Notice of Decision: Approval - Effective Immediately

Please be advised that on behalf of the Commissioner of the Department of Environmental Management, I have issued a decision regarding the enclosed matter. Pursuant to IC 13-15-5-3, this permit is effective immediately, unless a petition for stay of effectiveness is filed and granted according to IC 13-15-6-3, and may be revoked or modified in accordance with the provisions of IC 13-15-7-1.

If you wish to challenge this decision, IC 4-21.5-3 and IC 13-15-6-1 require that you file a petition for administrative review. This petition may include a request for stay of effectiveness and must be submitted to the Office of Environmental Adjudication, 100 North Senate Avenue, Government Center North, Room 1049, Indianapolis, IN 46204, within eighteen (18) calendar days of the mailing of this notice. The filing of a petition for administrative review is complete on the earliest of the following dates that apply to the filing:

(1) the date the document is delivered to the Office of Environmental Adjudication (OEA);
(2) the date of the postmark on the envelope containing the document, if the document is mailed to OEA by U.S. mail; or
(3) The date on which the document is deposited with a private carrier, as shown by receipt issued by the carrier, if the document is sent to the OEA by private carrier.

The petition must include facts demonstrating that you are either the applicant, a person aggrieved or adversely affected by the decision or otherwise entitled to review by law. Please identify the permit, decision, or other order for which you seek review by permit number, name of the applicant, location, date of this notice and all of the following:

(1) the name and address of the person making the request;
(2) the interest of the person making the request;
(3) identification of any persons represented by the person making the request;
(4) the reasons, with particularity, for the request;
(5) the issues, with particularity, proposed for considerations at any hearing; and
(6) identification of the terms and conditions which, in the judgment of the person making the request, would be appropriate in the case in question to satisfy the requirements of the law governing documents of the type issued by the Commissioner.

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178. Callers from within Indiana may call toll-free at 1-800-451-6027, ext. 3-0178.
MINOR SOURCE OPERATING PERMIT RENEWAL
OFFICE OF AIR QUALITY

NCP Coatings, Inc.
1413 Clover Road
Mishawaka, Indiana 46545

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued to the above mentioned company under the provisions of 326 IAC 2-1.1, 326 IAC 2-6.1 and 40 CFR 52.780, with conditions listed on the attached pages.

Indiana statutes from IC 13 and rules from 326 IAC, quoted in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a MSOP under 326 IAC 2-6.1.

SECTION A  SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the source contained in conditions A.1 and A.2 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-5.1-3(c)][326 IAC 2-6.1-4(a)]

The Permittee owns and operates a stationary paint manufacturing and packaging operation.

Source Address: 1413 Clover Road, Mishawaka, Indiana 46545
Mailing Address: 1413 Clover Road, Mishawaka, Indiana 46545
General Source Phone Number: (574) 255-9678
SIC Code: 2851
County Location: St. Joseph
Source Location Status: Nonattainment for 8-hour ozone standard
Attainment for all other criteria pollutants
Source Status: Minor Source Operating Permit Program
Minor Source, under PSD and Emission Offset Rules
Minor Source, Section 112 of the Clean Air Act
Not 1 of 28 Source Categories

A.2 Emission Units and Pollution Control Equipment Summary

This stationary source consists of the following emission units and pollution control devices:

(a) One (1) paint mixing line, constructed in 2002, identified as Mix Line #1 including four (4) paint mixer tanks, identified as Mixer #s 6, 7, 8, and 10, with a maximum throughput capacity of 0.46 tons per hour, and one (1) 20 liter horizontal small batch mill and mixer, constructed in 2004, with a maximum throughput capacity of 0.13 tons per hour, and particulate matter from the mixing line controlled by Torit Dust Collector D-1.

(b) One (1) manual small batch paint transfer/container filling operation, identified as SBF, approved for construction in 2007 and rated at sixteen and six-tenths (16.6) units per hour.

(c) Four (4) submerged filling stations, identified as 1 through 4, and constructed in 2000.

(d) Two (2) storage tanks, identified as Tank #5 and Tank PG-1, constructed prior to 1970, with a maximum capacity of 8,000 gallons and 4,200 gallons, respectively.

(e) Combustion units including:

(1) One (1) natural gas-fired boiler, identified as BH-5, constructed prior to 1970, with a maximum rated heat input capacity of 1.8 million British Thermal Units per hour (MMBtu/hr).

(2) Two (2) natural gas-fired heaters, identified as H-3 and H-4, constructed prior to 1970, each with a maximum heat input capacity of 0.25 MMBtu/hr.

(f) Paved and unpaved roads and parking lots with public access.

(g) Activities including the replacement or repair of electrostatic precipitators, bags in baghouses, and filters in other air filtration equipment.

(h) Vessels storing lubricating oils, hydraulic oils, machining oils, and machining fluids.

(i) Blowdown of boilers.
SECTION B  GENERAL CONDITIONS

B.1 Definitions [326 IAC 2-1.1-1]

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2 and 326 IAC 2-1.1-1) shall prevail.

B.2 Permit Term [326 IAC 2-6.1-7(a)][326 IAC 2-1.1-9.5][IC 13-15-3-6(a)]

(a) This permit, M141-24162-00196, is issued for a fixed term of five (5) years from the issuance date of this permit, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date of this permit.

(b) If IDEM, OAQ, upon receiving a timely and complete renewal permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect, until the renewal permit has been issued or denied.

B.3 Term of Conditions [326 IAC 2-1.1-9.5]

Notwithstanding the permit term of a permit to construct, a permit to operate, or a permit modification, any condition established in a permit issued pursuant to a permitting program approved in the state implementation plan shall remain in effect until:

(a) the condition is modified in a subsequent permit action pursuant to Title I of the Clean Air Act; or

(b) the emission unit to which the condition pertains permanently ceases operation.

