air pollution episode.

ALERT:

- 1) Notify all department managers of alert level of air pollution episode.
- 2) At present, all production furnaces, space heating requirements, and hot water heaters are fired by natural gas.
- 3) All grinders and shot peeners have dust collection.

EMISSION REDUCTION ESTIMATE: 98%

WARNING:

- 1) Notify all department managers of warning level of air pollution episode.
- 2) Prepare to stop all production that is a source of particulate emissions.
- 3) Continue use of natural gas-fired equipment.

EMISSION REDUCTION ESTIMATE: 98%

EMERGENCY:

- 1) Notify all department managers of emergency level of air pollution episode.
- 2) Stop all production that is a source of particulate emissions.
- 3) Limit the use of gas-fired space heating equipment to critical production operations only.
- 4) Dismiss all non-essential and affected employees for the duration of the episode.

EMISSION REDUCTION ESTIMATE: 100%

ACTION PLAN FOR SULFUR OXIDES AS SULFUR DIOXIDE (SO₂):

FORECAST: To the best of our knowledge, ASF-Keystone is a non-significant source of SO₂. Therefore, action will be limited to the emergency level.

ALERT: None

EMISSION REDUCTION ESTIMATE: 0%

WARNING: None

EMISSION REDUCTION ESTIMATE: 0%

EMERGENCY:

- 1) Notify all department managers of emergency level of air pollution episode.
- 2) Stop all production that is a possible source of SO₂ emissions.
- 3) Limit the use of gas-fired space heating equipment to allowable production operations only.
- 3) Dismiss all non-essential and affected employees for the duration of the episode.

EMISSION REDUCTION ESTIMATE: 99%

**Indiana Department of Environmental Management
Office of Air Quality**

**Technical Support Document (TSD)
for a Part 70 Significant Permit Modification**

Source Description and Location

Source Name:	Amsted Rail Company, Inc.
Source Location:	4831 Hohman Avenue, Hammond, IN 46327
County:	Lake
SIC Code:	3493
Operation Permit Renewal No.:	T 089-23826-00204
Operation Permit Renewal Issuance Date:	February 20, 2009
Significant Permit Modification No.:	089-30862-00204
Permit Reviewer:	Kimberly Cottrell

Existing Approvals

The source was issued Part 70 Operating Permit Renewal No. T 089-23826-00204 on February 20, 2009. The source has since received the following approvals:

- (a) Administrative Amendment No. 089-27976-00204, issued on May 28, 2009;
- (b) Significant Source Modification No. 089-30392-00204, issued on July 22, 2011;
- (c) Significant Permit Modification No. 089-30397-00204, issued on August 12, 2011; and
- (d) Administrative Amendment No. 089-30909-00204, issued on September 22, 2011.

County Attainment Status

The source is located in Lake County.

Table 1: County Attainment Status

Pollutant	Designation
SO ₂	Better than national standards.
CO	Attainment effective February 18, 2000, for the part of the city of East Chicago bounded by Columbus Drive on the north; the Indiana Harbor Canal on the west; 148 th Street, if extended, on the south; and Euclid Avenue on the east. Unclassifiable or attainment effective November 15, 1990, for the remainder of East Chicago and Lake County.
O ₃	Attainment effective May 11, 2010, for the 8-hour ozone standard. ¹
PM ₁₀	Attainment effective March 11, 2003, for the cities of East Chicago, Hammond, Whiting, and Gary. Unclassifiable effective November 15, 1990, for the remainder of Lake County.
NO ₂	Cannot be classified or better than national standards.
Pb	Not designated.

Table 1: County Attainment Status	
Pollutant	Designation
¹ The U. S. EPA has acknowledged in both the proposed and final rulemaking for this redesignation that the anti-backsliding provisions for the 1-hour ozone standard no longer apply as a result of the redesignation under the 8-hour ozone standard. Therefore, permits in Lake County are no longer subject to review pursuant to Emission Offset, 326 IAC 2-3. Basic nonattainment designation effective federally April 5, 2005, for PM _{2.5} .	

