Re: Interim Significant Source Modification Petition Approval
001-33453I-00025

Dear Mr. Quinton:

On September 30, 2013, the Office of Air Quality (OAQ) received an interim Significant Source Modification petition from Fleetwood RV, Inc., located at 1031 U.S. 224 E., in Decatur, Indiana for construction of three (3) paint booths with associated natural gas-fired process heaters and additional woodworking operations.

A public notice of the interim Significant Source Modification petition was published in Decatur Daily Democrat on September 6, 2013. The public comment period ended on September 20, 2013.

There were no comments received during the public comment period. This interim Significant Source Modification petition is in effect upon issuance and will expire on the effective date of the final Significant Source Modification permit.

The interim Significant Source Modification petition may be revoked after the effective date upon a written finding by the Indiana Department of Environmental Management (IDEM) that any of the reasons for denial in 326 IAC 2-13-1(h) exist or if the final Significant Source Modification permit is denied. The IDEM has reviewed this interim Significant Source Modification petition and has not found any such reason. The facilities subject to this approval may not operate until the final Significant Permit Modification is issued by OAQ.

The interim Significant Source Modification petition is federally enforceable. Detailed construction and operation conditions will be specified in the final Significant Source Modification permit 001-33453-00025.

If you have any questions regarding this interim Significant Source Modification petition, please contact Joshua Levering, OAQ, 100 North Senate Avenue, MC 61-53, Room 1003, Indianapolis, Indiana, 46204-2251, or call at (800) 451-6027, and ask for Joshua Levering or extension 4-6543, or dial (317) 234-6543.

 - Daily inspections to verify the placement, integrity and particle loading of the filters
 - Weekly observations to monitor the performance of the dry filters for the overspray from the surface coating booth stacks (SV1-9, SV1-10, and SV1-11) while one or more of the booths are in operation
- Recordkeeping
 - The amount and VOC content of each coating material, dilution solvent and cleaning solvent used on a monthly basis. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used;
 - The coating solid content of each coating material;
 - The total VOC and coating solid usage for each month;

 - The total coating solid usage for each compliance period
 - Log of weekly overspray observations and daily and monthly inspections

326 IAC 6-3-2(e): Particulate emission limitations, work practices, and control technologies, is not applicable because the after integral baghouse is less than the calculated value. Therefore, operation of the baghouse during the process will ensure the requirements of 6-3-2 are not applicable.