B.4 Enforceability

Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source’s potential to emit, are enforceable by IDEM, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.

B.5 Severability

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

B.6 Property Rights or Exclusive Privilege

This permit does not convey any property rights of any sort or any exclusive privilege.

B.7 Duty to Provide Information

(a) The Permittee shall furnish to IDEM, OAQ, within a reasonable time, any information that IDEM, OAQ may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The submittal by the Permittee does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1). Upon request, the Permittee shall also furnish to IDEM, OAQ copies of records required to be kept by this permit.

(b) For information furnished by the Permittee to IDEM, OAQ, the Permittee may include a claim of confidentiality in accordance with 326 IAC 17.1. When furnishing copies of requested records directly to U.S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.8 Certification

(a) Where specifically designated by this permit or required by an applicable requirement, any application form, report, or compliance certification submitted shall contain certification by an "authorized individual" of truth, accuracy, and completeness. This
certification shall state that, based on information and belief formed after reasonable
inquiry, the statements and information in the document are true, accurate, and complete.

(b) One (1) certification shall be included, using the attached Certification Form, with each
submittal requiring certification. One (1) certification may cover multiple forms in one (1)
submittal.

(c) An "authorized individual" is defined at 326 IAC 2-1.1-1(1).

B.9 Annual Notification [326 IAC 2-6.1-5(a)(5)]

(a) An annual notification shall be submitted by an authorized individual to the Office of Air
Quality stating whether or not the source is in operation and in compliance with the terms
and conditions contained in this permit.

(b) The annual notice shall be submitted in the format attached no later than March 1 of each
year to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, IN 46204-2251

(c) The notification shall be considered timely if the date postmarked on the envelope or
certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or
before the date it is due. If the document is submitted by any other means, it shall be
considered timely if received by IDEM, OAQ on or before the date it is due.

B.10 Preventive Maintenance Plan [326 IAC 1-6-3]

(a) If required by specific condition(s) in Section D of this permit, the Permittee shall maintain
and implement Preventive Maintenance Plans (PMPs) including the following information
on each facility:

(1) Identification of the individual(s) responsible for inspecting, maintaining, and
repairing emission control devices;

(2) A description of the items or conditions that will be inspected and the inspection
schedule for said items or conditions; and

(3) Identification and quantification of the replacement parts that will be maintained
in inventory for quick replacement.

(b) A copy of the PMPs shall be submitted to IDEM, OAQ upon request and within a
reasonable time, and shall be subject to review and approval by IDEM, OAQ. IDEM,
OAQ may require the Permittee to revise its PMPs whenever lack of proper maintenance
causes or is the primary contributor to an exceedance of any limitation on emissions or
potential to emit. The PMPs do not require the certification by an "authorized individual"
as defined by 326 IAC 2-1.1-1(1).

(c) To the extent the Permittee is required by 40 CFR Part 60/63 to have an Operation
Maintenance, and Monitoring (OMM) Plan for a unit, such Plan is deemed to satisfy the
PMP requirements of 326 IAC 1-6-3 for that unit.

B.11 Prior Permits Superseded [326 IAC 2-1.1-9.5]

(a) All terms and conditions of permits established prior to M141-24162-00196 and issued
pursuant to permitting programs approved into the state implementation plan have been
either:

(1) incorporated as originally stated,
(2) revised, or

(3) deleted.

(b) All previous registrations and permits are superseded by this permit.

B.12 Termination of Right to Operate [326 IAC 2-6.1-7(a)]

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least ninety (90) days prior to the date of expiration of the source’s existing permit, consistent with 326 IAC 2-6.1-7.

B.13 Permit Renewal [326 IAC 2-6.1-7]

(a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ and shall include the information specified in 326 IAC 2-6.1-7. Such information shall be included in the application for each emission unit at this source. The renewal application does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

(b) A timely renewal application is one that is:

(1) Submitted at least ninety (90) days prior to the date of the expiration of this permit; and

(2) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.

(c) If the Permittee submits a timely and complete application for renewal of this permit, the source’s failure to have a permit is not a violation of 326 IAC 2-6.1 until IDEM, OAQ takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ any additional information identified as being needed to process the application.

B.14 Permit Amendment or Revision [326 IAC 2-5.1-3(e)(3)][326 IAC 2-6.1-6]

(a) Permit amendments and revisions are governed by the requirements of 326 IAC 2-6.1-6 whenever the Permittee seeks to amend or modify this permit.

(b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

Any such application shall be certified by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).
(c) The Permittee shall notify the OAQ within thirty (30) calendar days of implementing a notice-only change. [326 IAC 2-6.1-6(d)]

B.15 Source Modification Requirement
A modification, construction, or reconstruction is governed by the requirements of 326 IAC 2.

B.16 Inspection and Entry
Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee’s right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ, U.S. EPA, or an authorized representative to perform the following:

(a) Enter upon the Permittee’s premises where a permitted source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;

(b) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;

(c) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;

(d) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and

(e) As authorized by the Clean Air Act, IC 13-14-2-2, IC 13-17-3-2, and IC 13-30-3-1, utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

B.17 Transfer of Ownership or Operational Control [326 IAC 2-6.1-6]

(a) The Permittee must comply with the requirements of 326 IAC 2-6.1-6 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.

