085-33392I-00102

Dear Mr. Lopshire:

On July 30, 2013, the Office of Air Quality (OAQ) received an interim Significant Source Modification petition from Louis Dreyfus Agriculture Industries LLC, located at 7344 State Road 15 South, in Claypool, Indiana for construction of one (1) Truck Dump No. 3, associated conveyors and legs, one (1) Grain Dryer, one (1) Hot Oil Heater, one (1) Glycerin Refinery, one (1) Glycerin Boiler and one (1) Biodiesel Distillation unit. LDAI is also requesting that the natural gas greenhouse gas limit of 1,652 million cubic feet per twelve (12) consecutive month period be removed from the permit.

A public notice of the interim Significant Source Modification petition was published in Warsaw Time Union on July 29, 2013. The public comment period ended on August 12, 2013.

There were no comments received during the public comment period. This interim Significant Source Modification petition is in effect upon issuance and will expire on the effective date of the final Significant Source Modification permit.

This interim Significant Source Modification petition is in effect upon issuance and will expire on the effective date of the final Significant Source Modification permit.

The interim Significant Source Modification petition may be revoked after the effective date upon a written finding by the Indiana Department of Environmental Management (IDEM) that any of the reasons for denial in 326 IAC 2-13-1(h) exist or if the final Significant Source Modification permit is denied. The IDEM has reviewed this interim Significant Source Modification petition and has not found any such reason. The facilities subject to this approval may not operate until the final Significant Permit Modification is issued by OAQ.

The interim Significant Source Modification petition is federally enforceable. Detailed construction and operation conditions will be specified in the final Significant Source Modification permit 085-33392-00102.

The particulate emissions limitations from the above table shall be calculated using the following equations:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour}$$

and

$$P = \text{process weight rate in tons per hour}$$

and

Interpolation and extrapolation of the data for the process weight rate in excess of sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 55.0 P^{0.11} - 40 \quad \text{where } E = \text{rate of emission in pounds per hour;}$$
