Dear Mr. Aust:

On June 8, 2015, the Office of Air Quality (OAQ) received an interim Minor Permit Revision petition from Armour-Eckrich Meats, LLC, located at 3311 South State Road 19, in Peru, Indiana. The modification of the six (6) existing batch smokehouses, identified as # 3 through # 8 to include one (1) woodchip smoke generator on each smokehouse. Each woodchip smoke generator will have a maximum capacity of twenty-four (24) pounds of wood chips per hour.

Detailed conditions will be specified in the final Minor Permit Revision 103-35921-00035. This interim Minor Permit Revision will expire on the effective date of the final Minor Permit Revision. This interim Minor Permit Revision may be revoked after its effective date upon a written finding by the OAQ that any of the reasons for denial in 326 IAC 2-13-1(h) exist or if the final Minor Permit Revision is denied. The facilities subject to this approval may not operate until the final Minor Permit Revision is issued by OAQ.

Re: Interim Approval - Minor Source Modification
Armour-Eckrich Meats LLC, Peru, Indiana
M103-30401-00035

To Whom It May Concern:

Armour-Eckrich Meats, LLC currently operates under the Minor Source Operating Permit 103-30401-00035, issued May 20, 2011. This facility is a stationary source that manufactures precooked bacon strips, located at 3311 South State Road 19, Peru, Indiana 46970. Armour-Eckrich is submitting this Interim Approval for the installation of one (1) woodchip smoke generator on each of the existing emission units Batch Smokehouses #3 through #8. With the addition of these woodchip smoke generators, Batch Smokehouses #3 - #8 would operate in the same manner as Batch Smokehouses #1 and #2 which already have woodchip smoke generators. The six (6) new woodchip generators are identical to the two (2) woodchip generators already permit at the facility and each will have the same 24 pounds of woodchips per hour capacity.

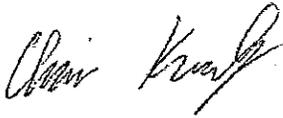

Cornerstone Environmental, Health and Safety Inc. has assisted Armour-Eckrich with the preparation of this Interim approval as well as a permit application and believe this to be a Minor Source Modification. The calculated increases in emissions are below 25 tons/yr for VOCs, PM, PM10 & PM2.5. The Interim Approval forms have been attached to this letter as well as a check for the filing and review fee. Emissions calculations for adding one (1) woodchip smoke generator to each of the six (6) Batch Smokehouses #3 - #8 are included. These calculations show the emissions generated from the six (6) new woodchip smoke generators and the facility wide emissions before and after the units are installed. The increase in emissions will not cause this facility to exceed minor source thresholds, so this facility should remain permitted as an MSOP.

Summary of Existing Emissions Units Modified

| Unit Name | Modification |
|------------------------------------|--|
| Batch Smokehouses #3 THRU #8 | One (1) woodchip smoke generator will be added to each smokehouse, six (6) in total. |

Description of the Operation of Equipment:

Armour-Eckrich Meats, LLC would like to install six (6) additional woodchip smoke generators. The woodchip smoke generators operate by using an electric heating element to heat water-soaked woodchips and generate smoke which is piped into smokehouses. This facility already has two (2) woodchip smoke generators permitted on Batch Smokehouse #1 and #2. These six (6) new units are identical to the current equipment with the same capacity, 24 pounds of woodchips per hour. One (1) woodchip smoke generator will be added to each of the existing six (6) smokehouses currently without woodchip smoke generators. The six (6) smokehouses to have woodchip smoke generation added are identified as Batch Smokehouses #3 - #8. Batch Smokehouses #3 - #8 exhaust through stacks 6 through 11 and operate with no controls.

Potential to Emit:

Smokehouses #3 - #8

| Pollutant | Emission Factor (lbs/ton of sawdust)* | Amount of Sawdust used in one smokehouse (lbs/hr) | Potential Emissions for one smokehouse (lb/hr) | Potential Emissions for one smokehouse (ton/yr) | Potential Emissions for six smokehouses (ton/yr) |