(b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

The application which shall be submitted by the Permittee does require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

(c) The Permittee may implement notice-only changes addressed in the request for a notice-only change immediately upon submittal of the request. [326 IAC 2-6.1-6(d)(3)]
B.18 Annual Fee Payment [326 IAC 2-1.1-7]

(a) The Permittee shall pay annual fees to IDEM, OAQ within thirty (30) calendar days of receipt of a billing.

(b) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-4230 (ask for OAQ, Billing, Licensing, and Training Section), to determine the appropriate permit fee.

B.19 Credible Evidence [326 IAC 1-1-6]

For the purpose of submitting compliance certifications or establishing whether or not the Permittee has violated or is in violation of any condition of this permit, nothing in this permit shall preclude the use, including the exclusive use, of any credible evidence or information relevant to whether the Permittee would have been in compliance with the condition of this permit if the appropriate performance or compliance test or procedure had been performed.
Emission Limitations and Standards  [326 IAC 2-6.1-5(a)(1)]

C.1 Permit Revocation  [326 IAC 2-1.1-9]
Pursuant to 326 IAC 2-1.1-9 (Revocation of Permits), this permit to operate may be revoked for any of the following causes:

(a) Violation of any conditions of this permit.
(b) Failure to disclose all the relevant facts, or misrepresentation in obtaining this permit.
(c) Changes in regulatory requirements that mandate either a temporary or permanent reduction of discharge of contaminants. However, the amendment of appropriate sections of this permit shall not require revocation of this permit.
(d) Noncompliance with orders issued pursuant to 326 IAC 1-5 (Episode Alert Levels) to reduce emissions during an air pollution episode.
(e) For any cause which establishes in the judgment of IDEM, the fact that continuance of this permit is not consistent with purposes of this article.

C.2 Opacity  [326 IAC 5-1]
Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

(a) Opacity shall not exceed an average of thirty percent (30%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
(b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

C.3 Open Burning  [326 IAC 4-1] [IC 13-17-9]
The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1.

C.4 Incineration  [326 IAC 4-2] [326 IAC 9-1-2]
The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and 326 IAC 9-1-2.

C.5 Fugitive Dust Emissions  [326 IAC 6-4]
The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions).

C.6 Asbestos Abatement Projects  [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]
(a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of
326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.

(b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:

1. When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or

2. If there is a change in the following:
   - Asbestos removal or demolition start date;
   - Removal or demolition contractor; or
   - Waste disposal site.

(c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).

(d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management
Asbestos Section, Office of Air Quality
100 North Senate Avenue
MC 61-52 IGCN 1003
Indianapolis, Indiana 46204-2251

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification by an “authorized individual” as defined by 326 IAC 2-1.1-1(1).

(e) Procedures for Asbestos Emission Control
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-1, emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.

(f) Demolition and Renovation
The Permittee shall thoroughly inspect the affected facility or part of the facility where the demolition or renovation will occur for the presence of asbestos pursuant to 40 CFR 61.145(a).

(g) Indiana Accredited Asbestos Inspector
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement to use an Indiana Accredited Asbestos inspector is not federally enforceable.
Testing Requirements  [326 IAC 2-6.1-5(a)(2)]

C.7 Performance Testing  [326 IAC 3-6]

(a) All testing shall be performed according to the provisions of 326 IAC 3-6 (Source Sampling Procedures), except as provided elsewhere in this permit, utilizing any applicable procedures and analysis methods specified in 40 CFR 51, 40 CFR 60, 40 CFR 61, 40 CFR 63, 40 CFR 75, or other procedures approved by IDEM, OAQ.

A test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

(b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

(c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ if the Permittee submits to IDEM, OAQ, a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

Compliance Requirements  [326 IAC 2-1.1-11]

C.8 Compliance Requirements  [326 IAC 2-1.1-11]

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements by issuing an order under 326 IAC 2-1.1-11. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

Compliance Monitoring Requirements  [326 IAC 2-6.1-5(a)(2)]

C.9 Compliance Monitoring  [326 IAC 2-1.1-11]

Compliance with applicable requirements shall be documented as required by this permit. The Permittee shall be responsible for installing any necessary equipment and initiating any required monitoring related to that equipment. All monitoring and record keeping requirements not already legally required shall be implemented when operation begins.

C.10 Monitoring Methods  [326 IAC 3] [40 CFR 60] [40 CFR 63]

Any monitoring or testing required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, 40 CFR 60, Appendix B, 40 CFR 63, or other approved methods as specified in this permit.

C.11 Instrument Specifications [326 IAC 2-1.1-11]

(a) When required by any condition of this permit, an analog instrument used to measure a parameter related to the operation of an air pollution control device shall have a scale such that the expected maximum reading for the normal range shall be no less than twenty percent (20%) of full scale.

(b) The Permittee may request that the IDEM, OAQ approve the use of an instrument that does not meet the above specifications provided the Permittee can demonstrate that an
alternative instrument specification will adequately ensure compliance with permit conditions requiring the measurement of the parameters.

Corrective Actions and Response Steps

C.12  Response to Excursions or Exceedances

(a) Upon detecting an excursion or exceedance, the Permittee shall restore operation of the emissions unit (including any control device and associated capture system) to its normal or usual manner of operation as expeditiously as practicable in accordance with good air pollution control practices for minimizing emissions.

(b) The response shall include minimizing the period of any startup, shutdown or malfunction and taking any necessary corrective actions to restore normal operation and prevent the likely recurrence of the cause of an excursion or exceedance (other than those caused by excused startup or shutdown conditions). Corrective actions may include, but are not limited to, the following:

   (1) initial inspection and evaluation;

   (2) recording that operations returned to normal without operator action (such as through response by a computerized distribution control system); or

   (3) any necessary follow-up actions to return operation to within the indicator range, designated condition, or below the applicable emission limitation or standard, as applicable.