- (a) **Ozone Standards**
 Volatile organic compounds (VOC) and Nitrogen Oxides (NO_x) are regulated under the Clean Air Act (CAA) for the purposes of attaining and maintaining the National Ambient Air Quality Standards (NAAQS) for ozone. Therefore, VOC and NO_x emissions are considered when evaluating the rule applicability relating to ozone. Lake County has been designated as attainment or unclassifiable for ozone. Therefore, VOC and NO_x emissions were reviewed pursuant to the requirements for Prevention of Significant Deterioration (PSD), 326 IAC 2-2.

- (b) **PM_{2.5}**
 U.S. EPA, in the Federal Register Notice 70 FR 943 dated January 5, 2005, has designated Lake County as nonattainment for PM_{2.5}. On March 7, 2005 the Indiana Attorney General's Office, on behalf of IDEM, filed a law suit with the Court of Appeals for the District of Columbia Circuit challenging U.S. EPA's designation of nonattainment areas without sufficient data. However, in order to ensure that sources are not potentially liable for a violation of the Clean Air Act, the OAQ is following the U.S. EPA's New Source Review Rule for PM_{2.5} promulgated on May 8th, 2008, and effective on July 15th 2008. Therefore, direct PM_{2.5} and SO₂ emissions were reviewed pursuant to the requirements of Nonattainment New Source Review, 326 IAC 2-1.1-5. See the State Rule Applicability – Entire Source section.

- (c) Lake County has been classified as attainment or unclassifiable for PM₁₀, SO₂, NO₂, CO, and Lead. Therefore, these emissions were reviewed pursuant to the requirements for Prevention of Significant Deterioration (PSD), 326 IAC 2-2.

Fugitive Emissions

Since this type of operation is not one of the twenty-eight (28) listed source categories under 326 IAC 2-2, 326 IAC 2-3, or 326 IAC 2-7, and there is no applicable New Source Performance Standard that was in effect on August 7, 1980, fugitive emissions are not counted toward the determination of PSD, Emission Offset, and Part 70 Permit applicability.

Source Status

The table below summarizes the potential to emit of the entire source, prior to the proposed modification, after consideration of all enforceable limits established in the effective permits:

Table 2: Source Status PTE	
Pollutant	Emissions (ton/yr)
CO	11.78
NO _x	27.68
PM	66.71
PM ₁₀	66.99

Pollutant	Emissions (ton/yr)
PM _{2.5}	42.39
SO ₂	0.18
VOC	158.91
Single HAP	<10
Total HAP	<25

- (a) This existing source is not a major stationary source, under PSD (326 IAC 2-2), because no regulated pollutant is emitted at a rate of 250 tons per year or more, and it is not one of the twenty-eight (28) listed source categories, as specified in 326 IAC 2-2-1(gg)(1).
- (b) This existing source is not a major stationary source under Nonattainment New Source Review rules (326 IAC 2-1.1-5) because no nonattainment regulated pollutant is emitted at a rate of 100 tons per year or more.
- (c) This existing source is not a major source of HAPs, as defined in 40 CFR 63.41, because HAPs emissions are less than ten (10) tons per year for any single HAP and less than twenty-five (25) tons per year of a combination of HAPs. Therefore, this source is an area source under Section 112 of the Clean Air Act (CAA).
- (d) These emissions are based upon Significant Permit Modification No. 089-30397-00204, issued on August 12, 2011.

Description of Proposed Modification

The Office of Air Quality (OAQ) has reviewed a modification application, submitted by Amsted Rail Company, Inc. on September 1, 2011, relating to changes to the testing requirements. The changes to the testing dates for this facility are detailed below in the proposed changes section of this technical support document.

Enforcement Issues

There are no pending enforcement actions.

Stack Summary

There is no new construction associated with this modification.

Emission Calculations

There is no new construction associated with this modification and no existing units are being modified.

Permit Level Determination – Part 70

Pursuant to 326 IAC 2-1.1-1(16), Potential to Emit is defined as “the maximum capacity of a stationary source or emission unit to emit any air pollutant under its physical and operational design. Any physical or operational limitation on the capacity of a source to emit an air pollutant, including air pollution control equipment and restrictions on hours of operation or type or amount of material combusted, stored, or processed shall be treated as part of its design if the limitation is enforceable by the U. S. EPA, IDEM, or the appropriate local air pollution control agency.”

