Re: 073-34152-00035  
Administrative Amendment to  
F073-30542-00035

Dear Mr. Sturges

Monsanto Company was issued a Federally Enforceable State Operating Permit (FESOP) Renewal No. F073-30542-00035 on November 20, 2012 for a stationary hybrid corn seed processing plant located at 15849 S US Hwy 231, Remington, Indiana. On February 6, 2014, the Office of Air Quality (OAQ) received an application from the source requesting to change the nomenclature of "corn" to "grain" to allow for the handling of either corn or soybeans.

Pursuant to 326 IAC 2-8-10(a)(2)(B), this change to the permit is considered an administrative amendment because the permit is amended to change descriptive information concerning the source or an emissions unit, where the revision will not trigger a new applicable requirement and there are no changes to any throughput limits or emission limits between different types of grain.

The permit is hereby revised as follows with the deleted language as strikeouts and new language **bolded**.

Change 1: The source requested the nomenclature "corn" to be changed to "grain" throughout the entire permit except in the description of husking receiving, which shall remain unchanged in A.2 (a)(1)(2), D.1 (a)(1)(2), and D.1 (b)(1)

## ~~Corn~~ Grain

Where "Grain" is defined according to Merriam-Webster Dictionary as:

- (a) *The seeds of plants (such as wheat, corn, and rice) that are used for food; also: a single seed of wheat, corn, rice, etc.*
- (b) The seeds or fruits of various food plants including the cereal grasses and in commercial and statutory usage other plants (as the soybean)
- (c) Plants producing grain

- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a health-based or technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describe the following:
- (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
  - (2) The permitted facility was at the time being properly operated;
  - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;

- (e) The Permittee seeking to establish the occurrence of an emergency shall make records available upon request to ensure that failure to implement a PMP did not cause or contribute to an exceedance of any limitations on emissions. However, IDEM, OAQ may require that the Preventive Maintenance Plans required under 326 IAC 2-8-3(c)(6) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-8 and any other applicable rules.
- (g) Operations may continue during an emergency only if the following conditions are met:
- (1) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
  - (2) If an emergency situation causes a deviation from a health-based limit, the Permittee may not continue to operate the affected emissions facilities unless:
    - (A) The Permittee immediately takes all reasonable steps to correct the emergency situation and to minimize emissions; and
    - (B) Continued operation of the facilities is necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw material of substantial economic value.

Any operations shall continue no longer than the minimum time required to prevent the situations identified in (g)(2)(B) of this condition.