(c) A determination of whether the Permittee has used acceptable procedures in response to an excursion or exceedance will be based on information available, which may include, but is not limited to, the following:

   (1) monitoring results;

   (2) review of operation and maintenance procedures and records; and/or

   (3) inspection of the control device, associated capture system, and the process.

(d) Failure to take reasonable response steps shall be considered a deviation from the permit.

(e) The Permittee shall maintain the following records:

   (1) monitoring data;

   (2) monitor performance data, if applicable; and

   (3) corrective actions taken.

C.13  Actions Related to Noncompliance Demonstrated by a Stack Test

(a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM, OAQ, within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.

(b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM, OAQ that retesting in one hundred twenty (120) days is not practicable, IDEM, OAQ may extend the retesting deadline.
(c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The response action documents submitted pursuant to this condition do require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Record Keeping and Reporting Requirements [326 IAC 2-6.1-5(a)(2)]

C.14 Malfunctions Report [326 IAC 1-6-2]

Pursuant to 326 IAC 1-6-2 (Records; Notice of Malfunction):

(a) A record of all malfunctions, including startups or shutdowns of any facility or emission control equipment, which result in violations of applicable air pollution control regulations or applicable emission limitations shall be kept and retained for a period of three (3) years and shall be made available to the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) or appointed representative upon request.

(b) When a malfunction of any facility or emission control equipment occurs which lasts more than one (1) hour, said condition shall be reported to OAQ, using the Malfunction Report Forms (2 pages). Notification shall be made by telephone or facsimile, as soon as practicable, but in no event later than four (4) daytime business hours after the beginning of said occurrence.

(c) Failure to report a malfunction of any emission control equipment shall constitute a violation of 326 IAC 1-6, and any other applicable rules. Information of the scope and expected duration of the malfunction shall be provided, including the items specified in 326 IAC 1-6-2(a)(1) through (6).

(d) Malfunction is defined as any sudden, unavoidable failure of any air pollution control equipment, process, or combustion or process equipment to operate in a normal and usual manner. [326 IAC 1-2-39]

C.15 General Record Keeping Requirements [326 IAC 2-6.1-5]

(a) Records of all required monitoring data, reports and support information required by this permit shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be physically present or electronically accessible at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.

(b) Unless otherwise specified in this permit, all record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

C.16 General Reporting Requirements [326 IAC 2-1.1-11] [326 IAC 2-6.1-2] [IC 13-14-1-13]

(a) Reports required by conditions in Section D of this permit shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue
MC 61-53 IGCN 1003
Indianapolis, Indiana 46204-2251

(b) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or
before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.

(c) Unless otherwise specified in this permit, all reports required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. All reports do require the certification by an "authorized individual" as defined by 326 IAC 2-1.1-1(1).

(d) Reporting periods are based on calendar years, unless otherwise specified in this permit. For the purpose of this permit "calendar year" means the twelve (12) month period from January 1 to December 31 inclusive.

(e) The Permittee shall make the information required to be documented and maintained in accordance with (c) in Section C- General Record Keeping Requirements available for review upon a request for inspection by IDEM, OAQ. The general public may request this information from the IDEM, OAQ under 326 IAC 17.1.
SECTION D.1  EMISSIONS UNIT OPERATION CONDITIONS

**Emissions Unit Description**

(a) One (1) paint mixing line, constructed in 2002, identified as Mix Line #1 including four (4) paint mixer tanks, identified as Mixer #s 6, 7, 8, and 10, with a maximum throughput capacity of 0.46 tons per hour, and one (1) 20 liter horizontal small batch mill and mixer, constructed in 2004, with a maximum throughput capacity of 0.13 tons per hour, and particulate matter from the mixing line controlled by Torit Dust Collector D-1.

(The information describing the process contained in this emissions unit description box is descriptive information and does not constitute enforceable conditions.)

**Emission Limitations and Standards**

D.1.1 Volatile Organic Compounds (VOC) [326 IAC 8-1-6]

Pursuant to MSOP 141-15583-00196, issued on April 9, 2002, and as revised in this Renewal M141-24162-00196, the usage of VOC containing material loaded to Mix Line #1 shall be limited to 1,600 tons per twelve (12) consecutive month period with compliance determined at the end of each month, and the VOC emissions shall be limited to thirty (30) pounds per ton of VOC containing material.

D.1.2 Particulate (Particulate Emission Limitations for Manufacturing Processes) [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Processes), particulate emissions from each of the following operations shall not exceed the pound per hour limits listed in the table below:

<table>
<thead>
<tr>
<th>Unit ID</th>
<th>Unit Description</th>
<th>Max. Throughput Rate (tons/hr)</th>
<th>Particulate Emission Limit (lbs/hr)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mix Line #1</td>
<td>mixer #s 6, 7, 8, and 10</td>
<td>0.46</td>
<td>2.44</td>
</tr>
<tr>
<td>Mix Line #1</td>
<td>one (1) 20 liter horizontal small batch mill and mixer</td>
<td>0.13</td>
<td>1.05</td>
</tr>
</tbody>
</table>

The pounds per hour limitations were calculated using the following equation:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

\[ E = 4.10 \cdot P^{0.67} \]

where \( E \) = rate of emission in pounds per hour;
\( P \) = process weight rate in tons per hour

D.1.3 Preventive Maintenance Plan [326 IAC 1-6-3]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for these facilities and their control devices.

**Compliance Determination Requirements**

D.1.4 Particulate Control

(a) In order to comply with Condition D.1.2, the Torit dust collector, identified as D-1, shall be in operation at all times Mix Line #1 is in operation.