There is no new construction associated with this modification and no existing units are being modified.

This modification will be incorporated into the Part 70 Operating Permit through a significant permit modification issued pursuant to 326 IAC 2-7-12(d), because it involves a significant changes to existing requirements.

Federal Rule Applicability Determination

There are no changes to Federal Rule Applicability as a result of this modification.

State Rule Applicability Determination

There are no changes to state rule applicability as a result of this modification.

Compliance Determination and Monitoring Requirements

Permits issued under 326 IAC 2-7 are required to ensure that sources can demonstrate compliance with all applicable state and federal rules on a continuous basis. All state and federal rules contain compliance provisions; however, these provisions do not always fulfill the requirement for a continuous demonstration. When this occurs, IDEM, OAQ, in conjunction with the source, must develop specific conditions to satisfy 326 IAC 2-7-5. As a result, Compliance Determination Requirements are included in the permit. The Compliance Determination Requirements in Section D of the permit are those conditions that are found directly within state and federal rules and the violation of which serves as grounds for enforcement action.

If the Compliance Determination Requirements are not sufficient to demonstrate continuous compliance, they will be supplemented with Compliance Monitoring Requirements, also in Section D of the permit. Unlike Compliance Determination Requirements, failure to meet Compliance Monitoring conditions would serve as a trigger for corrective actions and not grounds for enforcement action. However, a violation in relation to a compliance monitoring condition will arise through a source’s failure to take the appropriate corrective actions within a specific time period.

Compliance Determination Requirements

The changes to the testing dates for this facility are detailed below in the proposed changes section of this technical support document.

Compliance Monitoring Requirements

There are no changes to compliance monitoring requirements as part of this modification.

Proposed Changes

The changes listed below have been made to Part 70 Operating Permit Renewal No. T 089-23826-00204. Deleted language appears as ~~strikethroughs~~ and new language appears in **bold**:

Change No. 1 Emission units (g) through (k) are not specifically regulated; therefore, these units have been moved to Condition A.4. The changes to Condition A.4 are as follows:

A.4 ~~Emission Units~~ **Other Emission Units Insignificant Activities [326 IAC 2-7-1(21)]**

This stationary source also includes the following insignificant activities which are not specifically regulated, as defined in 326 IAC 2-7-1(21):

- (ga) Replacement or repair of electrostatic precipitators, bags in baghouses and filters in other air filtration equipment [326 IAC 2-7-1(21)(G)(X)(AA)].
- (hb) A gasoline fuel transfer dispensing operation handling less than or equal to one thousand three hundred (1,300) gallons per day and filling storage tanks having a capacity of less than ten thousand five hundred (10,500) gallons. Such storage tanks may be in a fixed location or on mobile equipment. [326 IAC 2-7-1(21)(G)(ii)(AA)].
- (ic) A petroleum fuel or other than gasoline dispensing facility, having a storage tank capacity less than or equal to ten thousand five hundred (10,500) gallons, and dispensing three thousand five hundred (3,500) gallons per day or less. [326 IAC 2-7-1(21)(G)(ii)(BB)].
- (jd) Application of oils, greases, lubricants or other non-volatile materials applied as temporary protective coatings.
- (ke) Routine maintenance and repair of buildings, structures or vehicles at the source where air emissions from those activities would not be associated with any production process, including the following: purging of gas lines and purging of vessels. [326 IAC 2-7-1(21)(G)(xvii)].
- (af) Three (3) electric induction heating furnaces, permitted in 2011, each with a maximum capacity of 5.0 tons of metal per hour.

Change No. 2 Condition C.5 has been updated to reference the Fugitive Dust Control Plan as Attachment A as follows:

C.5 **Fugitive Dust Emissions [326 IAC 6.8-10-3]**

Pursuant to 326 IAC 6.8-10-3 (formerly 326 IAC 6-1-11.1) (Lake County Fugitive Particulate Matter Control Requirements), the particulate matter emissions from source wide activities shall meet the following requirements:

(a) - (k) ...

The Permittee shall achieve these limits by controlling fugitive particulate matter emissions according to the Fugitive Dust Control Plan, **included as Attachment A**.