(b) In the event that bag failure is observed in a multi-compartment baghouse, if operations will continue for ten (10) days or more after the failure is observed before the failed units will be repaired or replaced, the Permittee shall promptly notify the IDEM, OAQ of the expected date the failed units will be repaired or replaced. The notification shall also include the status of the applicable compliance monitoring parameters with respect to normal, and the results of any response actions taken up to the time of notification.
Record Keeping and Reporting Requirements [326 IAC 2-5.1-3(e)(2)] [ 326 IAC 2-6.1-5(a)(2)]

D.1.5 Record Keeping Requirements

(a) To document compliance with Condition D.1.1, the Permittee shall maintain records in accordance with (1) through (4) below. Records maintained for (1) through (4) shall be taken monthly and shall be complete and sufficient to establish compliance with the VOC emission limit established in Condition D.1.1.

(1) The amount of each VOC containing material used in Mix Line #1;

(2) The estimated VOC emissions from Mix Line #1 emitted for each compliance period;

(3) Material Safety Data Sheets (MSDS) for all materials used; and

(4) Purchase orders and invoices of all VOC containing materials used.

(b) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.1.6 Reporting Requirements

A quarterly summary of the information to document compliance with Condition D.1.1 shall be submitted to the addresses listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the “authorized individual” as defined by 326 IAC 2-1.1-1(1).
Emissions Unit Description

(e) Combustion units including:

(1) One (1) natural gas-fired boiler, identified as BH-5, constructed prior to 1970, with a maximum rated heat input capacity of 1.8 million British Thermal Units per hour (MMBtu/hr).

(The information describing the process contained in this emissions unit description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards

D.2.1 Particulate Matter (PM) [326 IAC 6-2]

Pursuant to 326 IAC 6-2, the PM emissions from boiler BH-5 shall not exceed 0.6 lb PM/MMBtu.
Source Name: NCP Coatings, Inc.
Source Address: 1413 Clover Road, Mishawaka, Indiana 46545
MSOP No.: 141-24162-00196
Parameter: the usage of VOC containing material loaded to Mix Line #1
Limit: Less than 1,600 tons per twelve (12) consecutive month period with compliance determined at the end of each month.

Indiana Department of Environmental Management  
Office of Air Quality  
Technical Support Document (TSD) for a Minor Source Operating Permit Renewal

Source Background and Description

Source Name: NCP Coatings, Inc.  
Source Location: 1413 Clover Road, Mishawaka, Indiana 46545  
County: St. Joseph  
SIC Code: 2851  
Permit Renewal No.: 141-24162-00196  
Permit Reviewer: ERG/JR

The Office of Air Quality (OAQ) has reviewed the operating permit renewal application from NCP Coatings, Inc. relating to the operation of a paint manufacturing and packaging operation.

History

NCP Coatings, Inc. was issued a Minor Source Operating Permit (MSOP) on April 9, 2002. On January 5, 2007, NCP Coatings, Inc. submitted an application to the OAQ requesting to renew its operating permit. NCP Coatings, Inc. also submitted another application to OAQ on January 5, 2007 requesting a small paint container filling operation (identified as SBF) and labeling machine (identifed as Labeler) be added to their MSOP. This application has been determined to be a Notice-only Change and is being combined with this renewal. The MSOP has also been modified through Notice-only Changes 141-16903-00196 (issued January 14, 2003), 141-19416-00196 (issued September 9, 2004), and Minor Permit Revision 141-19769-00196 (issued December 21, 2004). Prior to issuance of this MSOP Renewal (141-24162-00196), the source indicated that the Mixing Line #3 and the associated air makeup unit permitted under Minor Permit Revision 141-19769-00196 (issued December 21, 2004) were never built; therefore this equipment is being removed in this renewal.

Permitted Emission Units and Pollution Control Equipment

(a) One (1) paint mixing line, constructed in 2002, identified as Mix Line #1 including four (4) paint mixer tanks, identified as Mixer #s 6, 7, 8, and 10, with a maximum throughput capacity of 0.46 tons per hour, and one (1) 20 liter horizontal small batch mill and mixer, constructed in 2004, with a maximum throughput capacity of 0.13 tons per hour, and particulate matter from the mixing line controlled by Torit Dust Collector D-1.

(b) One (1) manual small batch paint transfer/container filling operation, identified as SBF, approved for construction in 2007 and rated at sixteen and six-tenths (16.6) units per hour.

(c) Four (4) submerged filling stations, identified as 1 through 4, and constructed in 2000.

(d) Two (2) storage tanks, identified as Tank #5 and Tank PG-1, constructed prior to 1970, with a maximum capacity of 8,000 gallons and 4,200 gallons, respectively.

(e) Combustion units including:

(1) One (1) natural gas-fired boiler, identified as BH-5, constructed prior to 1970, with a maximum rated heat input capacity of 1.8 million British Thermal Units per hour (MMBtu/hr).
(2) Two (2) natural gas-fired heaters, identified as H-3 and H-4, constructed prior to 1970, each with a maximum heat input capacity of 0.25 MMBtu/hr.

(f) Paved and unpaved roads and parking lots with public access.

(g) Activities including the replacement or repair of electrostatic precipitators, bags in baghouses, and filters in other air filtration equipment.

(h) Vessels storing lubricating oils, hydraulic oils, machining oils, and machining fluids.

(i) Blowdown of boilers.

Existing Approvals

Since the issuance of the MSOP 141-15583-00196 on April 9, 2002, the source has constructed or has been operating under the following approvals:

(a) First Notice Only Change No. 141-16903-00196 issued on January 14, 2003;

(b) Second Notice Only Change No. 141-19416-00196 issued on September 9, 2004; and

(c) Minor Permit Revision No. 141-19769-00196 issued on December 21, 2004.