Change No. 3 The particulate matter requirements in Conditions D.2.6, D.2.10 (now D.2.7 and D.2.11), D.3.7 (now D.3.7 and D.3.12), and D.7.6 (now D.7.6 and D.7.10), for compliance determination and monitoring have been updated. There are no change to the permit requirements; IDEM has only reorganized the permit conditions for clarity. The changes are as follows:

D.2.6 Particulate Matter [326 IAC 6.8-2] [326 IAC 2-7-6(6)] [326 IAC 2-1.1-5]

~~(a) Pursuant to 326 IAC 2-7-6 and in~~ In order to comply with Conditions D.2.1, D.2.2, D.2.3, and D.2.4, the baghouse for PM, PM₁₀, and PM_{2.5} control shall be in operation and control emissions at all times when any of the grinders is in operation.

~~(b) In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.~~

D.2.7 Broken or Failed Bag Detection – Single Compartment Baghouse

(a) For a single compartment baghouse controlling emissions from a process operated continuously, a failed unit and the associated process shall be shut down immediately until the failed unit has been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

(b) For a single compartment baghouse controlling emissions from a batch process, the feed to the process shall be shut down immediately until the failed unit has been repaired or replaced. The emissions unit shall be shut down no later than the completion of the processing of the material in the emissions unit. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Bag failure can be indicated by a significant drop in the baghouse pressure reading with abnormal visible emissions, by an opacity violation, or by other means such as gas temperature, flow rate, air infiltration, leaks, dust traces or triboflows.

D.2.11 Broken or Failed Bag Detection – Multi-Compartment Baghouse

In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.

~~D.2.10 Broken or Failed Bag Detection~~

~~(a) In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.~~

- ~~(b) For a single compartment baghouse controlling emissions from a process operated continuously, a failed unit and the associated process shall be shut down immediately until the failed unit has been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B – Emergency Provisions).~~
- ~~(c) For a single compartment baghouse controlling emissions from a batch process, the feed to the process shall be shut down immediately until the failed unit has been repaired or replaced. The emissions unit shall be shut down no later than the completion of the processing of the material in the emissions unit. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B – Emergency Provisions).~~

~~Bag failure can be indicated by a significant drop in the baghouse pressure reading with abnormal visible emissions, by an opacity violation, or by other means such as gas temperature, flow rate, air infiltration, leaks or dust traces.~~

D.3.7 Particulate Matter [326 IAC 6.8-2] [326 IAC 2-7-6(6)] [326 IAC 2-1.1-5] [40 CFR 64]

- ~~(a) Pursuant to 326 IAC 2-7-6 and in order to comply with Conditions D.3.1, D.3.4, and D.3.5, the electrostatic precipitators for PM, PM₁₀, and PM_{2.5}, control shall be in operation and control emissions at all times when the associated Small Line Coil Spring Manufacturing Process or Large Line Coil Spring Manufacturing Process is in operation.~~
- ~~(b) Pursuant to 326 IAC 2-7-6 and in order to comply with Conditions D.3.2, D.3.4, and D.3.5, the baghouse for PM, PM₁₀, PM_{2.5}, and VOC control shall be in operation and control emissions at all times when the associated Medium Line Coil Spring Manufacturing Process is in operation.~~
- ~~(c) In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.~~

D.3.12 Broken or Failed Bag Detection – Multi-Compartment Baghouse

In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.

D.7.6 Particulate Matter [326 IAC 6.8-2] [326 IAC 2-7-6(6)] [326 IAC 2-1.1-5]

- ~~(a) In order to comply with Conditions D.7.1, D.7.2, D.7.3, and D.7.4, the bag filter dust collectors for PM, PM₁₀, and PM_{2.5} control shall be in operation and control emissions from their associated facilities at all times that the facilities are in operation.~~
- ~~(b) In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.~~

D.7.10 Broken or Failed Bag Detection – Multi-Compartment Baghouse

In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.