All terms and conditions of previous permits issued pursuant to permitting programs approved into the state implementation plan have been either incorporated as originally stated, revised, or deleted by this permit. All previous registrations and permits are superseded by this permit.

The following terms and conditions from previous approvals have been revised in this MSOP Renewal:

Condition D.1.1 of MSOP 141-15583-00196, issued on April 9, 2002:
The owner or operator shall limit the amount of VOCs from Mixing Line 1 to 24 tons per year, based on a 12 month rolling total.

Revised Condition:
Pursuant to MSOP 141-15583-00196, issued on April 9, 2002, and as revised in this Renewal M141-24162-00196, the usage of VOC containing material loaded to Mix Line #1 shall be limited to 1,600 tons per twelve (12) consecutive month period with compliance determined at the end of each month, and the VOC emissions shall be limited to thirty (30) pounds per ton of VOC containing material.

Reason Modified:
The intent of the original VOC emission limit is to limit the VOC emissions from Mix Line #1 construction to less than the 25 ton per year 326 IAC 8-1-6 BACT threshold. This condition was revised in order to make the condition practically enforceable. The calculations are based on confidential data documented in MSOP 141-15583-00196. The emission factor used in the calculation is from AP-42, Chapter 6.4, Paint and Varnish, Table 6.4-1 (May 1983).

Enforcement Issue

There are no enforcement actions pending.

Emission Calculations

See Appendix A of this document for detailed emission calculations relating to the Minor Permit Revision No. 141-19769-00196 issued on December 21, 2004 (excluding the Mix Line #3 and air makeup unit AM-1 because they were never built); as well as the addition of the small paint container filling operation (identified as SBF) discussed in this renewal. No emissions are expected from the labeling machine (identified as Labeler). The calculations for the rest of the equipment (including all other combustion, storage, and mixing line equipment) located at this source are considered to be confidential (see the original MSOP 141-15583-00196, issued on April 9, 2002).

County Attainment Status

The source is located in St. Joseph County

<table>
<thead>
<tr>
<th>Pollutant</th>
<th>Status</th>

</tbody>
</table>

(a) St. Joseph County has been classified as attainment for PM2.5. U.S. EPA has not yet established the requirements for Prevention of Significant Deterioration (PSD), 326 IAC 2-2 for PM2.5 emissions. Therefore, until the U.S. EPA adopts specific provisions for PSD review for PM2.5 emissions, it has directed states to regulate PM10 emissions as a surrogate for PM2.5 emissions. See the State Rule Applicability – Entire Source section.

(b) Volatile organic compounds (VOC) and Nitrogen Oxides (NOx) are regulated under the Clean Air Act (CAA) for the purposes of attaining and maintaining the National Ambient Air Quality Standards (NAAQS) for ozone. Therefore, VOC emissions and NOx emissions are considered when evaluating the rule applicability relating to ozone standards. St. Joseph County has been designated as nonattainment for the 8-hour ozone standard. Therefore, VOC and NOx emissions were reviewed pursuant to the requirements for Emission Offset, 326 IAC 2-3. See the State Rule Applicability – Entire Source section.

(c) St. Joseph County has been classified as attainment or unclassifiable in Indiana for all other criteria pollutants. Therefore, these emissions were reviewed pursuant to the requirements for Prevention of Significant Deterioration (PSD), 326 IAC 2-2. See the State Rule Applicability – Entire Source section.

(d) On October 25, 2006, the Indiana Air Pollution Control Board finalized a rule revision to 326 IAC 1-4-1 revoking the one-hour ozone standard in Indiana.
(e) Fugitive Emissions
Since this type of operation is not one of the twenty-eight (28) listed source categories under 326 IAC 2-2 or 326 IAC 2-3 and since there are no applicable New Source Performance Standards that were in effect on August 7, 1980, the fugitive emissions are not counted toward determination of PSD or Emission Offset applicability.

Unrestricted Potential Emissions

This table reflects the unrestricted potential emissions of the source.

<table>
<thead>
<tr>
<th>Pollutant</th>

<td>7.87</td>
</tr>
<tr>
<td>Combined Total HAP</td>
<td>18.4</td>
</tr>
</tbody>
</table>

(a) The potential to emit (as defined in 326 IAC 2-7-1(29)) of all criteria pollutants are less than 100 tons per year. The source is not subject to the provisions of 326 IAC 2-7. The potential to emit of PM, PM10, and VOC are greater than 25 tons per year. Therefore, the source will be issued an MSOP.

(b) The potential to emit (as defined in 326 IAC 2-7-1(29)) of any single HAP is less than ten (10) tons per year and/or the potential to emit (as defined in 326 IAC 2-7-1(29)) of a combination of HAPs is less than twenty-five (25) tons per year.

(c) Since this type of operation is not one of the twenty-eight (28) listed source categories under 326 IAC 2-7, fugitive emissions are not counted toward the determination of Part 70 applicability.

Actual Emissions

The following table shows the actual emissions from the source. This information reflects the 2003 OAQ emission data.

<table>

* The calculations for the rest of the equipment (including combustion, storage, and mixing line equipment) located at this source are confidential as part of the original MSOP 141-15583-00196, issued on April 9, 2002.

** Pursuant to MSOP 141-15583-00196, issued on April 9, 2002, and as revised in this MSOP Renewal, the usage of VOC containing material loaded to Mix Line #1 shall be limited to 1,600 tons per twelve (12) consecutive month period with compliance determined at the end of each month. The VOC emissions shall be limited to thirty (30) pounds per ton of VOC containing material.