Change No. 4 The testing requirements in Conditions D.2.7 (now D.2.8), D.3.8, and D.7.7, have been updated. Standard permit language was updated for clarity and the testing deadlines were updated at the request of the Permittee so that testing of like units may be performed at the same time. The revisions are as follows:

D.2.78 Testing Requirements [326 IAC 2-1.1-11]

In order to demonstrate compliance with Conditions D.2.1, D.2.2, and D.2.3, the Permittee shall perform PM, PM₁₀, and PM_{2.5} testing of the baghouse controlling the grinders. This testing shall be conducted utilizing methods as approved by the Commissioner. These tests shall be repeated at least once every five (5) years from the date of ~~this~~ **the most recent** valid compliance demonstration. **Testing shall be conducted in accordance with the provisions of 326 IAC 3-6 (Source Sampling Procedures).** Section C – Performance Testing contains the Permittee's obligations with regard to the testing required by this condition. PM₁₀ and PM_{2.5} include filterable and condensable PM. A demonstration of compliance with the PM₁₀ limits in D.2.2 may be used to demonstrate compliance with the PM limit in D.2.1.

D.3.8 Testing Requirements [326 IAC 2-1.1-11] [40 CFR 64]

- (a) In order to demonstrate compliance with Conditions D.3.2, D.3.4, and D.3.5, the Permittee shall perform PM, PM₁₀, **and** PM_{2.5}, ~~and~~ VOC testing of the baghouse controlling the oil quench tank (3-2838A) associated with the Medium Line Coil Spring Manufacturing Process ~~within~~ **no later than** one hundred eighty (180) days after the start of operation of the Medium Line Coil Spring Manufacturing Process. PM₁₀ and PM_{2.5} includes filterable and condensable PM.
- (b) In order to demonstrate compliance with Conditions D.3.1, D.3.4 and D.3.5, the Permittee shall perform PM, PM₁₀, and PM_{2.5}, testing of the electrostatic precipitator controlling the oil quench tank (3-2821) associated with the Small Line Coil Spring Manufacturing Process, and the electrostatic precipitator controlling the oil quench tank (3-2845) associated with the Large Line Coil Spring Manufacturing Process ~~within~~ **no later than** ~~one hundred eighty (180)~~ **three hundred sixty-five (365)** days of issuance of ~~SSM~~ **SSM SPM** No. 089-~~30392~~**30862**-00204. PM₁₀ and PM_{2.5} includes filterable and condensable PM.
- (c) In order to demonstrate compliance with Condition D.3.3, the Permittee shall perform testing of ~~uncontrolled~~ VOC (~~point source and fugitive~~) emissions **from the inlet and outlet of the baghouse controlling** from the medium line quench tank (3-2838A) ~~within~~ **no later than** one hundred eighty (180) days of issuance of SSM No. 089-30392-00204.

PM, PM₁₀, PM_{2.5}, and VOC testing shall be conducted utilizing methods as approved by the Commissioner. These **PM, PM₁₀, PM_{2.5}**, tests shall be repeated at least once every five (5) years from the date of this valid compliance demonstration. **Testing shall be conducted in accordance with the provisions of 326 IAC 3-6 (Source Sampling Procedures).** Section C – Performance Testing contains the Permittee's obligations with regard to the testing required by this condition.

D.7.7 Testing Requirements [326 IAC 2-1.1-11]

- (a) In order to demonstrate compliance with Conditions D.7.2, D.7.3, and D.7.4, the Permittee shall perform PM, PM₁₀, and PM_{2.5} testing on one of the baghouses controlling Shot Peener (3-1824) ~~and or~~ Shot Peener (3-1825) ~~within~~ **no later than** one hundred eighty (180) days of operation of each Shot Peener. PM₁₀ and PM_{2.5} includes filterable and condensable PM.
- (b) In order to demonstrate compliance with Conditions D.7.1, D.7.3 and D.7.4, the Permittee shall perform PM, PM₁₀, and PM_{2.5} testing on one of the baghouses controlling Shot Peener (~~3-30473-1804~~), Shot Peener (~~3-30223-1821~~), or Shot Peener (3-1823) ~~within~~ **no later than one hundred eighty (180) three hundred sixty-five (365)** days of issuance of ~~SSM~~ **SPM** No. 089-~~3039230862~~**30862**-00204. PM₁₀ and PM_{2.5} includes filterable and condensable PM.