(a) This existing stationary source is not major for PSD because the emissions of each criteria pollutant and PM are less than two hundred fifty (<250) tons per year, and it is not one of the twenty-eight (28) listed source categories.

(b) This existing stationary source is not major for Emission Offset because the emissions of the nonattainment pollutants, VOC and NOx, are each less than one hundred (<100) tons per year.

(c) Fugitive Emissions
Since this type of operation is not one of the twenty-eight (28) listed source categories under 326 IAC 2-2 or 326 IAC 2-3, fugitive emissions are not counted toward the determination of PSD and Emission Offset applicability.

Federal Rule Applicability

(a) There are no New Source Performance Standards (NSPS) (326 IAC 12 and 40 CFR Part 60) included in the permit for this source.

(1) The requirements of 40 CFR 60, Subpart Kb - Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984 are not included in this permit. Each of the storage tanks identified as Tank #5, and PG-1 has a capacity less than 19,813 gallons. The tanks identified as Mixers #6, #7, #8, and #10, are used as process tanks and not storage tanks.

(2) The requirements of 40 CFR 60, Subpart Dc - Standard of Performance for Small Industrial-Commercial-Institutional Steam Generating Units, for which construction, modification, or reconstruction is commenced after June 9, 1989, are not included in this permit. The natural gas-fired boiler, identified as BH-5 has an input capacity of less than 10 MMBtu/hr.
There are no National Emission Standards for Hazardous Air Pollutants (NESHAP) (326 IAC 14, 326 IAC 20 and 40 CFR Part 63) included in this permit renewal.

1. The requirements of the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Industrial, Commercial, and Institutional Boilers and Process Heaters (40 CFR 63, Subpart DDDDD) are not included in this permit for the natural gas-fired boiler, identified as BH-5. The potential to emit HAP at this source is less than the major source thresholds for HAPs.

2. The requirements of the National Emission Standards for Hazardous Air Pollutants: Miscellaneous Coating Manufacturing (40 CFR 63, Subpart HHHHH) are not included in this permit for the paint mixing line identified as Mix Line #1. The potential to emit HAP at this source is less than the major source thresholds for HAPs.

State Rule Applicability - Entire Source

326 IAC 1-5-2 (Emergency Reduction Plans)
The source is not subject to the requirements of 326 IAC 1-5-2 (Emergency Reduction Plans) because it does not have the potential to emit one hundred (100) tons per year, or more, of any pollutant.

326 IAC 2-2 (Prevention of Significant Deterioration)
Since the source has a potential to emit air pollutants of less than 250 tons per year, it is an existing minor source under PSD. It is not in 1 of 28 listed source categories.

326 IAC 2-3 (Emission Offset)
On April 15, 2004, the United States Environmental Protection Agency (U.S. EPA) named 23 Indiana counties, and one partial county, nonattainment for the new 8-hour ozone standard. The designations became effective on June 15, 2004. St. Joseph County has been designated as nonattainment for the 8-hour ozone standard. NCP Coatings, Inc. has a potential to emit of VOC below one hundred (100) tons per year. Therefore, this is not a major source for emission offset (ozone).

326 IAC 2-1.1-5 (Nonattainment New Source Review)
St. Joseph County has been designated as nonattainment for PM2.5 in 70 FR 943 dated January 5, 2005. According to the April 5, 2005 EPA memo title “Implementation of New Source Review Requirements in PM2.5 Nonattainment Areas” authored by Steve Page, Director of OAQPS, until EPA promulgates the PM2.5 major NSR regulations, states should assume that a major stationary source’s PM10 emissions represent PM2.5 emissions. IDEM will use the PM10 nonattainment major NSR program as a surrogate to address the requirements of nonattainment major NSR for the PM2.5 NAAQS. A major source in a nonattainment area is a source that emits or has the potential to emit one hundred (100) tons per year of any regulated pollutant. NCP Coatings, Inc. has a potential to emit of PM10 below one hundred (100) tons per year. Therefore, assuming that PM10 emissions represent PM2.5 emissions, nonattainment NSR does not apply.

326 IAC 2-4.1(New Source Toxics Control)
The source has the potential to emit less than 10 tons per year of a single HAP and less than 25 tons per year of a combination of HAPs. Therefore, 326 IAC 2-4.1 does not apply.

326 IAC 2-6 (Emission Reporting)
This source is located in St. Joseph County and the potential to emit of each criteria pollutant is less than one hundred (100) tons per year. Therefore, 326 IAC 2-6 does not apply.
326 IAC 5-1 (Opacity Limitations)
The source is located in the part of St. Joseph County that is north of Kern Road and east of Pine Road. Therefore, pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Exemptions), opacity shall meet the following, unless otherwise stated in the permit:

(a) Opacity shall not exceed an average of thirty percent (30%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.

(b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

326 IAC 6.5-1-2 (Particulate Matter Limitations Except Lake County)
This source has potential particulate matter emissions of less than one hundred (100) tons per year and actual particulate matter emissions of less than ten (10) tons per year. Therefore, 326 IAC 6.5-1-2 does not apply.

326 IAC 8-6 (Organic Solvent Emission Limitation)
The source is not subject to the requirements of 326 IAC 8-6 (Organic Solvent Emission Limitation) because it does not have the potential to emit VOC of one hundred (100) tons per year, or more.

State Rule Applicability – Combustion Units

326 IAC 6-2 (PM Emissions for Sources of Indirect Heating)
(a) The natural gas-fired boiler, identified as BH-5, is subject to 326 IAC 6-2-4 because the boiler is located in St. Joseph County and was constructed after September 21, 1983.

Pursuant to 326 IAC 6-2-4, the PM emissions from boiler BH-5 shall not exceed the limitation calculated with the following equation:

\[ Pt = \frac{1.09}{Q^{0.26}} \]

where:
- \( Pt \) = emission rate limit (lbs/MMBtu)
- \( Q \) = total source heat input capacity (MMBtu/hr)
  \[ = 1.80 \text{ MMBtu/hr} \]

Based on the capacity of the boiler, the PM limit is determined to be 0.93 lb/MMBtu. However, 326 IAC 6-2-4 states that if the maximum capacity is less than 10 MMBtu/hr, the limit shall in no case exceed 0.6 lb/MMBtu. Therefore the PM emission limit for the boiler shall be 0.6 lb PM/MMMBtu. Based on AP-42, the PM emission rate from the boiler is 0.0019 lb/MMMBtu; therefore, the boiler is able to comply with this rule.

(b) The two (2) natural gas-fired heaters, identified as H-3 and H-4, and the one (1) natural gas-fired air makeup unit, identified as AM-1 are not subject to 326 IAC 6-2 because they are not sources of indirect heating.

326 IAC 7-1.1 (Sulfur Dioxide Emission Limitations)
The natural gas-fired boiler, identified as BH-5, and the two (2) natural gas-fired heaters, identified as H-3 and H-4, each have the potential to emit less than 25 tons per year SO2; therefore, the requirements of 326 IAC 7-1.1-2 do not apply.
**State Rule Applicability – Mix Line #1 and SBF**

326 IAC 6-3-2 (Particulate Emission Limitations for Manufacturing Processes)

Pursuant to 326 IAC 6-3-2, particulate emissions from each of the following operations shall not exceed the pound per hour limits listed in the table below:

<table>
<thead>
<tr>
<th>Unit ID</th>
<th>Unit Description</th>
<th>Max. Throughput Rate (tons/hr)</th>
<th>Particulate Emission Limit (lbs/hr)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mix Line #1</td>
<td>mixer #s 6, 7, 8, and 10</td>
<td>0.46</td>
<td>2.44</td>
</tr>
<tr>
<td>Mix Line #1</td>
<td>one (1) 20 liter horizontal small batch mill and mixer</td>
<td>0.13</td>
<td>1.05</td>
</tr>
</tbody>
</table>

The pounds per hour limitations were calculated using the following equation:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

\[
E = 4.10 P^{0.67} \\
\text{where } E = \text{rate of emission in pounds per hour}; \\
P = \text{process weight rate in tons per hour}
\]

In order to comply with 326 IAC 6-3-2, the Cartridge Filter system (DC-1) shall be in operation at all times the pigment loading processes associated with Mix Line #1 are in operation.

326 IAC 8-1-6 (General Reduction Requirements for VOC Emissions)

The requirements of 326 IAC 8-1-6 are applicable to Mix Line #1 because Mix Line #1 was constructed after January 1, 1980, has a potential to emit VOCs greater than 25 tons per year, and there are no other rules in 326 IAC 8 applicable to this unit. However, the source has opted to limit the VOC from Mix Line #1 to less than 25 tons per year. Therefore, 326 IAC 8-1-6 does not apply. Pursuant to MSOP 141-15583-00196, issued on April 9, 2002, and as revised in this MSOP Renewal, the usage of VOC containing material loaded to Mix Line #1 shall be limited to 1,600 tons per twelve (12) consecutive month period with compliance determined at the end of each month, and the VOC emissions shall be limited to thirty (30) pounds per ton of VOC containing material.

**Recommendation**

The staff recommends to the Commissioner that the MSOP Renewal be approved. This recommendation is based on the following facts and conditions:

Unless otherwise stated, information used in this review was derived from the application and additional information submitted by the applicant.

An application for the purposes of this review was received on January 5, 2007.

**Conclusion**

The operation of this paint manufacturing and packaging operation shall be subject to the conditions of the attached MSOP Renewal No. 141-24162-00196.
**Potential to Emit PM/PM10**

* Assume all PM emissions equal PM10 emissions.
** See page 3 of this Appendix. The PTE of VOC for this operation is included as part of the confidential calculations completed in the original MSOP 141-15583-00196, issued on April 9, 2002.

**Methodology**

PTE of PM/PM10 After Control (lb/hr) = Outlet Grain Loading (gr/dscf) x Max. Air Flow Rate (scfm) x 60 min/hr x 1 lb/7000 gr
PTE of PM/PM10 After Control (ton/yr) = Outlet Grain Loading (gr/dscf) x Max. Air Flow Rate (scfm) x 60 min/hr x 1 lb/7000 gr x 8760 hr/yr x 1 ton/2000 lb
PTE of PM/PM10 Before Control (ton/yr) = PTE of PM/PM10 After Control (ton/yr) / (100% - Control Efficiency %)

<td>(1- % VOCs) * (1-Transfer efficiency) * (8760 hrs/yr) * (1 ton/2000 lbs)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**METHODOLOGY**

Potential VOC Tons per Year = Density (lb/gal) * Weight % VOCs * Gal of Material (gal/unit) * Maximum Usage (units/hr) * Weight % of process weight emitted * (8760 hr/yr) * (1 ton/2000 lbs)

Particulate Potential Tons per Year = (units/hour) * (gal/unit) * (lbs/gal) * (1- Weight % VOCs) *(1-Transfer efficiency) *(8760 hrs/yr) *(1 ton/2000 lbs)

HAP Potential to Emit (ton/yr) = Density (lb/gal) * Gal of Material (gal/unit) * Maximum Usage (units/hr) * % HAP * Weight % of process weight emitted * (1 ton/2000 lbs)