This testing shall be conducted utilizing methods as approved by the Commissioner. These tests shall be repeated at least once every five (5) years on alternate baghouses from the date of this valid compliance demonstration. **Testing shall be conducted in accordance with the provisions of 326 IAC 3-6 (Source Sampling Procedures).** Section C – Performance Testing contains the Permittee's obligations with regard to the testing required by this condition.

Change No. 5 The monitoring requirements in Conditions D.2.8 (now D.2.9), D.2.9 (now D.2.10), D.3.10, D.3.11, D.4.5, D.7.8, and D.7.9, have been updated for clarity as follows:

D.2.89 Visible Emissions Notations

- (a) (d) ...
- (e) ... Section C – Response to Excursions or Exceedances contains the Permittee's obligations with regard to ~~responding to~~ the reasonable response steps required by this condition.

D.2.910 Parametric Monitoring (Dust Collector)

- (a) ... Section C – Response to Excursions or Exceedances contains the Permittee's obligations with regard to ~~responding to~~ the reasonable response steps required by this condition.
- (b) The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ and shall be calibrated **or replaced** at least once every six (6) months.

D.3.10 Visible Emissions Notations [40 CFR 64]

- (a) - (d) ...
- (e) ... Section C – Response to Excursions ~~or~~ **and** Exceedances contains the Permittee's obligations with regard to ~~responding to~~ the reasonable response steps required by this condition.

D.3.11 Parametric Monitoring(Baghouse) [40 CFR 64]

- (a) ... Section C – Response to Excursions or Exceedances contains the Permittee's obligations with regard to ~~responding to~~ the reasonable response steps required by this condition.
- (b) The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ and shall be calibrated **or replaced** at least once every six (6) months.

D.4.5 Monitoring Requirements

- (a) Daily inspections shall be performed to verify the placement, integrity, and particle loading of the dry filters. To monitor the performance of the dry filters, weekly observations of overspray from each paint booth shall be made while the booth is in operation. **If a condition exists which should result in a response step, the Permittee shall take a reasonable response.** ~~The Response to Excursions or Exceedances shall be followed whenever a condition exists which should result in a response step.~~
- (b) Monthly inspections shall be performed of coating emissions from the stack of paint spray booth, identified as 3-2714, by ground-level examination and the presence of overspray on the nearby ground of both paint spray booths, identified as 3-2715 and 3-2714. The Response to Excursions or Exceedances for these units shall contain troubleshooting contingency and response steps for when a noticeable change in overspray emission, or evidence of overspray emission is observed. **If a condition exists which should result in a response step, the Permittee shall take a reasonable response.** ~~The Response to Excursions or Exceedances shall be followed whenever a condition exists which should result in a response step.~~
- (c) ... Section C – Response to Excursions **and** Exceedances contains the Permittee's obligations with regard to ~~responding to~~ the reasonable response steps required by this condition.

D.7.8 Visible Emissions Notations

- (a) - (d) ...
- (e) ... Section C – Response to Excursions **and** Exceedances contains the Permittee's obligations with regard to ~~responding to~~ the reasonable response steps required by this condition.

D.7.9 Parametric Monitoring

- (a) ...
- (b) The instrument used for determining the pressure shall comply with Section C - Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ and shall be calibrated **or replaced** at least once every six (6) months.

Change No. 6 The record keeping requirements in Conditions D.2.11 (now D.2.12), D.3.12 (now D.3.13), D.4.6, D.5.4, and D.7.10, have been updated for clarity as follows:

D.2.4112 Record Keeping Requirements

- (a) To document **the** compliance **status** with Condition D.2.89, the Permittee shall maintain a daily record of visible emission notations of the baghouse stack exhaust. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation (e.g. the process did not operate that day).
- (b) To document **the** compliance **status** with Condition D.2.910(a), the Permittee shall maintain a daily record of the pressure drop reading across the baghouse controlling the processes. The Permittee shall include in its daily record when a pressure drop reading is not taken and the reason for the lack of a pressure drop reading (e.g. the process did not operate that day).
- (c) To document **the** compliance **status** with Condition D.2.910(b), the Permittee shall maintain records of calibrations of the instrument used for determining the pressure drop across the baghouse.

(d) ...

D.3.4213 Record Keeping Requirements [40 CFR 64]

- (a) To document **the** compliance **status** with Conditions D.3.3 and D.3.9, the Permittee shall maintain records of the monthly VOC emissions (tons) and the monthly process throughput (tons) for the medium line quench tank (3-2838A).
- (b) To document **the** compliance **status** with Condition D.3.10, the Permittee shall maintain daily records of visible emission notations of the Large Line Coil Spring Manufacturing Process and Small Line Coil Spring Manufacturing Process electrostatic precipitator stack exhausts and the Medium Line Coil Spring Manufacturing Process baghouse stack exhaust. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation (e.g. the process did not operate that day).
- (c) To document **the** compliance **status** with Condition D.3.11, the Permittee shall maintain a daily record of the pressure drop reading across the baghouse controlling the process. The Permittee shall include in its daily record when a pressure drop reading is not taken and the reason for the lack of a pressure drop reading (e.g. the process did not operate that day).
- (d) ...

D.4.6 Record Keeping Requirements

- (a) To document **the** compliance **status** with Condition D.4.1, the Permittee shall maintain records of the following:

...
- (b) To document **the** compliance **status** with Condition D.4.5, the Permittee shall maintain records of daily inspections of the dry filters, weekly paint booth overspray observations, and monthly inspections of nearby ground for presence of overspray.
- (c) ...

D.5.4 Record Keeping Requirements

- (a) To document **the** compliance **status** with Conditions D.5.1 and D.5.2, the Permittee shall maintain monthly records of the following for compliant coatings:

...
- (b) ...

D.7.10 Record Keeping Requirements

- (a) To document **the** compliance **status** with Condition D.7.8, the Permittee shall maintain daily records of visible emission notations of the Shot Peener (3-1824) and Shot Peener (3-1825) baghouse stack exhausts. The Permittee shall include in its daily record when a visible emission notation is not taken and the reason for the lack of visible emission notation (e.g. the process did not operate that day).

- (b) To document **the** compliance **status** with Condition D.7.9, the Permittee shall maintain a daily record of the pressure drop reading across the baghouses controlling Shot Peener (3-1824) and Shot Peener (3-1825). The Permittee shall include in its daily record when a pressure drop reading is not taken and the reason for the lack of a pressure drop reading (e.g. the process did not operate that day).
- (c) ...

Change No. 7 The reporting requirements in Condition D.3.13 (now D.3.14) have been updated as follows to correct a typographical error:

D.3.1314 Reporting Requirements

... Section C - General Reporting Requirements contains the Permittee's obligations with regard to the ~~record keeping~~**reporting** required by this condition.

Recommendation and Conclusion

The construction and operation of this proposed modification shall be subject to the conditions of the attached proposed Significant Permit Modification No. 089-30862-00204.

- (1) Based on the facts, conditions and evaluations made, OAQ recommends to the IDEM Commissioner that the Significant Permit Modification No. 089-30862-00204 be approved.
- (2) A copy of the preliminary findings is also available on the Internet at: www.in.gov/idem/permits/air/pending.html.
- (3) For additional information about air permits and how the public and interested parties can participate, refer to the IDEM's Guide for Citizen Participation and Permit Guide on the Internet at: www.in.gov/idem/permits/guide/.

Granite City, IL 62040

DATE: January 4, 2012

FROM: Matt Stuckey, Branch Chief
Permits Branch
Office of Air Quality

SUBJECT: Final Decision
Title V - Significant Permit Modification
089 - 30862 - 00204

Enclosed is the final decision and supporting materials for the air permit application referenced above. Please note that this packet contains the original, signed, permit documents.

The final decision is being sent to you because our records indicate that you are the contact person for this application. However, if you are not the appropriate person within your company to receive this document, please forward it to the correct person.

A copy of the final decision and supporting materials has also been sent via standard mail to:
David Sutherland, Plant Mgr
Tom Rarick Environmental Resources Management
OAQ Permits Branch Interested Parties List

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178, or toll-free at 1-800-451-6027 (ext. 3-0178), and ask to speak to the permit reviewer who prepared the permit. If you think you have received this document in error, please contact Joanne Smiddie-Brush of my staff at 1-800-451-6027 (ext 3-0185), or via e-mail at jbrush@idem.IN.gov.
